The distinction of having installed the first municipal trap for the accommodation of the general public belongs to Spokane, Wash., the home of many sterling sportsmen. The trap is located in the Stadium, situated in the heart of the city, on the bank of the Spokane River, across from which is a railway embankment. It is open to the public at certain hours designated by the park officials, who have charge of the Stadium. The Spokane Gun Club has arranged to have a supply of targets available, and the official in charge of the Stadium can be relied upon to furnish trap boys and pullers. Shells can easily be obtained on account of the proximity of the trap to the business section of the city.

At the try-out shoot in September it was demonstrated that there was no danger from the operation of the trap or drawbacks so far as shooting was concerned. In the first 50-bird event there was one straight score, two of 49 and five of 48, proving that the background was satisfactory. Between 40 and 50 shooters took part in the event.

Much of the credit attached to the introduction of the municipal trap is due to Mayor C. A. Fleming, a zealous supporter of clean sport, and one of the smartest shots in the Northwest. Through his influence the park officials were induced to give the trap a trial, and as a result of the experiment they were won over to the Mayor's views. The convenience of the trap gives busy men who like to shoot an opportunity to indulge in their favorite pastime, and it promises to be a popular institution.

Seattle Association.—The twenty-first annual turkey shoot of the Seattle Trapshooters' Association was pulled off out on the club's grounds at Harbor Island on November 19 with a big bunch of satisfied shooters. Satisfied, because many of them had won their "turk" for the big Thanksgiving dinner and also from the good shooting and all-around good time.

Owing to the many ties in the squad shooting the program was terminated at the end of the ninth event, most of the shooters having shot many more targets than ordinarily shooting through a regular program.

Although the program called for ten 10-bird events, many of the contestants shot through the first fifty only. R. S. Searle, Hi Follerich and Ike Fisher, professional, stood high men at the end of the first fifty targets, they each totaling forty-seven. L. S. Barnes was in second position in the fifty bunch by shooting forty-six as a total.

In the ninety string L. H. Reid, professional, stood high score by shooting eighty-four. Hugh Fleming was the high amateur with a total of eighty-three. Fred Landwehr stood second to him by scoring 80.

The winners of "birds" found themselves handicapped two yards each time they repeated, the majority of them shooting most of the program from the 18-yard line, although several were placed on the 20-yard line distance and one shooter finished up on the 22-yard line.

Fred Landwehr left the grounds with two turks to the good, W. B. Taft one, R. S. Searle one, George Scripture two geese, H. S. Gibson one goose, A. H. Riehl, of Tacoma, two turkeys, Ralph Kinzer one turkey, W. J. Northfoss one goose, Jack Lewis one goose, C. W. Bandy one goose, Hi Follerich two turkeys, Dr. Newton two turkeys, L. S. Barnes one turkey, J. F. Hill two geese, A. B. Kidd one goose, John Ruppe one goose, Matt Grossman three turkeys and Deskin Reid one goose.

The day's program attracted many spectators to the grounds. One of the visiting shooters in the lineup was William Kuist, members of the Spokane Rod and Gun Club, of Spokane. The scores:

L. H. Reid* 86, Hugh Fleming 83, Fred Landwehr 80, Ralph Kinker 80, George Scripture 75, H. S. Gibson 74, W. B. Taft 70, Joe Bacher 61, C. W. Bandy 63, J. R. Gibson 51, A. B. Kidd 45, J. H. Hill 41, A. Riehl 50, R. S. Searle 47, Hi Follerich 47, Ike Fisher* 47, L. S. Barnes 46, D. Rhodes* 44, Matt Grossman 44, George Hambright* 42, Deskin Reid 41, Dr. Newton 39, W. J. Northfoss 38, F. J. Durdle 33, John Ruppe 30, Alvin Schwager 27, Jack Lewis 25, Douglas Huntington 15, William Kuist 14, Tom Wilkes 19, A. W. Mathis 15, J. W. Considine 13, Dr. Case 11.

(*Professional.)

Record of Trapshooting School.—Two hundred and thirty-six thousand four hundred and seventy-six targets were thrown and an equal number of shells were fired during the first six months of the Atlantic City Trapshooting Club of the Million Dollar Pier. The school was opened on March 27. The figures are to October 27.

The attendance during this period of time was 4870. Of this number 2353 men and 41 women had performed at the traps previously, while instruction was given to 2186 men and 290 women who had never before shot at the flying clays.

This is a remarkable record. The records show that 2476 new trapshooters were made. These people will continue to shoot and to progress and they will add others to the list by forming clubs or boosting the gun clubs at home. Trapshooting is a great sport for boosters.

Sportsmen's Row

The San Joaquin slough, beloved of widgeon and mallards, is playing to a full house, albeit several of the mid-week regulars preferred McCormick to the tin-whistle music of the mid-November birds. Capt. A. W. DuBray, the Parker prophet, dropped his ducks with the "Old Reliable" 32-inch long "twenty," and Orra E. Monnette took his first shoot of the season. The Klokke brothers, Stanley Anderson and John Birkholz, J. Aitken and Edwin L. Hedderly kept 'em moving—along or down—and took some heavy bags. Many teal were in evidence everywhere.

• • •

Those going to the mountains should take shells with heavy powder loads, not only because of the "punch" necessary to put out the big birds, but because the altitude and cold weather call for more "gas" to get the "mixture" of good shooting and clean killing right.

• • •

The mountain lake "cans" are far and away the best birds to be shot in Southern California at any time, and particularly this year. There is abundant feed of the kind they like and they are as fat as seals, sweet and delicious in flavor.

• • •

New York has sprung another new one in game protection. They are to have the game protectors employed by the State Conservation Commission in uniform. Few boys grow into men without a reasonable amount of fear and respect for the brass buttons and blue coat of the big policeman. It should be successful, even if expensive, and it will have the added merit of causing the game protector to be on the job at all times while in uniform.

• • •

There are 19,761 elk in the National Forest in Wyoming.

• • •

Statistics show that 70,000,000 animals are killed each year for their fur.

• • •

The man who over-shoots the limit robs millions of people. He is in the class with the fellow who cheats the customs or swears off his taxes—a small, contemptible thief.

• • •

Buckwood Farm, on the Jersey side of the Delaware Water Gap, one of the finest game preserves in the Eastern States, has been given to the State of New Jersey by C. C. Worthington. The Farm swarms with deer, rabbits, quail, wild duck, woodchuck and other birds. It comprises several thousand acres.

• • •

Bears have become so plentiful in the vicinity of Williamsport, Pa., that citizens several times lately have had to form posses to drive them into the mountains.

• • •

Wisconsin has become such a favorite place for wild game hunters that there is danger of all wild life being destroyed unless some changes in the laws are made, and the Wisconsin Game Commission is planning the changes now.

• • •

Hunters are glad to hunt hard all day in the East for half a dozen bobwhite quail and count it a good day when they get three brace; anything more is extraordinary. Yet here we find shooters complaining because they had to put in a day getting fifteen of the gamest little birds that fly. "Spoiled" is right!

• • •

Reports from the mountain lakes tell of splendid fishing, no trouble to get the limit. Parties from Little Bear brought back some fine twelve-inch fish and a few larger, saying anyone could catch them. Wonderful fishing is predicted for another year, with a normal winter.

• • •

Shooting generally in the Owens Valley has been little short of wonderful this fall. The valley is overrun with quail, and ducks are more plentiful than usual, as well as prime in condition, between Independence and Bishop; where the wheat stubbles give plenty of feed.

• • •

Reports from the Coachella Valley have it that the red-headed desert quail are getting wild from so much hunting, as the hunting licensees from the coast valleys have been taking full advantage of these long-legged lovers of the mesquite until quail are getting afraid to venture forth from the thorny scrub at all. Men used to their ways are getting them, however.

• • •

Duck shooting down Imperial way has been good all year. Mecca is, in fact, as well as in name, the rendezvous of the hunting licensees, who, by the way, are now known to be 27,000 strong from Los Angeles office sales by the Fish and Game Commission.

• • •

Eight mountain lions were killed in the state of California during the months of September and October. Three were killed in Kern county, two in Santa Barbara county, and one each in the counties of Tulare, Sonoma and Tuolumne. The state pays a bounty of $30 for each lion killed, as they are very destructive to the deer family.

Wade Strowger, the seven-year-old son of President A. W. Strowger of the Portland Gun Club, has the distinction of being one of the youngest, if not the youngest blue rock shooter in the country. Young Strowger has his own gun, a 28-gauge trap gun, and he takes his place at the traps like a veteran.

• • •

Fire recently destroyed the club house of the Swinomish Gun Club, one of the foremost hunting clubs in the state of Washington situated on the Skagit flats, near Whitney. The building was a total loss, although the greater part of the personal effects of the members, who are well-known Seattle residents, was saved. The loss will amount to more than $1,000, partly covered by insurance. Walter Melburn, keeper of the club house, with his wife and child, lived in the house. They saved almost all their effects, but could not save the building.

• • •

The San Luis Obispo (Cal.) Gun and Rod Club recently received ten cans containing about 1,000 striped bass, which were immediately taken and distributed in two streams. Messrs. Albert Martin and A. L. McCool placed six cans of the fish in the creek at Avilla, and David Andrews performed similar work in turning loose four cans full of fish at the mouth of Pismo Creek. The young bass were from three to five inches in length, and it is expected that within the next two years they will multiply and furnish some good fishing.—[Nemo, San Luis Obispo, Cal.

• • •

W. J. McKagney, a member of the San Jose Gun Club and one of the first Pacific Coast shooters to join the A. A. T. A., broke his first target in the A. A. T. A. medal contest on February 13, 1916. At that time Mr. McKagney's average, as shown by his record on registered targets, was 81.3%. On September 9th Mr. McKagney completed his last event in his competition for the 90% medal. His average, as indicated by his scores in his last medal series, was 92%, a net gain of 11% in seven months of actual shooting.

Anglers on Excursion.—Fifty-one Portland fishermen invaded the Nehalem country in quest of silversides on November 19th on a special train, but only those who found their way below the Nehalem falls were successful with the rod and reel.

Dr. E. C. McFarland, O. H. Reed and A. E. Burghduff each succeeded in landing three beauties apiece, one of the three landed by McFarland weighing 21½ pounds. W. E. Carlon pulled out two silversides. The honor of catching the biggest fish of the day was won by J. Budelman, who caught a 24-pounder.

The party as a whole would have had better success if it had gone farther down the Nehalem. Anglers who had fished there during the week previous were of the opinion that the best fishing would be above the falls at the junction of the Salmonberry, but such was not the case.

Another trip is being planned by O. H. Reed, who was in charge of the party. The special train was under the supervision of J. E. Hopgood. C. C. Jackson was the train's conductor and A. V. Jones was the engineer. The trip to Nehalem was made in four hours and ten minutes.

Those who made the trip were: Dr. E. C. McFarland, E. A. Burghduff, W. E. Carlon, O. H. Reed, J. D. Asher, N. Berlent, W. C. Allen, C. Gault, Matson, E. W. Brewer, McClane, Adams, J. E. Nelson, W. Collins, W. I. Terry, P. P. Fadden, A. Moulton, J. H. Moulton, Jack Kearney, F. A. Downs, F. T. Boulton, B. A. Garrett, H. Kerble, A. H. Dellar, E. Fisher, A. Fisher, L. Broda, G. P. Garrigans, H. E. Mead, V. C. Lumpkin, W. L. Kinser, Jack Lane, J. E. Brown, E. T. Valleant, W. Cornell, W. J. Clarke, A. D. Little, N. R. Cox, P. Kildoon, Dr. Knoder, W. Burke, Jack Herman, A. Palough, J. Hanebunt, Jim Miller, W. P. Kaiser, Hammack, L. Curry, R. A. Chapin, J. Budelman and R. A. Thoris.

Deer Driven with Cows.—Hot Springs.—Mrs. Duncan and Mrs. McDonald certainly beat the hunters of this vicinity when they captured a deer this morning by driving it into their barn together with a cow and calf.

When they first discovered the deer quietly feeding with the stock, they were going to shoot it, but it looked so pretty their courage failed them, and they thought of catching it with a rope, but found it too shy for that.

They then thought of driving it into the barn with the cow and calf, and after considerable maneuvering on their part the feat was accomplished and the women naturally feel very much elated over their prize and are contemplating going into the business of catching large game, as bear and mountain lion are quite numerous.

Squirrels Overrun Golf Links.—Sacramento is having difficulty in keeping the municipal golf links at Del Paso Park in playing condition on account of the numerous squirrels infesting the land included in the course.

The rodents burrow their holes through the greens and along the fairways so that it keeps the park workmen busy killing them. Suffocation is being tried successfully and it is believed that within a short time the pests will have been driven from the links.

HOW TO ATTRACT THE BIRDS OF THE N. W.

Government Sets Forth Ways to Encourage Feathered Wild Life.

Washington, D. C.—Lovers of birds in the northwestern portion of the United States who wish to attract the feathered wild creatures to live and nest about their homes may receive valuable suggestions as to methods of protection, feeding, and the provision of nesting places from Farmers' Bulletin 760, recently issued by the U. S. Department of Agriculture. The publication relates to Washington, Oregon, Ndaho, Northern California, and the western half of Montana, and is the second of a series of bulletins suggesting methods of attracting birds in various sections of the country.

One of the first steps a householder must take if he wishes to attract feathered wild life about his place is to provide protection from natural foes, especially cats. If a complete bird sanctuary is to be created, the area set apart for this purpose should be inclosed by a vermin-proof fence which can neither be dug under nor climbed. The principal feature of such a barrier is a top curved outward or bent outward at right angles. If the construction of such a fence is impracticable, a more limited protection may be supplied by placing guards on trees to prevent cats and other animals from climbing them. Sheet metal cuffs, completely encircling the tree, or cones of like material, fitting tightly at the upper edge and flaring downward, will serve the purpose.

Another essential is to furnish breeding places. Close-growing shrubs make excellent sites for nests. They should be trimmed back severely when young to produce numerous crotches. Bird houses also should be placed about the home for the species which will use such nesting places, but care should be taken that too many such houses are not furnished. As a rule, birds do not like being crowded. If breeding places are to be provided for ground-nesting birds, such as bobolinks, meadowlarks and bobwhites, grass should be allowed to grow thickly and long in appropriate locations.

For all birds some sort of bathing and drinking pools should be furnished. These may be either on the ground or raised and may be of pottery, stone, metal, or cement. Both the edges and bottoms should be somewhat rough. The water receptacle should be shallow and should slope up gradually toward the edge.

The vital factor in attracting birds is the food supply. This may be furnished either by providing artificial food such as crumbs, suet, chopped nuts, and the like, or by planting trees, shrubs, and herbs which will produce fruits or seeds that the birds themselves may gather. Winter feeding is the most familiar phase of bird feeding but there is no reason why birds should not be attracted throughout the year by a supply of food.

For artificial feeding the biologists of the U. S. Department of Agriculture suggest the use of several devices. A food shelf may be placed against the side of the house near a window, or a food tray may be fixed to the top of a post. An excellent food receptacle may be made by cutting a hole in a cocoanut and stuffing the shell full of chopped suet and nuts or some other food mixture. The shell can be hung from a limb. Holes bored in pieces of thick lumber may be used instead of a cavity in a cocoanut. Feeding hoppers like those used for poultry may be employed for birds on food shelves or on the ground. A wooden house open on one side, mounted on a pivot, and provided with vanes to keep the open side away from the wind also may be used as a feeding place.

If it is desired to feed the birds naturally, there are a number of plants that may be grown which will be ornamental and, at the same time, will furnish good provender for the feathered guests. For seed-eating birds in the Northwest the list suggested by the Department of Agriculture includes prince's feather, love-lies-bleeding, asters, Calandrinias, blessed thistle, Centaureas, California poppies, sunflowers, tarweed, forget-me-nots, Polygonum orientale, P. sachalinese, portulaca, Silene, and sugar cane. Other seed-bearing small plants that may be grown are the various millets, Canary grass, and the various species of Pennisetum. Among the trees bearing seeds relished by birds are the alders and birches. The redpolls, siskins, and golfinches are particularly fond of these tree seeds during the winter. Ashes and box elders furnish seed relished by evening grosbeaks, while larches and pines and other conifers are attractive to crossbills as well as to some of the species just mentioned.

The fruit-eating birds may be attracted in great numbers by planting fruit-bearing shrubs and trees. The best of the long-persisting fruits in the Northwest are juniper, bayberry, thorn apples and related fruits, holly, and snow-berry. A large number of other fruit-bearing plants are listed in the bulletin already mentioned, and the period of fruiting of each is shown on a chart. One of the advantages of planting wild fruit-bearing trees and shrubs, it is pointed out, is that the birds are fonder of these than of the cultivated fruits, and the latter, therefore, will be protected.

Copies of the bulletin may be had free on application to the U. S. Department of Agriculture as long as the department's supply lasts.

FISHING SEASON IS OVER.

Southern Part of State Enjoyed Best Angling Sport of Many Years.

Los Angeles, Cal.—The biggest and best trouting season Southern California sportsmanship ever saw ended Thursday, which well might be made a "Thanksgiving Day" by the angling lincensees as well as everyone else.

With returns for the season's sales practically completed so far as the Fish and Game Commission's southern office is concerned, it is now known that 21,734 anglers paid a dollar or more to exercise the privilege, this total falling far short of the aggregate in this end of the State, as county clerks sold quite a few to individuals, and to dealers who had not learned how to get 10 per cent commission for their work in retailing, by going to the State Board.

The fishing in Bear Lake was the best ever, and the splendid rainbow trout there averaged larger even than heretofore. At the wind-up, a couple of them will make a limit, and three of the average size are quite sure to aggregate the "ten pounds and one fish" allotted by law.

Bear Lake was of course the biggest fishing feature of the season as it is every season, but the early and late sport in Little Bear was and is good, while fly-casting on the streams has been better the last three months than in all the preceding period, the fish bigger, fatter and readier to rise, yet comparatively few sought them. It is always thus; the dyed-in-the-wool fly-fisherman waits until most get off the stream, and then hits 'em where the other fellow isn't. The mountain lakes were the only waters that were consistently played from start to finish.

It was not a particularly brilliant season in sea angling in any branch, and some are now beginning to wonder if protective legislation ever can accomplish much for the wandering tribes of the high seas as compared to what has been done in fresh water by conservation measures.

Surf-fishing was poor most of the summer, although it started brilliantly enough and for a time gave promise of old times. Then the corbina left, or went off feed, bad tides and currents set in. The fishing slowed down to discouraging. Yet some enormous catches were made in the forepart of the summer.

One unfavorable condition not to be met by legislation or any other human intervention, is the coldness of the water in the channel, which according to numerous reports was as much as 12 degrees below normal throughout the summer. This may have had much to do with the cool season, and is ascribed to an unaccountable shift of the Japanese black-stream current.

A feature of the angling season developed in the considerable sport enjoyed by bass fishermen in the city reservoirs and other waters stocked by the city or the Fish and Game Commission and artificially created angling was popular enough so that considerable pressure was brought to urge the city fathers to allow rodsters to raid the baby bass under an unfortunate law opening the season during spawning time, but on representation from the Fish and Game Commission that this was the case, the city protected the bass.

An experiment conducted by the Fish and Game Commission in transplanting striped bass from the proverbially favorable environment of San Francisco Bay to the southern tidal lagoons of brackish waters is being watched with interest by alongshore anglers, who see in it a most welcome possibility of addition of the greatest of the surf game fishes to their inducements toward the beach sport.

September produced some splendid trolling alongshore off the coast cities, many yellowtail being caught, and some still are in evidence, although it is late; their scarcity about the islands was unusual and evident. Good swordfishing in spots was a late feature. The tuna season was a failure.

Another season may change everything as regards sea angling, owing to the drifting nature of the fish, albacore canneries having expert testimony to offer regarding the lateness of the run upon which the tuna pack depends. With an average winter, improved trout fishing is to be expected throughout next season; the Bear Lake trout will be even bigger, and this year they were more than equal to most of the tackle employed for their capture. By another spring the anglers will be up against two-fish limits; the only objection to which is that a good day is too soon done. The smaller rainbow will be coming along, however, and probably they will be biting at times when the larger fish are not, thus adding variety t othe sport.

Ducks vs. Rice Argument.—Two thousand kernels of rice, mailed to the California Fish and Game Commission by U. M. Damon of Oroville and labeled "From one mallard duck, killed here November 19," furnished a cynical protest against the game laws which prevent a farmer from "saving" his crops from the "depredations" of the webfoots. The package brought out a statement from J. S. Hunter, acting executive official of the commission.

"The rice is the fallen grain," he says. "The duck naturally feeds on the ground or the surface of the water and eats what is fallen. He cannot reach the tops of the high stalk Sacramento valley rice.

"In this the duck does more good than harm, as he helps keep the crops from growing wild, which ruins many a field and spoils the quality of the crop. The farmer who understands these things does not howl at the game laws, but knows the ducks as a blessing." —S. F. Call.

Game Expert Drops Dead.—The California Fish and Game Commission has suffered the loss of another popular and efficient member through the sudden death on Sunday of John P. Fisher, game expert in charge of the license department of the San Francisco office. He was hunting at Los Banos in Merced county and dropped dead from heart failure. Fisher was born in San Francisco and was 51 years of age. His parents moved to Greenwood, El Dorado county, when he was a child. He grew to manhood in that county. For several years he did clerical work for different firms and was finally appointed deputy under County Clerk Bosquit. About twenty years ago he ran for the office and was elected, serving two terms.

After leaving public life he became bookkeeper for the C. A. Smith Timber Company of Pino Grande, El Dorado county. For the last two years he had been in the License Department of the State Fish and Game Commission, in San Francisco. His only son, Wesley, was killed in an accident in San Francisco a year ago. Fisher's remains have been interred at Placerville.

Report on Inyo Hatchery.—W. H. Shebley, in charge of the department of fish culture of the Fish and Game Commission, has just returned from inspecting the work on the new Inyo Hatchery. He reports that the engineers will have the first unit of buildings completed by the first of the year and then the hatchery equipment will be installed and plans outlined for commencing hatchery operations.

The Inyo hatchery is pronounced by Shebley as the last word in hatcheries. Besides being the most modern in the world, it will be one of the largest when all the plans are carried through. Work of repairing the Bear Valley hatchery has also started. All told, Shebley was pleased with the hatchery operations in Southern California.

Vernon Club.—Numerous tie scores resulted in the annual turkey shoot held Sunday morning at the Vernon Gun Club. Contenders fired in 15-bird events from handicaps. Every shooter to win a turkey, if he continued to shoot, was handicapped two more yards.

Stan Bruner, Tuckett and Lew Mellus tied in the first event, each with 15x15. They shot off at ten birds, Mellus breaking 10x10 to Tuckett and Bruner's 9x10. Mellus won a turkey in the second event with a 15x15 score. The fourth turkey was captured by Bruner with a 15x15 score.

Bob Bole and C. E. Groat tied for the fifth bird, each with 14x15. Bole won in the shoot-off. George Melford won the sixth turkey placed up, with a score of 15x15. The last two turkeys put up were won by Bruner, the first with 14x15 from 20 yards, and the last with 13x15 from 23 yards. The competition was taken part in by 20 shooters.

Country Model Best.—In the final judging of the Southern California Kennel Club show, Champion Country Model, an English bull, owned by Antone Korbel of San Francisco, was adjudged the best dog of any breed in the show.

Champion Bellmore Buffkins, Cocker Spaniel, owned by Mrs. Frank Connors of Pasadena, was adjudged the best dog of opposite sex in the show.

Cragwood Ben Barry, a St. Bernard entered by Miss C. B. Trask, won the trophy awarded the best conditioned dog exhibited.

Hunter Conquers Lioness.—One man and three dogs made short work of the period of freedom granted one female mountain lion in the woods near Sacramento on Sunday, and although the lioness was given 200 yards head start, she was captured within a short time. M. Bakker, the Montana hunter, who directed the dogs, climbed a live oak tree and roped the animal. As the tree was wet from the morning's rain the task was rather a difficult one. The animal was held in the tree by the three dogs, who barked and jumped at it from below. A fair sized crowd of Sacramento sportsmen watched the performance.

Originally the lion was to be turned loose to test the ability of several Placer county dogs to follow a lion trail without digressing for a trail of some other species of wild animal. However, none of the Placer owners or their animals put in an appearance, so Bakker chose three of his own animals and turned the lioness loose for exhibition purposes.

Instead of making a trail for the distant woods, the animal climbed a tree in the immediate vicinity of the point where she was set loose. The dogs, released at the same time the lioness was set free, reached the tree a little after the wild animal, and kept her there. She went out on an extended limb, with Bakker in pursuit, and he succeeded in roping her without much effort.

Specimens of the strange blind fish, which are spouted intermittently from an artesian well in the Spa district south of Tulare, have been sent to Professor Kofoid of the department of zoology of the University of California, who will make a study of them in an attempt at their classification. Specimens are also to be sent to Stanford University.

Largest Buffalo Herd.—In the Canadian National Park at Wainwright, Alberta (on the Grand Trunk Line between Winnipeg and Edmonton) is the world's largest buffalo herd—some 2,077. Once upon a time buffalo flourished in America, today every single one can be counted.

The Canadian herd was begun in 1873 with four bison calves, two bulls and two heifers. In 1884 the number was 13, and the owners sold them to the Canadian Government for a price said to be around $300 each. The herd was transferred to the National Park and a careful watch has been kept over it since.

The National Park covers an area of 160 square miles.

Dog Goes to School.—"Billy" is a dog that goes to school every day. His mistress teaches a second grade in one of the schools of Riverside and though Billy is twelve years old and though he understands many things he stays in the same grade year after year. The children think it a great joke that he has never been promoted. Everybody is very kind to him and when the city superintendent visits the school he always has a friendly pat for the school dog.

Sometimes Billy gets tired of lying in the corner listening to the children read and spell. Then he walks down town to call on some of his many friends but he rarely fails to come back to school in time to get the scraps from the children's lunches at noon.

Age Limits for Hunting.—With the general adoption of the license system has come the necessity of fixing a minimum age at which licenses may be issued. The practice is by no means uniform, but about half of the States have restrictions of some sort. These restrictions are of three general kinds:

(1) Exemption from the hunting lincense requirement for children;

(2) Refusal to issue licenses to children; and

(3) Requirement that children must have the written consent of the parent or guardian to obtain a license.

Children under 12 are not required to have a license in Idaho or Utah; under 14 in Montana, Nevada, Oklahoma or Oregon; under 17 (hunting small game) in Michigan; under 21 (hunting small game) in Minnesota. Children under 13 in New Hampshire and Nebraska and under 17 in Arizona do not require a license when hunting with a licensed adult.

New Jersey prohibits children under 10 from hunting with firearms, but upon application of a parent or guardian issues a $1 license to citizens of the United States between the ages of 10 and 14, provided they hunt in company with a licensed adult.

Pennsylvania also prohibits children under 14 from hunting, but issues licenses to minors between the ages of 14 and 16 upon application of parent or guardian.

Licenses are not issued to children under certain ages, or only upon written consent of the parent or guardian, in the following States:

Not issued under certain age—New Jersey, 10, Pennsylvania 14, Wyoming (for birds) 14, Wyoming (big game) 15, Rhode Island 15, Wisconsin 15, Connecticut 16, New Brunswick (big game), 16.

Written consent required: Age—Indiana 14, West Virginia 15, Pennsylvania 14 to 16, Ohio 16, Vermont 16, British Columbia 16, Saskatchewan 18, Iowa 18, New Hampshire 18.

Trade Notes.—R. P. DeMund, T. L. Edens and H. P. DeMund were "one, two, three" with 522, 512 and 502 out of 570 targets respectively at the Arizona State shoot recently held at Phoenix. All three used the "perfect combination," Remington UMC pump gun and Nitro Club shells.

At the Beideman Shooting Association meet held at Camden, N. J., ex-Judge H. Voorhees, Camden, broke 96x100 using Nitro Club shells. "Chief" Bender, Philadelphia, made second high score with 91x100 using Remington UMC pump gun and Nitro Club shells. Third man was W. Edson, of the Quaker City, with 84x100. He used Remington UMC ammunition. Many municipal officials including members of the police bureau are members of this organization.

W. H. Gooderham, Toronto, carried off honors at the Manor Farm Gun Club shoot, Clarkson, Ontario, with a score of 90x100. W. H. Joselin, Scarboro, broke 89x100 and H. Winters, Toronto, 88x100. All three used Nitro Club shells.

Charlie Nichols was high man at the Charlotte, N. C., Gun Club shoot, breaking 91x100. C. E. Webber and Dr. Coles took second and third honors with 88x100 and 83x100 respectively. All shooters used Nitro Club shells.

Close Matches at Greenhill Traps.—Wilmington, Del.—Nine shooters turned out at the Greenhill Club Saturday afternoon, Nov. 18. Jenks was high man, breaking 47x50. In the first class H. B. Hansborough, R. Bonsall and Dr. McElfatrick tied for the first pipe and in the shoot-off at five birds, Hansborough won with three breaks against one for Bonsall and one for McElfatrick.

In the second class Miss Hammond won a pipe, but as she had no immediate use for it she put it up again and it was shot for in a five-bird event, with the following rssult: Miss A. Schofield 3, W. C. Lynch 4, H. B. Hansborough 2, H. A. Lynch 2, Dr. McElfatrick 2, R. Bonsall 5. Bonsall broke them all and won the pipe.

In the third class the prize was a leather wallet and was tied for by Miss Schofield, W. C. Lynch and C. O. Lynch. The latter then broke 4x5 and was declared the winner.

Stock Breeders' Page

THE CHILD'S SHETLAND PONY.

The Shetland pony has come into widespread prominence as a pet for children. Today few large estates are to be found where the little folks of the family are not provided with one or more of these diminutive animals for riding and driving. There is something about these lovable little horses that appeals at once to children, and it would indeed be a strange boy or girl whose heart did not warm towards the shaggy "Shelties." Children are born with an instinctive longing for some particular object on which to lavish their affection and care. Sometimes this takes the form of a doll or favorite toy; again some childish hobby may be found to supply the lack; but in nine cases out of ten it is a live pet that the child really wants, one that can be taught tricks and played with, a companion in his frolics. It is in such a capacity that the pony is useful, for he is a truly ideal comrade.

For children's use the Shetland pony is unquestionably the universal favorite. The chief reason for this lies in the never-failing good humor and docility which are so characteristic of the breed as a whole. Find him where you will, the "Sheltie" is invariably patient and cheerful, and his wonderful tractability makes it possible for even the tiniest tots to handle him with perfect safety. The "Sheltie's" diminutive size is another point in his favor. A pet which can be cared for by the children themselves is sure to prove more interesting than one which must be entrusted to others, and for this reason a pony suited to their size is preferable to a large one. Half the fun of owning a pony lies in being able to harness or saddle it at a moment's notice without being obliged a wait for an older person's help. With a Shetland this is always possible. No registered pony measures more than 46 inches in height at maturity, and any child who is old enough to drive can easily reach to harness his pony.

Best of all the Shetland's good qualities, however, is his natural love for children. The ponies seem to know instinctively that the little folks are their masters and they will allow them to do almost anything. In fact, it has been noticed that these little animals are more readily managed by children than by grown-ups, and even when they are being imposed upon they never seem to forget that the little folks have been entrusted to their care and must not be harmed. Playfulness is an essential part of the "Sheltie's" make-up and a young pony is as fond of a frolic among his companions or a romp with the children as a big dog, although even in fun he is gentle and takes good care not to hurt his little playmates. Nor is this the only way in which the pony reminds one of a pet dog. On one large country estate where several Shetlands are kept, the affectionate little beasts have become so attached to their young masters that they will follow the children anywhere on the place, quite as a dog might follow his master. Throughout the summer months the boys are their constant companions and many are the good times they have together. Each shaggy little fellow has his own particular name to which he responds as readily as do the boys themselves, and never was there truer comradeship and affection than exists between these children and their knowing little four-footed chums.

With trustful, appealing natures concealed beneath their shaggy coats, it is small wonder that the hardy little Shetlands are beloved by old and young alike. If properly broken and cared for, they can be trusted to take the children anywhere in safety, and the possibilities for pleasure which they bring their little owners is unlimited. With a willing little steed at their disposal, boys and girls will not fail to find plenty of healthful outdoor exercise. Drives and brisk horseback canters will become everyday occurrences, and as a result color and animation will return to the pale, listless child and frail bodies will thrive and grow strong in the bright sunshine and pure air of the great out-of-doors. Some physicians have even gone so far as to attribute to the pony, and to the horse as well, a certain animal magnetism which they claim is one of the strongest possible safeguards against sickness. Transmitted to a child through personal contact in riding and handling a pony, this strange influence is said to be most beneficial in promoting good health. How much truth there is in this particular theory cannot be positively estimated, but certain it is that no pet could possibly afford its young owners more wholesome recreation or greater enjoyment than the universally popular "Sheltie."—[Mary H. Northend, Breeder's Gazette.

Spencer Borden, the prominent Fall River (Mass.) breeder of Arabians, has bought an estate at Woodstock, Vt., for the purpose of developing his Morgan horse stable.

◈ ◈ ◈

After the National Dairy Show a representative of the Japanese government who was in attendance upon that exhibition visited the herd of Stevens Bros. Co, Liverpool, N. Y., and selected a Holstein-Friesian bull by King of the Pontiacs for exportation to the land of cherry blossoms.

Another Good Ayrshire Record.

The two extremes of the United States are demonstrating the efficiency of the Ayrshire cow as a producer of milk and butter-fat. The state of Washington is the latest to boost the efficiency of "The Perfect Cow" in the announcement of the official yearly record just completed by Ryanogue Hattie, a mature cow, which produced 17,214 lbs. of milk, containing 806.91 lbs. of butter-fat, 941 lbs. of butter. This animal was bred by John Logan, Howick, Quebec, and imported by P. Ryan, Brewster, N. Y., and is at present owned by J. W. Clise, Redmond, Washington.

Two months ago New York State, on the opposite side of the continent, gave the Ayrshire an impetus by giving to the world a new Ayrshire senior three-year-old record, Jean Armour 3rd, owned by W. P. Schanck, Avon, N. Y., producing under official test 21,938 lbs. of milk, containing 859.65 lbs. of butter-fat, her record being exceeded by only one cow of another breed when reckoned by points including both milk and fat.

These records but prove that the Ayrshire, in adapting herself to all conditions of climate and environment, is gradually but surely coming to her own.

◈ ◈ ◈

A strong feature of the National Western Stock Show, to be held in Denver, Colo., Jan. 20th to 27th, will be the Hereford futurity under the direction of the Western Hereford Breeders' Association. There have been nearly 100 entries in these classes, limited entirely to western breeders. When the Denver show was launched 10 years ago there was not a breeder of any consequence in the Rocky Mountain section. It is expected that at the next show between 30 and 40 western breeders will exhibit.

◈ ◈ ◈

Charles F. Singmaster, senior member of the firm which for so many years has been prominent in the Percheron breeding and importing trade at Keota, Ia., died on Nov. 15th, aged 84 years. He was born in Pennsylvania and accompanied his parents to Iowa in 1844.

◈ ◈ ◈

The Hagmeister Stock Farm Percherons were sold at Administrator's Sale at Bellevue, Wisconsin, Nov. 15th. The thermometer stood at but two degrees above zero during the sale. The 32 mares and fillies sold for an average of $343, and the 11 stallions, ranging from suckers to the eleven-year-old Brilliant, averaged $290. Eleven of the best broodmares averaged $400 with the highest price at $580. The highest priced stallion was Pompey, a son of Historique out of a Baccarat dam, which was sold at $500. The senior stud sire Brilliant brought $400, and $410 was received for the four-year-old stallion McDougal, by True Blue and out of Petrel by Baccarat.

DRY MASH FEEDING FOR POULTRY.

The use of dry mash, fed in suitable receptacles, is especial recommended for sanitary reasons. Dry food hoppers hung along the wall or placed on a platform above the floor where the droppings and litter cannot get into the food, and so arranged that the fowls cannot perch on them, protects the food from contamination. Furthermore, this fine, dry food is unfavorable to the existence and development of disease germs that are often present and may easily spread through the flock where wet mash is fed and general unsanitary conditions prevail.

The dry mash feeding is the natural method. When eaten dry, the food is digested naturally and the process of digestion begins where it should begin—in the mouth. Nature has provided salivary glands at the base of the tongue for moistening food before it passes into the crop. When the food is "gobbled" down, as wet food generally is, this moistening process by the salivary glands does not take place, in which case the crop, gizzard and intestines of the birds have to take up the work of moistening and mixing the food before they can proceed with their own work. In other words, by compelling fowls to eat slowly and naturally they derive more nutriment from their food and they are not as likely to get indigestion.

The necessity for a well balanced ration is appreciated by most feeders. Such a ration is one in which all the different food elements are combined in correct proportion so that they will supply the necessary nutriment to the fowl in order to maintain perfect health and condition under all circumstances. Laying hens require comparatively rich food which is easily digestible, and one that supplies the elements which are contained in egg formation in large quantities. The difficult computation involved in securing the correct combinations for a perfectly balanced ration make it necessary for the average poultryman to feed more or less by guesswork. The poultryman who feeds in this way must be governed by experience and all we can do is to give the general principles of feeding as a guide.

But it may be stated that mash feeds are safe and natural, and are generally composed of bran, middlings, corn, gluten, oats, meat scrap and clover.

Wheat bran is indispensable. It is used as the foundation for nearly all mashes, either wet or dry. It carries a comparatively high percentage of coarse, woody material, and its digestibility is comparatively low. It supplies certain elements, however, which cannot conveniently be secured in any other way, being particularly rich in mineral matter, and it also has a tonic effect which gives it added value. Corn meal, wheat middlings, buckwheat middlings, gluten feed, ground oats and oil meal are all used in various proportions.

THE COMPOST BIN IN THE HOME GARDEN.

Make the bin of cement or redwood plank not less than three feet wide, six feet long and three feet deep, with partition. The purpose of the partition is to allow one part of the compost to be used out while the other part is being prepared. More than two compartments mad be made. Set low in the soil.

How to Make Compost. — Spread fresh manure of any kind available on bottom six inches deep. Over this an inch of ground phosphate rock or acid phosphate is spread. Moisten well, but have no unabsorbed water. Continue this process layer after layer. Along with the manure one may use green leaves, grass, vegetable tops, weeds and garden refuse of all kinds. Ashes may be used to good advantage, about an inch of ashes to twelve inches of compost. It is well to use some air-slaked lime, one-half inch to 12

G. & C. MERRIAM CO., Springfield, Mass.

inches of compost. The ashes and lime do not take the place of acid phosphate or phosphate rock, but they are valuable, especially when the phosphate is unavailable, and they may be used along with the phosphate. Many home gardeners have chickens and rabbits, and have learned that the fresh manure cannot be used with safety around growing plants. This compost bin is just the place to prepare the manure so that it can be used at any time.

Prevent Heating.—Keep the compost well stirred and always moist, but with no unabsorbed water. If this is done there will be no loss of gases and valuable material by heating or fire-fanging. The moisture prevents heating. It is well to throw in a few inches of good loam now and then to absorb phosphates, ammonia, etc. Collect falling leaves from all deciduous trees to make leaf mold in the compost. For best leaf mold, use only leaves, phosphate rock or acid phosphate and loam. Avoid such oily leaves as eucalyptus and pepper. If you are a city gardener and you will welcome the opportunity to get street sweepings, use caution in sorting what you get. Compost properly cared for should be ready to use in from sixty to ninety days.

Advantages of Compost.—By a compost bin, a gardener, trucker or florist is able to multiply his available fertilizer many fold. Almost anything of animal or vegetable origin is valuable as fertilizer if put in proper form. A dead chicken or dead rabbit is far from all loss when decomposed in the compost. There need be no unpleasant odors, and will be none if the gases are properly absorbed with the ground phosphate, loam, ashes, lime, etc. It is very wasteful to let vegetable matter dry up and the best values evaporate, or to burn it when dry. There is saved in the ashes only a small proportion of the fertilizing materials. A great advantage of composting is that it permits the soil to be growing something all the time instead of lying idle while an application of fresh manure is decomposing. It is not so valuable for large areas, because of the cost and labor, as it is for the small gardener and florist.

Surely every gardener should have a compost bin!

Buy A McMurray!

The Real Lady (2) t. 2:04¼, world's champion two-year-old, established two new world's records the first time hitched to the New McMurray Sulky.

Every race record of two minutes or better in 1916 was made to the new McMurray Sulky.

The Golden Anniversary Catalogue shows the complete line of McMurray "Easy Riding" Jog Carts in which horse action is absorbed into the springs—The Model 80 "Flyer," the last word in a training cart—The New Model 44 "Featherweight" Racer for racing, training or Matinee driving, and is gladly mailed free.

Remember, McMurrays build Sulkies and Carts exclusively. Their mechanics are specially trained, and by devoting their entire time to one line, are better able to furnish a first quality article at lowest cost.

Let McMurrays tell you what they can do for you.

FARMS FOR SALE

Choice Land In Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Turn Your Hand Trap Stunts Into Dollars

TELL us your "stunts" with the Hand Trap at camp, picnic parties, aboard motor craft, in the woods and fields, at the shooting club's joker trap, or any place where the Hand Trap has given amusement, instruction and experience to yourself and friends.

We Will Pay Cash for Illustrated Stories

For the best descriptive story of the most novel and practical Hand Trap experience accompanied by at least three group photographs of actions described, (containing more than one person) we will pay a first prize of $15.00; a second prize of $10.00; two prizes of $7.50; five prizes of $5.00 each; FIFTEEN PRIZES of $2.50 in CASH.

ALL STORIES AND PICTURES MUST BE SENT BEFORE DECEMBER 1, 1916

For desirable pictures, (publication rights released to us) accompanying stories not accepted, we will pay ONE DOLLAR on receipt of film.

IF YOU HAVEN'T A HAND TRAP RENT ONE OF YOUR DEALER when you buy your shells and targets.

Get your ideas "rounded-up,"—plan your exposures and let your camera earn a few dollars.

No restrictions as to age or sex of contestants or number of stories and photographic groups submitted, but prefer stories not over 600 words.

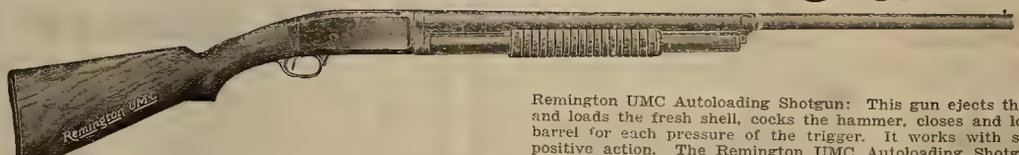
WINCHESTER

"LEADER" AND "REPEATER" SHELLS



For the high flyers and the low flyers Winchester "Leader" and "Repeater" shells have the reach, pattern and penetration. Their patented construction and uniform loading make them by far the best shells on the market. In proof of this we point to their unequalled winnings at the traps this year, including the Grand American Handicap. Such shells insure a good bag in the field. Get a box or two for your next day a-hunting and try them out for yourself.

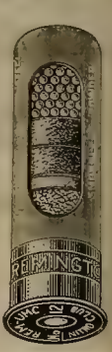
THE W BRAND WILL IMPROVE YOUR SHOOTING.

REMINGTON UMC

Critical Sportsmen Choose Remington UMC

REMINGTON UMC

Every day thousands of sportsmen, critical in their selection of firearms, are proving the superiority of Remington UMC Pump and Autoloading Shotguns at the traps and in the field. The perfect balance, easy operation and positive action of these famous guns have popularized them among the men who are in a position to speak from long and varied experience.



Remington UMC Pump Gun: The bottom ejection principle—an exclusive Remington UMC feature—contributes to safety, accuracy and convenience. Ejected shells are kept away from the face of the shooter and from interfering with his aim. The solid breech, hammerless and easy take-down features combine to make the Remington UMC Pump Gun a favorite sporting arm. The magazine holds six shells.

Remington UMC Autoloading Shotgun: This gun ejects the empty and loads the fresh shell, cocks the hammer, closes and locks the barrel for each pressure of the trigger. It works with sure and positive action. The Remington UMC Autoloading Shotgun possesses the usual Remington UMC solid breech, hammerless and easy take-down features. The magazine holds five shells. You press the trigger once for each shot.

A great majority of the champion shots of the country shoot either a Remington UMC shotgun or Remington UMC "Speed Shells" or both. The men who are jealous of their shooting records — many of them among the crack shots of the sporting world—rely upon Remington UMC to do full justice to their shooting skill. The dependability of Remington UMC shotguns and "Speed Shells" — Arrow and Nitro Club — makes Remington UMC a by-word among the sportsmen who **know.**

Look for the Sportsmen's Headquarters Sign of Remington UMC on your dealer's store.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

THE COMPLAINTS that have and are being made by horsemen in regard to the condition of the Dublin boulevard, in Alameda county, lead to the conclusion that the Supervisors of that county have put one over on the State Highway Commission. The slippery condition of the boulevard, during the rainy weather, as reported in the columns of the Breeder and Sportsman by Dr. Cecil Corwin of Hayward some weeks ago, finally resulted in that gentleman making a written complaint to the Alameda Supervisors, who in turn referred the complaint to the State Highway Commission. Mr. A. B. Fletcher, the Highway Engineer, has now replied to Dr. Corwin's letter as follows:

Mr. Cecil Corwin, Hayward, Cal.

Dear Sir:—Mr. Gross, county clerk of Alameda county, has sent to this Commission your letter of October 25 addressed to the Board of Supervisors of Alameda county, calling attention to the slippery condition of the Dublin Boulevard, Road IV, Ala-5-B, for horses.

I wish I could tell you definitely of the plans of the Commission concerning the Dublin Boulevard.

This road, as you know, was taken over as a State Highway by the Commission last year and the State is now responsible for its maintenance. It is a very serious problem; Alameda county has already spent on this road for its construction something more than $30,000 per mile. It is not in good repair, its maintenance is costly, there are bad curves and grades in the road, and as you state, the crown is excessive. Much of the slipperiness, so far as the horses are concerned, is due to the high crown.

The problem which the Commission has before it is whether it is better to try to maintain the road in its present condition and pay the high maintenance costs or to rebuild the road, lessening the grades and curvatures, and repaving it. It will probably be some months before this matter is determined, but I wish to assure you that the Commission is not unappreciative of the deficiencies to which you call attention. Yours very truly,

A. B. FLETCHER,
Highway Engineer.

From the above it would seem that the State Highway Commission has been induced to accept a road that although costing $30,000 per mile has not been properly built, but that the Commission intends putting it in proper shape as soon as possible. If that Dublin road cost thirty thousand dollars per mile, there must have been a big profit in the job for somebody. When it was first opened there was much hurrah advertising by the automobile agencies over its many fine features, but it seems that it was not built to last, and when the Supervisors of Alameda county lifted it over into the lap of the State Highway Commission it got rid of a troublesome and expensive child. Dr. Corwin deserves credit for taking the initiative and registering a complaint against this highway and it is pretty certain that his protest will bear fruit. In his first communication to the Breeder and Sportsman Dr. Corwin left the impression with us that the proposed State bond issue (since carried by a big majority) for completing the road system of California should not be carried because such roads as the Dublin boulevard were dangerous for horses and consequently should not be built. We intimated at the time that the Dublin road was built by Alameda county, and the mistake the State Commission made was in accepting it. No style of road that is slippery in wet weather should ever be built through hilly countries where steep grades are unavoidable, and we believe now that if the State Highway Commission decides to rebuild the road in question that it will put a surface on it that will be fit for horses to haul a load over. At any rate Dr. Corwin is entitled to the thanks of all horsemen for his action in the matter.

Starting and Timing Trotters in New Zealand.

Racing of harness horses is conducted on such a different plan in New Zealand from the customs in vogue in the United States, that the following editorial from a late issue of the New Zealand Referee will be of interest to all American horsemen:

The racing campaign of the 1916-17 season is now in full swing, for the early spring meetings have all been held, in each case with successful results, and by the time our next issue is published, the New Zealand Metropolitan Trotting Club's spring meeting—the most important fixture of the season in the Dominion—will be in progress. The present season's racing is arousing more than the ordinary amount of interest because of the fact that the majority of our clubs have abandoned the system of handicapping and starting their races by seconds, and have adopted instead the standing start method, with the handicaps adjusted on a distance basis. The change was made not because there was anything inherently wrong with the system of time handicapping and starting, but because it was recognized that the sport had reached such a stage with large fields and increasingly keen competition that it was a matter of physical impossibility for the starter so to control the fields that every horse had a reasonably fair chance. The handicapping by yards with the horses standing at their marks ensures a fair chance for all, although the bad beginner will suffer the same disadvantages under this system as he did under the former method of starting. The starting clock is not required under the new conditions, and clubs have had to make inquiries for a suitable device to assist the starter to send away his fields from a standing start. The Auckland Trotting Club, the first club in the Dominion this season to have all the events at one of its meetings handicapped and started by yards, decided to adopt the Higgins starting-machine, which is in use on several courses in Australia. This machine, which is a very efficient one of its type, is said to have answered requirements well when tested at Alexandra Park. Demonstrations of it have been given in the South Island, but it has not yet been adopted by either of the clubs whose officials saw its mechanism in action. The question of cost naturally comes into consideration, and under present conditions clubs cannot be blamed for hesitating before incurring somewhat heavy expense in fitting up apparatus which after all may not be absolutely necessary. Mr. H. Reynolds, who has been connected with the sport for so many years, has invented a very simple device, consisting practically only of light cords stretched across the track and broken easily when the horses move up to them, and this invention is to be used at Addington next week for the New Zealand Cup Meeting. The standing start has so far this season proved quite successful, considering that it was strange to practically all the competitors. It is largely a matter of the education of the horses, and when with more experience they become better schooled to the new methods, very substantial barriers may not be necessary. That is a question that can only be determined by experience, and in the meantime the experiments being made will be followed with interest. Arising out of the new system of handicapping and starting is the important one of timing. If in the case of a horse winning from behind scratch, the time given is that for the full distance covered, the public can easily calculate the time for the correct distance, but some uniform system must be followed. Handicappers in different parts of the Dominion appear to have adopted varying standards on which to base their handicaps, in some cases 12 yards to the second, and in others 11 yards, and this will increase the difficulty of arriving at an exact estimate.

Walter B. Jennings unquestionably thinks mighty well of the sons and daughters sired by Uncle that he now has in training for A. K. Macomber, as is evidenced by the number of yearlings of this breeding that he has entered in the Saratoga stakes for 2-year-olds to be run next August. While in the past season of racing he has shown a partiality for the get of Sunstar, the celebrated English sire, these run second to those of Uncle as entered in the big Jennings has entered seven colts by Uncle and six Saratoga events. In the United States Hotel Stakes by Sunstar. The yearling War Cloud, which is supposed to be one of the stars of the string, is by Polymelus out of Dreamy.

◆ ◆ ◆

New York is the best market in the United States for high class horses because there is more wealth there than in any other city, consequently more men and women who are willing to pay a big price for horses that are high class. For the ordinary horse, Chicago is the best market as there is where the dealers are the most numerous.

◆ ◆ ◆

A dispatch from New York states that the proposition to make the rules of harness racing uniform on all tracks through joint action of committees of the National Trotting Association and American Trotting Association may not succeed, owing to the apparent failure of the Western Association to clothe its rules committee with authority to act.

Saddle Horse Notes.

Marshall Chief Sold to a Philadelphian.

Our title page this week has a picture of the famous stallion Marshall Chief, winner of the Missouri state championship of 1916, that was recently sold by Jumps Cauthorn of Mexico, Missouri, to Mr. William Wallace of Philadelphia for one of the biggest prices ever received for a saddle stallion. Marshall Chief is by the famous sire McDonald Chief, that sired that great show horse Jack Barrymore, also Easter Cloud, that recently sold for $4,000 at auction. He carries more championship saddle blood in his veins than any horse that is still being shown. He defeated the best horses of Missouri and Kentucky this year. He is being exhibited at the International Live Stock Show in Chicago this week and will be taken to Denver for the big show and will also be shown at Milwaukee. He will remain in Missouri for the season of 1917 and will then be prepared by "Splint" Barnett for the big shows of the year.

Auction Sale of Saddle Horses.

On Wednesday evening, December 20th, at the Park Riding Academy, Fulton street, between Fifth and Sixth Avenues, San Francisco, Mr. E. J. DePue, proprietor of the Woodland Hackney Stud, will offer at auction twenty head of saddle horses. In this consignment are heavy weight and light weight carriers, horses suitable for children and several good ring horses suitable for use in riding schools. There are several really high class saddle horses that with proper handling can win in almost any show ring. Woodland Hackney Stud has sent many prize winners to the show ring and the consignment of horses from this farm that were sold in New York last spring brought good prices and some of them have won in the horse shows since. The sale will begin at 8 o'clock on Wednesday evening, Dec. 20th, and will give those looking for good saddle horses an opportunity of securing them at their own prices. Every horse will be guaranteed to be just as represented.

Morgan Stallion to Sire Cavalry Horses.

The registered Morgan stallion Robert Bruce has been sold by Charles A. Stone, of Plymouth, Mass., and New York, to the Secretario de Agricultura of Havana, Cuba, for the breeding of cavalry horses and the establishment of a cavalry remount station in Cuba.

Mr. Stone has been interested for several years in promoting a remount station in this country to furnish good horses for the United States army.

The sale of Robert Bruce marks a further development in the breeding of good horses, and he will be the first Morgan stallion to go to Cuba.

The purchase was made through Captain Louis A. Beltran, an officer of the General Staff of the Cuban army, who has charge of buying cavalry mounts for his government, and Dr. Bernardo Crespo, of the Agriculture Department.

Robert Bruce is a dark chestnut, four years old, 15.3 hands high, weighing 1,030 pounds. He was bred by the late Joseph Battell of Middlebury, Vt., and was got by Scotland, a son of General Gates, brother to Lord Clinton 2:08¾ and head of the United States government stud. Beauty, the dam of Robert Bruce, was a daughter of General Gates, so that he is closely inbred to that horse. Robert Bruce has won several blue ribbons in the show ring.

Al. Thomas Makes Endurance Rides Yearly.

In showing the horses at the Old Glory Sale A. L. Thomas rode from one hundred to one hundred and fifty miles a day for five days. Thomas was in the saddle off and on about twelve hours a day, and in addition to riding his own horse he drove another one, and a strange one, in front of him, tandem style, the entire distance, changing the leader about every mile. He is well past sixty, and he has been showing trotters in the same way for twenty-three years at the Garden, always at two sales and sometimes three sales a year. He was an expert at the work as long ago as 1885, when he exhibited the trotting stallion Don Cossack 2:18, and his colts at the National Horse Show for the late Arthur J. Caton, of whose stock farm at Joliet, Ill., he was then the manager.

In his younger days Thomas was an Indian fighter on the Western plains and was noted as one of the most enduring riders in the army. His friends tell of one occasion on which he carried important dispatches 250 miles in thirty-six hours through hostile territory, riding one horse while leading two others.

This veteran horseman is a firm believer that the western plains pony is the most enduring species of horseflesh in North America, if not in the world. And next to the range bred bronco he places the trotting horse, one of which he used along with his Western ponies at the recent sale in the Garden. It is worthy of note that this trotting horse—one of the toughest animals, Thomas says, that he has ever seen—was bred by the late General Brayton Ives, of New York, and was got by Prince Kellar, a grandson of the champion stallion Allerton 2:09¼, out of Pleasant Thought 2:21, by Prodigal 2:16; grandam Ecstasy 2:11¼, the dam of Lord Dewey 2:03¾.

Mr. and Mrs. T. J. Johnson have returned from their ranch in Mendocino county and are spending the winter at the Palace Hotel. Mrs. Johnson keeps her saddle horses at the San Francisco Riding School and may be seen almost daily riding one of her favorite horses on the bridle paths in Golden Gate Park.

STAKED YOUNGSTERS BRING HIGH PRICES.

Average Shows That the Public Wants Colts Eligible to Stakes.

[A. G. Asdikian in N. Y. Telegraph.]

As an annual indicator of trotting-bred horse values, the Old Glory Sale of last month made at least one record which was unique in its twenty-one year history and demonstrated that the time has arrived when breeders must center their attention on producing best possible candidates for juvenile stakes and futurities, or their produce will make a poor showing as horses of any market value.

The big sale also demonstrated that the youngster element offered to buyers should belong to blood lines that are represented by stake winners, either as youngsters or aged horses, or otherwise they are already a drug on the public market. The prices received for youngsters and the demand also should teach breeders that their stock must have futurity engagements or buyers will pass them over and pay high prices to those that are so engaged, and will have a chance to be tried in juvenile events to prove their value and ability as prospective candidates to turf fixtures for aged horses.

There were many instances during the sale to convince breeders that unless they limit their breeding operations to the blood lines now in demand, no paying returns can be expected. When a consignment of thirty-five head including youngsters without stake engagements and stock representing no stake winners of either side, brings an average of $141.50, while nineteen weanlings bred right and fully engaged average $716.50, the lesson can be readily learned.

Stake Colts in Demand.

The following figures, taken from the official list of the Old Glory sale and presented herewith, proved beyond any doubt what the present demand for trotting-bred horses is and how they should be bred upon a paying basis. They also prove that the day for inflated and fictious values for trotters has long passed, except in rare cases, while the stock offered to buyers must show some merit by its blood lines, individuality and stake engagements, as the kind most in demand for breeding and racing.

That present-day buyers want nothing as much or at higher prices, than youngsters properly and fully engaged in colt futurities, are shown by the tables herewith given, to prove in figures the respective values of those eligible to stakes and others that have no such eligibility. The list contains all weanlings, yearlings and 2-year-olds sold at the Garden:

ALL YOUNGSTERS.

	No.	Amount.	Average.
Weanlings	87	$32,960	$378.85
Yearlings	93	33,050	385.35
Two-year-olds	83	31,985	385.35
Totals and averages.	263	$97,995	$373.00

NO STAKE ENGAGEMENTS.

	No.	Amount.	Average.
Weanlings	4	$ 185	$ 46.25
Yearlings	29	3.085	706.40
Two-year-olds	25	3,765	160.60
Totals and average...	58	$7,035	$121.30

ENGAGED IN STAKES.

	No.	Amount.	Average.
Weanlings	83	$32,775	$395.00
Yearlings	64	29,965	467.90
Two-year-olds	58	28,220	486.51
Totals and average..	205	$90,960	$443.73

The figures show that when the so-called chaff was separated from the grain or youngsters with no stake or futurity engagements were taken out from each division, and the total, the average improved to the amount of $70.75 for the total number sold, while the increased value for the yearlings and 2-year-olds was an even $100 per head sold.

Deducting the number of colts (263) from the total number of 722 horses sold during the entire sale, also the $97,995 received for the former lot, from the grand total of $258,370, it will be seen that the remaining 459 head, including the $20,000 Guy Axworthy and 85,200 Bingara, brought a total of $160,375, or an average of $349.40 for high-priced mares, sensationally fast pacers, trotters with records, and standard bred horses in general, the difference in the two averages being $33.60.

Value of Stake Colts.

In order to fully present the real market value of the weanlings, yearlings and 2-year-olds, as shown by the sale, two more sets of figures are given herewith which will eventually prove that, compared with the general stock sold during the week, colts with engagements brought about 100 per cent more at the open market.

To prove the current demand and market value of trotters, it will be fair to consider the sale of a Guy Axworthy, at $20,000, as an extraordinary happening for the fact that no trotter had been sold in a public sale near that price for the past nine years, also must consider the fact that the same stallion brought only $2,100 at the Garden sale three years ago, so that the price paid for him was because he sired the world's champion trotter Lee Axworthy, 1.58 1-4. The occasional appearance of a Bingara in the sales ring at $5,000 should also be considered merely an incident, because had his owner not died the horse could not even be bought.

The two therefore demonstrate, respectively, incidental values which have very little bearing on breeding stock in general, except that the best is the highest. Deducting the $25,200, the amount received for the two stallions, from the $160,375 received for 459 head, outside of the youngsters, the figures show that the remaining general stock of 457 head brought a total of $135,175, or an average of a shade less than $296 per head. This average, therefore, was the correct market price for trotters, excepting youngsters.

In order to get to the actual average price for colts with stake engagements, the 58 weanlings and 2-year-olds without stake prospects are relegated back to the general stock, making the total number of 515 horses sold for $142,210, or an average of $276 per head. The figures correctly prove, therefore, that, barring the two stallions, the 205 weanlings, yearlings and 2-year-olds, with stake engagements, brought an average of almost 100 per cent more than the total sold, or to be exact, it was $443.75 or $276 in favor of stake colts.

THE CURT GOSNELL FUND.

When the popular trainer, Curt Gosnell, died from the result of an accident last summer, the Western Horseman started a fund for the benefit of his wife and with splendid results, as the following will show:

Cambridge City, Indiana, November 27, 1916.

Breeder and Sportsman—Gentlemen: I appreciate at this time more than ever before in my life, that bond of loyalty and friendship which exists among the light harness horsemen of this country as well as in Canada, and I take this opportunity to express my appreciation and thank each and every one who contributed to the Gosnell Fund for my benefit.

I have today received from The Western Horseman Company, custodians of the Fund, the magnificent sum of $4,119, same being the net amount of the Fund which they have deposited in the Fletcher Savings and Trust Company Bank for my benefit.

Yours very sincerely,

MRS. CURT GOSNELL.

What the National Horse Show Proved.

The big crowds which filled Madison Square Garden daily during the National Horse Show which closed last Saturday night, and the real interest shown by a large portion of the persons present each day and evening of the show denotes clearly that public interest in the horse has not decreased one jot or tittle since the coming of the automobile. Never before has the big Metropolitan been marked by exhibits of higher quality nor by exhibits for which the exhibitors had paid more money. It has been a long time since trotting horse breeders took any pronounced active part in the big show and this year was no exception in that respect, but in the classes for trotting bred horses and roadsters the quality of those shown was never higher. The classes for heavy harness horses, saddle horses, hunters, high steppers and ponies were filled to overflowing and the immense crowds that turned out to see them afford most satisfactory evidence of the senselessness of the talk of a "horseless age." Love for a good horse seems to be an inborn trait in the human race, and no matter what degree of development mechanical transportation attains, the horse will always play a part in the recreative life of the world if not in its industrial life, although for that matter, there is no evidence that the horse will be displaced industrially for generations to come, if at all.—Horse World.

Hope Springs Eternal in the Horseman's Breast.

There is a lot of philosophy in a remark attributed to John E. Madden in a conversation at Madison Square Garden last week. Speaking of the influence of the futurities in the encouragement of breeding and holding the interest in racing he said: "A horse entered in stakes keeps many a man from getting the blues. He winters on expectations. Who ever heard of a man with a lottery ticket in his pocket committing suicide?" Nothing truer was ever spoken. It is hope that buoys up the average man who races horses. He comes home in the fall after a bad season in a blue funk, with the determination to quit, and oftentimes he does. But in the spring when the training and racing season approaches he regains his optimism and looks forward to better luck. The thing he needs to enable him to hold on is a little hope ahead, and if he has a promising colt with a lot of stake engagements his boat is moored to a safe anchor. Racing associations like those at Goshen, Monroe and Middletown, which hold out in November the glittering rewards to be won the following August, instill hope in the same manner in the breast of the hesitating owner. He will not quit as long as there is hope if he is a game man, and there is always hope when he can see that he has a chance.—[Trotter and Pacer.

According to advanced reports from Detroit, the Detroit Driving Club is now planning two Grand Circuit meetings next year, one in July and another at a suitable date later. The three-heat system, which was first tried at the Michigan State Fair track last year, will be abandoned and replaced with a program of three races daily, on the best three-in-five system, and speculation confined to the parimutuel system.

COMPARING THREE CHAMPIONS.

Relative Speed of Lou Dillon, Uhlan and Lee Axworthy.

Fascinating to the speed-lover, is the analysis of record-breaking performances. This dissection and the comparison of the pace at different parts of the miles is always fruitful of interest. The quarter-time, in truth, discloses "where" the record was broken—and "how." In one instance it may reveal a wonderfully even rate of speed, assumed at the beginning and maintained throughout; in another, a terrific burst going away, or coming home, or through the middle half. The analysis computes and compares these fractions, and they have much influence in his final estimates.

The three fastest trotters that have thus far appeared are Uhlan 1:58, Lee Axworthy 1:58¼ and Lou Dillon 1:58½—and as the first is a gelding, the second a stallion, and the third a mare, they are also the champions of the three sexual divisions which they represent. The fact that their records are so nearly on a parity, but a half-second separating the fastest and the slowest of the three, is a somewhat unique feature, indicating how close together in class they were, or are. If it were a possible thing for the three to have raced against each other, without any of them having to trot a longer mile than the pole horse—that is to say, over a straight-away course—a blanket would cover them at the finish. It is true that both Uhlan and Lee Axworthy made their records "in the open," while Lou Dillon was preceded by a pace-maker—but, as is well known, she did not take kindly to that method of record-breaking, and it was necessary to keep the runner so many lengths away from her that he was of no benefit in lessening wind-resistance. The present writer, who witnessed and vividly recalls her record mile, has no hesitancy in stating that the front runner was a hindrance rather than a help to her that day, and that she would have trotted as fast, or perhaps faster, without him to bother her.

Which of these three trotters was really the "fastest"? That is, which possessed the highest flight of pure speed? Good arguments may be advanced for all three of them. Many critics still believe that Lou Dillon has never been approached as a speed marvel, holding that her flight, for a burst, has never been equaled by any later champion. Again, did not Uhlan pull Mr. Billings a half, to four-wheeled wagon, in 56¼ seconds? And has his owner not repeatedly ridden him eighths in 13 seconds or better, the gelding packing a weight of 190 pounds or more?

In one respect, however, Lee Axworthy has demonstrated a higher flight of extreme speed, over a corresponding distance of ground, than either of the other two. When he trotted his record mile in 1:58¼ at Lexington, Ky., last month, he reached the three-quarter pole in 1:27½, which is the fastest time in which any trotter ever covered that distance. An examination of the records shows that in their fastest miles all three of these trotters then went to the three-quarters at a higher rate of speed than in any other instance, so, as a matter of interest, we append the fractional time made by each:

Uhlan, 1912	:30	:59	1:28	1:58
Lee Axworthy, 1916.	:29¾	:58½	1:27½	1:58¼
Lou Dillon, 1903....	:30	:59½	1:28½	1:58½

It will be seen that Lee Axworthy was at the three-quarters in 1:27½, Uhlan in 1:28 and Lou Dillon in 1:28½. He did not, however, have quite the "steam" to take him onto the wire at a correspondingly faster rate. His last quarter consumed 30¾ seconds, while both Uhlan and Lou trotted theirs in flat :30. The middle halves of all three miles was where the record-breaking was really done. Lee Axworthy trotted his in :57¾, Uhlan did his in :58, and Lou Dillon hers in :58½. The fastest quarter by Lee Axworthy was his second, which he did in :28¾. Uhlan trotted both his second and his third in :29 each, and Lou did her third in :29 also.

When the three champions, of the three sexual divisions, reach a speed limit so nearly the same, the reflection is almost irresistible that the present speed-limit of the breed is, to all intents and purposes, not only actually, but theoretically established. This would seem to be farther supported by the status of the records in the two most important colt divisions, namely, the two and three-year-olds. As very few geldings of these ages are trained or raced, we can best gauge the situation by comparing the colts and fillies. We find that the champion two-year-old filly is The Real Lady 2:04¼, and the champion colt Peter Volo 2:04½; while the champion three-year-old colt is Peter Volo 2:03½, and the champion three-year-old filly is Volga 2:04½. But a quarter-second separates the two-year-olds, and a second the three-year-olds—and, as regards the latter pair, it is our opinion that Volga might have closely approached, if not equaled, Peter Volo's record had she been specially prepared for the task.[—The Horse Review.

Searchlight 2:03¼, twenty-two years old, went through the Indianapolis sale two weeks ago and was purchased by A. C. Shanks of Deshler, Ohio, for $180; Diamond Mac 2:15¼, thirteen years old, sold for $195, Hedgewood Patchen 2:09¼, six years old, brought $1200; Edna Ansel, a two-year-old filly by Prince Ansel, dam Edna Saunders by Axworthy, sold for $100; and Senator O'Brien, two years old with a yearling record of 2:29, by Peter the Great 2:07¼, brought $1000. The sale was held during very cold and bad weather.

Thoroughbred Matters

All records have been broken in the way of the entries of yearlings for future two-year-old stakes in the number that closed the Saratoga stakes for next season. This is the announcement made by Racing Secretary A. McL. Earlocker at the offices of the Saratoga Association. Last season records were broke at Saratoga for attendance by patrons of the sport and the number of thoroughbreds on hand to furnish the racing. And there is every reason to predict that everything will be bigger and better at Saratoga next August than that of the last season of racing at the great resort that has passed into memory. The complete list of entries for Saratoga shows that 200 two-year-olds have been entered for the Hopeful Stakes. This is seventy-eight more than were entered last year when the richest stake of the season showed 128 entries. This means that the winning of the Hopeful will bring a fortune to the winner. And there were big increases in entries all along the line. In the United States Hotel Stakes, guaranteed to be worth $7,500, 199 yearlings have been entered, as against 130 last year, while in the Grand Union Hotel Stakes, also for juveniles, there are 198 against 130 entered for last season's running. The Spinaway, for two-year-old fillies, also shows a considerable increase, with 148 entries, against 105 that were named for this event in 1916. Also the subscriptions for the Grab Bag Handicap, for two-year-olds, shows more liberality on the part of those who expect to race their stables at Saratoga. This event shows seventy-two subscriptions, as against fifty-five that were taken a year ago.

The exodus of brood mares, yearlings and bloodstock generally to the United States and elsephere, is assuming proportions that make one anxious concerning the breed in this country. Almost every week there appear in The Thoroughbred Record (Lexington, Ky.) lists of fresh importations from England, and if this sort of thing goes on, as it promises to, I am afraid that by the end of the war our stock will become seriously depleted. One cannot, of course, blame owners and breeders for taking advantage of the American demand for British thoroughbreds, but it is not as if buyers in the States were content with securing anything on four legs as long as its pedigree looked well. American owners and breeders are experts in the matter of make and shape as well as blood, and the best, or as near to the best as they can buy, is what they require and in many cases obtain.—[Vigilant, in London Sportsman.

The death of W. R. Griffin, who prior to the close of the race track here in California was prominently identified with the running turf, occurred at his home in Berkeley last month. Deceased was a brother of H. T. Griffin, the well known ex-racing man who is now heavily engaged in rice farming in Yolo county, and who resides in Oakland. W. R. Griffin was well known all over the United States as a successful trainer, and developed a number of good horses. He had during recent years been in the employ of the Southern Pacific Railroad.

476 Thoroughbreds Imported in 1916.

New York, Nov. 27.—The figures in connection with the thoroughbred industry of the United States as revealed by The Jockey Club's records for the past five years, or during the period when racing was under restrictions which hampered it almost to the point of extinction, are interesting. The official records show that 1,553 certificates were issued for males and females of various ages exported during that time by W. H. Rowe, the official registrar of The Jockey Club.

"These certificates do not by any means furnish an accurate estimate of the number of thoroughbreds we lost," said Mr. Rowe a few days ago, "as many consignments to England, Germany, Australia, the Argentine and other South American points were sent without any other papers than the foal certificates, and we are now getting communications from these countries where some of the mares have produced something good and their breeding must be confirmed. I would say that quite as many animals went without our certificates of exportation as have them, so that 3,000 would not be too high a figure to place on the total shipments of thoroughbreds from this country from 1911 to 1915 inclusive.

"Our records, however," continued Mr. Rowe, "show that the tide has turned our way strongly, the importations during 1914 from abroad totalling 190 head, while the current year to date is responsible for 406, with 70 more on the Atlantic at the present time. This will bring us well up to the 700 mark, with another month to fill out the year. A number of the horses and mares which went abroad represented the best blood lines in our stud book, and many of them we could ill afford to lose, but we are getting in exchange representatives of families that have been most successful abroad, and they should leave their impress on the thoroughbred future of the United States."

THOROUGHBREDS SLOWLY INCREASING

NEW YORK, November 26.—Gradually this country is getting into its stride again in the thoroughbred line. In conversation with W. H. Rowe, who looks after the registration of all thoroughbreds, he says the home bred two-year-olds which were registered for next year number 1,974, as against 1,879 this year. While this is but a small increase, it is something and does not include 205 foreign-bred youngsters that were imported for next year's contests. This totals 2,179 two-year-olds for 1917. "It is doubtful," said Mr. Rowe, "if there will be quite as many registrations this year as there were in 1915, owing to so many mares proving barren. One breeder reported that only one of his eight mares had given results. This, of course, was an extraordinary case, but as far as I can see now, it will not be surprising to see a decrease of about one hundred registrations this year compared with 1915. The proportion of foals in nearly every stud was lower this year for some unaccountable reason."

A comparative table for the past six years shows a steady growth since the Hughes crusade against the sport of racing in 1910. In that year there were 2,415 home-bred yearlings registered. It continued to decrease until 1914, when the number took an upward trend, there being 157 more registrations in 1914 than in 1913. Following are the figures for the past six years, for domestic-bred horses only: In the year 1915, there were 1,974 yearlings registrations; in 1914, 1,879; in 1913, 1,722; in 1912, 1,904; in 1911, 2,403; in 1910, 2,415.

Had not adverse legislation interfered with the growth of the thoroughbred industry, according to statements made by members of the Jockey Club, it would not have been out of reason to expect a list of 3,500 registrations by this time. Many breeding establishments began to sell their stock to foreign buyers as early as 1908, and by 1910, hundreds of mares had benn shipped to foreign countries. For the past two or three years, however, there have been many importations to this country, and, according to Mr. Rowe, the result will be beneficial in the long run, as we need new blood on the farms, and there is no question it has been brought here. Many horses of Europe's select blood have been brought over, and, while it may take a few years to demonstrate what the result will be, the general feeling is that in a year or two we shall have as good horses as ever were foaled here, and possibly better. From all viewpoints the thoroughbred breeding industry is now in a healthy condition.

Jockey Club Will Not Censure Pimlico.

New York, Nov. 29.—Some of the sensationalists and calamity howlers are trying to inject a feeling into others that the Jockey Club will take some action against the Pimlico management owing to its announcement that it will hereafter abandon stake races. It is doubtful if any such thought will even suggest itself to any member of the Jockey Club. In the first place, every association under Jockey Club jurisdiction can give as much money as it chooses or can afford to purses and stakes, so long as the rules are recognized. Some tracks can give more than others. As much as the turf rulers would like to see rich stakes and purses everywhere, it is not likely to take arbitrary action in any case. Mr. Belmont simply regrets that such an ultimatum has been reached at Pimlico, and his interview was issued to try to show how advisable it is to give rich stakes, to uphold the breeding industry of this country and to advance the importance of the horse in every particular. For the past few years there have been very few stakes run at Pimlico, hence its determination to cut them all out will not be any serious hardship. The only question at issue is whether it would have been far more advisable to open some rich stakes, rather than play to the overnight or forty-eight-hour events. As one horseman remarked: "Rich stakes bring the best stables to a race course, and with the best stables come the more aristocratic followers of the turf. This has been the history of racing for centuries."

◈ ◈ ◈

"From little acorns big oak trees grow" is an old saying, but it might be recalled in connection with the fact that one of the Dupont family has decided to arrange a hunt meeting somewhere near Wilmington, Delaware. It will not take place until next autumn, but there is a reason to believe that if it turns out a social success, as has the Piping Rock institution of a similar nature, it may be possible a wonderful race course will be built in Delaware. But for the war starting when it did, there might have been a race meeting in Delaware ere this of short duration and under the auspices of Delaware's fashionable set, but the European trouble necessitated the Dupont powder mills to get busy. There is no question that the little hunt meeting near Wilmington next autumn will be looked forward to with much concern by all who are interested in the welfare of the turf.

Juarez Has Successful Opening.

Advices from El Paso are to the effect that the opening of the racing season at Juarez on Thanksgiving Day was very successful, about 5000 persons being present, and the bettors took to the mutuel machines so well that the amounts wagered were far above expectations. The weather was perfect and while the racing was mostly of the sprint order it was very good.

Racing in Australia.

The Victoria (Australia) Derby, of one mile and a half, which was run at Flemington, on Saturday, Nov. 5th, resulted in a comfortable victory for Mr. D. U. Seaton's Wolaroi, a 7 to 1 chance, who won rather easily by half a length from Mr. J. Robinson's Mehi King, with Eastcourt, belonging to the owner of the winner, a good third. Wolaroi was bred by his owner, who offered him for sale as a yearling without the horse reaching his reserve, and is a black colt by Kenilworth (son of Childwick and Kizil Kourgan, winner of the French Oaks and Grand Prix de Paris) out of Widden Lass by Maltster, the latter of whom himself won the Australian Jockey Club and Victoria Derbys, and ran second to Clean Sweep as a three-year-old in the Melbourne Cup of 1900. Wolaroi is full of Galopin blood, Kenilworth being his great-grandson, as is Maltster (son of Bill of Portland), while Widden Lass's dam Chutney was begotten by Gossoon (son of Galopin). Wolaroi did very well as a two-year-old, among his victories being the rich Breeders' Plate at the A. J. C. spring meeting at Randwick last year, when he created a surprise by beating Sister Satellite and others, starting at 20 to 1. On Monday, the 7th of November, Lavendo, who won the Caulfield Cup in 1915, secured the mile and a quarter Melbourne Stakes, a weight-for-age sweepstakes with 100 sovs added, from Carlita (V. R. C. Derby winner) and others. Lavendo is a five-year-old bay horse by Chaucer (sire of Stedfast, Canyon, etc.) from Lavello by Laveno, bred by Mr. A. L. Christie, and he went to Australia as a foal, together with his dam, in 1912.

The famous Melbourne Cup, the richest stake in the world, had to be postponed from Nov. 7th to Nov. 11th, on account of a muddy track which made racing dangerous. This was the first time a postponement of this great race has been made since 1870, when Nimblefoot won the race. The race this year was won by Sasanof, at 20 to 1. Sasanof is a small horse of the pony size, and many of the turf followers did not believe he would be able to go the distance against the best three-year-olds in Australia. Furthermore, he was reported lame and a doubtful starter.

When the race got under way, Sasanof trailed back in the ruck for the first mile. Then Jockey F. Foley started moving up with him and when the straightaway was reached he worked his way up among the leaders. A furlong from the wire, Shepherd King moved up into contention, but Foley drew his whip and Sasanof easily increased his lead for a handy victory.

R. Lewis rode Shepherd King, that was 9 to 2 in the wagering. St. Spasa, M. Connell up, was third, and Lingle, with F. Dempsey, was fourth. The time, 3:27¾, was slow because of the rains.

Sasanof is a brown gelding owned by W. G. Stead and E. S. Luttrell and was sired by Martian, dam Ukraine.

Number of Horses Racing.

In the year 1905 there were 6,232 thoroughbreds raced in the United States and Canada, while in 1915 only 3700 faced the starter in these two countries. The number racing in 1916 will probably show quite an increase, but the actual figures cannot be tabulated until the end of the year. The number of thoroughbreds racing over American tracks since and including 1900 is as follows:

Year	Horses.	Year.	Horses.
1900	4,792	1908	5,405
1901	5,127	1909	4,890
1902	5,271	1910	4,180
1903	5,525	1911	4,038
1904	5,962	1912	3,553
1905	6,232	1913	3,541
1906	5,962	1914	3,632
1907	5,662	1915	3,700

Thirteen head of runners were shipped to New Orleans last Monday by John Lowe, trainer for Charles W. Clark, president of the Golden Gate Thoroughbred Breeders' Association. The New Orleans meeting opens on New Year's day and the outlook is for large attendance and high class racing. Murphy, an eastern lightweight, has been engaged to ride for the stable. The horses in the shipment are the well known Brynlimah, that won so many stakes at the exposition; Rose Marion, the speedy three-year-old; Aunt Liz, the Chantilly two-year-old that holds the New Orleans track record; David Craig, Pleasureville, El Palomar, Eatham, Duireer Roberts, Birdie, Gun Powder, Tresor and two unnamed Chantilly yearlings.

S. C. Hildreth and Thomas J. Healey have been weighing and measuring the two great two-year-olds which they have in their charge, Hourless and Campfire. Hourless, which stands just 15 hands and 2¼ inches high, is a quarter of an inch the taller of the two, while Campfire is a bit longer. Hourless weighs 1,018 pounds and girths 70 inches. Campfire weighs 1,054 pounds and girths 71 inches. Each trainer is very proud of his colt, and each is enthusiastic in his admiration of his stable champion's most dangerous rival. As Hourless is nearly black, he looks smaller in proportion to his actual measurements than does Campfire, which is a rich "hard" chestnut.

◈ ◈ ◈

There are 144 stalls at the San Francisco Riding School and all are now occupied by saddle horses.

Harness Horses and Horsemen

M. L. Woy of Fresno Wins His Protest.

At the meeting of the Board of Review of the National Trotting Association held in New York this week, the protest of Mr. M. L. Woy of Fresno, against the California State Agricultural Society, was sustained. When the Occident Stake for three-year-olds was trotted at the State Fair last September, it was trotted under the conditions which were made before the stake closed and which were as follows:

"Occident Stake of 1916, for foals of 1913, to be trotted under direction of the State Agricultural Society in 1916. One hundred dollars entrance, of which $10 must accompany nomination Jan. 1st, 1914, $15 to be paid Jan. 1st, 1915, $25 to be paid Jan. 1st, 1916, and $50 thirty days before the race. Conditions: Mile heats. Race to be three heats. Every heat a race. One-third of the money will be allowed for division in each heat, and money allotted for heat divided as follows: Fifty per cent to first colt, twenty-five per cent to the second, fifteen per cent to the third, and ten per cent to the fourth. The Occident Cup and $400 to be added by the Society to be awarded to colt standing highest in the summary. Distance 100 yards. Otherwise N. T. A. rules to govern."

When the race had gone to three heats the horses stood as follows in the summary:

Mr. Durfee's Hermes	3	2	1
Mr. Woy's Lulu B.	2	1	3
Mr. Pollock's Miss Axworthy Dillon	1	4	2
Mr. Christenson's Natal Day	4	3	4

It will be seen that no colt stood highest in the summary as Hermes and Lulu B. were tied for that place, each having a first, a second and a third to its credit. The judges thereupon ordered another heat to decide which of the two should be awarded the $400 and the cup. Mr. Woy protested that the conditions provided that the race should end after three heats, and declined to start his filly. Mr. Durfee brought his colt on to the track, trotted him alone another heat and was awarded the money and the cup. Mr. Woy thereupon filed a written protest against the decision and took the case to the Board of Review. The Board on Thursday last sustained his protest, ordered the $400 to be divided between the two and directed that the Agricultural Society either give each a cup or let the drivers cast lot for the one already provided.

Mr. Woy based his protest on the ground that the conditions of the stake provided for three heats and three heats only, and that section 4 of rule 37 provides that "When two or more horses appear equal in rank in the summary of a race they shall share equally in the award of premiums won by them."

Mr. Durfee claimed that the added money and the cup were given for the colt standing highest in the summary, and that this condition demanded another heat so that the award could be made. He also quoted a general condition governing all the races at the State Fair this year which stated that "Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fifth heat and money divided according to rank in the summary at the termination of that heat."

The Board of Review evidently held that this condition could not apply to the stake as no additional conditions can be made in a stake after it has closed, and that this condition only applied to the class races.

Further comment on the decision is reserved until the full context of the same is received, but we are safe in asserting that the matter will be subject for much conversation among California horsemen for several weeks to come.

The Last 2:10 Trotter of 1916.

In all probability Charley Spencer of Santa Rosa made the last addition to the list of 2:10 trotters for 1916 when he drove The Proof a winning race on the opening day of the Arizona State Fair last month and won the third heat in 2:09¾. In this race he beat Will Durfee with Esperanza, Fred Ward with Allie Lou, and four others that had started in the 2:12 trot for a purse of $1,000. And this reminds us that Spencer has marked quite a number of 2:10 trotters during his career as trainer and reinsman, and that he holds the opinion that The Proof will, barring accidents, trot to a lower record next season than any horse he has ever driven. During the season of 1916 The Proof started in thirteen races, was four times first, six times second, twice fourth and unplaced once. He trotted a lot of miles from 2:07¼ to 2:08, broke two half mile track records, and at Phoenix trotted three races in four days and showed that there is no question but he is capable of trotting in 2:06 or better. He won the 2:12 class, was second in the 2:09 class, and trotted the third heat in 2:07¾ beaten half a length, with one front shoe off that he lost about fifty yards after leaving the wire. He was only beaten a nose in the second heat in 2:07¾. Going a mile with one shoe off bruised his foot so that it was very sore, yet he stayed on the trot and the next day was 2-2-3, and only beaten a nose the first heat in 2:07¼. During Spencer's career as a trainer he has developed and driven Bernice R. 2:07¼, Prince Lot 2:07¾, Aristo 2:08¼, Kid Cupid 2:08¼, Nada 2:09¼, Bonnie Ansel 2:09¼, The Proof 2:09¾, Glen Rose 2:07¼ and a great many others with slower records. All these horses trotted around 2:07 and some of them have shown miles in better time. With Bernice R., Prince Lot and Nada he won about $27,000 in purses and made very few starts in the colt stakes in California in which he did not get a part of the money. Mr. Spencer has been very successful as a trainer, and while he had some very flattering offers to remain in the east while on his campaign with The Proof this year, he thinks California is about the best place in the world to live and will reside in Santa Rosa. The Proof will be raced again in 1917 and it is to be hoped there will be enough races for the 2:10 trotters in California to induce the owners of horses in this class to race here instead of crossing the mountains.

Thirty Per Cent More Nominations Than Last Year.

California breeders of trotters and pacers are more optimistic than they were last year, and have shown it by an increase of nearly 30 per cent in the number of entries for the Pacific Breeders' Futurity No. 17, over the list received for No. 16. Last year the stake closed with only 71 nominations, the smallest in its history, while this year there will be at least 90 entries and probably more, as at this writing the mail from distant points was not all in and there may be a few more by the time the nominations are all received. The California breeders have risen to the occasion and shown that from now on the breeding and racing of trotters and pacers will receive from them more attention than it has during the slump of the last few years. Everything points to better prices for horses with speed enough to race and that is what the breeder must now produce if he desires to keep up with the procession. The light delivery and roadster market which in years past took care of the trotters and pacers that could not show standard speed, is gone, never to return, so the breeder who makes a profit must breed horses with race horse speed. This means that fewer horses will be bred than ten years ago, but the class will be higher. There will no doubt be more racing every year, and horses that can trot in 2:25 or pace in 2:20 will always find races provided for them sufficient to give them a value proportionate to the speed they show faster than that. Breeders cannot expect to raise horses at a profit for which there is no active demand, consequently the proportion of horses suitable for racing must be larger than heretofore required. This will lead breeders to exercise better judgment in mating their mares, and more study in the selection of breeding animals. The demand is for faster and better race horses, and that demand will continue, but will be harder to fill, and the breeder who starts in now must breed for more speed and endurance, even though he is already in the front rank of the breeding army.

Cathedral Chimes Wins New Zealand Handicap.

American horsemen may look upon New Zealand as not "cutting much ice" in the harness racing game, but there is no race in America where aged trotters and pacers compete for as much money as is hung up each year in the New Zealand Handicap, a race which is for trotters and pacers. It has a value of $13,000, of which the second horse receives $2500, third $1500 and fourth $1000, leaving the winner about $8,000. The distance of the race is two miles. This year's handicap was trotted on Tuesday, November 7th, and was won by J. B. Thompson's Cathedral Chimes, that was handicapped 36 yards. R. McDonnell's Evelyn, handicapped 24 yards, was second, Mrs. Seymour's Admiral Wood handicapped 72 yards was third, and J. Lecky's Mandaren, scratch, was fourth. The time was 4:31 3-5, which is the record for the race for the past seven years. Seventeen horses started. The winner is a bay four-year-old colt by Four Chimes, son of Abbey Bells, a Kentucky bred horse. During the afternoon of the races fire broke out in the members' stand which was completely destroyed. It had been but recently erected at a cost of $50,000. Abbey Bells, the grandsire of the winner of this stake, was purchased by a representative of the Allendale Stock Farm in Kentucky when a colt, and taken direct to Australia. He was foaled in 1896, and was sired by Bow Bells (son of Electioneer and Beautiful Bells); his dam is Russia, full sister to Maud S. 2:08¾, by Harold, second dam the famous mare Miss Russell by Pilot Jr.

Hal Dillard 2:04¾ is Dead.

Word comes from Cincinnati that the noted pacing stallion Hal Dillard died at the farm of his owner, Franklin Sanford, across the river in Kentucky on the 10th of November. The old horse was 29 years old. He was foaled in 1887 in Tennessee and was purchased as a two-year-old by Thomas C. Parsons, who compiled Parsons' Pacing Register. Geers raced Hal Dillard successfully and gave him a record of 2:07¼, which was afterward reduced to 2:04¾ in a mile against time, driven by H. A. Hills. Hal Dillard was the first 2:05 pacer sired by the famous Brown Hal. He has thirteen pacers in the 2:10 list, and his son Hal B. 2:04½ is now the foremost living sire of pacers, with sixteen 2:10 pacers to his credit, the three fastest being Hal Boy 2:01½, Hal B. Jr. 2:02½ and Hal Raven 2:03¾, all famous Grand Circuit performers. Hal Dillard was a pacing bred horse. His sire was the pacer Brown Hal 2:12½ and his dam Annie Pointer by John Dillard Jr. At the close of 1915 he had 4 trotters and 90 pacers to his credit with standard records.

Horses Are Like Men.

The sale of Bingara for $5,200 at the Garden last month was a capital illustration of the fickle character of the public fancy for trotting sires. Here was a fashionably bred horse in the prime of life and as perfect in physical structure as almost any stallion of the day, one that, in a country where Peter the Great 2:07¼, Baron Wilkes, 2:18, and other famous sires had been failures at the stud, got more fast ones than any other horse of the same age ever got in the favorable climate of Kentucky or California.

At fifteen years of age Bingara is the sire of such trotters as Baden, 2:05¼, winner of $36,000 in one campaign through the Grand Circuit; of Belvasia, 2:06¼, winner of $10,885 in a single season; of Binvolo, 2:07¾, a futurity performer, of Bisa, 2:10¼, winner of $12,850; of Bergen, 2:06¾, winner of $5,050; of Baring, 2:12¼, winner of $8,450; of Brisac, 2:06¼; Brione, 2:08¾; Brescia, 2:09¼; Binworth, 2:09½; Bismya, 2:09½, and twenty-six trotters in the 2:15 list.

His get won nearly fifty races this year, and in the last five years have won more than $158,000 in purses and stakes. Peter the Great, at the same age, made no such showing, although he had then stood for several years in Kentucky, while Bingara's life has been spent in the rocky hills of Northern Massachusetts, where snow sometimes covers the pastures from November until May.

When asked why, in his opinion, Bingara brought so small a sum, a New York horseman, who now owns a champion said, it was largely due to his failure to get more fast colt trotters. But what other sire under like conditions ever had to his credit at the same age such colt trotters as Binvolo, with a three-year-old record of 2:09½; Binworth, with a record in the same notch at the same age; Bisa, "runner-up" to General Watts in the Kentucky Futurity of 1907, and Bivolo's second to The Harvester in the same race the next season, not to mention Belvasia, timed in 2:10½ in a race at the same age, and more than fifty of his offspring that earned records in the 2:30 list as two-year-olds? Bingen 2:06¼, the sire of Bingara, was incomparably the best two-year-old of his day, having trotted a mile in public in 2:12½ at that age. And Bingara's dam was by Arion, 2:07¾, holder of the world's record for two-year-olds from 1891 until 1909, so that he is bred in lines prolific of early and extreme speed. Given the warm climate of Kentucky or Tennessee, which changed Peter the Great, Todd, George Wilkes and so many other sires from failures to successful stock horses, and Bingara ought to rank with any of them as a sire of colt trotters or aged trotters.

The more probable explanation of the ridiculously low price for Bingara seems to be that he had not been represented on the turf in the last year or two by a sensational trotter like Baden or Belvasia, and that the fickle public had in some measure forgotten him in its enthusiasm for a new idol. This tendency among horsemen to take up a sire or a family on the strength of one or two brilliant performers and then drop it as suddenly and with about as little reason as they change the style of their hats, is as old as the breeding of trotting horses. Every old time horseman remembers the Dictator boom of a third of a century ago, when Jay-Eye-See, 2:10; Phallas, 2:13¾, and Director, 2:17, all on the turf at the same time, made their sire the most popular horse in the country. A little later came the passing craze for Pancoast, 2:21¾, sire of Patron 2:14¼; Issaquena, 2:21¼, and Aquarius, 2:26, and then the scramble for Sultan blood, when Marcus Daly paid $26,000 for an untried two-year-old, and John H. Shults $8,500 for a yearling under the hammer the same day.

Had Bingara been sold by auction in New York about three years ago, when the brilliant performances of Baden, Belvasia, Bergen, Bisa and Binvolo were sending troops of buyers to Allen Farm for colts the great son of Bingen, it is likely, he would have brought more money than Guy Axworthy commanded last week, with Lee Axworthy's splendid achievements fresh in the minds of fickle horsemen.—[Am. Horse Breeder.

Must Ride to Keep in Condition.

Messrs. Martin and Martin, the saddlery and harness makers, advise that their New York house recently received an order from The National Cash Register Co., of Dayton, Ohio, for fifty-five saddles for the use of their executives, who have been required to take horseback rides regularly each week. Horseback riding was undoubtedly chosen by the company, not only for its beneficial effects, but also for the reason that a horse can be ridden most of the year, thus keeping their executives in good condition at all times.—[Rider and Driver.

To Owners of Arab Horses.

The Arabian Horse Club of America is desirous of obtaining the names and addresses of owners of Arabian horses and asks all such owners to communicate promptly with Miss Ethel Boyd Bowers, Registrar, 140 West 16th Street, N. Y.

Dick McMahan, J. B. Chandler and the Hillanddale Farm stable will winter at Macon, Ga. Each stable will contain about 25 head.

Notes and News

Pacific Breeders' Futurity No. 17 will have nearly 100 nominations.

Many newcomers to the ranks of harness horse owners are reported in the eastern states.

Hemet Stock Farm will send 20 head of colts, mares and race horses to the Chicago Sale.

Henry Thomas will train a three-year-old half brother to Napoleon Direct 1:59¾ next year.

One of the half mile tracks in Vermont advertises a free-for-all trot for a purse of $2500 for 1917.

Over ten thousand trotters and pacers started in races in the United States in 1916, and about one-third as many runners.

It is said that Country Jay 2:05¼, now twenty years old, was started in two or three races this year.

Several California towns that have not held fairs or race meetings for years are talking about getting back into the game in 1917.

Stallion owners who will place their horses in public service this year should realize that advertising should be early to be most effective.

Harold Cohen, of this city, concluded last week that he would not send either Vera Hal 2:05 or Harold C. 2:13¼ to the Chicago Sale.

Fred G. Mead, a prominent horseman of Ossining, New York, died in San Francisco Nov. 27th. He had come to California recently for his health.

Mary Holt, dam of Deroche (3) 2:07½, has a foal at foot by Etawah 2:03, is now in foal to San Francisco 2:07¾, and is booked for 1917 to Lee Axworthy 1:58¼.

Mr. W. J. McDonald, a Boston amateur reinsman, bought eight or ten head at the Old Glory Sale and will probably get a string of horses and of them to race at the New England fates next year.

All Style 2:10 is advertised as "the only 2:10 trotting stallion ever seen in Australia." The son of Stam B. is now in service at Bendigo at a fee of ten guineas or about $52.50 for the season.

Hemet Farm owns the fastest yearling trotter of 1916 in Edith Carter 2:18¼ by Kinney de Lopez 2:23, and also owns Hemet Queen 2:16¼, the fastest of all yearling pacing fillies.

Tommy Murphy recently stated that he believed Lee Axworthy 1:58¼ would have trotted to a record of 1:55, next season, had his owners had his training continued instead of placing him in the stud.

Readville, that splendid mile track where the first mile in 2:00 was trotted, may come into the Grand Circuit this year, with the backing of influential breeders and horse lovers of Massachusetts.

Pierre Lorillard Jr. of Tuxedo Park, New York, Henry B. Rea of Pittsburg, Pa., and Rees Blizzard of Parkersburg, W. Va., have been elected to fill vacancies on the Board of Review of the National Trotting Association.

The consensus of opinion is now that the Curles Neck plan of disposing of weanlings will become more popular every year, and patrons of the sale marts need not be surprised if prices for Harvester colts rule much higher next fall.

Tommy Murphy is to train and race Lucile Spier for the races next year. She trotted a half mile track in 2:06¼ and then stepped the Lexington mile track in 2:03¼. She should be a star for the M. & M. of 1917 and other big stakes.

The Old Glory Sale has set the value of trotting bred horses in New York and the Chicago Sale, which opens on the 18th inst., is being looked forward to for the value set on this breed of horses in the Middle West.

Although Grand Rapids has already been placed in the doubtful list as a member of the 1917 Grand Circuit, horsemen should not be surprised to hear that the Furniture City Driving Club may again come in under circumstances that will insure permanency for half a dozen years, if not more. It is learned that after having missed the race meeting last August leading citizens are making great efforts to resume racing at Comstock Park track, under conditions and contracts that will avoid occurrences of the kind which drove the big race meeting from their city to Pittsburg.

There is a possibility of the revival of high class harness racing at Philadelphia in 1917. It is reported that several wealthy residents of that city will promote a Grand Circuit meeting at Belmont Park under the management of Albert Saunders.

Louis Titus of California bid as high as $12,500 on Guy Axworthy at the Old Glory Sale, but stopped at that figure. Had he secured the horse he would have made him the premier at Stony Ford, his stock farm in New York State.

Mr. B. A. Bulkley, owner of Silver Spring Stock Farm, Goshen, New York, who secured Bingara for $6500, refused an offer of $12,500 for him last week, and declares the stallion will spend the rest of his days at his new home.

The Old Glory sale figures show that a total of 87 weanlings were sold during the week for $32,960, or an average of $378.85 per head. Peculiarly enough, among the total number there were only four that had no futurity engagement and sold for $186, or an average of $46.25 each.

Joseph Ryan is training several head of trotters and pacers at the half mile track at Sonoma, getting ready for 1917, and will try to put that town on the racing map with some good ones. The pacer Glenwood Mac is getting road work every day and looks a good one for next year's pacing events.

The State Board of Accidents reports that there were 730 persons killed in California last year in automobile accidents. This is at the rate of two a day. Probably nine-tenths of these fatal accidents were of the avoidable kind—that is, accidents that were caused by carelessness.

Trotting horse lovers the country over will regret to hear that the veteran New York State breeder, William Simpson, proprietor of Empire City Farms, Cuba, N. Y., and owner of Axworthy 2:15½ and McKinney 2:11¼, is seriously ill at his home in New York.

Guy Axworthy, whose reputation as a sire is principally due to his having sired Lee Axworthy 1:58¼, champion trotting stallion, will have one big help in maintaining that reputation. He will be kept at Walnut Hall Farm in Kentucky, where he will doubtless be mated with many of the greatest broodmares in the country.

C. A. Durfee informs us that the breeding of the two-year-old pacer Oro Fino 2:17½ as given in the reports of this season's races is wrong. He is by Copa de Oro but his dam is not the mare Lady H. by Del Coronado, but is Lily Mac by McKinney 2:11¼, second dam Pond Lily by Geo. M. Patchen Jr. 31.

The suit which R. M. Williams instituted against the National Trotting Association and W. H. Gocher, for alleged damages for suspension, came up in the Federal District Court in New York City a few days ago, and Judge Mayer ruled that Williams had failed to state a cause of action. He was, however, allowed 20 days to amend his original complaint.

During the last week in October in Australia, the get of Harold Dillon, son of Sidney Dillon and Guycara by Guy Wilkes, won no less than ten races. This horse is a full brother to Dillcara, the stallion owned by the late Dr. C. E. Farnum of this city and now the property of his daughter, Miss Adeline Farnum. A picture of Dillcara graced the title-page of the Breeder and Sportsman last week.

A correspondent of the Horse Review writes: "I think it was a great thing for the trotting turf that Harry Harkness bought Guy Axworthy. He bought him to be his own personal property, and not the property of his father's estate. You know he started out with automobiles and flying machines. Well, he told me he is going to cut out the automobiles and flying machines and go back to the horses, and I believe it will be quite a good thing for the game."

Winfred Davies, with other Canadians will establish another racecourse near Toronto. This track will be built on the Davies estate. It will be a thoroughly modern course, and the men who are behind it promise that it will be one of the best in Canada. Mr. Davies is a son of the late Robert Davies and owner of the Thorncliff stable. Like his father, he is well-known to the turf, and it is assured that the new track will be a credit to the Cadanian circuit.

Plans for a racetrack to be owned and conducted by an association composed only of owners of horses are under way in Maryland, which may be in operation near Baltimore during the next season of racing. Oscar Lewisohn, who is promoting the scheme, started the subscription with $10,000. None other than a horse owner will be allowed to purchase stock in the association and no man will be permitted to own enough stock to give him control. It is to be understood that the stock in the enterprise shall not pay to the stockholders more than ten per cent per annum on their investment in the association. All revenues of the track, after running expenses and the ten per cent dividend are taken care of will go into purses for the horsemen.

Charles W. Smith, secretary of the National Horse Show Association, has opened a book in which to record suggestions for improving the annual exhibitions at Madison Square Garden. Everybody is invited to contribute his ideas for the consideration of the directors and Executive Committee. A suggestion which has already been adopted is to go back next season to the system of giving a number to each horse in the show and requiring him to carry it throughout the week every time he appears in the ring.

The American Sportsman of Cleveland, Ohio, has the following about a California bred horse that was thought last spring to be a coming champion: "All McKinney, the black pacer that has a time trial of 2:04, has been placed in Frank Hedrick's hands by his owner. If anyone can get this fellow to stay pacing, the horse will be a wonder. Hedrick has had great success with just such horses before, and he may get this good horse to do just as he wants him to, in which case he will have a pair of splendid wigglers in All McKinney and Loyal W."

Mr. D. S. Frasier, the veteran horseman, who has been connected with the Napa Stock Farm of Mr. A. B. Spreckels for many years, is able to be out again after being confined to the house in this city for the past five weeks with an attack of pneumonia. There are few men living in California who have been identified with horse breeding as many years as Mr. Frasier. He bred the stallion Secretary 28377 thirty years ago, and owned a farm near Petaluma where he bred and raised many fine-looking and high class roadsters. His many friends will hope to see him entirely recovered from his illness in a very short time.

The young trotting stallion El Carbine, that Walter Maben sold as a three-year-old to John Porter of Otago, New Zealand, in 1913, won a two mile race at Oamaru a few weeks ago, beating a field of fourteen starters. The time was 4:54 over a slow half mile track. El Carbine is by Carlokin 2:07½, dam by Zombro 2:11, second dam by Alcazar 2:20½, third dam Elwood 2:17¾, dam of 5, by A. W. Richmond, fourth dam Crichton's First, dam of that great campaigner Arrow 2:13¼ by Crichton, son of imported Glencoe. The meeting at which El Carbine won was a one day meeting and the New Zealand Trotting Journal states that £24,165 passed through the totalisator on that day, or over $120,000 in United States money. Some betting.

The stallion F. S. Whitney 2:09¼, that was bred by Frank Turner of Santa Rosa and is now owned by Sutherland & McKenzie of Orange Cove, California, carries a lot of speed producing blood in his veins mixed in a manner that is totally different from the majority of fast performers. His paternal grandsire had one cross of Electioneer blood and three of Geo. Wilkes in his veins and his paternal grandam had one of Dictator, one of Geo. Wilkes and one of Mambrino Chief. On his dam's side his grandsire was by a son of Geo. Wilkes out of a Mambrino Patchen mare, and his grandam by Nutwood out of a mare by Dictator. He has Wilkes, Dictator and Mambrino Chief blood on both sides of his pedigree and all his 26 ancestors in four generations are producers of speed with but two exceptions.

The Jersey sportsmen who hold their races at Weequahic Park, in Newark, admit all to field and grandstand free of charge. All expenses are borne by them. That the sport is popular with Jersey folk is shown by the attendance figures. Frequently 15,000 persons have viewed the races on a Saturday afternoon. New Yorkers can view the speed contests of the local organization on the Harlem River Speedway. There is no seating capacity provided for the visitors, but this is not regarded as a hardship by Manhattan and Bronx devotees of the light harness racing. Five to seven thousand of those sometimes stand in lines four deep on each side of the Speedway between 181st and 201st streets on Sunday afternoons during the season. Perhaps they, too, have imbibed the enduring spirit of the light harness racing world. —[N. Y. Herald.

A. H. Cosden, owner of the world's champion The Real Lady, was one of the largest buyers in the consignment of Curles Neck weanlings by The Harvester. For Harvest Sylph, he gave $800; for Harvest Pride, $1500; for Harvest Belle $600, and for Harvest Stream, $1000. After he had bought these babies one of the most representative trainers in this country offered to take all four of the weanlings and pay a profit of $200 on each. The offer, of course, was a sincere one, and was promptly turned down; however, had this trainer believed that he could stop Mr. Cosden in the bidding, each of these youngsters would doubtless have brought more money under the hammer. Mr. Cosden very likely had a limit on each of these foals, but it is equally as likely that his limit would not have been reached when the other fellow stopped.

Among the arrivals at New York from Europe last week was William Wiley, a jockey who once rode for John A. Drake. Wiley has been riding for King Ferdinand of Rumania, but when that country entered into the big European quarrel a few weeks ago, Wiley decided it was no place for a race rider and started for home.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Hunters Are Marooned.—A party of San Francisco hunters and huntresses, who enjoyed Thanksgiving day in taking shots at the wild waterfowl on the wing up in the rice-field country near Live Oaks, were marooned at that place for a week after the holiday. J. B. Coleman reached this city on Monday after being hemmed in for over a week, and he has a thrilling tale of his escape.

The hunters were hemmed in on all sides by overflows of water from the recent rains, and they had to be good swimmers or send out S. O. S. calls to get away. Coleman was forced to swim and wade over a mile before he reached the Live Oaks station and took the train for San Francisco. He is now suffering from a severe cold, and doesn't believe that hunting is the grand and glorious sport that it once was.

Other local nimrods up in that section who were marooned are Mr. and Mrs. A. G. Wilkes, Roy Avery and Mrs. Avery, and his mother, Thomas Wilkes, Colonel Dorsey and Mrs. Coleman. They were at the Greenhead Club, which is situated about fifteen miles from Live Oaks. The party had plenty of provisions and a dry place to sleep, but it is safe to say they did not enjoy being shut off from the outside world. Hunting is good, however, and their friends are counting on receiving some birds when the water recedes.

The neighboring clubs and preserves on the marshes have suffered from a similar experience, and some wild yarns may be in order when the bold hunters are able to reach their homes.

Charity Shoot Planned.—George Cline, prominent sportsman of Los Angeles, is working hard on the plans for the monster charity shoot for the poor of Los Angeles. This is the third year of the charity shoot, which was a great success last year, when over 2000 ducks were given away to the poor for Christmas dinners.

Cline wishes that all the hunters of Southern California would join with him in bagging enough ducks and rabbits to supply the poor of Los Angeles.

Cline has the consent of most of the gun clubs around Los Angeles to turn over their ducks to him.

A monster rabbit drive is being planned by Cline. According to him, there are thousands of rabbits near Lancaster, and if enough hunters are secured for the day of the drive, over 2000 rabbits could be secured.

All the ducks and rabbits secured will be gathered by Cline and will be distributed to the poor of the city the Saturday before Christmas.

Hundreds of hunters turned out last year for the shoot and a goodly number of ducks and rabbits were collected. Cline believes that a better number will be turned in this year.

Keep Gun in Condition.—Keeping a gun in condition is not such a difficult task if one gives the matter a little care and attention, but the trouble is that sometimes we feel a little lazy, and so "friend" gun suffers.

Among the many formulas given for browning or finishing gun barrels, the following is recommended:

Remove the old finish with an emery cloth and polish the gun barrel, using care not to touch the barrel with the hands or oil after cleaning. Then with a piece of absorbent cotton apply a solution made of the following:

Spirits of nitre	3 drams
Tincture of iron	3 drams
Sulphur	1 dram
Blue vitriol	2 drams
Corrosive sublimate	1 dram
Nitric acid	½ dram
Copperas	1 dram
Rain water	12 ounces

Set the gun barrel away to dry thoroughly and then repeat until seven or eight coats have been applied. After the barrel has had plenty of time to dry, wash thoroughly with a cloth and hot water, and polish with a piece of soft wool dampened with linseed oil.

For re-blueing barrels without heating the following applies:

Wipe the gun barrel free and clean of oil, rust or any other deposits, then apply nitric acid, using care to see that none of the acid touches the hands. Neutralize with water or a soda solution, oil the barrel and burnish. Unless you have had some experience under intelligent supervision it is better to leave the blueing process to a gunsmith.

Status of Sea Lions.—Eugene, Ore.—Of unusual interest to sportsmen is the recent opinion handed down by Circuit Judge Coke, of Marshfield, Oregon, defining the status of a sea lion and the duty of the counties regarding the payment of bounties for such animals.

Last summer William Hunter, a fisherman at Gold Beach, Ore., shot 247 sea lions and took the skins to the county clerk, who advised that the county could not pay the bounties of $1 a skin. He said that in the first place, a sea lion was not considered a seal, the hairy species of which bring a bounty of $1, and in the second place, that the boundaries of the county stopped at the shore line and did not extend to the three-mile limit.

Carl Shoemaker, state game warden, advised Mr. Hunter that he was entitled to the bounties in his interpretation of the game laws, so Hunter had a writ of mandamus issued compelling the county clerk to pay the bounties.

The court made the stipulation, however, that in such cases the state of Oregon should reimburse the county for half the amount of the bounties, inasmuch as the shore line was a part of the state as well as the county. This is the first case of its kind to be decided in Oregon.

PROPOSED CHANGE IN FISHING LAWS.

Report Is That Commission Will Recommend That Trout Season Open a Month Earlier.

Secretary J. S. Hunter of the California Fish and Game Commission admits that some legislative measures will be proposed when the legislature meets after the first of the year. The nature of the bills, however, will not be discussed, he says, until they are introduced.

"The field of hunting and fishing in the State has been gone over thoroughly," he explains, "and we have noted a number of things that will be recommended to improve the sport and at the same time work for the conservation of wild life."

Among the proposed measures is a bill for an earlier opening of the trout season, so it is reported on good authority. This matter was bound to be brought to the attention of the State law-makers as anglers were a unit in declaring that May 1st is too late. A recommendation coming from the Commission for an earlier opening will accordingly carry a deal of weight and will prove a popular move.

Until this year, April 1st has been the opening date and it was found satisfactory. Then the change was made and quite a rumpus was raised among the rodsters, who contend that they are being deprived of following their favorite sport just at the season when fish and water are in the streams.

Conditions this year were made worse by the fact that there was a dry spring with little or no rain during April and little in March. The small Coast streams were very low and trout were conspicuous by their absence. There was some good sport, of course, but the rank and file set up the argument that it would have been so much better if they had been allowed to fish during April. They claim that the fish are all through spawning by that time and no harm could be done.

The taking of so many small fish this year may also lead to a bill regulating the length of catches. In many states there are laws making the minimum catch five inches in length.

Just what the other proposed changes are is not known, but the Fish and Game Commission has been active in framing new laws for months past.

Seattle Proposes Changes.—Seattle anglers are in favor of throwing barriers about fishing so as to make for greater sportsmanship among the fishermen and at the same time give the fish a more even fighting chance.

The Seattle Bait and Flycasting Club went on record recently as favoring the passage of a bill in the next legislature absolutely prohibiting the use of salmon eggs as bait lure in Washington state above tidewater. The point on which this was favored was that by the extensive and unsportsmanlike use of salmon eggs the trout had not been given a chance, and also that so many of the small ones had been taken in this manner that it had gradually diminished the number until what was once one of Washington's greatest attraction to the sportsmen is now the poorest of any of the western states.

Another bill favored for passage in King county was to increase the size of trout to eight inches and bass to ten inches and limiting the catches. It was brought out by the committee drawing up this bill that both these fishes do not spawn until they reach the age and the size designated. By keeping to this size it is believed the number of both species will be increased in the streams and lakes.

To represent the club in the legislature President P. Pitt Shaw has appointed a committee which is expected to aid the club at Olympia in their endeavor to place these bills in the same gode.

The monthly fly and bait casting tournament of the Southern California Rod and Reel Club's casting auxiliary will be held Sunday at the Eastlake park grounds. The tourney is attracting more than usual attention, for the casters are just getting warmed up and expect records to fall at the December tournament. In the November meeting, which was a double-header, one world's record was equaled and another club record was smashed. A tournament between the Los Angeles casters and the San Francisco casters may be arranged for next month.

COAST DOG WINS HONORS AT BOSTON.

Little Tony Wagner Attracts Notice by Jumping Off Train to Show Ring.

You may talk about grooming a dog for a show, but once in a while a real dog will show without much artificial aid, and you can't help but praise one that does not need pampering to get on the block and show his points to perfecton.

At the recent Boston Terrier Club specialty show Little Tony Wagner was the winner. He had been "stabled" in one of the Wells Fargo barns for ten days because his owner, who had brought him from San Francisco, had no particular place to keep him. Tony, by the way, is not Pacific Coast bred. He was brought up right in Boston, where they are always getting the best Bostons—which should only be a natural thing—but he was expatriated at an early age. He was "The Man Who Came Back."

One cannot help but say "Gee!" when he reads an item in a certain paper about an expenditure of $10,000,000 by the women of America for poodles. If there are ten million dollars' worth of poodles even in the whole world then the worth of the other breeds must soar to a height which would defy the greatest mathematician we have ever known to estimate the figures. At a recent meeting of the Women's International Missionary Union in New Orleans, Mrs. R. L. Barker made the above statement. She did this in telling how American women make the money fly. You could buy the contents of all the poodle kennels in the world for much less than ten millions.

• • •

It is wonderful to sit around and listen to the experts tell you their theories of dieting a dog. The trouble is that most of the time the dogs are brought up on those fancy foods much like babies which are reared on a sort of correspondence school diet. I have a dog whose favorite food is a concoction of mashed potatoes, mixed with onions and sage and baked with pork gravy. She is crazy about it, and there is no dog of her breed around this neighborhood in better health or in better coat. She has never had worms, nor has she ever been attacked with any sickness. It seems to me that if there was less theory and more practice it would be far better for the dogs.—C. H., N. Y.

• • •

Just how big a dog may take in one's affections was demonstrated strongly one day last week, when Miss K. E. Henesey, of New York, lost a Yorkshire terrier, York Sunshine Girl. This little terrier weighed only a couple of pounds, but her owner would not have sold her for anything. Miss Henesey was called out to the kitchen of her apartment for some reason or another and she did not notice that her pet was following. There was a swinging door between the rooms and "Sally," as she was called at home, was caught in it as it slammed. Miss Henesey was panic stricken, and knowing that there was no veterinarian near by, called a physician who happened to be a high priced specialist. When he saw what the case was he said that he was no "vet." "Here's a check for $1,000," she said. "You have no objection to earning that, and if you can save her it is yours." The dog had a broken neck, however, and was beyond saving.

The night of her death "Sally" was laid out in state on a velvet cushion and about her were flowers and the ribbons, cups and other trophies that she had won in her show career. A prominent undertaker was ordered to furnish a little white satin-lined casket and she was buried in tiptop style at the Hartsdale canine cemetery alongside of "Toodles," another pet of other days. Over the grave is a tombstone with the names of the two inscribed.

Miss Henesey said she was going to take a trip to Europe to buy the best Pomeranian she could get to take the place of "Sally." The latter was said to be the best female Yorkshire in this country.

Dog Lost in Tree.—A valuable bull terrier dog, belonging to Mr. Roumel of Los Banos, happened to spy a cat the other day and, as dogs will, gave chase. The race continued for some distance, when the cat hied up into a cypress tree and the dog succeeded in getting ten feet up after his would-be prey. The cat, however, continued on to the top.

When evening came, the dog was missed, and the next day after a futile search, an ad, offering a good reward, was inserted in a local paper. About eighteen hours after the dog chased the cat into the tree some people happened to pass that self-same cypress tree, when a heavy object fell upon their heads. The said object proved to be the lost bull-terrier. The dog at first appeared dead, but soon gathered himself together, rolled over in the dirt with his pitch-covered fur, and hiked at a merry clip, in a bee-line, to his home.

Although up to his ears in pitch and dirt, the dog was welcomed with open arms. And thus ended a true little canine and feline story of human interest.

Organizers of trapshooting clubs evidently do not know that the Interstate Association gives trophies to newly-organized clubs. Of the many organized in October only two put in claims. They were the Garrett Gun Club, of Garrett, Ind., and the Oak Creek Gun Club, of Oak Creek, Col.

WHY NOT A TRAP SHOOTING LEAGUE?

Proposal Is Made to Get Up a Circuit in California to Have Some Sport.

Editor, Breeder and Sportsman:

Why don't the California trapshooters have a league of gun clubs and engage in contests like other States in the Union? Why not start right now and make arrangements and not be the last to fall in line?

We could arrange a league of five or six clubs with ten shooters on a team. There could be a shoot every month with each club taking its turn in promoting the events. We could have a banner circuit right here at home with no long jumps. Counting the professionals, we could have sixty to seventy shooters at every event.

Salinas, Watsonville and Pacific Grove could easily get together a strong team; Family Club of San Francisco another; Golden Gate Club one; Stockton, Modesto and Newman two teams and San Jose one. That would make six in the league and all so closely situated that it would make the transportation question easy.

Come on, brother Trap Shots, let us get together and arrange such a circuit or some other that is better, if possible. Oregon and Washington have just organized a league and California should have one. We should get busy and make all arrangements now so as to be ready to make a start in February.

We could start off the 1917 season with a bang. Everything points to the biggest and most prosperous year of all in 1917. More big tournaments are already being mapped out for next season than ever before and every shooter should boost for more events that will attract attention and keep up the interest. Yours respectfully,

CALIFORNIA TRAP SHOT.

Portland Club Meeting.—On December 12th the Portland Gun Club of Portland, Ore., will hold its annual meeting. At that time they will elect new officers for their club. The last year has been unusually successful, and this is in a large measure due to the efforts of the retiring officers, who are: A. W. Strowger, president; H. A. Pollock, vice-president; Frank Templeton, secretary; John G. Clemson and R. A. Tyler, directors.

During the annual Rose Festival the Sportsmen's Association of the Northwest held its contest, with 101 entries. The Pacific Coast Handicap, held in Portland on September 12-13-14, was largely attended, and the interest taken was remarkable. The "Rose City" has also been awarded the Sportsmen's Association of the Northwest shoot and the Pacific Indians for 1917. The club has recently erected cement trap houses and cement shooters' stands.

Leading Shot of Season.—Fred Harlow of Newark, Ohio, who won the Grand American Handicap at Columbus, Ohio, in 1898 by defeating Woolwolk Henderson of Kentucky in the shoot-off—Henderson having tied him on a score of 92x100 targets—will probably rank as the leading amateur trapshot of America this year, he having an average of .9771 on 2,010 targets. Henderson, whom he defeated at Columbus, is close on his heels with a percentage of .9714 on 2,550 targets, and as these two men are the only ones this year to break better than 97 per cent, it is presumed that when the scores are all averaged up they will stand in the order above named. Harlow, in 1898, the season when he won the handicap, was not widely known outside of his own locality, and he was placed on the 16-yard line by the handicapping committee, while Henderson, who was much better known, was placed at 19 yards, and it was probably the three yards' difference in distance and Henderson's great desire to win the event that caused him to lose the shoot-off.

Compliment to Elmer E. Shaner.—"The Father of organized trapshooting."

That's how the trapshooters of the United States and Canada speak of Elmer E. Shaner. Elmer lives in Pittsburgh, Pa., but he is no millionaire. He is just the tournament manager and treasurer of the Interstate Association for the Encouragement of Trapshooting.

He's the Ban Johnson of trapdom—but without the domineering methods of the czar of baseball.

Shaner's title is deserved. For more than a quarter of a century he has devoted all his energies to the promotion and improvement of trapshooting and he more than any one else,is responsible for the high place trapshooting holds in sporting circles today.

Shaner knows trapshooting as well as Connie Mack knows baseball. Need any more be said? He is fair, unbiased, honest to a fault, always determined to do right and keep abreast of the times. Trapshooters know this. They have great respect for the judgment and ability of Elmer Shaner.

Some time ago, when the thought flittered through my mind that it wouldn't be amiss to say a few kind words for Mr. Shaner, I asked one of the leading trapshooters of this country to give me a little "dope"—as we say in newspaper offices—on him. This is the answer I received:

"It is rather hard to say anything about Mr. Shaner and yet it is hard to say enough about him and what he has done for the good of trapshooting."

There are several hundred thousand just like this one. You can go just as far as you like with praise, the sky is the limit. During his many years of service, Shaner has made as many friends as any man in the country and has established a reputation for fairness that is second to none.

Twenty-eight years ago Shaner was instrumental in the formation of the Pennsylvania State Sportsman's Association and managed their tournaments until he was drafted by the Interstate Association, in 1893. He held the office of secretary-treasurer of the Interstate Association until three years ago, when he resigned the office of secretary.

It was the genial Elmer who worked out the details of the registered tournament system and all the other systems that have been promoted successfully by the Interstate Association. Back in the early days of trapshooting, if it had not been for his integrity many evils would have crept into trapshooting. He has kept the sport clean in every way.

He is the right man in the right place. A better man for the position could not be found. Trapshooting has not been any see-saw proposition with Shaner at the helm. There have been no ups and downs. It has been one of continuous upbuilding.—[By Peter P. Carney.

Reports from Sacramento.—If the present rainstorm continues, says President F. M. Newbert of the State Fish and Game Commission, duck hunting for the unattached hunter will greatly improve. The rain will offer more ponds for the birds in the rice district, in the valley and in the Yolo Basin, and the ducks will scatter outside of the duck club preserves.

Reports of game conditions received by the Commission for this week say:

Alturas—All marshes frozen. Ducks and geese have left.

Newman—Ducks and geese very plentiful from Gustine to Mendota.

Dana—Ducks are just coming in. Mostly widgeon and black jack. Few geese.

Truckee—Storms will benefit duck hunting. Very little hunting at present. Ducks and geese on lakes not so numerous. Ducks very wild.

Weaverville — Many ducks in the Junction City section.

Williams—There are still lots of ducks between Colusa and Williams.

Willows—Hunting open to all, under permission from ranch owners. Rice lands open since crop was harvested. Ducks and geese plentiful.

Live Oak—Ducks and geese plentiful on preserves and members bagging the limit. Not very good on open territory, but will improve if rains cause Butte Creek to rise.

Gridley—Many hunters in this section are getting limits. Birds are fat, on account of feeding on rice fields.

Biggs—Hunting continues to be good. Ducks and geese are plentiful a distance of three to ten miles out. Have had some good rains and rubber boots are necessary.

Hunt at Sweetwater.—The first big duck drive of the season took place last week at the quack hunters' pet lake, famous old Sweetwater. And it was a real hunt. First in the boats, first in command and first in the gathering of webfeet, was Commodore Stanley Andrews of San Diego.

Sweeping out from the dam the boats formed a graceful crescent that slowly forged up the lake, and anon, from the center of the line, Commodore Andrews roared his orders from the bridge of his flagship, the Leaky Punt. Many times the wily webfeet maneuvered to outwit the hunters, but always there was a closing of the gaps and a barking of guns that meant meat.

Dean of the squad was Colonel Fred Jewell, whose efforts at quack killing were aided by Walter Jewell, Rance Hammond, Charley Rinehart, Fortune Lavier, Ed Kaley, Mead Cornell, Mr. Riley and his son, E. J. Hermindinger, E. H. Post, Eddie Overland Davies, Floyd Topping and Stanley Andrews. More than 300 ducks, a few less than the legal limit for each gun, found their way into the boats, and the drive was finished at 2 o'clock.

Damman Fulton showed the outfit every courtesy and provided a fleet of fine punts. According to Mr. Fulton, the program at Sweetwater this winter will include three forays each week, but there will be no Sunday hunts.

For years Old Sweetwater's fame has been chanted by San Diego's Brotherhood of Chilled Sixes and yesterday's hunt was another joy chapter in the history of this celebrated lake.

Kellogg, Idaho, Club.—The most successful shoot ever held by the Kellogg Gun Club was attended on November 26th by 32 trapshots, the result being that 38 turkeys, 20 ducks and six geese were distributed among the participants.

There were four classes, the beginners forming the largest squad. Fred P. Porter won the stick-pin offered by Frank Venable, tying with Turner with 42 out of 50 and winning in the shoot-off, 22 to 18. There were five 10-bird events in each class, the following being the scores:

Class A—Porter 42, Venable 36, Thomas 40, Nicholson 36, Sebastian 26, out of 30.

Class B—Gibbs 32, Turner 42, Martin 36, McDougall 38, Johnson 38, Kennett 26, out of 30.

Class C—Armitage 36, Teape 35, R. Jones 37, Heitfeld 38, Hadley 24, out of 30.

Beginners' class—Ingersoll 19x30, J. E. Jones 4x 30, McIntosh 11x30, Smith 16x30, Papesh 17x40, Rock 10x20, Presler 4x20, Bowers 4x20, Corbe 11x30, Macheski 6x30, Conley 6x20, Timpe 23x30, Carter 17x 30, Crim 26x40, Maddox 6x10, Coates 22x30.

GREAT HUNTING SEASON NOW ON.

Duck Is Shot at Mt. Eden with Government Band on Leg; Market Hunters Busy.

Many old hunters are enthusiastically claiming that the best hunting season in Northern California in years is now on, and reports from the southern sections of the State are just as encouraging. The reason advanced for the improved conditions—especially in comparison with the lean season of 1915—is that no shooting of waterfowl was allowed during the month of February and the birds had a chance to breed.

Certainly home-bred birds have been very prominent. Until a couple of weeks ago few of the northern birds were reported as putting in an appearance and still limit bags were the general rule. Now that the flight is arriving, hunting has picked up. The driving rain of Friday a week ago had the effect of driving the birds off the bay and made shooting great for the boys who turn out on the week-ends. If the rain continues the ducks will likely scatter to feed at the new ponds in the interior but game is so plentiful that there will still be enough left to provide sport up until the closing days in January. Of course, you never can tell, for one big storm may drive all the birds south.

San Joaquin Valley and Colusa continue to stand out as the ideal places to get limits. According to the shipping statistics kept by the Fish and Game Commission, it is estimated that the daily kill in the San Joaquin Valley district has been 2500 daily. The figures seem stunning at first glance, but every one who has been down that way declares that they have never seen birds more numerous and so many hunters.

A feature last week was the shooting of a spoonbill with a government band on its leg at Mt. Eden. Billy Flannagan brought it down and in accordance with the request sent out, he sent the leg and ban to the San Francisco office of the commission. Unfortunately the man carrying the leg lost it, but the figures were noted and a report will be sent on to Washington.

Some interesting data may result. Last year the government liberated a number of ducks that had been captured at Salt Lake while sick and placed bands on their legs. Records are being kept on how the ducks migrate. If Flannagan's bird proves to be one liberated at Salt Lake it will disprove the theory of scientists that ducks migrate only to the south and north.

Market hunters are again getting active in violating regulations to exterminate game. Two were caught in the San Joaquin valley stalking ducks with a horse. The fellows used the "bull" gun with its four barrels of eight-gauge. Four shots are said to have slaughtered 100 ducks. The fellows were taken to Merced and fined $100 apiece. Three others were caught at Princeton in Colusa county using the hides of cows to sneak up on game and deputy S. J. Carpenter secured one conviction with the two other cases still pending.

Portland to Fight Bill.—The Chamber of Commerce is preparing already to put a quietus on the bill which seems likely to bob up in the legislature again in the coming session which, if passed, will put duck shooting out of the running as one of the sports of the Willamette and Columbia rivers country.

The bill aims to enact a law to prevent the feeding of wild ducks in the lakes along these rivers. It was up at the last legislature, and some thought it a joke, but it developed a rather alarming strength before it was beaten. Information has come to the chamber that the bill is to be brought up again in the next session.

Presumably the interests that are backing the bill are located in Southern Oregon and Northern California—whither the wild ducks would have to fly, taking with them the duck hunters, if feeding were abandoned in Northern Oregon.

In the early days the wapato, which furnished food for wild ducks, was luxuriant along the sloughs and lakes of the Columbia and Willamette.

Then some philanthropist introduced carp into the Columbia and the carp promptly exterminated the wapato and left the ducks foodless.

So the owners of the duck lakes began feeding, and the sport remained good, but it will remain good only while the ducks are fed.—[Portland, Ore.

Owl Attacks Hunter.—Challenging the hunter after he had brought down a plump mallard on the Nisqually flats, near Tacoma, a big white Arctic owl flew at Allan H. Gilchrist with snapping beak. Gilchrist had just shot the duck, which had fallen on the ground, when the owl swooped down upon the dead bird.

Gilchrist approached, but the owl instead of retreating flow at the hunter and attempted to drive him away. Gilchrist struck at the owl with his gun, but did not succeed in driving it away. While loading his gun to fire at the bird, the owl swooped down on the duck again and started to carry away the prize in its talons.

Gilchrist then brought down the owl with a well-placed shot and later exhibited to his friends unique and double trophies of the chase. Arctic owls are reported by sportsmen to be quite common in the Tacoma section now, although they were formerly regarded as a great rarity in that latitude.

Sportsmen's Row

The Portland (Ore.) Gun Club has erected concrete trap houses.

• • •

It would be interesting to know what type of clay target smashing weapon is most in vogue in different sections of our land. An accurate count has been made during a popular shoot embracing contestants from Philadelphia to Boston, and it was found that 64½ per cent used the special single barrel weapon, called "trap-gun," 20½ per cent used double-barrel guns and 15 per cent used repeating guns. It is quite likely that in the Middle West the order would be reversed and on the Pacific Coast another order of choices would prevail.

• • •

Hundreds of mining companies, industrial concerns and athletic associations have added trapshooting to their list of interests during the past year. Many concerns recommended it to their employees—notably the Pennsylvania Railroad Company.

• • •

The Interstate Association intends to have announcers at the big shoots next season, also to try and have the most competent referees and trap pullers procurable. When the traps are pulled properly and the referees are keen the trapshooters go home satisfied. Satisfied men and women are what make sports successful.

• • •

It isn't often that one sees a clergyman at the traps, but in the Pacific Handicap in Portland the Rev. J. R. Olson was one of the most interested shooters. He is an expert.

• • •

At a recent tournament of the Omaha Gun Club Al. Koyen, of Freemont, Neb., and Cal. Wagner, of Diller, Neb., tied and it required five shoot-offs to break the tie. This is possibly a world's record for shoot-offs.

• • •

One of the most important changes in trapshooting methods that will take place next year—important to newspapers as well as to readers—is that there will be room for the address, city and State, of the trapshooters on the score sheets. It will be no difficulty hereafter to find out where a shooter is from.

• • •

Statistics just compiled show that there is thirty millions of dollars invested in baseball and forty millions of dollars invested in trapshooting in the United States. Trapshooting is a vastly bigger sport than a great many people imagine.

• • •

Trapshooting on United States warships has been a popular form of amusement for some time and as a result several of the officers have become expert shooters. Paymaster F. R. Holt, U. S. S. "Louisiana," recently set up a mark that is likely to stand for some time. The paymaster broke 97 targets out of a possible 100. This is mighty fine shooting and establishes a record in the Navy which, to our knowledge, has never been equaled or surpassed.

• • •

Dr. McGettigan of the Family Club is the latest convert to the 20-gauge. He has been getting in some good shots at the Volante Club and will soon be able to take on Jim Maynard.

• • •

Sitting in a boat for long periods at a time gets tiresome, for some reason or other the seat has no soft spots. Here's the answer recently sent in by a fishing bug. "Go to a carriage trimmer and get a piece of buggy top, with it make a cushion about twelve by fourteen inches, sew it all around except at one end, and in this open end punch holes for frequent lacings. This will fold flat and take up very little room. When you get to your destination fill up the cushion with leaves or balsam boughs and lace up like a shoe. With this under you, you will find the sitting much easier."

• • •

Edward Swanson, a member of the Butte (Mont.) Anglers' Club, has to his credit a catch of the biggest trout caught in the Big Hole Country this season. Mr. Swanson's catch consisted of one "rainbow" that weighed eleven pounds, eleven ounces dressed and another that tipped the scales at ten pounds, two ounces.

• • •

Do not run races with the fisherman ahead of you on a stream or try to beat him to the best pools. If you are passed by an angler from behind let him go ahead as fast as he can, because the faster he goes the less fish he will catch.

• • •

Newt Neustadter has already imported three Llewellin setters from Virginia and now he is going to send to England for a bitch.

• • •

J. Walter Scott, President of the Los Banos Gun Club, has been having some great sport. He bagged his 275th duck of the season last Sunday and of this number he has eaten only eight. J. Walter remembers his friends.

• • •

Five cities want the Grand American Handicap in 1917. At this writing Chicago looks like the best bet.

The trout fishing season, which drew to a close on November 30th, was one of the most successful in years, according to W. H. Shebley, head of the fish culture department. He declares that trout were found in abundance in all sections of the State and prospects are bright for the fish planting operations for the season panning out well.

Seattle to Give Show.—Seattle, Wash.—The Seattle Kennel Club, one of the most enthusiastic, hard-working dog clubs in the United States, expects to hold a five point show next spring. Last March they held the only four point show on the Pacific Coast or Northwest, going one point ahead of California. Dogs from five different States were represented, and the show was a most successful one. Seattle has that strong "get together" spirit which means so much toward the success of a show. They think only of the success of the game out here. The secretary, George Tinto, a hard working Scotchman, is receiving letters every day from fanciers in the East, for it is worth a trip out here to gain five points toward championship. A very able set of men compose the officers of the club in Dr. L. W. Brydon, as president; J. Alvah Scott, vice-president; George Tinto, secretary; Earl Fry, treasurer, and Captain Charles Tennant, William Guldenfeldt and "Tom" White, trustees.

Seattle is taking a prominent place in the dog world and owns some of the finest dogs in the country. She always obtains the best of judges from the East for her shows, which insures large entries. There are some fine judges on the Pacific coast and in British Columbia, but exhibitors are always wanting some new judge, and from a great distance, therefore the fancy usually goes East for judges.

One of the latest additions to Seattle's dogdom is the location there of George Henry Keyes, formerly of Boston, Mass., owning the famous Sagamore Kennels. As an authority on Bostons, having judged several times at Boston and other large Eastern shows, Mr. Keyes will be welcomed by the numerous Boston fanciers and dog breeders in general. Mr. Keyes brought several of his best dogs out with him, including Sagamore Sag, who took winners at the Boston show in 1914 and winners at the Barnstable (Mass.) show of this year; Sagamore Polly, a reserve winner at the Barnstable show this year and winning puppy bitch at the Boston show in 1915.

Green Lake Club.—A summer's vacation from the trapshooting game did not seem to take the edge off the eye of J. H. Hopkins, who led a field of fifty-one shooters at the Thanksgiving turkey shoot of the Green Lake Gun Club on November 26th. Hopkins, who had been in Nome all summer, had not shot at a target in six months. He broke forty-six out of fifty targets.

L. H. Reid stood high in the professional class of six, breaking forty-three, shooting the last thirty from the 22-yard line. The professional class was enlarged by the presence of Frank Riehl, of Tacoma, and E. Valeen, of Spokane.

A total of twenty-three turkeys were given in the regular events for the amateurs and five in the professional class. Three birds were also given in the consolation event, a donation by the club to those not winning a turkey in the regulars.

A feature of the program was the handicapping of all contestants before starting, that all might be placed upon an equal basis. So satisfactorily did this scheme work out that only three were able to win two birds. Shooting from the 20-yard line, I. M. Fisher, professional, had to break a run of fifteen in order to win his bird from L. H. Reid and George Hambright. Several of the ties resulted in spectacular shoot-offs, the longest being made by J. Converse with sixteen, nosing out Hi Follrich, also on the 20-yard mark, who dropped his sixteenth target.

Several extra events were staged after the regular program was completed, which brought the total number of turkeys up to thirty-three.

Those winning turkeys were N. Hubinger, two; George Scripture, two; C. B. Fitzgerald, two; W. W. Barr, L. R. Reid, Dr. S. W. Case, D. Rhodes, J. H. Hopkins, Dr. King, W. H. Carstens, D. Huber, W. J. Northfoss, J. W. Geltz, J. V. Hough, A. E. Drake, E. Valeen, Matt Grossman, George Hambright, J. Converse, Frank Riehl, Dr. A. B. Kidd, Dr. Newton, H. P. Warner, I. M. Fisher, E. E. Young, Dr. J. F. Hill, Fred Call, L. S. Barner and G. A. Conklin.

Scores: J. H. Hopkins, 18 yds., broke 46; W. W. Barr (18) 45, N. Nubinger (16) 44, Dr. Newton (16) 44, *L. C. Reid (20) 43, Hi Follrich (20) 43, Fred Call (20) 42, C. R. McConnell (16) 41, *Frank Riehl (20 41, *I. M. Fisher (20) 41, Jack Converse (20) 41, C. E. McKelvey (20) 41, W. H. Carstens (20) 41, J. V. Hough (18) 41, E. E. Young (18) 41, George B. Baker (18) 41, Robert Tyler (16) 41, Dr. King (20) 40, H. P. Warner (16) 40, *D. Rhodes (20) 39, *E. Valeen (20) 39, J. W. Geltz (18) 39, D. R. Baker (18) 39, S. A. Martin (18) 39, A. E. Drake (18) 38, Matt Grossman (20) 38, J. Ruppe (20) 38, Dr. J. F. Hill (18) 38, Dr. A. B. Kidd (18) 38, L. S. Barnes (20) 37, G. A. Conklin (20) 37, Dr. Winningham (18) 37, C. W. Bandy (18)36, A. L. Hall (18) 36, C. B. Fitzgerald (18) 36, C. Chantlerr (16) 36, H. Cosgrove (16) 36, D. H. Huber (16) 38, George Scripture (20) 35, W. J. Northfoss (18) 35, W. A. Rosenfield (16) 35, Dr. S. W. Case (16) 35, C. R. Sydman (18) 32, E. M. Hansen (16) 32, F. F. Gearhaardt (16) 30, W. Nelson (16) 29, H. E. Gleason (16) 28, L. A. Taylor (16) 26, A. J. Gerrard (16) 28, Dr. Slyfield (16) 13, J. H. Taylor (16) 12. (*Professional.)

HUNTING TOLL HIGH IN FIFTEEN STATES.

California Has Record of Two Killed, But More Care Should Be Exercised.

Hunting accidents of the year:

States—	Killed.	Injured.
California	2	2
Colorado	2	3
Illinois	13	7
Indiana	3	3
Iowa	4	2
Maine	1	.
Michigan	22	11
Minnesota	2	1
New Hampshire	1	.

Totals	86	40

Eighty-six known dead and approximately forty injured is the hunting toll in fifteen States for the season which ended on November 30th, as compared with fifty-nine dead and sixty-six injured last year and 111 dead and 162 wounded in 1912.

Last year's statistics were gathered from eighteen States. The figures presented herewith not only included the victims of the short deer season, but those of the rabbit and duck season.

"Mistaken for deer" and carelessness on the part of hunters account for the many dead and wounded.

Michigan, as during the last several years, leads in the number of dead with twenty-two. The season in Illinois produced thirteen deaths, while in New York eleven dead are reported.

Ten thousand hunters combed the woods of Northern Michigan for deer, while it is reported a like number invaded the forests of Minnesota and Wisconsin.

Game Commissioner Otis of Michigan described the deer season just closed as "the worst ever."

"This year the hunters seem to have gone into the woods together the day after election, or the next day," he said. "As a result they were in bunches, not scattered as they usually are, and at the same time all were in a hurry to get back home. That accounts for the nervousness and shooting at sounds without waiting to see what really made the noise."

"Of course, carelessness was one of the chief causes of so many deaths and injuries, and one would have thought that this year, above all others, would have been a 'safety-first' year. The papers in the upper peninsula printed every day since the season opened a list of 'don'ts' and woods were placarded with 'dont's' where everybody should have seen them as they never were before.

"The only thing I can think of that will put an end to the great number of casualties is a 'buck law,' and I am going to do my level best to have the next Legislature pass such an act. Judging from the results in Wisconsin, that will keep down the shooting at sounds, which accounts for a great number of the killings. In Wisconsin they had such a law last year, and the number of deaths was cut down."

Probably the most peculiar accident that marked the hunting season was the death of Solon Linn, 12 years old, who was shot by his dog. Solon locked the animal in the barn. The dog broke loose, overtook the boy, pulling the gun's trigger with his paw. The charge entered the lad's head.

Auto Runs Down Goose.—There are all sorts of ways of getting a big, fat goose for birthdays, Thanksgiving and for any other occasion, but to break the neck of a choice wild goose with the fender of an automobile on a lonely road after dark, puts to shame the wildest stories of the imaginative huntsmen. This freak of good fortune, however, actually happened to J. C. Burgess of Sacramento one night last week, at about 8 o'clock, on the road between Sacramento and Woodland. M. Stein was a witness to the remarkable incident. Incidentally the goose and the weird story of its capture came as a surprise to Mrs. Marion Burgess, secretary to Mrs. Margaret McNaught, commissioner of elementary education, who celebrated her birthday with a wild goose feast.

Burgess and Stein were returning by auto from Woodland over the Yolo causeway. Before them they saw a large, wild goose, undoubtedly blinded or dazed by the glare from the auto headlights, running directly before the car. The fender struck it in the neck as Burgess tried to avoid running over it. The bird was found to be fatally injured and was duly killed and returned to the Burgess home in Sacramento, and had it not been remembered that Mrs. Burgess had a birthday anniversary the game would have served as the main dish of a Thanksgiving feast at the Burgess home. Mrs. Burgess tells the story, and refers all to Stein and her husband for verification.

1230 Deer Killed (L. A.)—The deer census being completed by the Fish and Game Commission for the State now shows that the counties comprised in the Los Angeles administrative district aggregated 1230 bucks. Kern County led with 375 reported. Santa Barbara ran up ahead of last year with 270. Ventura, 213, was third. Los Angeles yielded 153; San Bernardino, 60; Inyo, 54; Riverside, 45; San Diego, 35; Orange, 20; Imperial, 5; "finished as named."

COAST FIELD TRIALS OPEN THURSDAY.

Large Gathering of Financiers Will Go to Bakersfield For the Thirty-fourth Annual Events.

On Thursday of the coming week, the thirty-fourth annual field trials of the Pacific Coast Club, one of the oldest organizations in the country, will open at Bakersfield. Indications point to a banner attendance with fanciers from all parts of the Coast present.

John H. Schumacher of Los Angeles will officiate as presiding judge with Phil M. Wand and J. W. Flynn as associates. Reports received from the preserves about fourteen miles out of Bakersfield, where the trials will be held, are to the effect that conditions are ideal for the pointers and setters to show at their best.

President A. G. Wilkes and Secretary S. Christenson declare that there will be many new dogs in the competition this season. There has been a revival of interest in field trials all over the country. It was felt on the Coast this year when Oregon, Washington and Vancouver staged trials with success.

That the trials will be well attended is indicated by the reservations made by the following members: John McKeon, Taft; C. E. O'Neill, Frank J. Ruhstaller, W. W. Richards, S. Christenson, Roy Avery, Mrs. Avery, A. G. Wilkes, Mrs. A. G. Wilkes, Thomas Wilkes, John W. Considine, J. S. French, J. Walter Scott, L. S. Hawxhurst, John M. Kilgarif, C. J. Mathews, Hugh Crunney, J. A. Chanslor, Dr. Arthur Beardsley, Henry Cartan, William Dormer, Charles L. De Ryder, S. P. Eastman, J. W. Flynn, E. C. Ford, John H. Schumacher, W. W. Sweeney, Martin I. Smith Sr., and Jr., Lansing Tevis, Lloyd Tevis, Phil M. Wand, George W. Wingfield, Peter B. Kyne, J. Bishop, Henry Cline, Fred de Augustine, Robert Hardman, Stanley Anderson, Mr. Beckhalt and a number of others.

The three usual fixtures—The Derby, All-age and Member stakes—will be contested. The entries will remain open until the night before the trials when the drawings will be made.

Shell Mound Pistol Prizes.—The Shell Mound Pistol and Rifle Club, one of the most popular shooting societies of the Pacific Slope, held its tenth annual shooting festival Sunday on the Shell Mound range. It was fully attended and resulted in satisfactory scores.

When the shooting ended at dusk, the members of the club and a number of guests partook of a banquet served in the banquet hall of the club in Shell Mound Park.

Judge James G. Quinn of Oakland officiated as toastmaster, and during the ceremonies a large number of valuable prizes were awarded to the marksmen. Following are the principal scores of the yearly competition and the winners:

O. Lillemo, king of the Shell Mound P. and R. Club.

T. H. Johnson, the Siebe handicap trophy championship.

C. W. Seely, the first prize on the special bullseye, 200 yards.

F. A. McLaughlin, the Orpheum trophy on the 50-yard special bullseye.

Two hundred yards, 10 best scores for the year:

Class A—E. Schierbaum, 2155; A. Thompson, 2105; R. T. Wixson, 2046; K. O. Kindgren, 2042.

Class B—A. M. Poulsen 1937, O. P. Peterson 1925, C. Otten 1890, H. Purman 1853.

Class C—L. Erickson 1996, G. R. Hauser 1843, John Bender 1828.

Class D—T. H. Johnson 1715, B. Brunje 1668, R. A. Paulson 1442.

Fifty-yard Pistol Range—Class A, R. T. Wixson 909 and O. Lillemo 883. Class B, C. M. Kraul 855, L. Erickson 846 and A. M. Poulsen 825. Class C, E. Bridge 871, F. P. Poulter 842 and Dr. R. A. Sommers 828. Class D, A. Hartman 821, A. Thompson 805 and O. P. Peterson 791.

Fifty-yard Special—F. A. McLaughlin 11½, E. Schierbaum 15, F. P. Poulter 21, H. Kroeckel 21½, A. Thompson 23, L. Erickson 25½, H. Kliienenbroich 35½, O. Lillemo 36½.

200-yard special bullseye, total three best centers: C. W. Seely 68, F. A. McLaughlin 69, L. Erickson 101, K. O. Kindgren 103½, E. Schierbaum 108½, Al Thompson 132½, G. R. Hauser 167½, C. Otten 169½, John Bender 172, C. Weggermann 217½.

Tough on Green Hunter.—Of course, you've heard the bewhiskered story of Christy Mathewson and the greenhorn friend he took quail hunting into the Tennessee hills. Well, they take their guns and go out after the Bob Whites. All of a sudden, Christy sees his friend's gun pointed at a quail running in the path ahead.

"Hey! You're not going to shoot him while he's running?" cried Matty.

"Nope. I'm going to wait till he stops."

This may not be apropose, but the other day in Portland Rube Foster took his first duck hunt as the guest of a coterie of friends who have a preserve at the Sauvies island duck lakes. To be exact, Rube was there on the invitation of Messrs. A. L. Finley, state biologist; E. B. Chandler, W. J. Brady and Kenworthy.

A flock of wild ducks, noting the apparent security of some of the tribe darting hither and thither over the lake, began to settle down.

"Bang!. Bang! Bang! Bang!" went the guns of the old hunters. What wild birds were left winged rapidly out of reach.

"Bang!" came a belated shot.

Smoke was seen issuing from the muzzle of Rube's gun ,and a live decoy in the lake rolled over on his back, wiggled his webs in Rube's direction and expired. The effect was too great on Rube's overwrought nerves. The bank gave way under his feet, and dervish, the "pride of railroad row," 'took an unexpected bath in the 32-degree water.

Northwest Trap Circuit—The Spokane trapshooters are spoiling for a chance to prove that the Inland Empire can produce 10 men who can defeat any 10-men team in either the Puget Sound territory or the Columbia-Willamette valleys in the proposed series of team shoots to be held in Spokane, Seattle and Portland, the first of which was set for Portland last Sunday, but postponed on account of the field meet of the Oregon Sportsmen's League, previously arranged for at Everding Park.

Charley O'Connor, the president of the Spokane Gun Club, declares that the Inland Empire marksmen have "shot the wadding out of the Coast men many a time before and can do it again." The bold Charles has evidently been sounding out his territory and Spokane may be expected to bring down a strong aggregation from that city, the Palouse country and Northern Idaho, in which there are many trap experts of high class.

Shooters from outside the three cities are keen for the team shoots. It is the first opportunity they have had to take part in contests of the kind without qualification or selection. All they have to do is to come and enter. If they happen to strike a good gait and land among the first 10 in their territory, and that territory produces the 10 high men, the purse is theirs as well as the glory. There will be other events also for their entertainment.

The dates for the three big team shoots will shortly be announced. Each club is making provisions for bad weather in case it should be encountered. They are also devoting much attention to the social features of the shoots, which will be much more elaborate than usual.

Averages of Pro Shots.—It has taken a remarkable bit of shooting to place Homer Clark, the little professional of Alton, Ill., at the head of all the professionals in the country during the 1916 trapshooting season. According to Sporting Life's official trap shooting averages of all of the professionals in the country in the registered tournaments of the Interstate Association, Clark has set the remarkable average of .9800 on 2100 registered targets.

Out of this total Clark missed but 45 targets. It was a most noteworthy performance, inasmuch as he beat out Lester S. German, of Aberdeen, Md., who was runner-up with an average of .9730 on 4700 targets. The third man in line is Art Killam, of St. Louis, Mo., whose average is .9862 on 6,385 targets.

Ranking fourth comes the veteran, William R. Crosby, of O'Fallon, Ill., who on 5546 targets established an average of .9670. The fifth professional is E. L. Mitchell, of Los Angeles, Calif., with .9670 on 1000 targets. C. G. Spencer of St. Louis, Mo.; C. A. Young of Springfield, O.; Rush Razee of Curtis, Neb.; John R. Taylor of Newark, O., and H. D. Gibbs of Union City, Tenn., follow in order.

Peculiarly enough the man who has shot the greatest number of targets in Interstate registered tournaments this year is that veteran of more than a score of years' service in the professional ranks, Fred Gilbert, of Spirit Lake, Ia. Gilbert has shot at 9890 targets and established the fine record of .9391.

These averages are of 406 registered tournaments shot during this season.

The figures on Coast professionals are: J. R. Brennon, Sacramento, Cal., shot at 300, broke 22, .7500 per cent; A. W. Bruner, Los Angeles, 200x162, .8100; C. Burtch, Vancouver, B. C., 300x216, .7200; J. R. Bull, Portland, 990x914, .9232; J. Cadham, Vancouver, B. C., 250x221, .8840; C. Clement, Pasadena, 300x253, .8433; L. A. Cook, Oakland, 2110x1915, .9076; S. W. Dimick, 910x723, .7945. F. A. Dryden, Spokane, 1790x1658, .9263; W. R. Ellis, San Francisco, 1260x1063, .8437; M. O. Feudner, San Francisco, 950x857, .9011; I. M. Fisher, Seattle, 890x788, .8854; J. S. French, San Francisco, 210x130, .6190; G. H. Harrison, Seattle, 700x662, .9457; P. J. Holohan, Portland, 3640x3373, .9266; L. S. Hawxhurst, San Francisco, 2110x1986, .9412; C. A. Haight, San Francisco, 1910x1598, .8366; J. G. Heath, San Francisco, 400x341, .8525; W. J. Higgins, Sacramento, 600x476, .7933; G. Holohan, Los Angeles, 1940x1816, .9361; H. A. Hoyt, Los Angeles, 1000x885, .8850; O. N. Jones, San Francisco, 800x615, .7687; C. Knight, San Francisco, 1500x1339; .E. L. Mitchell, Los Angeles, 1000x967, .9670; W. J. F. Moore, San Francisco, 200x121, .6050; E. B. Morris, Portland, 2040x1814, .8892; G. E. Oliver, Los Angeles, 1600x1383, .8644; H. E. Poston, San Francisco, 3650x3473, .9515; R. C. Reed, San Francisco, 1810x1740, .9613; J. E. Reid, Portland, 1565x1367, .8735; R. Rhodes, Seattle, 450x375, .8333; H. Ricklefson, San Francisco, 900x703, .7811; F. C. Riehl, Tacoma, 2690 x2510, .9331; L. H. Reid, Seattle, 2740x2605, .9507; C. J. Schilling, Portland, 1210x1110, .8952; W. O. Shreves, Mayfield, 150x128, 8533; E. L. Valleen, Spokane, 900x776, .8622; W. F. Willett, San Francisco, 1100x993, .9027; A. Woodworth, Spokane, 1390 x1241, .9144.

SAN JOSE GETS COAST HANDICAP SHOOT.

Interstate Association Awards Grand American to Chicago; Local Shots Win Sunday Tournaments.

Press reports carry the information that the San Jose Blue Rock Club beat out the Golden Gate Club for the honors of holding the Pacific Coast Handicap. At the meeting of the Interstate Association on Thursday, the fixtures were awarded and other action taken. One of the most important was the permission granted to hold registered tournaments on Sunday.

The Breeder and Sportsman was the first paper to take up the fight of Coast shooters for the right to engage in registered tournaments on Sundays and we feel gratified that the trap shooting officials have adopted the sensible move. It means a big boost for the sport out this way where trayshooting is in popular favor on Sundays. The report on the meeting is as follows:—

New York, December 7.—At the twenty-eighth annual meeting of the Interstate Association for the Encouragement of Trapshooting, held here today, the grand American handicap tournament for 1917 was awarded to the South Shore Country Club of Chicago. The Western tournament will be held under the auspices of the St. Joseph Gun Club, St. Joseph, Mo. The Roanoke Gun Club, Roanoke, Va., was chosen to take charge of the Southern tournament. Hartford, Conn., will be the scene of the Eastern tourney, and the Pacific Coast handicap will be shot over the traps of the San Jose (Cal.) Gun Club. The dates for all these events will be arranged early next year.

T. E. Doremus of Wilmington, Del., was re-elected president and T. H. Keller of New York vice-president. F. R. Shaner of Pittsburg, Pa., secretary, and Elmer E. Shaner, Pittsburg, manager and treasurer, also were re-elected.

Acting on the request of Paymaster F. P. Williams, U. S. N., the association voted to allow the winner of the Navy trap-shooting championship to take part in the annual national amateur championship at 100 targets, which is decided during the grand American tournament.

In accordance with many applications from Western districts, sanction will be given in future for Sunday contests.

It was decided that any one who receives shooting utensils, guns, cartridges or other ammunition from manufacturers or dealers without purchasing them and paying his own expenses is to be classed as a professional.

During the last year 546 sanctioned shoots were held, as against 333 in 1915, when 4,814,360 targets were trapped. During 1916 the number of targets trapped was 6,366,110.

Los Angeles Club.—Although the rains prevented many trapshooters from partaking of their favorite sport Sunday, many took advantage of the fine weather earlier in the week and journeyed out to the Los Angeles Gun Club and blasted away at the tar hawks.

C. M. Wood was one of the visitors, and smashed 95x110, while Seth Hart blazed away at 100 targets and broke 94 of them. Many others took part in the shooting during the week. Following are some of the scores:

C. M. Wood 95x100, Seth Hart 94x100, Wm. Kennedy 88x100. B. H. Carnahan 85x100, F. C. Hartmann 62x100, S. B. Friend 68x75, R. C. Hartmann 60x75, F. H. Teeple Jr. 45x50, Guy L. Pulley 44x50, S. H. Wilson 43x50, C. G. Griffith 42x50, G. Steel 37x50, M. D. Towne 34x50, F. H. Teeple Sr. 23x25, C. C. Sultner 15x25, C. Y. Endsley 15x25, R. B. Houston 12x25, G. S. Sullivan 10x25, N. A. Combs 11x25, V. Yates 9x25.

Game Reservations, (Washington, D. C.)—Five big-game preserves and 67 bird reservations are maintained by the Biological Survey, U. S. Department of Agriculture. The mammal reservations include the Montana Bison Range, the Wind Cave Game Preserve in South Dakota, the Niobrara Reservation in Nebraska, the Elk Refuge in Wyoming, and the Sullys Hill Game Preserve in North Dakota. The Niobrara Reservation was intended as a bird reserve, but has been stocked with big game and is at present maintained chiefly for buffalo and elk, according to the annual report of the chief of the Biological Survey, just issued. In the first three reservations mentioned the herds of buffalo have shown a notable increase since their establishment a few years ago, says the report, and now include 207 head, or more than a third of all the buffalo which now belong to the Government. The elk number about 160 and the antelope 40, making a total of about 400 head of the big game.

National Bird Reservations—The number of bird reservations was increased during the year by the addition of the Big Lake Reservation in Arkansas. Sixty-seven reservations are now maintained primarily for birds. The report urges the importance and necessity of retaining as breeding grounds for water fowl and other birds, tracts of land which are not especially valuable for agricultural purposes. The area of marsh land necessary for breeding grounds is insignificant, it is said, in comparison with the benefits which will accrue to the public through the increase in our supply of game birds.

Stock Breeders' Page

Dairy Products Worth Over $40,000,000.

California dairy products for the year ended September 30, 1916, had a total valuation of $40,627,039, according to the biennial report of the State Dairy Bureau, which has just been issued. A surprising feature of the report is that the price of butter, during the period when all other foodstuffs were soaring to the skies, averaged lower than for several years past. The report gives the average price of butter in California during the past year as 27.39 cents a pound, as compared with 28.70 for 1915, 27.61 for 1914 and 32.12 for 1913.

In the above total of $40,627,039, there is included butter valued at $19,181,264; cheese at $1,203,592, condensed milk at $1,488,818, casein at $503,685, marketable milk at $14,000,000, calves at $2,500,000, and skimmed milk and buttermilk at $1,750,000.

The condensed milk industry increased considerably during the past year. California is exporting large quantities of condensed milk. This is because the war has shut off importations of the produce from other channels, and California is now sending condensed milk into practically all markets of the world, according to the Dairy Bureau report.

California Steer Grand Champion.

The University Farm at Davis has sent to the International Live Stock Exposition at Chicago two steers of its own breeding and feeding, and secured the grand championship. California Favorite, a yearling cross bred Hereford-Shorthorn steer, took the grand championship and California Jack, a two-year-old Aberdeen Angus steer, was made the reserve champion. The California University school has thus demonstrated that California alfalfa, barley and other grains are as suitable to fatten cattle as the alfalfa and corn of the Middle West.

Chicago Cattle and Horse Markets.

On Monday a load of 1,627-pound Hereford steers sold at $12.35, making a new record. Another drove averaging 1,423 pounds sold at $12.25 and two lots at $12, but the percentage above $10.50 was small, the bulk selling at $8.25@10.25. The liquidation of light steers, of which thousands have been going to killers at $4.75@6.25, is subsiding, and when the country stops deluging the market with that stuff better action by medium grades will be logical. Beef from such cattle is going into cold storage in enormous quantities, and but for such facilities and advancing cost of hides light steers and canner grades have had little value.

Purchases of army horses by the French and Italian Governments have been curtailed and prices pruned. Both inspections are now paying $150@165, and are exacting as to quality. The commercial trade is of limited volume. Southern buyers are picking up reject stuff at $75@100 and taking mares up to $125; but they are indifferent. A little city business is being done in expressers and chunks at $170@220, and a few work horses are going east on the same basis; but the recent demand for big horses has subsided, buyers having orders for drafters finding it advantageous to go to the country to get them. No considerable volume of trade or urgency of demand is expected until the turn of the year—[Breeder's Gazette.

Want the Wiry Western Horses.

For cavalry and artillery service nothing equals the wiry horses bred in the west. The same qualities of stamina which our western altitude and climate have given the broncho are noticeable also in the draft horses bred in this part of the country. Consequently our western horses are being sought by foreign governments for all branches of the war service and a new raft of buyers appeared last week on the Denver market in quest of this kind of stock. The United States and Russia produce three-fifths of the world's horses. Russia is utilizing all its extra mounts, hence England, France and Italy were compelled to turn to this country for their supply. The war demand came at a providential time for our horse raisers as there was a surplus in this country and the market was weak and showed little chance of improvement. The war sales put millions of dollars in circulation among our farmers. While the war purchases have not made serious inroads on the total number of horses in the country, the fact remains that the shrewd buyers from abroad have taken the best of the average horses. War conditions have not affected our government supply of horseflesh to any extent. There is a good deal of a debate waging in army circles just now as to the comparative merits of standard and thoroughbred horses, and certain regiments are now supplied with one class and others with the other. The plan is to follow the horses closely and to determine which strain is the better for cavalry mounts. There are men who believe most emphatically in the trotter as being better for general purposes.—Denver Field and Farm.

The silo is a great aid in any kind of dairying, but especially so in winter dairying. Silage is a good deal like pasture, and when supplemented with alfalfa hay and some grain feed, a maximum milk flow can be expected.

ROAD IMPROVEMENT.

[By J. B. Stoneking, M. E.]

There is such a heavy increase of traffic on all roads in this country, more especially on the main trunk highways between cities and towns of importance and the roads leading from the more populous country districts into the markets, that a very necessary and radical change has been forced in road building and improvement methods. Not many years ago, plain graveled and water-bound macadamized roads stood the wear and tear of the then comparatively light and slow-moving vehicles. Light surfacing was the rule and materials which would stand up under that traffic were found to be inadequate when subjected to the abrasion and hard pounding of our heavier and rapid-moving vehicles of the present day.

Since the development and perfecting of the auto truck for hauling and delivery purposes, the slow wide tired wagon has been largely replaced. This type of traffic has spelled the doom of earth roads, and tears holes in lighter, more easily worn surfacing with amazing ease and rapidity. It has also caused a cry to be raised for easier grades. The lighter pleasure automobile is almost as hard on road surface as the truck, and the higher speed has increased the number of bad accidents on sharp curves and steep grades. These causes have not only made a heavy, wear-resisting road surface necessary, but in the rebuilding and improvement now being done the roads are widened, grades reduced, sharp turns and dangerous curves eliminated.

The vast amount of work to be done, coupled with the high cost and shortage of labor, has led to the development of successful labor-saving road machinery of many different and highly specialized types. One of the labor-savers adopted from quarry, railroad, and mining work and applied with success to road building is the low-freezing, slow-acting, heaving, low-grade dynamite for earth work in deepening and widening cuts, widening curves around hillsides and points, blasting out stumps, boulders and trees, and in making side and outfall ditches for drainage. Considerable saving is accomplished by its use in loosening material in conjunction with steam shovels, graders, scrapers, and other machinery.

After a good earth bed has been prepared, the type of road surfacing best adapted to local feasibility and traffic conditions should be applied. Each type of road has its particular advantages and disadvantages, and local conditions must govern the selection, frequently combining parts of each type. The following are considered standard types, although more or less interrelated:

Macadam in its different forms,
Bituminous or asphaltic,
Brick or stone paved,
Wooden block, and
Concrete roads.

Macadamizing is probably the oldest and most widely used method of surfacing, having more modifications than any other type. It consists primarily of crushed stone or gravel held together with some form of applied "binder." This type of road is most generally the cheapest in first cost and holds up well under the lighter traffic. Heavy traffic, however, soon breaks through, making a high maintenance cost, hence it is not suitable for use as city paving nor on main roads near the larger cities and markets.

Crushed stone having sharp edges is a more satisfactory material than round-edge gravel for it compacts with less "creeping," and gives a better binding. Trap rock, diabese, basalt, porphery, and other fine-grained rock are very good on account of their hardness and wearing qualities, although somewhat low in "cementing" quality. Granite is usually too coarse-grained, and limestone too soft for a first-class road surface. A small amount of limestone is frequently mixed with the harder rocks to increase their cementing effect. The binders used are fine stone screenings and water, sand and water, limestone screenings and water, or clay and water.

Upon the compacted earth formation is spread a layer of broken stone of sizes between one or two and one-half inches in diameter. This is rolled and rerolled until it is well compacted; a thin coat of binder material is spread over this and rolled into the interstices of the larger stone. Next a coating of finer material of one-half inch to three-quarter inch is rolled, on top of which is spread and rolled very thoroughly a finishing coat of binder, using water freely. The finished sub-base of coarser stone is usually about four inches thick and the surface coat two inches, thus making a six-inch pavement.

In bituminous or asphaltic roads, the crushed stone sub-base is coated with a small quantity, approximately one gallon per square yard, of asphalt cement or tar, then the surface course consisting of three-quarter to one inch stone, which has been heated and thoroughly mixed with asphaltic cement, is spread on and rolled while hot. A thin dusting of sand or stone screenings is spread on top to keep the surface from running and becoming sticky. Often a concrete sub-base is used with the surface left rough purposely to prevent the creeping of the surface course. This type of road has a certain "springiness" which saves the horses' hoofs from too much jarring, it is easily repaired, the surface is not easily abraded, but it has the disadvantage of disintegrating after a length of time due to the presence of a certain amount of volatile oils.

A modification of the bituminous and asphalt road is the oiled road of California. A quantity of broken stone or gravel is spread upon the soil surface and thoroughly sprinkled with a light, crude asphaltic oil, then the whole is plowed to a depth of from six to eight inches, thus mixing soil, stone, and oil. It is then rolled with a roller having foot-like projections which work like a subsurface packer in compacting the material from the bottom upwards, frequent harrowing and oil sprinkling being done as the rolling progresses until the surface becomes smooth and firm. Light oil or tar sometimes is used to sprinkle macadam roads and the surface dusted with fine screenings, hoping thus to eventually secure an asphaltic road through the penetration of the oil into the stone sub-base.

Brick, paving stone and wooden block pavements all require a good substantial, smooth-surfaced foundation, preferably of concrete, to insure permanency. A cushion of sand from one to two inches thick is spread over the surface and the stone or brick laid in courses with greatest length across the street, the joints being broken and each brick or block rammed home to a smooth surface. Sand is then swept into the cracks, followed with a thin cement grout, a pitch compound, tar, or asphaltic cement. Wood blocks are generally treated with some preservative and rammed to a firm seat in a cement mortar or asphaltic cement cushion coat. A joint filler of some bituminous compound is worked into the cracks and the surface is then dusted with sand or fine screenings.

Concrete, while having been used extensively for foundations, has not been used very much for the wearing surface until late years. It has the disadvantage of being unyielding, scaling or spawling under blows, very hard on horses' hoofs, and it is difficult to secure good bonding between repairs and the older work. Nevertheless, it is coming into favor in recent years on account of its durability, slightly cheaper first cost compared to other first-class durable pavements, and the generally comparative ease in securing the materials for construction and repairs.

Formerly, concrete roads were laid much the same as sidewalks with a decided difference between subbase and wearing coat. This was not entirely satisfactory, and in later construction the whole depth is poured at once with reinforcing near the bottom, and by floating gets the finer materials on the surface for a smooth, good-wearing surface. The addition of some form of woven or webbed reinforcing has done much towards insuring the permanency and consequently increasing the use of concrete roads.

The cost of roads varies with so many factors in different localities that an average figure means very little. However, a few average contract prices per square yard obtained from different sources are as follows:

Macadam	$ .90
Stone paving	2.73
Brick paving	1.95
Wood block	2.82
Bitulithic	2.25
Asphaltic and Petrolithic, or oiled roads (figures from California only)	1.91 .36

Setting Forth the Natural Causes.

A most astonishing disposition is nation-wide manifest to overlook natural causes of high-priced foodstuffs and seek the reason in combinations in restraint of trade. A wild rush has been made to the offices of states' attorneys in the apparent fatuous belief that a few grand jury indictments would augment the fruits of last season's harvests. Unhappily women's clubs, most useful and helpful adjuncts of modern life, have been among the chief offenders in this unreasoning campaign. Some public officials are not wholly guiltless. It is high time that officials who are supposed to be cognizant of the facts, should speak as does the dairy and food commissioner of Wisconsin, when he reports that the shortage of butter and eggs in that state is attributable to the wholly abnormal heat and drouth of the past summer. The heavy exports of cheese, under war-time demand, account for the prices of that dairy product over which complaint is registered. Doubtless, however, the women's clubs of Milwaukee will go on cheerfully boycotting the farmers and handlers of eggs and dairy products, as if that course would magically cause the supply to grow in stature like Jack's beanstalk.—Breeder's Gazette.

Winter Dairying.

Winter dairying has been found to be the most profitable dairying. When the cows freshen in the fall, they will give a good milk flow during the winter, and when turned on the summer pastures, the milk production will be given a new impetus. The drying-up period will come at the time when work is the most pushing, when flies are the worst, and when pastures are short.

Another advantage of winter dairying is that milk and butterfat bring the highest price in the winter and labor is the cheapest. On many farms a number of cows could be cared for without any extra labor during the winter.

The cows that freshen in the fall will produce more milk during the year than those that freshen in the spring, and the largest milk production will come when the prices for milk and butterfat are the highest and labor the cheapest.—[Rural Spirit.

THE FARM

Drainage.—Drainage makes a clay soil more productive by removing the surplus soil water and by helping to correct acidity. It deepens the root zones and enables the plant to obtain more moisture during a dry spell. It hastens decay of organic matter by making the soil warmer and by providing a supply of oxygen.

Not all soils require drainage. The need for it is indicated by the following conditions: Moss growing on the surface, plants looking yellow or dwarfed, deep cracks during a dry season, and water standing more than twenty-four hours after a rain.

A soil may be drained by laying the land out in beds, by constructing ditches, or by making a system of underground tile drains. In many sections the land is thrown up in level beds five feet wide, to insure sufficient drainage for winter vegetables.

Fresh Vegetables.—The fresher the green vegetable the quicker it cooks. Wilted vegetables take two or three times as long to cook and are not then as tender as perfectly fresh ones. The wilted vegetables should be soaked in cold water till revived as far as possible. Vegetables likely to contain worms or insects should be placed in cold water fifteen to forty minutes to draw them out. A little vinegar helps start them.

Mr. J. H. Boisseranc of Buena Park has recently made a valuable improvement to his ranch by way of installing a Layne & Bowler Turbine Centrifugal Pump.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons, Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

Buy A McMurray!

The Real Lady (2) t. 2:04¼, world's champion two-year-old, established two new world's records the first time hitched to the New McMurray Sulky.

Every race record of two minutes or better in 1916 was made to the new McMurray Sulky.

The Golden Anniversary Catalogue shows the complete line of McMurray "Easy Riding" Jog Carts in which horse action is absorbed into the springs—The Model 80 "Flyer," the last word in a training cart—The New Model 44 "Featherweight" Racer for racing, training or Matinee driving, and is gladly mailed free.

Remember, McMurrays build Sulkies and Carts exclusively. Their mechanics are specially trained, and by devoting their entire time to one line, are better able to furnish a first quality article at lowest cost.

Let McMurrays tell you what they can do for you.

FARMS FOR SALE

Choice Land in Idaho

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

160 acres of timber land, good farm land when timber is cleared off, all can be farmed except about 2 or 3 acres. Good timber, yellow pine and fir. Price $4000. 40 miles from Lewiston, Idaho. Well located to log off.

240 acres 6 miles from Asotin, 12 miles from Lewiston, Idaho, about 75 acres in fall wheat, about 75 acres more can be cultivated, balance in bunch grass pasture, two springs, small house, all fenced. Price $40 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

ADDRESS
Breeder and Sportsman
Post Office Drawer 447, San Francisco

Every farmer should keep a few guinea fowls. Not only do they make themselves valuable as watch birds against hawks, but becouse of their wild game flavor they are coming into favor as food. Formerly hotels and restaurants served grouse, quail and other wild game birds, but now, on account of the enactment of game laws, they are forced to find a substitute. The guinea fowl makes an acceptable substitute and is being used increasingly because of its similar taste.

Due to the small size of the guinea egg, the raising of guineas for egg production is not advised. The guinea egg is classed as a second. If the demand for the wild game taste is to be satisfied, however, the production of guineas for the market should become profitable.

Especially, if the guinea a source of profit when raised on the farm in small numbers, since the food that it eats in ranging over the farm is just waste food that probably would not be utilized othewise. The guinea fowl does not stand confinement well, but on the farm where it can have free range the conditions are nearly ideal for this bird.

Guineas can be raised by use of incubators, but the method which proves most satisfactory is to use hens, or, better yet, bantams, for brood mothers. Then the wild nature of the guinea will be moderated and the birds can be cared for more easily

The (P) Brand Quality is always "on the job." Only one standard is used in the Peters factory, and that is the very highest. You cannot go wrong if you buy shells or cartridges with the familiar red (P) on the labels.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . 585-587 Howard Street, **SAN FRANCISCO, CAL.**

WINCHESTER

"LEADER" AND "REPEATER" SHELLS

For the high flyers and the low flyers Winchester "Leader" and "Repeater" shells have the reach, pattern and penetration. Their patented construction and uniform loading make them by far the best shells on the market. In proof of this we point to their unequalled winnings at the traps this year, including the Grand American Handicap. Such shells insure a good bag in the field. Get a box or two for your next day a-hunting and try them out for yourself.

THE **W** BRAND WILL IMPROVE YOUR SHOOTING.

Recommended Game Loads:—

IT IS A difficult matter to recommend a particular load for any certain kind of game shooting, as natural conditions vary so much in different localities.

With this in mind, we have given considerable study to the various loads recommended and believe that those shown will give the most satisfactory results, and will be an aid to consumers and dealers.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER AND SPORTSMAN

VOLUME LXIX. No. 25. SAN FRANCISCO, SATURDAY, DECEMBER 16, 1916. Subscription—$3.00 Per Year

JURIST 5778

Chestnut Five Gaited Saddle Stallion, sired by Bourbon's Best, dam Irma McClaskey. Exhibited by Dr. L. C. Deming of Anaheim, Cal., at Cal. State Fair of 1916, and sold there to Mr. A. W. Pike, of San Francisco.

$2,500 GUARANTEED — **GUARANTEED $2,500**

The State Fair Futurity Stake No. 9.

TO BE GIVEN BY THE

CALIFORNIA STATE AGRICULTURAL SOCIETY

For Foals of Mares covered in 1916 to TROT and Pace at Three-Years-Old, 1920.

Entries Close: Tuesday, January 2nd, 1917

$1,500 FOR THREE-YEAR-OLD TROTTERS. **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS

Entrance and Payments—$2 to nominate mare on January 2, 1917, when name, color, description of mare and stallion bred to must be given; $5 May 1, 1917; $10.00 on Yearlings May 1, 1918; $10.00 on Two-Year-Olds May 1, 1919; $10.00 on Three-Year-Olds May 1, 1920.

Starting Payments.—$35.00 to start in the Three-Year-Old Pace and $50.00 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place. Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat and 25 per cent to the race according to rank in the summary. Money divided in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return payment, nor will any entry be liable for more than amount paid in or contracted for.

Entries must be accompanied by entrance fee.
Nominations liable only for amounts paid in. Failure to make any payments forfeits all previous payments.
This Society is liable for $2500.00, the amount of the guarantee only.
Hobbles will be barred in trotting and pacing divisions.
Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors of this Society.
There will be no more moneys in each division or heat than there are starters. Entries open to the world.
Other than exceptions made on this entry blank, rules of the National Trotting Association to govern.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

$10 DUE ON FOALS OF 1916.

Third Payments:

JANUARY 1st, 1917.

Pacific Breeders Futurity Stakes No. 16---$3,000

GIVEN BY THE

PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

FOR FOALS OF MARES BRED IN 1915. FOR FOALS OF 1916 TO TROT OR PACE AT TWO AND THREE YEARS OLD

Entries Closed Tuesday, February 1st, 1916.

$1600 for Trotting Foals — $1100 For Pacing Foals
$150 to Nominators of Dams of Winners. — $100 to Owners of Stallions

MONEY DIVIDED AS FOLLOWS:

$1000 for Three-Year-Old Trotters.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.
600 for Two-Year-Old Trotters.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$700 for Three-Year-Old Pacers.
50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
400 for Two-Year-Old Pacers.
25 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$50 in Special Prizes was paid to Stallion Owners in February, 1916.

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916, when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before JANUARY 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

ANY BREEDER of Standard horses who will read the reports of the auction sales cannot fail to note that colts that have stake engagements have a far greater value than those that are unstaked, and this excess value is much more than the cost of the engagements. But a few of the California breeders of Standard stock can spare the time and the expense necessary to train and race their colts in the big futurities that are decided every year on the Grand Circuit, consequently it is necessary that they should patronize the home stakes if they desire to race their colts here or sell them to those who will race them. The State Fair Futurity No. 9 will soon close for the nomination of mares covered in 1916. The date for the closing of this stake is Tuesday, January 2d, 1917. The value of the stake is $2500 and it costs but the small sum of $2 to nominate. There were 96 nominations in the Pacific Breeders' Futurity which is a stake with much the same conditions, and the State Fair Futurity should receive every one of these and several more. If the reader will refer to the advertising columns of the Breeder and Sportsman he will find all the conditions of State Fair Futurity No. 9 there set forth, and it would be well for him to make a note of the date of closing and determine to send Secretary Charles Paine his nominations on or before January 2d. There will probably be no more than three stakes for the three-year-olds of 1920 to trot for in California, and if a colt can win all three of them he will earn about $2500, which is worth while. Let everybody get busy now and see if we can't pull at least 100 nominations for California State Fair Futurity No. 9. A small boom has been started in trotting horse affairs in this country, and every person interested should aid in keeping it going. January 2d, 1917, will be the last day for making nominations to this stake.

THE TROTTING HORSE lost one of its oldest and strongest supporters when William Simpson died last week at his home in New York, says a writer in the New York Herald. He had been breeding trotters almost forty years, and horsemen estimate that he expended more than $1,000,000 in rearing, racing and training them. Before Maud S. 2:08¾ was heard of he bought of David Bonner her half sister, Cora Belmont 2:24½, and founded the Empire City Stud, which is still in existence, with the renowned sires McKinney 2:11¼ and Axworthy 2:15½ at its head. For McKinney Mr. Simpson paid $50,000, and for Axworthy $21,000 at auction in Madison Square Garden just ten years ago. He owned John R. Gentry 2:00½ when that horse paced the fastest race on record, at Fleetwood Park, just twenty years ago, and he bred the crack trotter Bouncer 2:09, with which he won the classic Transylvania Purse at Lexington in 1895.

Though he was one of the large property owners of New York and the possessor of so much ready money that E. H. Harriman and other big operators in the financial district used to go to him on occasions for spot cash in large amounts, Mr. Simpson almost to the last spent most of his time in his little ground floor office, fronting on Park row, near the Brooklyn Bridge, where he demonstrated that a pawnbroker can be as worthy of confidence and respect as a banker or any other business man. He once owned a large herd of Jersey cattle and a famous collection of Shetland ponies, but the trotting horse was his hobby, and he would put aside important business to sit and discuss the blood lines of his favorite stallions and broodmares, for his interest in trotters as in all other live stock was centered around pedigrees and the laws of heredity.

NATIONAL TROTTING ASSOCIATION.

Official Report of the 29th Congress, Held in New York, N. Y., December 5, 1916.

The Twenty-Ninth Congress of the National Trotting Association was held at Murray Hill Hotel, New York, N. Y., December 5, 1916. John C. Welty, President, called the meeting to order as per previous notice and said: "At the May meeting of the Board of Review a resolution was adopted looking to the formation and codification of uniform rules for both the American Trotting Association and the National Trotting Association. It was evident then, and must be to everyone connected with the turf, that the conflict of rules and the re-writing and frequent promulgation of amendments has led to much criticism—and justly so—and much confusion, and thrown much work upon the secretaries and officers of the tracks, until finally it became apparent to everybody that uniformity of rules was to be desired. The Board of Review, for the purpose of hastening the matter, gave your President authority to convene this Special Congress. It is to that end I have called you together for the purpose of appointing a committee to act with a similar committee from the American Trotting Association.

"It should be a committee of six, with six alternates, from each of the two associations; and that committee of the associations should be fully authorized to re-write and to codify a uniform set of rules which shall be the rules of both associations.

"There is no referendum to the committee. It has has absolute power; and when the rules have been agreed to by a majority vote of that joint committee of twelve, those shall be the rules of both associations for the year 1917 and until the next meetings of the Congresses of the two associations. To that end each of you or your association for you, received notices of this meeting together with copy of a letter from myself explaining the situation.

"After the May meeting of the Board of Review, I took the matter up with Mr. W. P. Ijams, President of the American Trotting Association, and he heartily concurred in the suggestion of the resolution passed by the Board.

"The American Trotting Association, however, is not as far along as we are in this matter. It is going to appoint a committee but that committee is going to be appointed by its Board of Directors, and it shall not have complete authority until the third Tuesday in February, 1917, when their annual meeting will be held and ratify it.

"So it seems to me the wise thing for us to do is to provide in our resolution that, as soon as a like committee from the American Trotting Association is granted the same authority and the same power, it shall go into effect and be a Joint-Board. I am not in favor of this committee meeting a committee from the American Trotting Association that has to have a referendum, because if you adopt the plan suggested in our resolution, we do not have that, for the committee is given full power to act."

The report of the Committee on Credentials was presented by A. P. Sandles, chairman of the committee. It showed that there were 270 associations represented by person or proxy.

After the report of the committee was presented Mr. Sandles also stated that since it was completed he was handed two credentials authorizing Pierre Lorillard, Jr., of Tuxedo Park, N. Y., to represent the Bergen County Fair, Hohokus, N. J., and Monroe Driving Park Association, Monroe, N. Y., and one credential authorizing W. Averill Harriman of Arden, N. Y., to represent Goshen Driving Club of Goshen, N. Y. With these additions the total representation amounted to 273. On motion of Carlos M. DeGarmendia, seconded by John R. Townsend and duly carried, the report was accepted.

The President presented a resolution for appointment of committee which after considerable discussion was adopted, the members of the committee and alternates named in same also being elected after the resolution was adopted:

"Resolved—That John C. Welty, Canton, Ohio; W. H. Gocher, Hartford, Conn.; Pierre Lorillard Jr., Tuxedo Park, N. Y.; John Early, Nashville, Tenn.; DeForest Settle, Syracuse, N. Y., and E. W. Swisher, Columbus, Ohio, be and they hereby are appointed a Rule Committee, which together with a like committee in number and authority to be appointed by the American Trotting Association, shall be and they are hereby authorized to re-write and codify the rules of both associations and make them uniform, and upon their adoption by a majority vote of said Joint-Committee of both associations, shall be the only rules and regulations governing all racing upon the tracks of the members of both the National Trotting Association and the American Trotting Association during the year 1917, and the necessary rules to enforce same by said associations and until the meeting of the Congresses of both said associations in 1918, hereby giving unto the said Joint-Committee full power and authority therein to act as fully as this Congress; and when such Committee has thus adopted such rules and regulations as herein provided, the same shall operate automatically to repeal all the rules and regulations now in force and effect, of both associations for the time hereinbefore named; but no authority is given said committee hereby appointed, to act until a like committee is appointed by the American Trotting Association, and with as full and complete authority to act finally upon all matters submitted as the authority is herein granted to the above-named committee.

"Further Resolved—That Edward Moulton, Worcester, Mass.; Reese Blizzard, Parkersburg, W. Va.; Thos. S. Griffith, Spokane, Wash.; Ray M. Colby, Owego, N. Y.; James M. Belden, Newark, N. J.;, and James P. Winchester, Wilmington, Del., be elected as alternates to fill any vacancy or vacancies upon said committee and in the order named."

Upon motion of A. P. Sandles, seconded by Carlos M. DeGarmendia, the Congress adjourned, sine die.

W. H. GOCHER, Secretary.

Westchester Stakes Show Increase.

With the one exception of the Amateur Cup, a highweight selling affair for gentlemen riders, every stake closed by the Westchester Racing Association for Belmont Park, shows a big increase in the number of horses entered.

The Metropolitan Handicap has 85 entries against 57 in 1916, while the Suburban has 83 against 53 in 1916 and the Toboggan has 94 against 53. The stakes for two-year-olds, now yearlings, have even larger numbers entered. The Juvenile has 124 entries against 82 last year; the Keene Memorial, 117 against 86; the Fashion, 97 against 64, and the Bouquet, 63 against 58.

There were 50 entries against 30 of last year for the Ladies' Handicap for mares, while the Harlem has 50 against 22 and the Hollis, another selling stake, has 46 against 35.

The entries of yearlings for the Belmont and Withers for three-year-olds to be run in 1918 also show an increase, there having been 132 yearlings entered in the Belmont and 152 in the Withers, as against 95 and 116, respectively, for last year.

There were 88 two-year-olds nominated for the Lawrence Realization, to be run in 1917; 145 yearlings for the Realization of 1918 and 224 weanlings for the Realization of 1919.

Wise cattlemen, says Field and Farm, are purchasing good young stock heifers for breeding purposes and also patronizing the breeders of pure bred bulls. The biggest money makers in the next few years will be the men who breed good heifers and grow yearling beef. The markets are getting a fair number of stock heifers of good and medium grade, but medium stuff should go into the slaughterer's hands, while high bred heifers should be kept back home to chew alfalfa in the winter and browse on double-taxed forest reserve grass in the summer time. The man who raises his own steer calves and feeds them into yearling beeves is not taking the same speculative chances as the one who must buy stockers and feeders each season. The latter runs against a high feeder market very often and after the cattle are fat hits a fat beef market temporarily overstocked and with high priced feed that he has put into the cattle of course fails to pay out and is left high and dry on the barren rocks of stern adversity. The calf crop offers the best end of the cattleman's situation now. This is the time when the farmer must get back into cattle breeding. Conserve the heifer supplies and buy more good bulls.

◈ ◈ ◈

Many a horse is bought for a song at the auctions that turns out a good winner. "It was twenty years ago," recently remarked Mr. Daingerfield, nephew of the late James R. Keene, "when I sent imported Skate, a gelded son of Minting out of imported Glide, to the Lexington sale. Perhaps his name was against him, but considering that Glide was his mother, it was well taken at that, and not given him because he was considered a 'skate' in the sense the term is applied to poor ones.

"Skate netted the Castleton Stud just nine dollars. He was knocked down for $20. The lowest fee to the auctioneer at that time was $10. Then there was a fee of one dollar for bringing a horse into the sales ring. The colt was bought by George Innes, then a blacksmith in Kentucky, and the next year he won nearly a dozen good races for his owner, and a lot of them were handicaps."

Skate was one of the bargains of the turf, as he certainly proved a consistent winner through the seasons of 1897 and 1898, and on one occasion defeated the great black mare Imp.

◈ ◈ ◈

S. C. Hildreth, having given nearly all the American bred yearlings in the Belmont string satisfactory trials, has turned them out along with the members of the older division, including Stromboli, Hourless, Deer Trap and others, but as yet not much has been done with the imported yearlings which came up from The Nursery after the others had had their trials. These young things are improving rapidly and are looking vastly better than they did when they first reached Belmont Park, and some of them at least have begun to gallop in a style which is extremely encouraging.

◈ ◈ ◈

Classes for docked saddle horses are to be cut down in number at the National Horse Show next year. In six classes this year there were only 32 entries as against one hundred and one in the same number of classes for undocked saddle horses. This shows a most commendable trend among the saddle horse men.

Entries to Pacific Breeders' Futurity No. 17 for Foals of 1917

Cheerful news! An increase of about 33 1-3 per cent has been made in the number of nominations for Pacific Breeders' Futurity No. 17 over the number made in No. 16. The new stake closed on the 4th of this month with 96 nominations while Stake No. 16 had but 71. While there has been an increase of 25 in the number of mares nominated, the number of stallions represented is the same—37. Last year Copa de Oro 1:59 headed the list with eight of the mares bred to him nominated, Carlokin 2:07½ was second with seven, and Peter McKlyo third with five. In Stake No. 17, Peter McKlyo 2:06 leads with thirteen of the mares bred to him this year nominated, Jim Logan 2:01¾ is next with eight, and The Anvil 2:02¾ third with seven. El Angelo, Vernon McKinney and Wilbur Lou are tied for third place with six each, and Carlokin and Copa de Oro each have four, and are tied for fourth place. Copa de Oro was sold and shipped to Australia early in the season last year, and probably was not bred to any mares outside of those owned or in the stables of W. G. Durfee.

The fact that there has been an increase of a third in the number of nominations points conclusively to the fact that interest in the breeding of trotters and pacers and the desire to race them has greatly increased since a year ago. This stake will be the first since the Pacific Breeders' Futurity was inaugurated in which there is no provision made for two-year-olds to race, all the money going to the three-year-olds. There are many who think elimination of the races for two-year-olds was a mistake, and the great interest which was manifested last year on the Grand Circuit tracks in the two-year-old races, may lead to the restoration of the two-year-old events to future stakes of the Pacific Breeders' Futurity. The complete list of nominations to Stake No. 17 is as follows:

OWNER	MARE	STALLION BRED TO

NORTH PACIFIC FAIR ASSOCIATION.

Dates Selected for Seven Fairs Beginning August 20, at Vancouver, B. C.

About 35 representatives of various fair associations in Oregon, Washington and British Columbia answered the roll call when the 16th meeting of the North Pacific Fair Association was called to order by President Frank Meredith Nov. 7th, at Portland, Ore.

The most important event was the report of the dates committee, which was unanimously adopted. Following are the dates of the 1917 circuit:

August 20, Vancouver Exhibition, Vancouver, B. C.

August 27, Southwest Washington Fair, Centralia, Wash.

September 3, Spokane Interstate Fair, Spokane, Wash., and Grays Harbor County Fair, Elma, Wash.

September 10, Washington State Fair, North Yakima, Wash.

September 17, Oregon State Fair, Salem, Ore.

November 4-17, Northwest Land Products Show, Seattle, Wash.

November 24, Provincial Exhibition, New Westminster, B. C.

This list is subject to the Oregon State Fair getting permission from the State Legislature to hold its "doings" the week of September 17. If this is not obtained the fairs at North Yakima, Salem and New Westminster will move back one week. If Vancouver finds it necessary to take the week of August 13th to join up with the Canadian Prairie Circuit, it will be permitted to do so.

All of the fairs will be six-day ones with the exception of the Northwest Land Products Show of Seattle.

D. E. Mackenzie, New Westminster; Wilfred G. Hannam, Spokane; A. C. Marsters, Salem; H. S. Rolston, Vancouver; H. T. Graves, S. K. Bowes and R. R. Somerville, of Centralia, composed the report of the dates committee.

President Meredith appointed W. C. Brown, of Vancouver, B. C., chairman of the racing committee; Edith Tozier Weatherred, of Salem, chairman of the resolutions committee, and H. S. Rolston, of Vancouver, B. C., chairman of the dates committee.

The following compose the racing committee, which met and fixed classes and conditions of all horse racing of the circuit: John W. Pace, Frank Meredith, W. C. Brown, George R. Walker, Thomas S. Griffith, Judge E. R. Brady and A. H. Lea. Each member represents a different fair. All of the cities will have horse racing with the exception of Seattle and New Westminster.

The racing committee decided that an effort would be made to have classes at the race meets of the association as uniform as possible, and recommended the following: Trotting—2:15, 2:20, 2:25, free-for-all; pacing—2:15, 2:20, 2:25, free-for-all.

The committee suggests that all except the free-for-all races be under the "every heat a race" plan. Any association which sees fit can put on extra events. The size of purses is optional with each member. Entries will close for all events on August 1st. Entry fee will be 5 per cent and 5 per cent will be deducted from the money winners.

R. L. Schee, manager of the Crook County Fair, was present and said that the circuit for the smaller fairs will start early in September and end early in October. Their meets will have parallel dates with the major circuit. The following towns will be in the smaller circuit: Goldendale, Wasco, Moro, Baker, Ontario, Prineville, Bend and Pendleton.

Managers of these fairs will meet in The Dalles shortly after January 1, where definite plans will be decided upon.

On Thursday an election of officers wound up a very enthusiastic and profitable convention.

Thos S. Griffith, of Spokane, was elected president, W. C. Brown of Vancouver, B. C., vice-president, and John W. Pace, secretary-treasurer. Frank Meredith is the retiring president.

—o—

Death of McKinney's Owner.

New York, Dec. 6.—At his home, 960 Bryant avenue, the Bronx, William Simpson, horse breeder and pawnbroker, died yesterday morning, in his eightieth year. Mr. Simpson came of a line of loan brokers, his grandfather having been the first to establish the business in New York.

Mr. Simpson, who was a veteran of the Seventh Regiment, was born at 232 William street, in the rear of the Park Row store. He leaves two sons, William J. and Frederick B.

All his life Mr. Simpson was keenly interested in horse breeding, and his stud farm at Cuba, New York, was one of the most noted in the country. He was always ready to expend thousands of dollars in the improvement of his string of stallions and his purchase of McKinney for $50,000 created a sensation in the world of horsemen. He was also owner of Axworthy, for which he paid $26,000. At one time he owned the renowned John R. Gentry, which he sold for $19,500.

◈ ◈ ◈

A new French contract for artillery horses at $160 has been let, but inspectors are exacting, demanding stock weighing 1,275 pounds or more. They reject horses with one five-year-old tooth and will not accept many light grays. They will take plain horses if sound, but are emphatic in turning down anything with sidebones. The contract was let in Chicago.

◈ ◈ ◈

Captain A. H. Waddell, at one time editor of the Bit and Spur and a writer on horse topics, died on November 30th at his home in Brooklyn, N. Y. He was fifty-eight years old and is survived by a widow, two sons and one daughter.

The 2:05 Trotters of 1916.

Where, a comparatively few years ago, the 2:10 list was the objective of the breeder and owner of any trotter, things have changed until the interest that centered in this select circle now lies in the 2:05 list. Maybe some day it will be the two-minute list, but to date that is too small to more than marvel over the superlative speed of the occasional trotter that strays into it.

But the 2:05 list is the real mark of distinction, for it is attainable by several each season, and it is the badge of great speed and enough manners to carry it to the end of the mile.

Several records were established during the season of 1916 and one of the most important of these is the fact that eight trotters entered the 2:05 list, exceeding the total of any other year by two. In view of the great speed shown on many occasions one might ask himself, "were not there more than that?" But when you come to consider what 2:05 or better means, the quantity must stand out as an achievement.

Those that entered this list during the year are Lucile Spier, Mabel Trask and St. Frisco, with 2:03¼ each; Zomrect 2:03¾; The Real Lady 2:04½; Volga 2:04½; Mary Putney 2:04¾, and Peter Scott 2:05.

Having been in 2:03¼ the year before, Lee Axworthy, the stallion champion, does not get into the 1916 list. Invasion of the two-minute list is glory enough for him.

The eight that are in do not represent the list of all that could have trotted in 2:05. For instance, Donna Clay was second in 2:03½ and Wilkes Brewer showed when she trotted a half mile track in 2:08¼ that she is eligible.

One thing that stands out among the eight that did the trick is the approved breeding of these fast horses. Three are by Peter the Great, two by San Francisco and one each by Directum Spier, Zombro and Moko, every one of these five horses a successful sire of extreme speed.

Only four enterd the 2:05 list in 1915 and Peter the Great led with two, so he has been at the top in successive years.

The 2:05 list was started by Nancy Hanks when she trotted in 2:04 in 1892, and only four joined her in the first eight years. The total roster of this is 55, so that 50 of them have become members of the inner shrine in the last 16 years.

Kentucky naturally has the distinction of being the birthplace of the greatest number, no fewer than 19 being foaled there; seven in California, six in New York, three in Iowa, two each in Ohio, Illinois, Massachusetts, Nebraska, New Jersey and West Virginia, while Michigan, Indiana, Colorado, Delaware, Maryland, Tennessee, Canada and Austria come along with one apiece.—[Frank S. Cooke in American Sportsman.

Thoroughbred Matters

The well known horseman L. Galbraith, of Independence, Oregon, has been spending a few days in San Francisco. He thinks that country the best place in the world to raise thoroughbreds or any other breed of horses on account of the feed and the climate. He has the stallions Tony Faust and Milton Barber on his ranch, together with ten or twelve well bred mares. Among other breeders located there are C. A. McLaughlin and W. W. Percival, and Bert Bagley is breeding a few at The Dalles.

◆ ◆ ◆

L. Bailey, who formerly rode for Rome Respess, but who has been retired from jockeydom for ten years; during which time he has been in the butcher business in El Paso, Texas, did a "come back" December 2d at Juarez, when he took a mount in the second race and brought the horse in a winner.

◆ ◆ ◆

Captain William F. Presgrave, the well-known Maryland turfman, died of heart failure November 29th at his stock farm, "Tonytank," near Salisbury, in his fifty-seventh year. Within a few days of his death he apparently enjoyed good health. He was a director and stockholder in the Maryland Jockey Club and manager of the pari-mutuel system at Pimlico.

◆ ◆ ◆

The Thoroughbred Horse Association, at a meeting held at Lexington recently, directed President Headley to address a letter to the governing turf bodies of the United States and Canada protesting against the rule prohibiting the racing of two-year-olds until April. It is said that among the leading New York owners and breeders are many who agree with Captain Cassatt, who framed the rule, that two-year-olds are raced altogether too early in the year, and they would move the date back to May 15, while others would favor a prohibition until August 1. There is scant chance for any such radical change, however.

◆ ◆ ◆

J. McGinnis of New York who returned recently from England and Ireland, whither he went to look over the racing situation abroad, did not bring home any thoroughbreds with him, but he has some options of which he thinks rather well. He reports that North Star, recently purchased by A. K. Macomber, is a grand-looking colt, and he praises the eminently sportsmanlike spirit displayed by that gentleman in paying such handsome prices for that great two-year-old and for King's Joker, also bought of Mr. Joel, but he is of opinion that the Pacific Coast sportsman will find 1917 a very hard year in which to win big races in the three-year-old class if both Campfire and Hourless should pull through the winter as well as it is reasonable to hope that they will. He says that two such colts as Campfire and Hourless would be hard to find in any country, and that they and some others which performed well as two-year-olds in 1916 promise to make the three-year-old class in 1917 one of the hottest ever seen in this country.

"I sincerely wish Mr. Macomber good luck," he said, " for he is a real sportsman and not a mere 'sport.' He took 'the gaff' in the early part of the season without whining or finding fault with anybody, and then when good fortune began to come his way, he was most modest about it."

◆ ◆ ◆

Richard Croker will return to the American turf in 1918 with a strong stable from his Glencairn breeding stud in Ireland. In a recent interview Mr. Croker expressed the opinion that the American thoroughbred would soon be the equal of any thoroughbred anywhere. "At the present time," said he, "I do not think they rank with the average high-class horse in England. Of course, the reason for that is well known, inasmuch as the best can trace back through generations of really scientific breeding, so that it is only natural that they should be better.

"While American thoroughbred blood is not considered of much importance in England just now, the progress which has been made and must be improved upon in the near future must force itself upon the attention of those who now look askance at it."

Mr. Croker has a very decided admiration for Sunstar, who ranked third among the winning stallions in England for 1916. This one is the sire of North Star, recently purchased by A. K. Macomber, the American sportsman.

Orby, Mr. Croker's Derby winner, was placed sixth on the list of winning stallions for the year, while the former Tammany chieftain's silks earned $12,030 on the Irish turf, this placing his name fourth on the list of winning owners. The two that gave Orby his place in the stallion list were Eleanor M. and Eos, a pair of three-year-olds, and the two-year-old Diadem. All three of them have been sold by Mr. Croker.

Although he disposed of a number of his stock at auction last month he states that Glencairn still houses Orby and a dozen brood mares of which he has great expectations. Among some of his thoroughbred possessions are two fillies, both by Orby. One is a full sister to Eleanor M. and the other out of Blakestown, the dam of Flash of Steel, a frequent winner of big stakes in India.

BREEDING POLO PONIES.

[Breeder's Gazette.]

Commenting on the inquiries of N. C., New Mexico State College, authorities on polo pony breeding may differ as to the method, but evidence is strong that all are fairly convinced that the correct type has been arrived at. English breeders are satisfied on this point; they have solved the problem of obtaining ponies large enough combining the requisite character, endurance and speed. Size and speed proved most difficult to combine, and there is yet something to be accomplished in holding the correct pony type while cross-breeding to get the finer points of the Thoroughbred and its velocity. In America many original or, let me say, fundamental, types have been tried with more or less success, but by the introduction of racing blood through the sire ponies with most of the desirable attributes are now to be seen on our polo fields everywhere.

Perhaps the closest comparison of types that experts now living have ever indulged in occurred during the first International practice period extending over several weeks at Lakewood, N. J., and Rockaway, Long Island, prior to the competitive tests on Meadow Brook Field in 1911. Old polo enthusiasts noted particularly how ideas had changed with regard to the conformation and weight-carrying ability of ponies in the game. The old-time, coarse-headed, big-limbed, slow cob, tricky and handy as the proverbial cat, and mostly produced from bronco stock, had given way to the finer-drawn equine hurricane that could get into a flight of speed in an instant and pull up near the boundary line without having its jaw broken.

At first glance a long-legged heavy rider looks entirely too much for his lean, racy, Thoroughbred-looking mount, but seldom does it happen that such a pony wilts under its load. Indeed the load is no longer a mere adipose tissue. Players to live through a season of hard-fought tournaments are usually trained down nowadays, and the weight carried is principally muscle and bone. The burden is alive, not dead, moves in unison with the mount, and therefore is scarcely felt during the short periods of play now popular.

There is, however, much reliance placed by careful and far-seeing breeders on the judicious introduction of coarse strains in the make-up of foundation stock. There must always be some substance and quite some bone, coupled with the inevitable Thoroughbred blood. Inbreeding from "blood" alone would, of course, result in shadowy mounts, totally out of the question for either back or forward players. It is a mistake to suppose that roughness necessarily means coarseness. The range life of the growing colt and the lack of care as the animal reaches maturity account for this roughness. Thus we find rough-looking mounts that are the equal of finely-groomed and finely-bred candidates, when put to the test. When, however, actual coarseness or common character develops, such a pony is usually relegated to general utility purposes between clubhouse and grounds, or for occasional practice where the going need not be particularly fast.

Now that the game has increased in speed, the light-weight pony is of course in greatest demand for No. 1 and No. 2 players, and if the idea is not pushed too far no great harm results. Showring judging of ponies tends this way possibly, but it is some consolation to find, at least in America, that showring judges are generally chosen because of their ability at play, and they may be trusted to recognize the type that is best at getting away the instant the ball is dropped, the most enduring and plucky when interfered with, and that can turn on the proverbial tencent piece.

When that acknowledged expert player and judge of clever, fast and wrought-iron ponies, Foxhall Keene, picked Thomas J. Regan's heavy-boned, stoutly-built, rangy, four-year-old, 15.2 chestnut Thoroughbred stallion Stalwart Model as the most suitable to get polo mounts at the New York National Horse Show of 1915, the cry went up that he had selected too much bulk. Yet no one knows better than Mr. Keene that it takes substance as well as speed to carry big International players to victory, and it is generally agreed that he was right, in that it is an easy matter to breed light fast mares to such a stallion and get proper results. This year the same judge picked Allan Pinkerton's nine-year-old, 14.2¼ chestnut stallion Booger Red, by Rancocas, a son of Iroquois, the late Pierre Lorillard's Derby winner. Booger Red is a typical, wedge-shaped, blood-like pony, bristling with quality. A representative of the Japanese government offered $7,500 for him the moment the pony came out of the ring, but Mr. Pinkerton declined it, as he refused the English offer of $8,000 some time ago. In mares Mr. Keene gave first to a 15-hand, seven-year-old chestnut called Meteor, belonging to the Comsewogue Farm. She was rangy, rather plain in character, but with excellent shoulder and good hindquarter, well let down, and apparently in foal. Next he chose a good old-fashioned polo mare of wedge shape, called Los Angeles, 15 hands high, 8 years old and from the same farm. When these two mares appeared in the light weight 150-pound class, with riders up, they were again first and second for handiness, quick get-away, close turning, speed and guiding by the neck. They were considered by Mr. Keene as best for foundation stock and best in the game.

One of the main causes of failure in polo pony production has been the tendency of so-called polo pony stock to exceed the limit of height (14.2) formerly accepted as standard. Gradually this standard became ignored, inasmuch as in important matches ponies 15 hands, and even above that mark, were frequently played. Many players ceased to bother about the height limit in spite of regulations. In fact the measurement of ponies by officials became a custom more honored in the breach than the observance. In adopting various methods to keep down the height of stock, type, and more particularly speed, were lost. Ponies, like other stock, can be stunted in growth, but it was found that the performances of such ponies late in life went below par.

The plan now is to secure mares of the true, old-fashioned pony blood, or at least character, and then by the judicious infusion of Thoroughbred blood through a race-horse-like sire work up to a type that will be permanent, or at any rate stick for a generation or so. Ponies in the game will usually average within an inch or two of the official standard, one way or the other, and no set rule can alter this. British players are depending on English and Irish ponies largely and many such have been seen on American fields in the east and on the Pacific Coast. In the English colonies African ponies, Indian "tatties," Australian "walers" and Chinese or Tartar ponies are used. The problem in America is to breed native polo ponies, quarter, half or three-quarter Thoroughbred, without recourse to fresh infusions of English, Irish, or Oriental blood. The pony is more than half the game, and our leading players are as deeply interested in the subject of breeding as they are in the matter of winning tournaments around the circuit. They pay big prices for good mounts, and eagerly buy up all that the reputable breakers, trainers and dealers offer. The business is in the hands of high-class men who have spent their lives at it and can play up to champion form.

Bergen Co., N. J. A. H. GODFREY.

Midwinter Polo Tourney at Coronado.

Unless weather conditions interfere to make the field unsuitable for play, the mid-winter polo tournament at Coronado will begin on January 1, with competition for the Jessop trophy. The players will include well known riders who have been identified with the most noteworthy colors in the country—Meadowbrook, Bryn Mawr, Rumson, Miami Valley, Point Judith, Midwick, Denver and Coronado.

Many polo men well known here will participate in the matches. Players like Lawrence C. Phipps, Jr., Malcolm Stevenson, Perry Beadlestone, Thomas Le Boutillier and many others of conspicuous daring will be seen in the tournament. Probably the most discussed of these is Alexander Smith Cochran of New York, heir to an estate said to be appraised at several millions, and a first rank contender for polo distinction.

Cochran arrived in San Francisco recently on his magnificent steam yacht "Warrior." Some index to Cochran's efforts to equip himself as a polo player of high rank is furnished by his purchase of the beautiful Mrs. C. H. J. Belmont estate adjoining the Meadowbrook Hunt Club at Westbury, L. I. This he improved, developing a private turf for his own practice and later making a present of the regal estate to the Meadowbrook Club.

E. W. Hopping, G. M. Heckscher, Benjamin Gatins, Steve Velie, Cliff M. Weatherwax, Colonel C. Fleischman and Carlton Burke are some of the other leading players who will appear on the Coronado field during the season.

Twenty-six ponies belonging to Hopping, Wm. P. Hulbert, Mrs. Raymond Belmont and Julius Fleischman are among the stock in the Coronado Country Club stables. Heckscher's string of twenty is due any day, while other ponies belonging to Le Boutillier and Carleton Burke are soon to follow.

Major Colin G. Ross, secretary of the Coronado Country Club, said: "We can look for polo this season which will surpass any we have ever had at Coronado. From the opening match, New Year's day, we shall have brilliant, daring play."

Charleston, S. C., is a most popular wintering resort for the runners and nearly all the stable room there is filled. Among those there A. K. Macomber has 51 and the string will soon be increased by the arrival from England of the great two-year-old North Star, another two-year-old, War Dog, and King's Joker, a three-year-old. John Sanford has 32, E. R. Bradley 23, Ed Trotter 7, and Jefferson Livingston 21.

◆ ◆ ◆

H. C. Hallenbeck recently paid $24,000 for eight yearlings that were lately brought over from England by Duncan Grant of the Rugby Stud. Four of them were by Heliotrope, two by Pericles, one by Marco and one by Land League.

◆ ◆ ◆

Prices for thoroughbreds in England are high in spite of the panicky war times. A gentleman who sent a commission to bid $5000 each on two mares that were offered at auction at Tattersall recently was outbid on both of them.

◆ ◆ ◆

Charley Borel, who was recently given a license by The Jockey Club, has signed up for next season and will ride for Frederick Johnson and Mr. C. K. G. Billings.

Trappoid won at one mile at Juarez December 5th, and covered the distance in 1:38 2-5, the fastest mile of the season at that track.

Horses and Horsemen

State Fair Track Is Not Idle.

Walter Tryon was down from Sacramento this week and reports the State Fair track in elegant shape since the rains. There is not much speed shown on the track these days but a number of trainers have their horses there and will be making speed before the new year is very old. Tryon has eight head in his string. Six of them are the property of Harry Cowell of San Francisco, whose business affairs prevent him from visiting Sacramento very often, but when he does he enjoys driving a fast one as much as any man that lives. His pacer Rastus, that raced so well this year and reduced his record to 2:04¾ in a winning race, is now in fine shape and will be ready for the free-for-alls of 1917. Albaloma 2:08¼ and Mack 2:12¼, both trotters, are also in good order. Mountain Dee, the pacer bred by the late Col. J. C. Kirkpatrick, is showing considerable speed lately. He was given a standard record of 2:20¾ as a three-year-old and worked miles around 2:11 as a four-year-old, and looks now to be good enough to race. He is by Charley D. 2:06¼ out of the great broodmare Mountain Maiden, dam of Tom Carneal 2:08½ and three more in the list, by Cresco. The two Peter the Great colts are in fine order, and they will soon be taking regular work on the track. They will be three years old in the spring.

Mr. Tryon is giving lessons to a two-year-old by Peter McKlyo 2:06 out of Iron Bell, that he thinks a good deal of. This two-year-old is owned by Sam Galt of Sacramento. A green pacing mare by Demonio, owned by G. W. Davis of Vacaville, completes the Tryon string. This mare is showing a lot of speed and heats around 2:10 do not seem to be difficult for her.

James Thompson has Mr. L. H. Todhunter's stallion Peter McKlyo 2:06 at the track. The horse is in perfect condition and can brush a two-minute clip any time he is asked to. He will be in the stud during the 1917 season.

William Ivey has a few young horses by Lijero that are showing well, and Dr. Delano, the popular veterinarian, has a filly that he purchased at Fresno last summer that is by Stanford McKinney and threatened with speed.

John B. Stetson, who came down from Washington to train at the Sacramento track, is handling quite a few youngsters by Robert Bingen that he has purchased for Mr. E. D. Gould of the Midway Stock Farm, Nebraska. Mr. Gould owns Robert Bingen and these youngsters will be given an opportunity to take records.

Only a Few Chances Left.

There are still a few chances—very few—to get your foal of 1916 named in Pacific Breeders' Futurity No. 16, which has a value of $3000. This stake closed last February, and there were 71 mares nominated. Now the substitution condition reads: "If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before January 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return payment nor will any entry be liable for more than amount paid in or contracted for." As this stake did not have a big list of nominators, there were only a few mares that proved barren or lost their foals or died, consequently there are only a very few opportunities for foals to be substituted in this stake. There are a few, however, and if any owner has a foal of 1916 that he desires to give a stake engagement to, he should forward an application for the same immediately to Secretary F. W. Kelly, Post Office Drawer 447, San Francisco, Cal., or bring it in to the secretary's office at 366 Pacific Building, San Francisco. The applications will be granted in the order in which they are received and as there are but a few chances open it is best to "shop early" if you want to get a nomination for your colt or filly.

Henry Helman Training Youngsters by Blue Peter.

Among the horses owned by Washington breeders that Henry Helman of Salinas brought to Salinas when he returned from his campaign in the northwest this fall, was a two-year-old filly owned by James Dacres of Walla Walla, that will be heard from in all probability if she starts as a three-year-old next summer. She is a pacer, and her sire is Blue Peter 35385, a son of Peter the Great 2:07¼ that was bought in Kentucky some years ago by William Hogoboom and sold to his present owners, Bowman & Maurer of Walla Walla. The dam of Mr. Dacres' filly is that good mare Lida Carter 2:12¼ by Stam B. 2:11¼, second dam Lida W. 2:18¼, the dam of Nutwood Wilkes 2:16½, and also of that sensational little pacer Alberta 2:03¼. Mr. Helman also brought down a couple of yearlings by Blue Peter, one belonging to Bowman & Maurer that is out of a McKinney mare, the other belonging to Senator Aukney of Washington that is out of a mare by Antrim. Both these yearlings will be given work next spring when they are two years old. Blue Peter is inbred to Pilot Medium, as his sire Peter the Great is a son of that horse, and also his dam, Kahla Belle 2:29¼.

High Class Saddle Horses at Auction.

Much interest is being shown in the annual sale of saddle horses from Mr. E. J. DePue's Woodland Hackney Stud that is to take place on Wednesday evening next, at the Park Riding Academy on Fulton street, between Fourth and Fifth avenues. While the consignment from the farm is not large, it makes up in quality what it lacks in quantity and there should be prompt bidding when Auctioneer Hord calls for bids. One of the choicest animals to be offered is the seven-year-old mare Iolanthe, which for the reputation of the Woodland Hackney Stud should be sold in New York, as she would there bring something near her value. Iolanthe is undoubtedly one of the greatest green show mares ever seen on this coast. Her training has been limited, but she shows all the hock and knee action of a show ring champion, and in addition to magnificent springy gait and elegant carriage, has all the fire and vim necessary for a first prize winner and at the same time is very intelligent and perfectly gentle. She is a beautiful bay with a white strip in her face and one white hind stocking. She stands 15.2½ and is

broke to both cross and side saddle. Every horseman who has seen Iolanthe believes she can win in any of the eastern shows including the National Horse Show at Madison Square Garden.

Iolanthe is not the only handsome and classy saddle animal to be offered at this sale, as there are a number of fine saddle animals, mares and geldings bred on the Woodland Farm and thoroughly mannered for the saddle and to drive. Many of them have fine action, and several are suitable for ladies or children to ride. There are two or three splendid ponies in the consignment, also a number of horses that have been used in the ring at the Park Riding Academy by the members of the riding classes. No better lot of useful and thoroughly broken horses has ever been offered at auction in this city. The sale will begin Wednesday evening at 8 o'clock. McAllister or Fulton street cars pass the door of the Academy.

Will Spend the Holidays in Oakland.

Geo. A. Kelly, of Walla Walla, who owned and raced Anzella 2:06¾ and now owns that fast producing son of McKinney 2:11¼, Bonnie McK, came to California a few weeks ago with his wife to spend the holidays with "the children," who have homes and families of their own in Oakland. Mr. Kelly has not yet entirely recovered from the effects of an accident he met with last spring, when he was thrown from a cart he was riding in when the horse he was driving stumbled and fell. The horse was speeding at the time and Mr. Kelly was thrown fifty feet, striking the ground on his head and face. The bones of his nose and chin were broken, his teeth knocked loose, and he was unconscious for forty-eight hours. Outside of a tooth or two missing from his lower jaw, and a scar across the bridge of his nose, which will doubtless soon be entirely obliterated, his face does not reveal how serious the accident was, and the surgeons surely did a good job. Mr. Kelly reports very cold weather in the north and great loss among the apple growers from the freezing of the fruit after being boxed and put in the warehouses. The get of Bonnie McKinney are beginning to drop into the standard list, no less than eight now bearing standard records. One of the most promising of his get is the pacer Joe Buckley that was raced in the northwest by Will Hogoboom this year. This horse took a record of 2:12½ we believe, was only beaten a half length in 2:06¼, and looks a good one for the fast classes in 1917. Mr. Kelly says Bonnie McK will probably make the season of 1917 in Walla Walla. During his stay in California Mr. Kelly is enjoying trips to the training tracks, having been shaking hands with the boys at Pleasanton and Santa Rosa this week. He will not return to Walla Walla before February.

The complete racing career of the pacer Billy M. 2:03¾, that died recently, shows that he started in 69 races, was a winner in 38, second in 12, third in 18, fourth in two, unplaced in but five. His gross winnings amount to $15,540.

W. J. Leyburn Sold for $15,000.

Terra Haute, Dec. 5.—The most important sale of trotting horses that has taken place in Indiana for a number of years was consummated here today, when W. H. (Knap) McCarthy, veteran Grand Circuit driver, sold to Hon. David Tod, a wealthy sportsman of Youngstown, Ohio, the brown trotting stallion W. J. Leyburn, by Crito Leyburn (son of Arion 2:07¾ and Criterion by Crittenden) dam Nancy J. Farrelly, dam of eight standard performers, by Equivalent, for a consideration of $15,000.

The horse has a record of 2:14¼ and has an authentic trial of 2:07½, half in 1:02, quarter in 30 seconds over a mile track, and 2:08½ over a half mile track.

Being only five years old and a trotter of championship caliber, W. J. Leyburn is considered the best prospect in the United States for the Grand Circuit classes to which he is eligible.

No Demand for Morgans.

The annual sale of Morgan horses was held at the United States Government Farm, at Weybridge, Vermont, November 13th. The farm is not very large and a sale is held each year to prevent overstocking. At this sale eighteen head were sold, including colts and broodmares.

The prices were not nearly what was expected. Most of the stuff was thin in flesh and not in anything like sale condition, which probably accounts, in a large measure, for the low prices received.

The first one put up was a brood mare, sound, and in foal to Scotland. The opening bid was only $25 and she was finally knocked down for $50. Next came a two-year-old filly which went for $50, and the next one, also a two-year-old filly, sold for $35. Several others went at prices ranging from $20 to $45, and one yearling filly brought only $10.

The total for the eighteen head amounted to only $503 or an average of a trifle under $28 per head.

Macomber's Latest Purchases Reach New York.

On board the steamship Lancastrian of the Atlantic Transport Line, which docked at New York last Saturday, were three of the finest young thoroughbreds which have been shipped to this country in recent years. These were North Star, by Sunstar—Angelic, War Star by Sunstar—Berne, both two-year-olds, and King's Joker, a three-year-old by Sunder—Absurdity.

They are all recent purchases of A. K. Macomber, the California sportsman who made his debut on the turf last season and since then has spent a small fortune in getting together a high-class stable. The horses were bought from Sol Joel, the English owner. North Star is undoubtedly the pick of the three, with the Middle Park Plate, one of the most important two-year-old events, to his credit. The winner of this annual fixture, according to the English custom, is made the Winter favorite for the Derby, and in numerous cases has won the great three-year-old classic. Mr. Macomber is said to have paid $40,000 for North Star.

War Star is another Sunstar youngster which has won a number of races as a two-year-old, though they have been of less importance than the Middle Park Plate, and whether he has the speed of North Star will not be found out until next season, when he will be seen on the Metropolitan tracks as a three-year-old.

King's Joker, by Sunder—Absurdity, is a three-year-old chestnut, which appears to have a lot of class. He has been moderately successful in England and should make a valuable acquisition to Mr. Macomber's already large stable.

All three colts were shipped to Walter Jennings at Charleston.

There Are Two Kinds.

A young student in a little red school house under the hill got his geography a bit mixed. On examination day he wrote concerning the subject Zones, as follows: "There are two zones, masculine and feminine. The masculine is either temperate or intemperate; the feminine either torrid or frigid."

There are two zones in the manufacture of veterinary remedies and in the selling of them to the horse owner. In one zone the manufacturer makes an article which contains the very best medicinal ingredients money can buy. He makes this article good so that horsemen will use his remedy year after year. His is not a catch-penny affair where they only hope to sell one order. He wants his good remedy to sell well this year and fifty years from now and backs every order he sells with a binding gilt-edge guarantee. HORSE HEALTH is made and sold in the above zone. It is made right, and cannot fail to do right in any recommended use. HORSE HEALTH is used today by the world's most successful horsemen and a great many prominent veterinarians.

There is another zone in which the nondescript condition powders are made, which horsemen are now well acquainted with. The inferior condition powders are sent out into the world in the same manner as an anonymous letter—no one to back their claims and no one to care whether they make good or not. HORSE HEALTH is fast eliminating such preparations from the market, for once a trial is given this good remedy the results readily show the user that there is really no comparison between HORSE HEALTH and any other conditioner and tonic ever made. Write to The Horse Health Co., Norwalk, Conn., for their booklet telling "Who says so."

Notes and News

Both the sire and the dam of Lee Axworthy 1:58¼ are now owned at Walnut Hall Farm.

Peter Scott 2:05 is to be placed in the stud in Kentucky during the season of 1917.

Eleven mares were added this year to the list of mares that have produced two 2:10 trotters.

E. E. Smathers, of Major Delmar 1:59¾ fame, is a devotee of the bridle paths and is using Frank L. 2:09¼ and Vanko 2:06¼ in Central Park, New York.

Silver Spring Stock Farm, the new owner of Bingara, announces that the fee for that stallion will be but $100 for the season of $1917.

Secretary Woodland of Youngstown, Ohio, has already announced a ten days meetings for next spring, featured by fourteen early closing events.

California State Futurity, $2500 guaranteed, will close for the nomination of mares January 2d, 1917. See advertisement.

There are a few opportunities for getting substitutions in Pacific Breeders' Futurity No. 16. It is worth $3000. Jan. 1st, 1917, is the last day. Make your application before then.

John Sloughgrove, who has been the secretary of the Shire Horse Society in England for 33 years, died recently from the result of a street car accident. He was 69 years of age.

The Hampton County Fair Association, at Holyoke, Massachusetts, has been suspended by the N. T. A. because it failed to pay its purses last summer and will remain suspended until it pays up.

Madison Square Garden was sold for $2,000,000 at the foreclosure sale on the 8th inst. The bid was made by the New York Life Insurance Company, holder of the mortgage, and there were no other bids.

They are now predicting that Ben Billings 2:07, pacing son of Bingen and Lou Dillon, will reduce his record several seconds before the end of next season.

Thos. S. Griffith, of Spokane, has been elected president of the North Pacific Fair Association. Mr. Griffith is the head of the Spokane Inter-State Fair, the greatest fair held in the northwest.

The Chicago Sale, at which W. G. Durfee, Hemet Stock Farm, R. W. Scott of Inyo county, C. A. Harrison of Seattle and other Pacific Coast owners will sell, opens Monday next at the Union Stock Yards.

It is pleasing to know that Mr. L. G. Duffy, editor of that excellent trotting horse journal The American Sportsman, of Cleveland, is recovering rapidly from a recent operation for appendicitis.

The date of the Oregon State Fair is fixed by the Oregon legislature as the first week in September each year, but a petition will be presented to the Oregon legislative body to permit the board of directors to fix the date.

Not all the prices were high at the Old Glory sale. A weanling colt by Justice Brook 2:09¼, a champion at two years of age, dam Sonoma Girl 2:04¼, a champion in her day, sold for $110 and a yearling full brother to the weanling sold for $150.

Homer J. Kline, who has been the efficient secretary at North Randall for several years, has resigned and will re-enter journalism on the staff of a periodical devoted to the automobile. W. Kinnan of Chicago has been appointed Secretary at North Randall in Mr. Kline's place.

James Y. Gatcomb, who spent one season in California some years ago, still has his great pacer Audubon Boy 1:59¼ and is quartered at North Randall, Ohio, for the winter. Audubon Boy will be 20 years old in the spring but is in perfect health and condition.

There are more trotters and pacers in the hands of trainers east of the Mississippi river than during any winter in ten years. The secretaries of the regular circuits throughout the east and middle west are figuring on big entry lists for the racing season of 1917.

Good horses of any established breed are bringing good money these days. One hundred and thirteen thoroughbred horses were sold for an average of $557.20 week before last during the annual winter sale held at Lexington by the Kentucky Sales Co., the highest price, $9,500, being paid for the eleven-year-old stallion, Transvaal.

California State Fair Futurity No. 9 will close for the nomination of mares on Tuesday, January 2d, 1917. It is for the foals of mares covered in 1916, and it costs but $2 to nominate. It has a guaranteed value of $2500, of which $1500 will be for three-year-old trotters and $1000 for three-year-old pacers.

Harry Young, address not given, tried to start the pacing gelding Albia 2:11¼ by Alton, out of his class on some of the New York half mile tracks this year and won $315 with him. The man and the horse have been expelled by the National Trotting Associations until the unlawful winnings shall have been returned for proper distribution. Albia was raced in Oregon and took his record at Salem in 1913.

The question of organizing a Western Trotting Association, to take the place of the National and American associations on this coast, was debated at the recent meeting of the North Pacific Fair Association held at Portland, but the concensus of opinion was that the time was not opportune for the organization of such an association.

Rider and Driver, of New York, is the first Christmas number of any of the horse journals to reach our desk. The cover page is very fine, the illustration being of the Hackney pony stallion Irvington Tom Trot, from a painting by Haas. The 24 pages of the number are beautifully illustrated with half tone engravings of winners in the recent National Horse Show.

Hon. David Tod, of Youngstown, Ohio, who recently paid $15,000 for the trotter W. J. Leyburn, will probably name this horse in the same events that Dr. Buechnu, also a resident of Youngstown, will name that great trotter Wilkes Brewer 2:08¼ in the next season. There is said to be great rivalry among the horsemen of Youngstown as to which will have the best trotter on the Grand Circuit in 1917.

F. R. Bain, president of the Los Angeles Gas Company, has consigned his pacer Zocon, eight years old, to the Chicago Sale. This horse is an own brother to Auto Zombro 2:02½, being by Zombro, dam Trixie by Conifer. Zocon worked in 2:19¼ as a three-year-old, and has been used on the road by Mr. Bain ever since, but never trained or raced.

Gean Smith has just painted a portrait of Lee Axworthy 1:58¼, for William Bradley, breeder of the champion trotting stallion. Mr. Smith is now working on a portrait of Guy Axworthy 2:08¾. He says this horse is one of the most perfect in all his lines and proportions that he has ever seen, with a head and neck that would pass for the front of a desert Arab.

Miss Lotta Crabtree, of Boston, favorite San Francisco actress of years agone, who gave the Lotta fountain to San Francisco, who paid $20,000 for the trotting mare Sonoma Girl 2:04½ and who bred the greatest money winning trotter Peter Scott 2:05, was painfully though not seriously injured recently in an automobile accident near New Haven, Connecticut.

John Gwynne 2:11½, the eight-year-old bay gelding bred by John Grimes of Petaluma, sold to eastern parties and for the past two seasons a member of the Pittsburg, Pa., matinee brigade, was purchased at the Old Glory Sale by J. W. Linnehan of South Weymouth, Mass., and will be raced next season. He is by McMyrtle, son of McKinney, and his dam is by Secretary.

Breeders of draft horses in California are getting fair prices for heavy pairs, but very few teams are sold here for more than $500. To show how the New York market for heavy drafters is at the present time we note that at last week's auctions at Fiss, Doerr & Carroll's a pair of chestnut geldings that tipped the scales at 3700 pounds sold for $765 and for several other teams $600 and over was received. The average for seven matched pairs was $560.

Ideal, a young stallion raised on a farm near Washington Court House, Ohio, proved the first prize sensation among the Belgian horses at the International live stock exposition. The Belgian horses were the first to be gone over by the judges. This stallion, now the property of J. Crouch & Son of Lafayette, Ind., took the blue ribbon at the Ohio State Fair. It was at Columbus that the Crouch firm bought the youngster for $2,000.

Guy Axworthy 2:08¾ has been sold four times by auction in Madison Square Garden. John H. Shults, who bred him, consigned him to the Fasig-Tipton Company's sale in November, 1907, where William Bradley bought him for $8,100. When Mr. Bradley dispersed the last of his trotters at the Garden in 1912 Senator J. W. Bailey bought the son of Axworthy 2:15½ and Lillian Wilkes 2:17¾, for $4,200. Mr. Bailey sent him back to the Garden in February, 1914, when he was struck off for $2,100 to Hunter Moody, who resold him to Leo Oettinger for $2,500 without taking him out of the building. Mr. Oettinger soon afterward let the late Jacob Ruppert have a half interest in the horse for $1,250, and he was sold for the joint account of Mr. Oettinger and the Ruppert estate when he brought $20,000 at the Garden a few weeks ago.

O. W. Welch, of North Adams, Mass., recently bought a horse on the witness stand. He was testifying for the defense in a damage suit in which a horse had been struck by an automobile. "Would you give $75 for the horse as he stands today?" asked the attorney for the plaintiff. "I would," said Mr. Welch. "Then you have bought a horse," was the quick retort. And a check for the amount was written out at once.

Referring to the fact that Russell Boy 2:00¼ won a race at New Orleans Nov. 18th in 2:08¼, 2:09¼ and 2:07, the American Horse Breeder remarks, "that must be a world's record for the time of the year." Did the A. H. B. notice that only the day previous (November 17th) the California pacing mare White Sox by Del Coronado, driven by her amateur owner, won a race at Phoenix, Arizona, in 2:05, 2:05¾ and 2:06, while the same day the California trotting mare Esperanza by Carlokin won a race in 2:07¼, 2:08½ and 2:07½?

Wm. Thaw, Jr., of Pittsburg, was the real purchaser of the weanling filly Harvest Dawn, by The Harvester 2:01, that was struck off to W. J. Thubron for $1,900 at the Garden sale. Mr. Thaw is a newcomer on the trotting turf. Harvest Dawn is engaged in futurities aggregating about $50,000. Her dam, Lucille Bingen, by Bingen 2:06¼, has a record of 2:08½ as a three-year-old, and her grandam, Lucille Marlow, by Prodigal 2:16, has a mark of 2:09½, while her third dam, Miss Edgar 2:29, is the dam of Minna Ward 2:10.

Graustark, the roan pacer owned by J. Silvey of Dixon, that went east last summer and raced through the middle west and the southern states with good success, winning about twenty races, is as well bred a pacer as hit the half mile tracks this year. He is by Aerolite 2:06¾, his dam is by Bonnie McK 36569 (son of McKinney 2:11¼ and Bonsilene 2:14½ by Stamboul), and his second dam is that famous old roan mare Birdie by Jay Bird that is the dam of Bodaker 2:13 and others, including that fast matinee trotter Yoncalla that is owned by Mr. Giovanetti of this city.

Fifteen thousand dollars is to be added to the stakes of the Kentucky Derby which will be run at Churchill Downs May 12th, 1917. The event will be the richest stake in the west and will doubtless be worth more than $20,000. Among the cracks to be named, chief interest centres in R. T. Wilson's Campfire, leading money winner of the American turf this year, and North Star, the leading two-year-old of England, which Sol Joel recently sold to A. K. Macomber for $40,000. The probable presence of this pair had much to do with the raising of the value of the Derby.

The historic Stony Ford Stud Farm, in Orange county, New York, is being cut up in part and sold off by Louis Titus, the Californian who purchased it a year or two ago from the estate of the late J. Howard Ford. Mr. Titus disposed of twenty-three of his trotting bred horses in the recent sale at Madison Square Garden, and has since sold more than two hundred acres of the farm where Electioneer, Swift 2:07, and other equine celebrities were foaled. The famous farmhouse in which General Grant, Governor Leland Stanford, Robert Bonner, General B. F. Tracy, William C. Whitney and other horsemen were guests in the days of Charles Backman is not in the market, it is said.

The Department of Agriculture is investigating the practice of some shippers of hay of veneering or facing the bales. Veneering consists in feeding to the baling machine an occasional forkful of hay that is of higher grade than the bluk of the lot being baled and manipulating the forkful in such a way that the high-grade hay covers the outside of the bale, making the bale appear to contain better hay than it actually does contain. The National Hay Association has requested the Department of Agriculture to co-operate with it in trying to eliminate this practice, believed to be dishonest. Buyers of baled hay are warned to be on the lookout for this practice in order to avoid accepting on a cursory examination a lower grade of hay than they intend to purchase.

Nine Horses Die In Bowie Fire.

Bowie, Md., Nov. 21.—In a disastrous fire which completely destroyed three stables and damaged many others at the Prince George Race Track at noon today, nine thoroughbreds were burned to death. Had not the wind changed suddenly when the blaze was under control, probably the entire equipment, including stables, stands and club house would have been wiped out.

The horses which came to their sudden death were Father Riley, Corsican, Yellowstone, Joyland, King Box, Running Shot, Bootless Baby, Ballagung and Chelsea. There are about 700 or 800 thoroughbreds quartered at the track.

Several men and boys had their hands severely burned during the work of rescue. Manager O'Hara worked like a Trojan to save the horses and buildings. Yellowstone, Father Riley and Corsican were worth $3,000 each.

The other five were worth $1,500 each. All were a total loss. The stables were insured for half their value, $1,500 each. The association will replace the stables temporarily with tents.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Shorter Fishing Season.—Owing to the constant increase in the number of anglers in California, a shortening of the trout season to the middle of November, says President F. M. Newbert of the State Fish and Game Commission, is among the possibilities of the near future.

Although the Commission has taken no action, the Legislature may be asked to act at its next session. At present the trout season in most of the State closes November 30th. In District No. 2 it reopens on December 15th to remain open until February 14th.

The number of anglers' licenses for the year ending December 31st is expected to be at least 25,000 greater than during the year 1915. Last year 90,000 licenses were issued by the Commission and this year indications are that the total will reach the 115,000 mark.

"The constantly increasing use of the automobile for traveling," says Newbert, "is one of the principal reasons for the increasing popularity of fishing. With the present outdoor equipment and means of traveling, hundreds of people in cities find it convenient to spend week-ends in the open.

"The increase in licenses also shows the people are in sympathy with the present game laws and that they are more willing to pay for the sport they enjoy. Although the Commission is constantly restocking the streams it may be necessary to shorten the season a couple of weeks in November. It will not seriously affect the fishing, however, as the height of the season has been passed by this time of the year."

Wonderful Woman Shot.—When it comes to shattering the elusive clays, Mrs. Ad. Topperwein comes pretty nearly being in a class by herself.

She is beyond all question the greatest of all fair Dianas of the traps today, and is possibly the best trapshot in the United States.

That's quite a compliment and a great honor to pay anyone, especially a woman, when you take into consideration that there are more than 600,000 trapshooters in the United States, but it is no more than Mrs. Topperwein deserves.

Year in and year out for a dozen of them she has shot at 8000 to 10,000 targets and has always compiled an average of better than 95 per cent, but on November 10th she accomplished the greatest feat of her career when she pulverized 1952 out of 2000 targets thrown in succession from the traps of the Montgomery (Ala.) Country Club.

Not only did Mrs. Topperwein establish a record for performance, but she also established records for endurance and for the greatest number of shots fired over the traps in one day by one shooter. Back in 1908, when she had been shooting four years, Mrs. Topperwein shot at 1000 targets in San Antonio, Tex., her home city, and broke 961. It took her four hours and 35 minutes to shoot at the thousand clay boys. It only took her 5 hours and 20 minutes to shoot at the 2,000 targets, of which 3 hours and 10 minutes were spent in actual firing. Thus her improvement will be noted.

No man has ever shot at 2,000 targets in one day, and only one has shot at 1000. He is J. W. Garrett, of Colorado Springs, Col., and he broke four more targets than Mrs. Topperwein did in 1908. In her magnificent performance in Montgomery Mrs. Topperwein used only one gun, weighing 7½ pounds, and did not rest a minute, despite the fact that the barrel of the gun became so warm a number of times that ice water had to be poured over it. It was difficult to hold, and Mrs. Topperwein suffered a blistered hand, but she was shooting better at the close than when she began. She broke 96 of the first 100 targets and 98 of the last 100.

The lowest score she had in any 100 was 95, and her average for the 2000 was a shade less than 98. She compiled straight runs of 106, 111, 139 and 280, which we might say in conclusion is "some" shooting.—[Peter P. Carney.

Big Trout-Raising Season.—Bear Valley Hatchery had the biggest season of trout-raising in its history and was operated to capacity this year, no less than 150,000 rainbow trout fry being hatched and distributed from the spring "take" of eggs from the Bear Lake fish, all in San Bernardino county lakes and streams.

Bear Lake, although already teeming with fish, received 386,000 more fry, the last 106,000 being emptied at the time of closing the hatchery, July 17, as it was impossible then to get over the Mill Creek road with the trucks to the upper Santa Ana, where these fish had been allotted. So the state fish-car was sent South from the big mother hatchery at Sisson with 120,000 rainbow, steelhead and Eastern brook trout for the Santa Ana and its tributaries.

For the benefit of angling licensees who wish to know where these fish were planted by the Fish and Game Commission in its efforts to repair the storm scouring of last January, W. H. Shebley, in charge of the department of fish culture, has prepared the following statement of distribution, which should be pasted in the hat of every sportsman:

From Bear Valley Hatchery—in Bear Lake, July 1, 2 and August 17: 386,000.

During July: 10,000 each to Shay's, Van Dusen, San Antonio, Waterman, Cucamonga and Bear creeks; 5000 each to North, Middle, and 6000 to South Forks Lytle creek; 5000 each to main Santa Ana, Forsee, Barton and South Fork Santa Ana; 400 to Devil canyon, 12,000 to Coble creek, 2,000 to Day canyon, 4,000 to Sawpit canyon, 12,000 to Lower Deep canyon, 8000 to Grass Valley creek, 48,000 to Mill creek, 48,000 to Forest Home, 4,000 each to Alder, Falls and Fish creeks; 2000 to Castle and Vivian creeks each; City creek, Dark canyon, 24,000 each; Holcomb creek, 30,000, Crek creek, 6000.

From Sisson Hatchery, September 9—Santa Ana river, 16,000 steelhead, 38,000 Eactern brook at Big Meadows, one-quarter mile up south fork; Falls creek, 14,000 steelhead; south fork Hill creek, 12,000 steelhead, 6000 rainbow; Montana Home creek, 6000 steelhead; Forsee creek, 4000 Eastern brook, 8000 steelhead; Barton creek, 8000 each of Eastern brook and steelhead.

CLUBS FIND IT PAYS TO ADVERTISE.

Wilmington, Portland and Seattle Clubs Go into the Boosting Game on Large Scale.

[By Peter P. Carney.]

It pays to advertise.

There was a time—and it wasn't so many years ago—that some of our men of affairs considered advertising a means for the getting rid of superfluous cash.

But not now.

Advertising—the right kind—is essential in every business. One cannot hope to be successful these days without it.

Advertising can be applied to trapshooting clubs as well as to business. Some gun clubs already know the benefits to be derived from advertising. I will tell you about them so that your club may take heed.

Wilmington, Del., is a progressive city. It has a progressive gun club. Wilmington newspapers are strong for the Wilmington Trapshooting Association. But the club doesn't stop here in selling its wares. In the railroad station, the cigar stores, hotels and all public places will be found placards telling when the next shoot of the association takes place; where it will be held, the time, and how to get there, with this P. S.: "Visitors are always welcome." This progressiveness is the reason that Wilmington has more trapshooters than any city of its size in the United States.

The Seattle (Wash.) Trapshooting Association is following in the footsteps of the Wilmington organization. For their recent big tournament they invited everyone through the columns of the press, placarded the city, put signs in the hotels and other public places and not only invited every one to witness the shoot but made special mention that "admission was free."

"Shooters have long distances to travel for the big tournaments on the Pacific Coast and 100 entries in California or Oregon is equal to twice that number in the East. So to get out the shooters for the Northwest tournament at Portland the gun club of that city sent around a cloth sign three feet by ten feet, with no letter less than ten inches in heighth, telling the trapshots of the tournament and inviting them. They responded. To all trapshooting clubs visitors are always welcomed and no admission is ever charged to witness any trapshooting competition.

Progressive trapshooting organizations know that it pays to advertise.

Seattle Association.—Only three shooters braved one of the worst storms of the season and the hardest blow that has been experienced on Harbor Island for a long time, to go out and try their luck at the handicapped shooting on December 3rd. Angles of every description were on tap and for really good shooting exercise the sport could not be beaten.

C. W. Bandy and J. H. Hopkins went through the fifty target program with forty-two to their credit. Hi Follerich finished the fifty with thirty-eight.

In an extra hundred targets Follerich finished with eighty-eight and Hopkins eighty-two.

On Sunday, December 24th, the Seattle Trapshooters' Association has planned a big Christmas turkey shoot. Arrangements will be made for the winners of all "birds" to obtain them on the afternoon of the shoot for use on the following day. A definite program for this day will be announced later. The scores:

C. W. Bandy 42x50, J. H. Hopkins 42, Hi Follerich 38. Hi Follerich 88x100, J. H. Hopkins 82.

Seattle, Wash. E. A. FRY.

TO HONOR FAMOUS IZAAK WALTON.

"Father of Fishing" to be Remembered by Anglers' Clubs on Anniversary of His Birthday.

For the first time in the history of angling America, an effort will be made next year to properly celebrate the birth of Izaak Walton, the gentle angler.

Although English fishing clubs for years have had celebrations on the birthday of the fisherman who wrote the classic, "The Compleat Angler; or, The Contemplative Man's Recreation," American angling clubs have been remiss in this direction.

The United Anglers' League, of New York, intends to have a national celebration to commemorate August 9, 1493, the day when "honest Izaak" was born at Stafford, in the parish of St. Mary.

The league will ask the co-operation of fishing clubs all over the country, including the Salmon Club or Oregon, St. Petersburg Tarpon Club, Izaak Walton Club, Fort Meyers Fishing Association and the Sailfish Club of Florida, Aransas Pass Tarpon Club, of Texas, the Tuna Club of California, and the Atlantic Tuna Club of Rock Island, together with the fishing clubs in every town.

To this end the United Anglers' League has appointed an Izaak Walton committee, consisting of John W. McDonald, John S. Roberts and Julius Heyman. The committee will probably be increased to a number that will permit the appointment of several sub-committees, each with a special function. The idea will be an annual celebration of "Walton Day."

Walton published the first edition of his celebrated work in 1653 and lived to see it go through no less than five editions, the last of which was accompanied by a second part written by his intimate friend and adopted son, Charles Cotton, of Beresford Hall, in the county of Stafford. In it Cotton treated of fly-fishing.

Since Walton's death every few years some author and some publisher have gotten out an edition of "The Compleat Angler," some using the modern spelling of "complete" and others using the old English form.

Some of these authors from Walton's time to the present include Moses Browne, Hawkins, Ellis R. Thompson, Major, Rennie, Nicolas, Bethune, "Ephemera," E. Jesse, G. C. Davies, H. Morley, R. B. Marston, J. R. Lowell, E. G. Johnson, J. E. Hartiz, C. H. Dick, Andrew Lang, Richard Le Gallienne, Austin Dobson, J. Buchan, A. W. Pollard, S. A. B. Dewar and Sir Edward Grey.

Some of these volumes are illustrated, others are not. The earlier editions command fabulous prices and literally are worth their weight in gold. Libraries which have early editions of Izaak Walton's book keep them in glass cases.

It is interesting to reprint the manner in which the first edition of "The Compleat Angler" was advertised in the "Perfect Dirnall" from Monday, May 9, to Monday, May 15, 1653:

"The Compleat Angler, or the Contemplative Man's Recreation, being a discourse of Fish and Fishing, not unworthy the perusal of most Anglers, of 18 pence price. Written by Iz. Wa. Also the known Play of the Spanish Gipsee, never till now published. Both printed for Richard Marriot, to be sold at his shop in Saint Dunstan's Churchyard, Fleet Street."

Izaak Walton was evidently a believer in the follow up system, for the same advertisement was printed in the "Mercurius Politicus" from Thursday, May 12, to Thursday, May 19, 1653.

In "The Compleat Angler" Izaak Walton refers to sixty-seven books, but if one copy of every edition of his own book were put on a five foot shelf half a dozen five foot shelves would have to be added to contain them all.

Few books in the history of the world have been so popular or have been edited by more individuals. Probably the romance of "The Compleat Angler" has been more romantic than the life Izaak Walton himself led in the ninety years he spent upon the earth.

The first edition of "The Compleat Angler" found a ready sale. The publishers put out a second edition, which is really the first of the book as it is known today. In this second edition he increased its length by at least one-third and made many changes and additions.

The first edition had two interlocutors, "Piscator" and "Viator." In the second edition there are three: "Venator" taking the place of "Viator," whom, however, Cotton resuscitates in his second part. The second edition was so popular a third and fourth edition followed. If Walton had not asked Cotton to write a second part doubtless his adopted son's name would never have been linked with the father of fishermen.

All editions since have been based on this fifth edition. Following are the dates of the five editions. First, 1653; second, 1655; third, 1661; fourth, 1664; fifth, 1668.

Illegal Catch of Sardines—The opinion of Attorney R. D. Duke of the Fish and Game Commission that the conversion of sardines into fertilizer or chicken feed, although without the province of that State board, is nevertheless illegal, caused quite a stir among canners at San Pedro, Long Beach and San Diego, as enforcement of the law is up to the State health authorities, who always have been active in other lines. Canners lay the light catch of albicore to over-abundant sardines, and took double pleasure in keeping their plants busy working.

OREGON SPORTSMEN'S LEAGUE MEETS.

Recommendations Made in Change of State Laws and Management of the Game Commission.

Portland, Ore.—The proverbial steam roller was in evidence at the afternoon session of the third annual convention of the Oregon Sportsmen's league on Monday, December 4th, at the Imperial Hotel.

When the smoke had cleared away, and a majority of the delegates, who numbered close to 70, were late to their duck dinner in the Chamber of Commerce dining room, 11 recommendations that will be presented to the state legislature were passed, new officers were elected from the seven districts of the state being appointed.

The recommendations for changes in the game laws, as passed by the league, are as follows:

The preservation of the Malheur lake preserve, one of the most important wild fowl resting places in the United States.

Reducing the limit of trout from 75 to 50 and not more than 100 in seven consecutive days.

The prohibition of the killing of female China pheasants.

The changing of the opening of the deer season from August 15th to September 1st.

The reducing of the limit on ducks from 30 to 20 in one day and 25 in seven consecutive days.

The blending of the state law regarding the opening and the closing of the duck season with the federal migratory bird law.

The closing of the Willamette, Rogue and Necanicum rivers to net fishing.

The opening of a China pheasant season in Hood River county, from October 1 to October 10; bag limit, three males.

The appointment of two members of the Oregon Sportsmen's League as members of the Fish and Game Commission, together with the appointment of two members by the governor, the four members to meet and elect their own chairman, who shall be the fifth member of the commission.

Practically the entire afternoon, given over to discussion of the various game proposals, was consumed in a bitter debate over the Rogue river net fishing question. Secondary to this was the Willamette river net fishing and the abolition of an open season on hen pheasants.

The Rogue river net fishing subject saw an alignment of C. M. Thomas and R. L. Ewing for the anglers, and George Putnam, Dr. J. C. Smith and Rodney L. MacLeay for the cannery men. Game Warden Shoemaker, I. N. Fleischner and F. M. Warren also gave an illuminating history of the Rogue river fishing subject in general.

A vote on the subject favored closing the stream to net fishermen by 14 to 10, several of the delegates not voting.

The matter of feeding ducks on the lower Columbia river, which was expected to assume a position of prime importance in the deliberations, was not mentioned.

Late in the afternoon the question of changing the administration of the state game commission came up, but it was not given the amount of discussion that some of the delegates would have liked.

So much legislative matter was before the body for consideration that it would not be accomplished in one day and it is likely that the 1917 convention, which will be held in Portland, will be a two-day affair.

The delegates held their annual banquet at the Chamber of Commerce. A new set of films on wild game life, exhibited by State Biologist W. L. Finley, was a feature of the evening.

Dr. E. C. McFarland, present president of the Multnomah Angler's Club, was named president of the league to succeed H. B. Van Duzer. Leslie Butler of Hood River was chosen first vice-president and Y. D. Hensill of Eugene was named second vice-president. S. C. Bartrum of Roseburg was re-elected secretary-treasurer.

The new members of the executive committee in the districts are: District No. 1, H. B. Van Duzer; district No. 2, L. H. Kelly; district No. 3, M. H. Bauer; district No. , R. L. Ewing; district No. 5, Richard McDonald; district No. 6, J. M. Nichols, and district No. 7, Robert Robertson.

The following clubs were represented:

Round-Up Gun Club, E. F. Averill; Corvallis Rod & Gun Club, M. H. Bauer; Grants Pass Rod & Gun Club, Dr. J. C. Smith; Estacada Gun Club, A. W. Heylman and C. W. Bartlett; Oakland Gun Club, E. J. Wainscott; Molalla Rod & Gun Club, C. J. Herman; Canemah Rod & Gun Club, C. E. Tracker; Gaston Rod & Gun Club, J. H. Westcott; Hillsboro Rod & Gun Club, G. W. Russell; St. Helens Rod & Gun Club, E. I. Ballagh; Sutherlin Rod & Gun Club, F. R. Armstrong; Clatskanie Gun Club, R. B. Magruder; Ashland Rod & Gun Club, James H. Driscoll; Clackamas Rod & Gun Club, W. L. Kelly; Newberg Rod & Gun Club, F. W. Kincaid; Hood River Rod & Gun Club, Alva Day; Haines Rod & Gun Club, J. K. Fisher; Salmon Club of Oregon, W. E. Carlon; Oregon Field Trials Club, Dr. C. S. White; Portland Revolver Club, Roger Newhall; Umpqua Rod & Gun Club, V. R. Allen; Rogue River Fish Protective Association and the Medford Rod & Gun Club, C. M. Thomas and R. L. Ewing; Umpqua County Fish and Game Club, E. V. Averill and Marion Jack; Seaside Anglers' Club, C. M. Godfrey; Umpqua Sportsmen's Club, S. B. Crouch; Bend Sportsmen's Club, J. G. Gill; Klamath Sportsmen's Club, T. H. Mitchell; Newport Rod & Gun Club, G. A. Schumacher; Eugene Chamber of Commerce, Y. D. Hensill; Lake Grove Anglers' Club, N. E. Tyrell; Portland Gun Club, H. A. Pollock; Astoria Rod & Gun Club, C. V. Brown; Yamhill Country, Rod & Gun Club, M. F. Corrigan and J. L. Fletcher; Capital City Rod & Gun Club, Mark Siddall; Brownsville Rod & Gun Club, Ira Hutchings; Multnomah Anglers' Club, W. F. Backus, Dr. E. C. McFarland, A. J. Winters, W. L. Finley, Carl Shoemaker, E. S. Catron, F. M. Warren, F. A. Elliott, R. E. Clanton, George H. Cecil, Stanley G. Jewett, Thomas McKenzie; Orin Thompson and C. S. Bartram of Roseburg, and H. B. Van Duzer of Portland.

Game Plentiful in Alaska—Charles Peterson has just returned to Tacoma from a trip to Alaska. With him he brought not a few trophies of the chase and the finest collection of hunting stories imported in some time.

"Shooting deer out of the back door of our house was one of the best things we did," Peterson asserts. "One morning shortly after we arose we looked out and saw a deer standing on the shore not more than 100 yards away. We did not have to go out of the house, but standing in the doorway brought down enough venison to last us and our friends for several meals.

"And grouse? Honestly we could sit in a rocker on the front porch and get all the grouse we could eat or force upon our friends. They used to come and try to steal some of the grain from the chickens.

"Ducks? We went in the back yard for them and shot them as they swam past. Same way with geese. Oodles of them. In fact I've had so much game meat of late that Im tickled to death to get back to Tacoma where I can bite into a choice piece of beef neck and have hot sausage for breakfast."

Peterson admits that the house which he did all of this plain and fancy shooting is quite a way out of town.

Portland Club.—Dr. E. C. McFarland captured high honors in bait casting and Frank Templeton and W. C. Bristol in shooting at the fly casting and trapshooting tournament given December 3rd by the Portland Gun Club in honor of the Oregon Sportsmen's league at the Everding park traps. Results in detail were as follows:

One-half ounce accuracy bait casting—First, Dr. E. C. McFarland, 97-10; second, W. Cornell, 96 8-10; third, W. F. Backus, 96 6-10.

One-half ounce distance bait casting—First, W. F. Backus, 142 feet; second, M. E. Caypless, 131 feet; third, A. T. Gribble, 116 feet.

Trapshooting scores: Winner class A, Frank Templeton; class B, Miss Gladys Reid (shoot-off); class C, E. L. Clark; class D, C. G. Dodele (shoot-off).

Scores, 25 targets: Frank Templeton 25, *F. C. Riehl 24, *P. J. Holohan 24, H. R. Everding 23, Chas. Leith 22, C. C. Kelly 22, *J. E. Reid 22, E. J. Wainscott 21, E. H. Keller 20, A. L. Zachrissen 20, Dr. O. D. Thornton 20, Miss Gladys Reid 19, John G. Clemson 19, C. W. Lougery 18, J. C. Morris 18, H. A. Pollock 18, *C. J. Schilling 18, Fred Kincaid 17, Dr. E. C. McFarland 17, E. L. Clark 16, O. Thompson 15, C. N. Parker 14, W. C. Bristol (20 gauge) 14, Warren Cornell 13, L. A. Spangler 11, F. C. Griffin 10, C. G. Dodele 10, Walter Backus 6, W. M. Umdenstock 5, H. B. Hall 3. (*Shooting salesmen.)

Doubles, 24 targets: W. C. Bristol (20 gauge gun), 20; Frank Templeton 19, Charles Leith (Woodburn) 19, Dr. O. D. Thornton 18.

Quail Plentiful.—Deputy George W. Courtwright of Modoc county reports that the marshes and lagoons of his section are frozen and the ducks and geese have left.

Deputy G. O. Laws of Trinity county reports that the storm brought thousands of wild ducks to the Junction City section. For many years it has been observed that with the first heavy winter storm the ducks come to this particular section as though they know it for the protection and food that it affords. With good weather they move on south.

Reports from deputies in the foothill sections indicate that quail are quite plentiful, but very little shooting is being done. Cotton-tail are unaccountably scarce. Before the opening of the season they seemed to be unusually plentiful, only to mysteriously disappear when the law permitted them to be killed.

The foothill sections are now alive with robins. Reports from Deputy Sanders at Truckee indicate that very few if any deer are left in the high mountains, the snow having driven them to seek protection in the lower sections.

The Game Laws.—The Migratory Bird Laws are a fixture. They have received the stamp of approval from every sportsman worthy of the name in the United States, and now we undergo the stage of trouble caused by those afflicted with tinkeritis.

It is to be fondly hoped that these well-meaning persons can be subdued until the effect of the present laws can be noted, and the gunner anxious to obey these laws can have a chance to become familiar with them. While we have some localisms at present (the majority of them unjustifiable in the writer's estimation), we weaken one of the very strongest points in favor of the law and defeat its original intent when we depart locally from the general scheme of protection.

IRELAND IS LOSING FAVORITE DOG.

Blue Terrier of County Kerry Disappearing; Other News in Kennel Circles.

It is news to us that the blue—for which should be read black-blue—terrier of County Kerry is fast disappearing. So scarce, indeed, has the variety become that a writer in the Cork Examiner declares, quite positively, that Ireland is in danger of losing the breed. It was never very common, and was certainly never shown, for the good reason that it is not recognized by the Kennel Club, though that might have been overcome if the smart little sporting terrier had such friends as those who have worked to such advantage for the Cairn, Sealyham or West Highland white terriers.

None possesses a better history than the Irish blue, and the bulk of the best specimens seen in Ireland for many years were descended from a strain perfected by the man who was credited with having bred Master McGrath. He was not at all anxious to sell any of his terriers, but interest in the breed extended, and up to a few years since specimens were to be met with by men touring in the remote parts of Kerry.

We cannot withhold admiration from the Irish writer who gave the blue terrier the following character: "He is the finest all-round dog now in this country. The red Irish terrier has been so enervated for show breeding that he often won't kill a rat. The blue is larger, and is dead game. Rather long is the catalogue of all he will fight singly—an otter in the water, a badger in his mountain fastness and another dog to death. He is good for rabbits; rats are no trouble; trained, he will track a hare, and when the beagles get a check he will pick up the line for them. He is a great watchdog, a good companion and the best terrier in Ireland. But his days are numbered. Affection for his master is an extraordinary trait, and neither blows nor injuries will deter him from defending him to the very last. The intelligence of the blue terrier is of a high degree, and much superior to that of most dogs.

"Those who possess that class should attach great value to them, and dog lovers would do well to give a trial to the Irish blue terrier." After this there will surely be a rush over to County Kerry to secure so great a paragon.—The London Field.

• • •

Can a man ever become a competent judge without having bred dogs? That was a question put up to a veteran breeder and exhibitor the other day. He was broad minded enough to say he thought so. A man certainly can make a study of almost anything and become an authority on it without being on the terms of closest intimacy with it. For instance, a man would not necessarily have to be a mummy to be an expert Egyptologist.

• • •

Superstition counts a whole lot in the dog game. One of the things that every one thinks about is that if you get an offer for a dog, sell him right away else you will lose him. There is one person who is convinced of this, and that is Mrs. William C. Thompson. Recently she presented a Yorkshire puppy to a friend and it ate insect powder and died in short order. The next week she lost champion Beauty. She was sure that things of this sort always came in threes and waited. Shortly afterward she lost champion Armley Little Dick, one of the best of his breed in the country, after two hours' illness. To lose two champions in a fortnight is the worst of luck. She thinks that neighbors threw out chicken bones to the little fellow and that he got one down which perforated his intestines.

• • •

Hair tonic and clippers are never seen in a kennel of Mexican hairless dogs.

In cold weather place four old English sheep dogs over you in bed and they will serve the purpose of a dozen blankets.

Many wonder why the dachshund was built as he is. A famous German savant is authority for the statement that he was constructed that way so that he might easily get under bureau drawers in search of collar buttons.

If your Pekingese is not short enough in the face hit him on the nose with a sledge hammer. This will either shorten his foreface or his show career, probably the latter.

The best way to train a bird dog to point is to fasten a roast checken on a stick and place it within three feet of his nose, then run him over a course of soft asphalt. He is sure to get stuck on his game.

• • •

Edward Ward, of Askern, Doncaster, England, the man who sent Watlands Winning Ways and ch. Rebel Chieftain to this country, is here on a visit. He has brought over with him some terriers and Pomeranians. He has taken over thirteen with him, and some of them have been big winners abroad.

Bird lovers of the Imperial Valley report that the English sparrow menace to local birds is not the least overdrawn, and say the feathered rats already have driven out many robins. They mob individual birds and overpower them by numbers.

• • •

The rain has scattered jacksnipe considerably and given some shooting on them to people who ordinarily get none at all. Snipe will go wherever worms are easy to get, and that is the secret of hunting up the places they frequent.

Sportsmen's Row

The canvasback ducks from Bear Valley this season were white with a rich sweet fat which exactly resembles that on the famous Chesapeake Bay eel-grass beds. The eel-grass, or Vallisneria, wild-celery, as variously known, is one of the greatest canvasback foods known, although in Crane Lake and other of the mountain lakes in Southern California, the "cans" partake freely of sago pond weed tubers and stalks. Systematic efforts are under way by the Fish and Game Commission to improve the food conditions for wild ducks in the State by plantings, that being properly within the province of an organization which is entirely financed by licenses collected from sportsmen.

• • •

Investigations already conducted in Bear Valley go to show that there are several valuable food plants attracting ducks there, the lake being full of smartweed. As there are no carp, and trout do not destroy vegetation as the "water hogs" do, the Bear Valley lakes afford opportunity for considerable work of an experimental nature which will be undertaken.

• • •

Otto Pachmayr reports that the San Pedro crowd who sold out in the Bolsa and leased the old Gadwell grounds under Fred Bixby's house at the head of Alamitos Bay, are getting four or five limits every shoot, quite a few mallards among them. They have thirteen members and no hoodoo as yet.

• • •

Dr. W. W. Richardson ensconsed himself in a little tule opening on the San Joaquin slough Sunday and by dint of dropping 'em in the open water, got together a limit with his trusty little Parker 20-bore, among the bag, mostly widgeon, being "class" as represented by nine mallards. Drs. George W. McCoy and E. H. Wiley, W. B. McCullough and T. F. Stimson, a guest, and Edwin L. Hedderly, found themselves too few to keep the big flight of birds moving when they began to pile into the tule openings to get out of the storm. Wiley and Hedderly each got a goose. The place was alive with mallards.

• • •

Del Paso Park of Sacramento soon will be the haven for all the wild game in that section of the Sacramento Valley, especially quail and the smaller species which are mostly hunted. At least the city will do all in its power to protect game in the park.

Commissioner Carragher is planning to ask the Supervisors to prohibit shooting in the park. City Attorney Yell has been asked to determine just how the city can bring about an order prohibiting shooting. It is thought, however, that an application to the Supervisors will be sufficient.

• • •

Despite the disappointments of the last few weeks, bass fishermen anticipate good sport from now on. The fish shortly will begin their run into the sloughs to spawn. The big fish will be in abundance then, and even now some of the San Francisco fishing fraternity are catching their bullheads. This fish is a favorite morsel of the bass and seldom fails to bring at least a strike.

• • •

The Capital City Coursing Club has decided to hold its next coursing meet about January 15th, no definite date being fixed. It was at first proposed that a meet be held on December 17th, but this was considered too near the holidays.

Prospects are for bigger sport than ever this year, a number of hound owners in that section having several young pups which will be ready to compete within a few months.

Westerfield Is Secretary.—Several changes have been made in the Fish and Game Commission. Carl Westerfield, commissioner of the San Francisco district, has resigned to accept the position of secretary with a salary of $4,000 per year. Edward L. Bosqui has been appointed by Governor Johnson to fill the vacancy on the Commission, as head of the San Francisco district.

Mr. Westerfield should prove a success in the new position, which was held by Ernest Schaeffle who resigned a couple of months ago. Westerfield is a hunter and fisherman of practical experience and is well versed in fish and game conservation. He has been engaged in the practice of law in San Francisco for a number of years and boasts of a host of friends.

Fish and Game Confiscated.—Thousands and thousands of game birds, over one-half ton of venison and six tons of game fish have been confiscated by officers of the Fish and Game Commission in the two years from July, 1914 to July, 1916.

In the same period 2087 cases have been tried and fines aggregating $33,415 have been collected. Judges have meted out to offenders against the sportsmen's laws a total of 3103½ days of imprisonment.

These faces are soon to appear, with a complete record of the work of the Commission in the biannual report, which is now on the press in Sacramento. A 200-page book is being published. The cover is brown and embellished with a color plate, while in the book are 200 fine illustrations. Copies may be secured at the offices of the Fish and Game Commission when the book is finished.

Tax Commerciai Fishing.—Plans for new fish and game legislation to be introduced at the coming session of the Legislature was discussed by the State Fish and Game Commission at the regular monthly meeting of the body held at Sacramento last week. M. J. Connell of Los Angeles and Carl Westerfeld of San Francisco conferred with F. M. Newbert, president of the commission.

A special tax on commercial fishing and the shortening of the mountain quail season, possibly closing it entirely for a few years, are among the most important changes in the present law being considered. Newbert, however, states that no definite plans have yet been made, although there will be a number of smaller changes tending toward the greater conservation of game and facilitating the prosecution of law violators.

"The important changes we made at the last Legislature have brought the fish and game legislation to an almost ideal condition and this time only trimming here and there will be necessary. There will be no great changes, as we have found the fish and game seasons for the most part satisfactory.

"The commission has been keeping in close touch with its deputies and others interested in the fish and game situation and has considered all suggestions for changes. The quail situation has been invistigated and it has been found that while the valley quail seem to be sufficiently plentiful, the mountain quail are scarce and a smaller limit and shorter season for a few years is also possible. As previously announced, the trout season may also be shortened.

"Commercial fishing is becoming a big industry, especially along the coast, where much tuna is being caught. Our investigation shows that the difference in the price paid the fishermen and the price paid by the consumer, during the past year, has been $15,000,000. This increase in value indicates the extent of the commercial fishing in California and it appears just that it should bear its proportion of the costs of maintaining the fish in this state."

Young America and Trapshooting.—The day is not far distant when nearly every trapshooting club in the country will have its quota of boy and girl shooters. New trapshooters of tender years are creeping into the ranks daily, and inquiries from all sides would indicate that an army of youngsters only needs the proper encouragement to get into this most fascinating and broadening of all sports.

At 15 years of age a boy or girl is sufficiently strong to handle a 12-gauge shotgun, but if the pupil intends to shoot from the 15-yard mark the gun should be of the regulation gauge. It should have the customary full straight comb, so that when the head is on the stock the line-up of rib and sight is normal.

This end attained, the pupil should be instructed to shoot with both eyes open—not to aim as with a rifle, but to look along the barrels, or between the barrels; if it be a double barrel gun, see the bird full, if a straight-away, as the trigger is pressed; if an angle bird, the barrel should be moved slightly ahead and the trigger pressed, as the gun is still in motion.

If the gun is stopped as the trigger is pressed, the charge is apt to go behind the target. All of this, however, comes instinctively with a little experience.—[By George Peck.

Teaching Boys About Gun—To the average father, it is a foregone conclusion that his son will practice the use of firearms if by any possible chance the opportunity is offered, for the desire is innate with every real boy.

Just how to handle the matter has often proved a vexing question to parents who are enough in sympathy with their children as to see the thing from a boy's standpoint.

Probably the best solution of the problem is the action of the Columbus (Ohio) Gun Club in organizing a shooting class for boys in which thorough instruction is given in the handling of the shotgun.

Not alone the pleasure to be derived from the proper use of a gun is taught, but stern emphasis is laid on the fact that it may become an exceedingly dangerous weapon in the hands of the inexperienced or reckless.

The "Columbus idea" promises to prove popular with trapshooting clubs throughout the country.

Elks in the Rockies.—Denver, Col.—Re-stocking different Rocky Mountains with elk is an expensive work, according to the recently issued report of the District Forester. The work is done to keep the regions uniformly stock with big game.

The report shows that since 1909, when the work started, it has cost an average of $16 per elk to transport the animals from one region to another. There is, however, one instance where the private interest, co-operating with the Forest Service, shipped 22 elk from the Jackson Hole district to the Big Horn Basin in Wyoming at a cost of $59 for each animal.

Shipments of elk have been made regularly each year, except in 1910 and 1911. A total of 436 animals have been distributed. Of these 114 have been sent to the Big Horn Basin, 41 to the Black Hills of South Dakota, 275 to the National Forest in Coaorado. They came from Wyoming points.

Biggest Hatchery in World.—The Sisson hatchery is the largest in the world, according to the report of the State Fish and Game Commission.

FIELD TRIAL GATHERING IS LATE.

Drawings Are Put Off to Day of Trials; Prospects For Best Sport in History of Club.

By FISHER HUNT

[Special correspondent, Breeder and Sportsman.]

Bakersfield, Cal., December 13.—The lobby of the Southern Hotel presents a lively scene tonight as fanciers from all sections of the Pacific Coast are discussing the prospects of their dogs in the thirty-fourth annual field trials that open tomorrow morning over the famous preserves some fifteen miles south of this city. Many of the members from San Francisco and Los Angeles were late in arriving tonight and the usual business of making the drawings for the three feature events was put off until tomorrow morning.

It was interesting to listen to the discussions. Secretary S. Christenson, J. Walter Scott and J. A. Chanslor went over the grounds earlier in the day and they had their arguments back and forth over the condition of the dogs. For one thing the members of the Coast Field Trials Club have been exceedingly unfortunate this year in having many of their dogs taken down with sickness. There are a half dozen cases out at the kennels and it is feared that more will follow.

The Derby, however, promises to attract a field of twelve attractive puppies. Maggie G., a pointer owned by the Delta Kennels of Vancouver, B. C., has been electrifying the followers out at the field trial grounds and is favored to win. It is reported that A. G. Wilkes is negotiating for the purchase of the pointer and the sale may be consummated by the time this is printed. There are other promising candidates and a keen competition looms up.

W. B. Couts, 73 years of age and as spry and active as a man of forty, was the center of attraction in the group of fanciers. The veteran Couts is going to see his twenty-five field trials in California and then he declares he will be willing to retire and let the younger handlers go to it.

L. S. Hawxhurst, the well-known professional trapshot, was an early arrival but was doomed to disappointment. The first news he heard on his arrival was that his dog is down with distemper.

It will be impossible to secure the full report in the Breeder and Sportsman this week, but the news will be on tap in the next issue.

Vernon Club.—Robert Bole and Stanton Bruner were shooting about the same Sunday. At least they made exactly the same score, which was 48x50. However, in the shoot-off Bole was just a shade better for he smashed 24x25, while Bruner was one target behind with 23x25. Bole got off to a bad start at the first event, but picked up in the last three.

William Pugh was the runner-up with 47x50. A very fair crowd was in attendance at the shoot Sunday and the scores were very good, being as follows:

	Hdcp.	Practice		Trophy	
William Pugh	18	22	21—43	24	23—47
Meek	18	22	23—45	23	23—46
Bole	17	20	23—43	24	24—48
A. W. Bruner	16	22	22—44	21	25—46
S. A. Bruner	20	23	23—46	24	24—48
O. Evans	18	24	..—24	22	23—45
Brown	16	17	20—37	..	..—..
Dierdoff	18	..	..—..	20	24—44
Bohring	18	25	..—25	..	..—..
Brawner	16	25	..—25	..	..—..

Los Angeles Club.—A lively trapshooting tournament was held at the Los Angeles Gun Club Sunday, and some real competition resulted. In the first fifty target event with distance handicaps W. A. Hillis was the victor and won the solid gold take-home trophy. In the second event of the day Free won the trophy in a shoot-off with E. K. Mohler.

Free smashed 45x50, as did Mohler, but in the shoot-off Free won. In a special event with a big purse up for the first two places George Tuckett was the victor with 43x50 smashes, while Harry Cline captured second place. In a special race for a take-home trophy E. K. Mohler won.

Next Sunday a big turkey shoot will be held in conjunction with the special shoot in honor of Tiny Tuckett. The highest scores in the take-home trophy events were as follows:

Two events, at 50 targets—

	Hdcp.	1	2
E. K. Mohler	20	40	45
F. Free	19	41	45
W. A. Hillis	20	47	..
George Tuckett	19	43	45
H. Cline	18	43	43
H. E. Sargent	18	45	44
B. H. Carnahan	16	40	44
William Kennedy	16	44	36
H. Hickman	16	41	35
Seth Hart	16	41	43

Salem Ore.—Attorney General Brown has rendered an opinion to the effect that under the coyote scalp bounty law it is not necessary to sever the head scalp in presenting the skins before the county clerk to collect the bounty. Hunters of coyotes complained that the severing of the head scalp depreciated the value of the hides considerably. The opinion was rendered at the request of the district attorney of Lake county.

PRIZES ARE PRESENTED TO ANGLERS.

Southern California Rod and Reel Club Elects Officers and Plans Big Season.

Members of the Southern California Rod and Reel Club met December 4th and elected the officers for the coming year and announced the winners of the club competitions for the past season.

The election resulted in A. E. Roome continuing as president with Sherman Baker as his assistant. Charles Van Horn is second vice-president and F. K. King is third high mogul. J. Howard Smith is secretary-treasurer and Clark Benthuysen's son is recording secretary.

The winners of prizes are as follows:

Tuna—J. W. Jump, 96 pounds 8 ounces, tuna rod, by Roy F. B. Shaver.

Swordfish—J. W. Jump, 201 pounds. No prize (for record).

Yellowtail—First, Miss Blanch Mills, 22 pounds, 3-6 silkein rod and 300 yards No. 6 line, by Tufts-Lyon Arms Company; second, R. P. Caufield, 15 pounds 4 ounces, Montague reel, by Montague City Rod Company.

Albicore—Gust Loobs, 23 pounds 6 ounces, light tackle rod, by B. H. Dyas Company.

White sea bass—None entered.

Black sea bass—First, F. A. Perkins, 204 pounds, Bliss belt and buckle, by W. B. Bliss.

Skipjack—None entered.

Bonita—None entered.

Rock bass—First, F. A. Perkins, 6 pounds 9 ounces (for record only).

Barracuda—First, R. P. Caufield, 8 pounds 15 ounces (for record only).

Halibut—First, F. Kling, 16 pounds (for record only).

Corbina—First, C. Van Benthuysen, 6 pounds 13 ounces, rod, by William H. Hoegee Company; second, Joe Longfield, 6 pounds 5 ounces, basket, by B. H. Dyas Company; third, A. W. Dunn, 6 pounds 4 ounces, 300 yards No. 9 line, Tennessee Line and Twine Company; fourth, Mrs. Gladys Clark, 5 pounds 14 ounces, one yearly subscription to National Sportsman.

Croaker—First, Frank Kling, 8 pounds 3 ounces, Neptune reel, by A. F. Meisselbach & Bro.; second, Charles King, 7 pounds 11 ounces, safety razor, Gillette Safety Razor Company.

Yellowfin—First, C. J. Lenarth, 4 pounds 8 ounces, Montague reel, by B. H. Dyas Company; second, J. W. Goepfert, 3 pounds 12 ounces, 300 yards No. 9 line, Tennessee Line and Twine Company; third, A. E. Perkins, 3 pounds 4 ounces, yearly subscription to Outdoor Life, by Outdoor Life; fourth, J. A. Lehman, 3 pounds, 5 pounds sinkers, by E. J. Lesley.

Special prizes—100 pounds clams for largest corbina, won by C. Van Benthuysen, clams donated by the Haniman Fish Company. 100 pounds clams for largest spotfin croaker, won by Frank Kling, clams donated by Young's Market, Inc.

Largest number of corbina, two each, caught by Mrs. Gladys Clark, A. W. Dyer, S. Baker and Charles King; prize, 200 yards No. 9 line.

Largest number of spotfin croaker, one each by F. Kling and Charles King; prize, 200 yards No. 9 line.

Largest number yellowfin, 200 yards No. 9 line, won by C. J. Lenarth; fifteen entered.

Smallest yellowfin, corbina or croaker—Winner, Charles H. Kin; weight of fish 1 ounce; $5 merchandise order.

Trout, Big Bear Lake—First, J. F. Mahlstedt, 24-inch trout (for record only); second prize, Louie Breer, 20½-inch, 50 yards silk line, by Ashaway Line and Twine Company.

Trout, Little Bear—None entered.

Trout, all streams—First, J. F. Mahlstedt, 20½ inches, steel rod, No. 14, by Horton Mfg. Co.; second, Charles Van Horn, 12 inches, reel by Enterprise Mfg. Co.

Fresh water black bass—First, E. C. Blackwell, 2 pounds 15 ounces, one No. 6 bass rod, by James Heddon's Sons.

Special prize—$5 flies and leaders, donated by Charles Van Horn and won by Charles Van Horn, donated back to the club. (Trout, 12 inches, caught in San Gabriel river on a fly.)

Winter Prizes, 1916-1917.

Tuna—First, club button, 200 yards No. 24 line.

Swordfish—First, club button; second, 200 yards No. 24 line.

Yellowtail—First, club button; second, 300 yards No. 6 lne; thrd, No. 5 Knowles spoons.

Whte sea bass—Frst, club button; second, pair Utility scales.

Albicore—First, club button; second, 300 yards No. 9 line; third, one dozen metal South Coast minnows.

Black sea bass—First, club button; second, one-half dozen metal South Coast minnows.

Skipjack—First, club button; second, two No. 3 Knowles strikers.

Bonita—First, club button; second, two South Coast minnows; third, one dozen metal South Coast minnows.

Rock bass—First, club button; second, one dozen metal South Coast minnows.

Barracuda—First, club button; second, two bone jigs.

Halibut—First, club button.

Corbina—First, club button; second, Bliss belt and buckle; third, 300 yards No. 9 line.

Croaker—First, club button! second, Bliss belt and buckle; third, 300 yards No. 9 line.

Yellowfin—First, club button; second, 300 yards No. 9 line; third, 5 pounds sinkers.

Winter season opens Nov. 1 and closes April 1st.

Los Angeles Rifle Club.—Eduardo D. Neff of Altadena persuaded some fifteen other fellows of the Los Angeles Rifle & Revolver Club on Dec. 3rd that they didn't care much about any old member's medal from the National Rifle Association anyhow, and it was finally agreed that his 140 score was just about enough to win said medal. Therefore Mr. Neff is the proud owner of the 1916 National Rifle Association medal, one of which is given to each civilian rifle club each year to be shot for on some given date by the club members.

C. A. Morse, who is something half Mr. Neff's age, and twice his height, hung up a 50 at 200 timed fire to Neff's 48 and went horse and horse with Neff at 300 slow fire, but alas, somebody pushed the tall youth at 500, and the veteran from Altadena galloped in a point to the good when a red "four" disc too much came creeping up over Morse's target.

Doc. Felsenthal, the logical winner, from his fine showing at Jacksonville, Florida, in October, was three points to the bad, about the fourth time the Hon. Doc. has failed to run true to form in this medal shoot thing. P. M. Casady qualified as expert, Billy Burns took down another expert button, while Leavitt and McAleer made the sharpshooter grade for the government buttons, and the legal title to their rifles.

How they shot:

	Time fire.	Slow fire.		
Name.	200	300	500	Total.
E. D. Neff	49	43	49	140
G. A. Morse	50	43	46	139
John Sefert	48	45	46	139
G. L. Wotkyns	48	43	47	138
W. G. Hansen	46	45	47	138
Dr. L. Felsenthal	46	43	48	137
E. C. Price	49	43	44	136
A. L. Thompson	42	43	49	134
C. E. Kemper	45	44	44	133
Casady	45	40	42	132
W. E. Potter	45	42	44	131
Wright	..	43	39	...
W. H. Burns	39	45	48	132
Dr. Leavitt	40	37	44	121
W. A. Thompson	..	30	41	110
McAleer	32	44	45	121
F. C. Payne	46	41	46	133

Casady qualified as expert rifleman by firing at 600 and 300 in addition; Burns qualified as expert; Leavitt and McAleer as sharpshooters and Thompson as marksman.

Booming Pacific Coast Handicap.—O. N. Ford, secretary of the San Jose Gun Club, writes that work of booming the Pacific Coast Handicap has started. The Interstate Association made the award to the club but no date has been set as yet. It will likely be staged in June or July as it proved this year at Portland that September is a bit late in staging the Coast fixture.

Ford is anxious to break the record for the number of entries received. The greatest number that have shot in the event to date is 138 and with the hundreds of shooters to draw from around the bay and Southern California little trouble should be experienced in drawing at least 150. It is likely that several squads will come down from the Northwest as the trapshooting game is in popular favor up there.

The San Jose Club held the California-Nevada State championship this past season and ran off the events in tip-top shape. The club has a beautiful grounds with Mt. Hamilton in the background. Geo. H. Anderson is president of the organization with C. R. Arques vice-president. There are many crack shots in San Jose.

The California-Nevada shoot, the other big trap feature in this section, will not be awarded until after the first of the year. Secretary C. A. Haight announces that Del Monte is anxious to secure the attraction and other cities will also likely file their applications.

Data About Oysters.—There are seventy kinds of oysters in the world and all of them are good, says a writer in the Philadelphia Ledger.

So far as the records go, the first man who said oysters should be eaten only in R months was Butler. In "Dyet's Dry Dinner," which appeared a little more than three centuries ago, it was written: "It is unseasonable and unwholesome in all months that have not an R in their name to eat an oyster."

Bismarck was a champion long-distance oyster consumer. He ate six dozen at a sitting.

They began eating oysters long before the Christian era, but Swift said: "He was a bold man that first ate an oyster."

There are enough oysters eaten each year throughout the world to feed every person in the United States 100 each. In other words, more than thirty million bushels.

Five out of every six oysters are American.

The oyster is the most valuable commercial product that comes out of the sea.

According to Sheridan, he is a romantic cuss, for that celebrated wit said, "An oyster may be crossed in love."

WHALE FISHING INDUSTRY ON COAST.

Glycerine, Used in Manufacture of War Materials, Is Obtained From Oil.

Whale fishing, like every other industry, has felt the far-reaching economic effects of the war. Glycerine, which is useful in the manufacture of explosives, is obtainable from the oil of the "humpback," "finback" and "sulphur bottom" whales. As Pacific whale oil averages 6 to 10 per cent of glycerine content, with a maximum 14 per cent, a rise of 10c to 20c per gallon since the outbreak of war has given a pronounced impetus to whale-fishing in Pacific waters.

The pursuit of whales for oil and bone has declined very seriously from the high water mark reached in the middle of last century. While the "right" whale has become so scarce that the price of baleen or "whalebone" has risen from $1,250 per ton in 1835 to about $12,500 today, the price of oil, despite the upward trend caused by the war, has seriously declined from the level of former years. Sperm oil had declined from upwards of $1 per gallon, in the fifties, to less than 50c in 1913, and the ordinary whale oil was sold for 35c. These low prices, together with the increased cost of fitting out ships—$65,000 in 1853, as compared with $150,000 today—have made the industry unattractive to American capital. The decline in the New England whaling industry may thus be explained on economic grounds.

There is a tendency to scout the idea that whales are becoming scarce but the fact that the whalers are going further and further afield demonstrates that the old grounds are becoming depleted.

A very flourishing fishery has grown up in the Antarctic. South Georgia, previously uninhabited, now has a large industrial village with three slips for cutting up whales, two guano factories, and large reservoirs for oil. In 1911 the catch was 7000 whiles, which produced 34,000 metric tons (about 310,000 barrels) of whale oil, enough to fill a basin in which a 100-ton steamer could maneuver. One company, with a capital of $182,000, has in two years distributed an annual dividend of 130 per cent., besides adding a portion of the profit to various reserve funds and increasing its resources 60 per cent.

Although whaling is still a flourishing industry in certain quarters of the globe, these enormous profits spell the doom of the whales unless an international agreement can be arrived at to regulate the killing. Of course, an increasing scarcity of wholes may make the business unprofitable and, as in New England, the majority of the hunters may be driven from the field. Then the whales may get sufficient respite to enable them to re-establish themselves. But, leaving the conservation of natural resources to the blind play of economic forces is both dangerous and unsatisfactory. Not only may it lead to the utter destruction of an irreplaceable resource—as an animal species—but it builds up a huge industry in the boom days—when the principal as well as the interest is being greedily consumed—only to be followed by a wretched decline when large numbers of men lose their livelihood and expensive plants rot through lack of use. Proper regulation would minimize this expansion and contraction and would ensure a steady supply and a more stable condition of the industry.

Change Steelhead Law.—There will be an endeavor to open the season for steelhead fishing a month, or at least two weeks, earlier next season. This admission comes from acting Secretary Hunter of the Fish and Game Commission.

"There has been a great deal of complaint from steelhead fishermen. The season now opens in May over all of California. Many of the fishermen complain that they have lost the best steelhead sport of the season.

"Steelhead return to the creeks to spawn in the winter. From December to May they are in the coast streams. The heavy rains usually come in March and April.

"We shall propose to the Legislature to allow fishing of trout in the coast streams earlier than is allowed in the mountain regions. The season might open April 1st or April 15th. The date has not been thoroughly considered. A bill will be presented to the State Legislature, which convenes January 8th."

Signs in Forests.—Making the tenderfoot safe—that is what one part of the Forest Service is devoting itself to these days. This particular department, which is under the charge of Luther Whiteman, is getting ready to placard every trail and road in the national forests so that only a blind man will have a chance of getting lost.

One hundred thousand signs are to be placed in the California woods. Rangers all over California are now sending in orders for these guide signs. As soon as they are painted they are to be shipped back into the woods, where the forest service men, relieved of the duty of watching careless campers and stamping out burning campfires for the while, will attend to placing them.

The good that these signs will do is only appreciated by those who, relying on the careless directions of others, have traveled many miles out of their way. And it is not only the tenderfeet who do get lost. Many an old experienced woodsman has hit the wrong trail and wandered about for hours before he has located himself.

Stock Breeders' Page

University Bred Steer Sells for $1950.

California Favorite, the cross bred steer that won the grand championship at the International Live Stock Show in Chicago, sold for $1950, or $1.75 a pound, the highest price ever paid for beef. It has been the custom for years for the prize winning steers at this great exposition to be put up at auction at the close of the exposition. Enterprising dealers who know the value of advertising are the bidders, and they have customers among the leading hotels and restaurants who make a feature of the cuts from these steers on their holiday dining tables. That is the reason the steers sell for such big prices, or about two hundred and forty times what most steers would bring their raisers. It was a Detroit dealer who bought California Favorite.

The University is rejoicing greatly over its victory in exhibiting at the International Livestock Show the two finest steers in America.

The wonderful opportunities California offers for engaging in the pure-bred livestock business have been forcefully called to the attention of the whole country by the feat of the University in winning a Grand Championship and a Reserve Grand Championship with the steers of its own breeding and feeding exhibited at the International Livestock Show in Chicago. Never before has an American agricultural college bred and fed a grand champion steer for this greatest of all livestock shows. The triumph is the greater because these animals were exhibited in the heart of the greatest livestock section in America, before vast throngs of visiting corn-belt farmers.

"California Favorite," the cross bred Hereford-Shorthorn steer which won the Grand Championship over all competitors, over all the pure-breds and over all the cross-breds, when he left the University Farm at Davis for Chicago already weighed a hundred pounds more than any of the three calves that in the past had won Grand Championships in the International Livestock Show. This steer was shown by the University for the first time at the State Fair at Sacramento this year, where he was the first prize steer calf, the champion grade or cross-bred steer, and the grand champion steer of the show.

The Reserve Championship, an honor exceeded only by the Grand Championship, has been won by University of California Jock. When he left the University Farm he weighed 1880 pounds, or more than any two-year-old steer that has ever won the Grand Championship at the International Livestock Show. California Favorite is an extreme illustration of early maturity, and University of California Jock is for his age and weight an unusually smooth animal. Jock, as a yearling at the Panama-Pacific International Exposition, was declared the best of the Aberdeen-Angus steers over 18 and under 14 months of age, was declared Champion Aberdeen-Angus steer, Champion one-year-old steer of any kind, and Grand Champion steer of the show. The University then sent him to the Pacific International Livestock show at Portland, and there he was first prize Aberdeen-Augus yearling. At the last State Fair at Sacramento he was first prize Aberdeen-Angus steer, winning a gold medal also.

The success of the livestock experts in charge of teaching animal industry in the University of California and at the University Farm in breeding and feeding two steers which have now won the highest awards it is possible for steers to obtain, and in having broken all livestock show records for price for steers, is pointed to by the University as evidence of the excellence of the opportunities the young men of California now have to specialize in the College of Agriculture in the great California industry of livestock breeding and feeding.

Skim-Milk and Mixed Grain for Calves.

Milk is so expensive nowadays that the farmer can't afford to pamper his calves on such a luxury. So the University of California has been experimenting for the past two years to find out the best way of raising strong and healthy calves on separator skim milk, mixed grain feeds, and hay. The successful results are told by F. W. Woll, Professor of Animal Nutrition, and E. C. Voorhies, Instructor in Animal Husbandry in the University of California, in a bulletin on "Feeding Dairy Calves in California," which may be obtained free by writing to the College of Agriculture at Berkeley.

They recommend that the new-born calf be left with its mother for a day only (unless the cow's udder is greatly inflamed or the calf very weak), that the calf should be fed whole milk for about two weeks, at first three times a day, later twice a day; and then gradually changed to warm skim-milk, in the course of a week or ten days, since skim-milk costs only about one-eighth as much as whole milk. When the calf is put on a skim-milk diet it should receive a small amount of a grain mixture, gradually increased from less than a quarter of a pound daily to about two pounds at weaning time—four or five months of age. Bright, fine alfalfa or grain hay should be kept before the calves, as well as clean drinking water and salt. The grain mixture can be made up from standard dairy feeds, such as rolled barley, dry beet pulp, milo, kafir, cocoanut meal, crushed carob pods, etc., according to the special feeds available or economical. In the case of more or less delicate calves that do not eat their feed readily, a small proportion of linseed meal may be included in the grain mixture.

Linseed meal is not necessary, and does not produce better gains than grain mixtures which omit linseed meal, but linseed meal makes the mixtures more palatable and to some extent improves the calves' appearance and handling quality. It is not necessary, therefore, to make this usually high-priced feed a part of the grain ration for thrifty calves that have been successfully brought over to a skim-milk diet.

The University Farm proved that calves can readily be brought up to a weight of over 450 pounds at an age of six months, on a ration of skim-milk, alfalfa hay, and a suitable grain mixture, at a feed cost of a little over four cents per pound of gain in body weight from the time the calves are put on skim-milk.

Beans that grow on a tree—a promising crop, comparatively new in California—will prove a good constituent of the grain mixture for calves. This feed is the pod of the Carob, an evergreen tree highly prized in Southern Europe and the islands of the Mediterranean as feed for livestock. These tree-beans are used also as a food for humans, for cooking, ground with cereals. The carob tree grows well in the central and southern coast counties of California. It may be planted on non-arable land, in pastures, hillsides, and stony and other waste places, etc., and in time yields a regular supply of a highly palatable and valuable feed for stock, without further effort and expense than harvesting of the crop. The carob is reported to yield 300 to 500 pounds of pods per tree per annum when full-grown. Before feeding, the pods should be crushed with machinery used for rolling barley or oats, and mixed in equal proportions by weight with ground milo. Calves relish the pods greatly because of their high sugar-content. The carob pods are equal to barley in nutritive value, at least as a feed for calves.

A mixture of beet pulp and barley, fed with skim-milk and alfalfa hay, was found to have a nutritive value of about ten per cent higher than that of cocoanut meal fed in similar amounts and combinations. The dried beet pulp is generally cheaper than cocoanut meal. A mixture is two parts of rolled barley to one each of beet pulp and cocoanut meal.

As an essential suggestion in the successful building up of a dairy herd, Professor Woll and Mr. Voorhies urge that farmers raise heifer calves only from the good cows in their herds. they point out that no farmer can expect to make a real success of dairying unless he places at the head of the herd the best pure-bred dairy bull that he can secure. "The bull is half the herd," says the proverb, and they declare that a good bull who will transmit to his offspring the capacity for large dairy production bred into his line for many generations back is likely to be worth all that he costs, and much more.

In part of these feeding experiments, much valuable work was done by two students in the College of Agriculture, C. V. Castle of Porterville and W. F. Elder of San Diego, and in some of the other experiments by two other students, W. B. Hubbard of Los Angeles and Carl J. Williams of Gustine and Bakersfield.

Cow Pays College Expenses.

Taking his cow to college to help finance his education is the new and novel experiment being made by John Herdley of Holton, Kansas, a student at the Kansas State Agricultural College. Determined to get an education, he did not propose to let a little matter like lack of money be a handicap. He got his father to give him one of the prize cows from the Jersey herd on the farm, and instead of selling the cow, the son loaded the animal onto a freight car and shipped her to the college town.

He found a man in the town who would feed her for the milk and John got a job taking care of the cow in return for his board, which would have cost him $17 per month. At the end of the term the man who was feeding the cow and the boy, too, found he was $20 to the good. Young Herdley had his schooling free of cost and still owns the cow, which he values at $300. He expects to make the cow pay his way, in a similar manner, for the coming term of school.

The Phillips Guernseys Make $356.

L. F. Herrick sold the fifth importation of Guernseys for Frederick Phillips of the Frie Baton, Guernsey, and the Manor Farm, Villa Nova, Pa., at the Manor Farm on Nov. 25. The animals consisted of one aged bull, 10 cows, 34 heifers, 19 heifer calves and 5 bull calves, which sold for $24,575. Owing to the presence of submarines near the Atlantic coast the ship which brought over the importation was delayed seven days in docking, during which time she experienced considerable rough weather. As the cattle were but four days out of quarantine at the time of the sale, many of them showed the effects of the hard trip, but the results of the sale prove that the animals were appreciated. About 500 Guernsey breeders attended the sale. The top price was obtained for the imported heifer Nellie's Gem des Blancs Bois, a superb daughter of Governor of the Chene, and out of the great Island butter-test and prize-winning cow Nellie des Blanc Bois 9th, a daughter of imp. Masher's Sequel. She was purchased by William L. Austin, Rosemont, Pa., at $1,400. He also purchased the prize-winning bull Golden Noble 2d of the Briquet for $825.

How to Feed and Breed Chickens.

The 3000 chickens at the University of California Farm at Davis are producing more than eggs and broilers, according to an article appearing in the special poultry husbandry edition of the University Farm Agricola (the student agricultural weekly, edited by T. C. Judkins Jr.). Here are some of the most valuable products of that poultry plant, of which eggs and broilers are the by-product:

It has been proved by a three-year feeding test, says the Agricola, that great savings in cost in feeding chicken may be obtained, since 7.7% of animal proteids,when balanced by 15% of vegetable proteids, has been proved to give as good results as feeds containing 30% of animal proteids. That knowledge is of importance, because animal proteids cost from $56 to $80 a ton, while those from vegetable sources range from $35 to $40 a ton. The Agricola asserts that several millions will be saved annually when California poultry-raisers follow this teaching.

It has been found that during seven and a half months 307 hens kept in yards with a yard space of 39 square feet per fowl laid 1200 more eggs than 307 hens kept closely confined.

All the cockerels are offsprings of the ten best hens at the University Farm. Each of these ten hens lays more than 200 eggs a year. One of them, Lady California, laid 281 eggs in her second year. Trap-nests are used, and an intricate system of line breeding is being experimented with to increase egg production.

Investigations are being made of the effect of time of hatching on the moulting of fowls, the monthly egg production, and the age of beginning to lay during the pullet year. For the interior valley the preliminary results point toward the desirability of early hatching, in order that the birds may get a good start before the hot weather.

Many valuable publications on poultry matters have been issued by the University of California. Among recent publications at Berkeley are "Practical and Inexpensive Poultry Appliances," "Suggestions to Poultrymen Concerning Chickenpox," and "Round Worms in Poultry." Soon to be issued is a paper on "How to Operate an Incubator." Many thousands of poultry-growers throughout the state are taking the University's free Extension correspondence course in poultry problems.

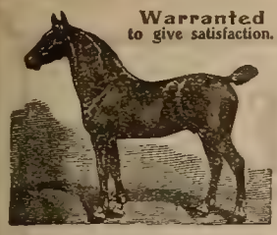
DuPont Company Has Completed Road Building Film.

Much has been said and written relative to the building and improvement of roads, but the latest means taken to further the educational side of road construction and maintenance is a road building moving picture film, made at a considerable expense by the direction of the Du Pont Company of Wilmington, Del. This firm has always manifested a great interest in all public improvements from which the people reap a benefit.

This film taken from actual construction scenes, shows the very latest up-to-date road building methods and will surely fulfill its object, the education of the general public.

The plans are to have it shown at the meetings of farmers, road builders, automobile associations and other gatherings when it can best be seen by those most directly interested in roads.

In brief, this film shows the troubles from bad drainage and mud, and how these troubles are corrected; the troubles and dangers from boulders and stumps in and near the road, and how to get rid of them; objections to heavy grades; easier and quicker methods of grading, stone crushing and hauling; building several kinds of roads; repairing a dirt road; re-surfacing worn-out roads; and, finally, a completed road affording fast, easy travel.



The completed film is in two reels of about one thousand feet each, and requires about thirty-five minutes for showing. It makes an attractive, interesting and instructive addition to any convention. The demand for it is already large and is still increasing, which shows that those interested are eager to learn, or know more, so as to enable them to talk and work intelligently on road subjects, thus lending their co-operation and aid for the upbuilding and progress of the whole nation, for improved roads are merely an indication of how progressive a community really is.

A Sane Exception.

A sane editorial expression from a city paper at this time entitles it to the credit of specific mention. Our breadstuff exports for ten months dropped over $88,000,000 below last year. While live stock, meats and dairy products increased over $10,000,000 in export value, the bulk or weight materially decreased. Our oversea shipments of food are now averaging nearly $8,000,000 a month less than last year. Commenting on these facts the Chicago Daily Journal declares:

"Nothing more is needed to prove the fallacy of the notion that the increase in food prices is due to vast shipments of food abroad. That increase is a world phenomenon, caused primarily by a short crop all over the globe."

After winning fifty-four blue ribbons in various horse shows, the chestnut saddle mare Fairy Queen, owned by Myron H. Oppenheim of New York, has been retired from the show ring and sent to Kentucky to be bred to the noted stallion Richelieu King.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is Warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

Buy A McMurray!

The Real Lady (2) t. 2:04¼, world's champion two-year-old, established two new world's records the first time hitched to the New McMurray Sulky.

Every race record of two minutes or better in 1916 was made to the new McMurray Sulky.

The Golden Anniversary Catalogue shows the complete line of McMurray "Easy Riding" Jog Carts in which horse action is absorbed into the springs—The Model 80 "Flyer," the last word in a training cart—The New Model 44 "Featherweight" Racer for racing, training or Matinee driving, and is gladly mailed free.

Remember, McMurrays build Sulkies and Carts exclusively. Their mechanics are specially trained, and by devoting their entire time to one line, are better able to furnish a first quality article at lowest cost.

Let McMurrays tell you what they can do for you.

Classified Advertising

FOR SALE.

Black gelding, six years, 15.2 hands, 1,050 lbs., perfect beauty and a show horse. Kind, gentle and fearless. Absolutely sound. Natural smooth pacer. Wears neither boots or straps. Sired by Vasser 2:07. First dam Zenobie 2:19 by Zombro, 2d dam by Truman 2:12, son of Electioneer. This horse paced a mile as a 3-year-old at 2:14. If given a chance, he is rugged and strong, and with his racing qualities I think he will make a 2:05 pacer. For sale reasonable.

H. OLSEN, 1450—46th Ave., Oakland.

FOR SALE—THE ICICLE by The Iceman 2:10, dam California by a son of Sable Wilkes, next dam thoroughbred. Handsome(dark bay horse with black mane and tail, star, and both hind pasterns white. A remarkably showy horse, weighs 1000 pounds, stands 15¾ hands high and can show five gaits under saddle. Has trotted a mile in 2:16¾, last quarter in 32½ seconds; trotted a half in 1:04½. Kind disposition and intelligent. One of the most desirable horses to ride, drive, or show, in California. Will be sold cheap. Address

A. T. JACKSON,
R. 4, Box 11, Stockton, Cal.

FOR SALE.

Thoroughbred colts and fillies by Marse Abe.

Standard bred colts and fillies by Dillcara, son of Sidney Dillon.

Colts and fillies by Flosnut, by Nutwood Wilkes.

All these colts are untrained. Some choice saddle horses among the lot.

Address Mrs. C. E. Farnum, 420 Market St., or P. O. Box 555, San Francisco, Cal.

I WANT TO BUY.—I have sold eleven horses in the last few months ranging from $2,000 to $200. If you have a horse for sale and will write me, I will tell you what my system is. It is a winner. I find there is a buyer for every horse for sale at the right price. It is just a question of getting the buyer and seller together. If you have one for sale let me hear from you. MAGNUS FLAWS,

542 S. Dearborn St., Chicago, Ill.

FARMS FOR SALE

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Recommended Game Loads:—

IT IS A difficult matter to recommend a particular load for any certain kind of game shooting, as natural conditions vary so much in different localities.

With this in mind, we have given considerable study to the various loads recommended and believe that those shown will give the most satisfactory results, and will be an aid to consumers and dealers.

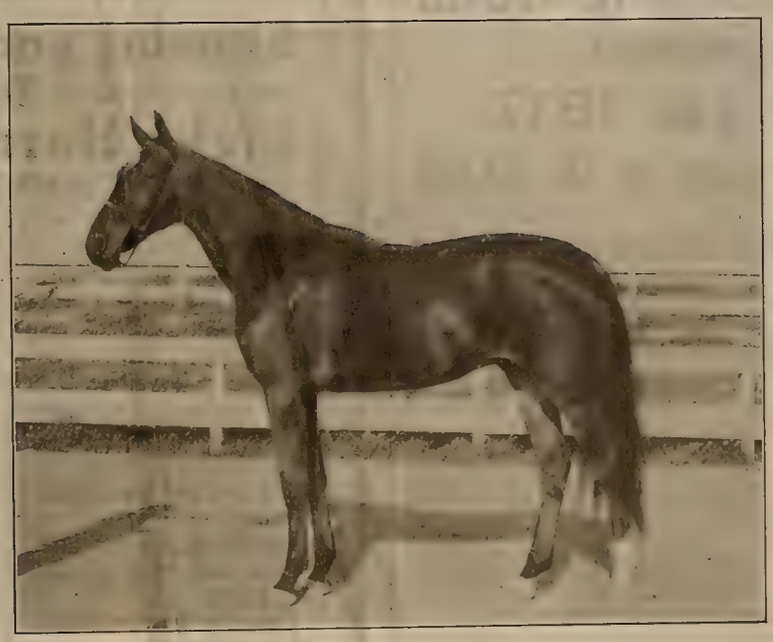
TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.



Price, in heavy paper cover, $1; $1.50, postpaid.

P. O. DRAWER 447, SAN FRANCISCO, CAL.

BREEDER AND SPORTSMAN

VOLUME LXIX. No. 26. SAN FRANCISCO, SATURDAY, DECEMBER 23, 1916. Subscription—$3.00 Per Year

PROMISING TWO YEAR OLD

A son of True Kinney 2:12¼ and a mare by Hawthorne that is a member of Mr. A. W. Longley's stable at Pleasanton.

$2,500 GUARANTEED — **GUARANTEED $2,500**

The State Fair Futurity Stake No. 9.

TO BE GIVEN BY THE

CALIFORNIA STATE AGRICULTURAL SOCIETY

For Foals of Mares covered in 1916 to TROT and Pace at Three-Years-Old, 1920.

Entries Close: Tuesday, January 2nd, 1917

$1,500 FOR THREE-YEAR-OLD TROTTERS. **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS

Entrance and Payments—$2 to nominate mare on January 2, 1917, when name, color, description of mare and stallion bred to must be given, **$5** May 1, 1917; **$10.00** on Yearlings May 1, 1918; **$10.00** on Two-Year-Olds May 1, 1919; **$10.00** on Three-Year-Olds May 1, 1920.

Starting Payments.—**$35.00** to start in the Three-Year-Old Pace and **$50.00** to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place. Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat and 25 per cent to the race according to rank in the summary. Money divided in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return payment, nor will any entry be liable for more than amount paid in or contracted for.

Entries must be accompanied by entrance fee.
Nominations liable only for amounts paid in. Failure to make any payments forfeits all previous payments.
This Society is liable for $2500.00, the amount of the guarantee only.
Hobbles will be barred in trotting and pacing divisions.
Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors of this Society.
There will be no more moneys in each division or heat than there are starters. Entries open to the world.
Other than exceptions made on this entry blank, rules of the National Trotting Association to govern.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$50 in Special Prizes was paid to Stallion Owners in February, 1916.

ENTRANCE AND PAYMENTS—$2 to nominate mare on February 1, 1916, when name, color, description of mare and stallion bred to must be given; $5 August 1, 1916; $10 on Yearlings January 1, 1917; $10 on Two-Year-Olds January 1, 1918; $10 on Three-Year-Olds January 1, 1919.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace; $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

SUBSTITUTIONS

If a mare proves barren or slips or has a dead foal or twins, or if either the mare or foal dies before JANUARY 1, 1917, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return of a payment nor will any entry be liable for more than amount paid in or contracted for.

Shoeing and Balancing *The* Light Harness Horse

BY JAMES CLARK

A COPY of this book should be in every horse owner's library. It treats the subject in a way that you can understand, giving accurate and reliable information that every owner of a good horse will find extremely helpful in the care of his horse's feet.

TABLE OF CONTENTS:

The Treatment of the Colt's Feet Before Shoeing.
The First Set of Shoes.
Sore Feet and Sour Disposition.
Knee-hitting, Scalping, Etc.
Pads, their Benefits and Abuses.
Thrush, its cause, treatment
Punctures.
Quarter and Toe Cracks.
Hoof Bound.
Hitting the Elbows.
Navicular Trouble.
Heavy Shoes and Pads in the Winter Season.
Neglected Teeth Make Knee hitters and Cross Firers.
Making the Shoes.
Extension Shoes.
Outside or ½-swedged Shoes.
Swedges or Dies.
Calks and Grabs.
Bar Shoes Behind.
Aluminum Shoes.
The Last Word.

MERRY CHRISTMAS! We extend the season's eetings to our readers and hope the annual festival ill be one of great happiness to all and be followed r a year that will bring health and prosperity to ch and every one. We, who are connected with e horse breeding industry, have seen during the st few years a little gasoline cloud grow until it s almost totally obscured our view of the trotting rse breeding farms, but during the past year here d there over the country there are numerous rifts that cloud and King Horse is coming into a part his former possessions, although he has given up uch territory where his work was so hard that the ss of it is not to be regretted. During the year 16, the greatest season of harness racing seen in e United States for many years was completed ith a new world's champion trotting stallion and any new champions among the colts and fillies. alifornia has furnished a new champion yearling cing filly, the fastest yearling trotter of the year, new champion trotter under saddle in a race, and e pacer of a team that has made a new world's cord on a half mile track. That is not a long list champions but it is of pretty fair size considering e small number of horses California has had in aining recently, and it has served to keep us on e map. The year 1917 gives every promise of eing a still more prosperous one for the owners nd trainers of the light harness horse. The eastern nd middle states are counting on more meetings, rger purses and bigger fields than ever. We on e Pacific Coast are a little slow, but there is a rospect of a larger circuit than last year and we are ving in hopes during this holiday season even ough we die in despair later on. At any rate this no time to borrow trouble from the future. Let s all resolve to have as merry a Christmas as we an afford and determine that we will each do our art toward making the harness horse industry as rosperous as it is possible to make it during the ew year and the years that follow.

Of the two mistakes made in feeding, perhaps nderfeeding is most common, according to C. H. ckles of the Missouri College of Agriculture. It is serious mistake to feed a cow only enough to keep p her body. She must receive feed to keep her milk roduction up to capacity. If a cow loses weight hile in milk, she is not receiving sufficient food. A od cow, if not fed enough, will produce milk for a ime at the expense of her body; that is, she will ake the surplus flesh from her body, and convert it nto milk and thereby will lose live weight. On the ther hand, when a cow is overfed she will begin to atten in a short time. This condition may be corected by giving her only the amount she needs for aintenance and for milk production. Such feeding ill maintain practically a uniform weight.

Roughness is the first important consideration in eeding cows. A cow is not contented unless her tomach is full She should always have all the oughness that she will clean up and then the amount f grain she receives should be regulated by the mount of milk produced. A dry cow in good condiion should be fed roughness only, and does not need ny grain. In feeding grain to milk producing cows, he following rule may be used ,and is found to work airly well: Feed 1 pound of grain for each 3 pounds r pints of milk produced. A Jersey cow producing ery rich milk may need a little more grain than the mount given.

Rollo, a chestnut yearling son of Directum King, wned at Wheaton, Illinois, has never been shod and October 17th paced an eighth in 16 seconds, barefooted and hitched to a cart.

SADDLE and SHOW HORSES

Le Grand McDonald Is a Handsome Horse.

After the sale of the Woodland Hackney Stud horses at the Park Riding Academy last Wednesday evening, Judge E. A. Bridgford had his fine three-year-old saddle stallion Le Grand McDonald led into the ring. It was announced by Auctioneer Hord that the winner of the junior championship at the P.-P. I. E. horse show last year was not for sale, but that the stallion's owner simply desired to show the large crowd of horse loving people present how Le Grand McDonald looks in his three-year-old form. He is certainly a grand young horse, and is destined to be a frequent winner in the show ring during the next few years. The Judge remarked that a gentleman who saw him as a two-year-old offered $1000 for the colt, which was refused as Le Grand McDonald was not then and is not now for sale. The gentleman who made the offer was present and said that the offer still stands. The few colts sired by Le Grand McDonald when a two-year-old are now weanlings, and they show that he will be a great sire of style and good looks. He is now a big strong horse of good bone and substance and in addition to showing all five gaits of the saddle horse, has been broken to harness and makes a fine appearance between the shafts and has excellent road qualities. He is one of the best bred saddle stallions ever brought to this coast, and Judge Bridgford made a wise selection when he purchased him as a weanling in Missouri.

Arranging for a Big Horse Show.

Representatives of the Pacific Coast Saddle Horse Association met with the management of Idora Park, Oakland, one evening this week, and made the preliminary arrangements toward holding a big horse show at that Park during the week following the California State Fair this year. The State Fair will hold its usual big horse show and the horses will then be shipped to Oakland for a show to last four or five days and at which the prizes will be numerous and of generous size. Idora Park is an ideal place for a horse show and we predict now that it will be the leading feature and best drawing card that place of amusement will put on during the summer of 1917. Premium lists and programs are to be issued early and an advertising campaign started that will cover the entire State. As several of the fairs will include a horse show in their programs next year, the owners of saddle and other show horses will have a regular circuit of shows, which will add much to the interest and attract more entries than ever before.

Show Horses in the Movies.

A Los Angeles motion picture firm is arranging to put on and picture a regular horse show during January. A regular show ring is being constructed and arrangements have been made with some of the leading owners of California to bring all their best horses and show them just as they would at Madison Square Garden or any of the big show places. Mr. Revel Lindsay English of Sierra Vista Stock Farm at Chino has been induced to take an active part in perfecting the arrangements and those who know this enterprising and energetic horse owner will also know that the show will be put on right. Fred Bork, the well known rider of this city, is already at Los Angeles under engagement and will ride a number of horses that are to be filmed. The films, when completed, will be shown throughout the country and will give thousands who have never enjoyed the opportunity of visiting a real horse show a chance to witness a photographic presentation of one that will be an exact affair in every particular. Many of the very best horses in California are to take part in this production.

Children's Horse Show.

Miss Jean Wheeler, Miss Ysabel Chase and Mrs. Philip Wand have been chosen as a committee to make the awards at the Children's Horse Show and Gymkhana, Friday afternoon at the riding school. A number of cups and other prizes have been given by the families whose young folks are participating in these sports.

There are about forty children in this affair, and the rehearsals show a surprising degree of skill. As a class, the youngsters are wonderfully well trained and it is seldom that grown-up riders do nearly as well as these children.

Chicago Banker Buys Show Horses.

John J. Mitchell, president of the Illinois Trust and Savings Bank of Chicago, has recently purchased from Valentine Crane of the Wild Rose Stock Farm, St. Charles, Illinois, seven high class show horses and will not only exhibit them at the shows of 1917 but will engage in the breeding of high steppers. Among the seven horses transferred to Mr. Mitchell were Rillington Nimble and Nimbus, and Baronet and Satire, two noted pairs of imported English hackneys that had won at the London International and the New York National, as well as many lesser shows. With them were included Wild Rose and Wonder Rose, a pair of trotting bred harness horses, and the runabout horse Mighty Rose, that was second in his class at Chicago. Rillington Nible was one of the star performers at the International exhibition, which clased the season's horse shows. Driven by Charles J. Barrie, of Ridgewood, N. J., she defeated Miss Constance Vauclain's famous Lady Dilham and Princess Sheila, the latter the champion of the last National Horse Show. In hand Mr. Mitchell's new mare won from Miss Vauclain's English mare The Whip, reserve champion in harness in New York. Rillington Nimble is a daughter of Polonius, and was formerly owned by J. Sumner Draper, of Boston. J. M. Smith, who selected her and exhibited her for Mr. Draper, always maintained that on breeding, individuality and performance she was one of the best hackney mares that ever left England. Mr. Mitchell will now retire her to the stud.

Big Attendance at Chicago Horse Shows.

In point of attendance the horse show held at Chicago week before last in connection with the International Live Stock Exposition, was one of the most successful horse shows of the year, the big pavilion at the Union Stock Yards having been crowded every afternoon and evening. The afternoons were given over to the draft horses, and this exhibit is said to have surpassed anything ever seen in this country or Europe in the variety and quality of the big horses shown. Percherons, Belgians, Shires, Clydesdales and Suffolks, representing nearly all the leading breeders and importers of the United States and Canada, were in the ring, making some wonderful displays.

California Horse Show Circuit.

The Pacific Coast Saddle Horse Breeders' Association has taken steps to aid in the formation of a circuit of horse shows in California to be held at the county fairs of 1917. It is planned to have shows at four or five of these fairs whose dates are such that shipping from one point to another will be over the shortest distances and at the least expense to exhibitors.

Woodland Hackney Stud's annual sale of horses, held at the Park Riding Academy on Wednesday evening of this week, drew a good attendance, but prices were not high nor bidders very prompt with their offers. Auctioneer Hord succeeded in disposing of twenty head by ten o'clock, the highest price being $220, two horses bringing over $200 and eleven more than $100. A few aged horses which have been used as school horses brought from $40 to $90.

SALES AT THE INTERNATIONAL.

[Chicago Breeder's Gazette.]

Shorthorns.

Such a packed-in congestion of people was never before witnessed at a cattle sale. It is gratifying to be able to announce that another year adequate provision will be made for the large number of breeders who desire to attend the sales of pedigree cattle held during International week. The Shorthorn offering sold at figures which gave considerable satisfaction. The average on the entire 56 head was $958.65, while the 22 bulls averaged $1,155.45, and the 34 females averaged $831.30. The stellar feature of the sale was the price of $6,600 bid by the Maxwell & Miller Cattle Co., Steamboat Springs, Col., for the first-prize bull Maxwalton Pride 2d. Considerable interest attended the offer of this bull. Several bidders wanted him, but the Colorado firm endured to the end.

Herefords.

They tossed bids around of large size with bewildering rapidity at the Hereford International sale. A big body of breeders came with the determination to give the Hereford a front seat in the sale series, and they succeeded by a decidedly large majority. On 50 head of cattle of remarkably high class an average of $1,489 was recorded . It is a record average. The 33 bulls sold for $56,385, an average of $1,736, and the 17 females brought $18,100, an average of $1,064. Contributing materially to the outstanding figures was the sensational sale of the yearling bull Woodford 6th at $15,100.

Aberdeen-Angus.

When an average of $681.15 is made on 53 head of Aberdeen-Angus cattle, it looks like a good enough result even in these times of enlarged values, especially as the 16 bulls averaged $848.45 and 37 females $608.80; but an accurate conclusion can only be reached with a knowledge of the outstanding character of many of the lots consigned from leading herds. With this knowledge Angus breeders have not very substantial ground for felicitation over the result of their sale at the International. Too many breeders declared that the prices bid were under the offers they had received for their animals at home.

Clydesdales.

The initial sale of Clydesdales at the International contributed from leading studs and held under the auspices of the American Clydesdale Association, proved gratifying to all concerned. Prices did not rule high but the demand was good and fair values were realized, considering the youth, and the age, of some of the entries. The top price, $3,025, was paid by John K. Branch, Richmond, Va., for Mr. Soderberg's champion mare Osco Darling. Mr. Branch also bought the prize-winning stallion Fariholm Warrior at $1,550, which he has presented to Gov. Stuart of Virginia, to be allotted by him to the state institution where his services can be best utilized in the improvement of the horse stock of the state.

Horses and Horsemen

Wants to Race in California if Possible.

The Breeder and Sportsman office had a pleasant call on Monday of this week from Mr. B. F. Jaggar, of Portland, Oregon, who has been taking a short lay-off from business and spending a week with Henry Helman of Salinas, who has for the past two years been training and driving Mr. Jaggars' pacer Mack Fitzsimmons 2:07¾. He found Mack enjoying a run in a big paddock every day and is greatly pleased with his looks. Mr. Jaggar would very much like to race his horse in California during 1917, if there is anything of a circuit and classes for his horse. Helman also has Prince Zolock 2:06¼, owned by Mr. Gardner of Seattle, thus having two pacers of near the same class. If there were a free-for-all pace and a 2:08 class pace at each meeting on the California circuit, Helman would not think of racing outside the State unless at one or two of the big meetings up north or at the Arizona State Fair, but unless there is a good California circuit announced early he will make his arrangements to race elsewhere. Mr. Jaggar states that the Driving Club at Salinas is seriously debating the question of giving a race meeting independent of the annual "Rodeo" which takes place there, and believes that by claiming an earlier date than the wild west show, it would be well patronized by the horsemen and the public. Mr. Jaggar formerly owned the pacer Maurice S. 2:06 by King S. that Dick Wilson bought for him in 1912 and raced through California and Oregon, taking his record at Fresno that year. He paid $2500 for this pacer and won him out and a nice profit beside that season, as the purses ranged from $1000 to $4000 in the classes in which he raced. He started ten times, was six times first, once second, once third and twice fourth, and his winnings were very nearly $5000 over and above entrance fees at the end of that season, and the horse was afterwards sold. Under Henry Helman's driving, Mack Fitzsimmons started twice at the fall meeting of the P.-P. I. E. in 1915 and won both races, which were for $2000 purses, in straight heats. Helman raced him up north this year as a trotter as there were few classes for him at the pace, but he did not do very well at that gait and it will be as a side-wheeler that he will be out in 1917.

Harness Racing at Fairs.

At a meeting of the Association of Fairs and Expositions held at Chicago this month, Mr. Richard J. White, who is superintendent of speed of the Wisconsin State Fair, also one of the vice-presidents of the American Trotting Association, read a paper on Harness Horse Racing at Fairs, in which he argued that from his experience harness racing is the biggest drawing card at all state and county fairs. At the close of his address he made the following brief recapitulation of his personal ideas in regard to racing:

"I believe the sport or business of horse racing is legitimate only when conducted in the broadest spirit of fairness and with due regard to the interests of the public, the association and the horse owner.

"That the public interest is stimulated and best maintained by good tracks and stables, which insure the fastest contests, by few rules, wide advertisement of prime essentials to determine races, liberal purses which draw the highest class of horses and prompt, regular and orderly management of the performances.

"That the associations should, to insure adequate attendance, give large purses, advertise widely and efficiently, observe and enforce the few necessary rules to insure promptness, fairness and the best performances.

"That the horse owners should be given liberal terms for entrance, should be required to keep their contracts, but should have due recognition and entitled to full benefit of their rights, be governed by few rules, and allowed largely to control the methods of races, consistent, however, with and subservient, always, to the demands of the public. An even break, no unusual favors, no discrimination, yet courtesy, fairness and honesty should be reciprocated among the three elements."

Where Did He Study Breeding History?

Among the many ridiculous things that have gotten into print over the signatures of persons who were writing as experts on horse breeding, the following from a Chicago farm journal of last week takes the palm:

"Starting with a well-selected tap-root (the Layton Barb mare) the late Leland Stanford succeeded in changing the gallop to a trot. Coming along down the line some 200 years, he bred Estella to Mambrino Patchen, a trotter with Messenger blood. He then bred the produce, Alma Mater, to Electioneer, using more Messenger. As a result came Palo Alto and Sunol. Mark you that there was no abrupt pulling off from type. Stanford did not make the mistake that so many have made."

As Leland Stanford did not breed Alma Mater and never owned her, and as neither Palo Alto nor Sunol are descended from her, the "tap-root' 'to which he is giving all the credit was probably a nightmare of his own breeding.

Canadian Ice Racing Opens Today.

Beginning today, ice racing for trotters and pacers will be one of the big attractions on Canadian tracks this winter, and many horses have been shipped across the line from the United States to take part in the many events. The Canadian laws permit racing only on three days of each week and also limit the number of days during the year. At Hillcrest Park, Toronto, all the events will be for purses of $400 each, the start being made today, December 23d, and again taken up on the following Monday, Tuesday and Wednesday, and after giving the racing stables four days of rest the sport will be continued on the following Monday and Tuesday. Eligibility of starters will be governed by ice records only, and in mixed events trotters will be allowed three seconds, with six to enter and four to start, and in case there are six starters the purses will be divided among all starters under Winter racing rules of the Canadian National Trotting and Pacing Harness Horse Association.

On Saturday, January 6th, stables racing at Hillcrest Park are invited to shift over to Toronto's other track, Dufferin Park, and race four days more for the same amount of purses, but under more liberal conditions, as here the purses will be divided under the regulation 50, 25, 15 and 10 per cent to the first four horses, while fifth and sixth moneys will be added to the regular purse, if that many start and finish in each event.

The offer of $12,000 in purses and the inducement of open pool selling and book betting will not only draw big entries and large fields of starters from both countries, but also the usual big attendances. The real "Grand Circuit meeting" of ice racing will not open until the first day of February so that the sport may be continued at other points until campaigning stables are ready to go to Ottawa to race on the river under the auspices of the Hull Driving Club.

The Ottawa program will also extend to two weeks, and as now announced, contains twenty-three events for an average value of $1,000 each race. The features are two $5,000 purses or rather early closing events, for trotters and pacers eligible to the 2:10 classes, while seven events each for $1,000 are almost evenly divided between trotters and pacers.

For a two-mile race, in best two-in-three and also for a five-mile dash, purses of $500 each are offered, while the remainder of the programs are made up of $400 purses, pacing events being two more than trotting. It now seems certain that with favorable weather conditions, ice racing will be made an outdoor sport in Canada for over two months.

A number of similar events are being arranged in this country, mostly in northern New York State and parts of New England, and while some might be held, yet not as important as those in Canada, for the reason that after American owned horses are sent across the border few remaining owners or drivers take part in this method of racing harness horses, except in amateur events and under the auspices of amateur organizations, the same as sleigh races where weather conditions make them feasible.

Half-Mile Tracks Best.

Willis Sharpe Kilmer, of Binghamton, N. Y., has been recently reconstructing a half-mile track at his Riverside Farm near that city, where he is raising thoroughbred horses, says the Goshen Independent Republican. Mr. Kilmer stopped at the Goshen Inn last October on his way to Washington, D. C., and was greatly impressed with the appearance of the Historic track, and especially with the grade on the turns. Learning that Coates Brothers had some years ago reconstructed these turns, he engaged J. S. Coates to superintend the work on his Riverside track and consented to have his track entirely remodeled upon new lines, and the turns, which formerly were of about the same radius as the Goshen track, now have a radius of 250 feet, and, of course, somewhat shortened stretches. Owing to the high rate of speed at which the trotters now go Mr. Coates attaches great importance to the present day need of longer and therefore easier turns for the half mile tracks, and he believes that where this can be accomplished the more prominent trainers of the country will be willing to start their high class horses. There has always been a good deal of aversion to the short turns of the half mile tracks on the part of the trainers of the country's greatest trotters, but it is now conceded that the day of the mile track is gone and the "two-lap" course is what the public desires.

It now seems certain that the once famous trotting horse breeding nursery, Stony Ford Farm, Stony Ford, N. Y., long noted in trotting horse breeding annals, will soon be a thing of the past, as part of the property is now being already cut up for building lots and the rest will soon follow. Breeding and training operations have already been abandoned by the farm's recent owner, Louis Titus of California, who bought it from the estate of the late J. Howard Ford, and the farm's former trainer, Will Hodson, has opened a public training stable at Goshen.

◈ ◈ ◈

Star Winter 2:05 has found a field of usefulness in the show rings, R. E. Moreland, the well-known Kentucky exhibitor, having bought the gelding recently from Lon McDonald, who acted for William G. Snell, of New Bedford, Mass., former owner of the son of Ed Winter 2:12¾.

L. G. Duffy, editor of The American Sportsman Cleveland, was recently operated on for appendici and for some reason the incision had to be reope a couple of times on account of complications. Wh he was convalescent he wrote the following story his paper which was published: "An Irishman w taken violently ill with appendicitis and hurried a hospital and operated upon. The operation w pronounced successful, but a few days later com cations set in and it was necessary to again put t patient under the knife. This time it was discover that the surgeon had carelessly left a pair of force in the Irishman. A week later he had high fe and the incision became inflamed, evidence of mo trouble, so for the third time the patient was open and a package of gauze removed. Just as the s geon was preparing to sew up the opening, the patie remarked, 'Doctor, I would suggest that you p hooks and eyes on me belly and avoid the annoyan of carving me when you again find it necessary peep inside my inwards.'"

◈ ◈ ◈

According to the latest gossip, Mr. Devereux w resign from the presidency of the grand circuit wh that association meets in annual session in Atlan January 23, and that he will under no circumstanc accept the renomination. On good authority it h also been stated that Devereux is also contemplati the severing of his connection as an officer of t Forest City Livestock and Fair Company, of whi he has been president since its incorporation, a will thereafter confine his activities to looking aft the interests of his own matinee stable and the w fare of the Pastime Stable, in which he is interest along with Coburn Haskell, P. W. Harvey and Fra Ellis.

◈ ◈ ◈

One of the features of the winter fair last wee at Guelph, Ont., was the display of standard br horses. In the stallion class T. Hassard, of Mar ham, won first with Peter Wilton, the eleven-yea old son of Peter the Great 2:07¼ and Mazie W., Wilton 2:19¼, that formerly stood at Pleasanto while second honors went to Burt Axworthy 2:0 now the property of Crowe & Murray of Toront and third fell to the lot of Bryson McKinney, owne by Charles Finnegan, of Stratford, Ont. The cha pionship in the standard-bred class was won by Pet Wilton.

◈ ◈ ◈

Though the smoke of battle has hardly yet cleare away after the spirited and brilliant contest for t Alfred G. Vanderbilt Memorial Gold Cup for roa fours at the National Horse Show of 1916, there already a new Richmond in the field for next year competition, intent on taking the $1000 trophy awa from William H. Moore, who won it this seaso W. D. Grand, who had a hand in putting together th winning team, is authority for the news that M Moore will have to meet a new and formidable opp nent in 1917.

◈ ◈ ◈

According to an official announcement from Clev land, the offices of the American Association of Tro ting Horse Breeders have been moved from the Nort Randall track to the Euclid-Penn Building in Clev land, where all communications must be addresse to Secretary H. K. Devereux, who will have Ted K Kline, son of the former North Randall and Gran Circuit secretary, Homer J. Kline, as his assistant.

◈ ◈ ◈

Four famous breeders of trotting horses, whos death meant the dispersal of the horses on thei breeding farms, have passed away during the pas two years. They are William Simpson, Empire Cit Stud, Cuba, New York; John H. Shults, Shultshurs Farm, Rochester, N. Y.; Jacob Ruppert, Hudso River Stock Farm, Poughkeepsie, and W. R. Allen o Allen Farm, Pittsfield, Mass.

◈ ◈ ◈

Nothing has aroused the enthusiasm of New Eng land horsemen in recent years more than the authori tative announcement that the famous Readville trac will be the scene of a Grand Circuit meeting in 191 that will be backed by several of the wealthiest hors owners of Boston.

◈ ◈ ◈

Two-year-old racing will begin at Juarez and a Tijuana January 1st, but as the colts racing at th two Mexican tracks will probably remain in the wes during the year, they will not be affected by th Jockey Club rule which prohibits the racing of two year-olds before April.

◈ ◈ ◈

The demand for thoroughbreds was never greate in this country than it is right now, and the impor ters are all feeling quite comfortable over their pros pects. Should there be an early ending of the European war, the horses brought over last year and this would probably double in value.

◈ ◈ ◈

One of the most important deals in the horse goods field was consummated last week, when Tuttle & Clark, the famous turf goods house of Detroit, Mich. purchased the entire horse goods holdings of the Sell Horse Goods Co., of Canton, Ohio.

◈ ◈ ◈

At a meeting of the Massachusetts State Board of Agriculture held Dec. 8th, the dates for 30 county fairs that receive State aid were set. The dates were all in August or September and in some instances three fairs will be held during the same week, although in different counties.

Thoroughbred Matters

ommission Has Power to Regulate Tracks.

Louisville, Ky., Dec. 11.—Holding that the Kentucky State Racing Commission is clothed with power o regulate the race tracks in the State in the same manner as has the police department to regulate the ities of the State and that by reason of this power r authority, the Commission has the right to fix the mount of money to be offered as purses, Judge Samel B. Kirby today denied the application of the Douglas Park Jockey Club for a temporary restraining order to enjoin the Commission from fixing $800 s the minimum for purses. He also sustained the demurrer of the Commission to the petition, and ranted the Jockey Club an appeal to the Court of Appeals.

Judge Kirby said that because of a press of business he had been unable to write an opinion, setting orth in full his reasons for denying the prayer of he jockey Club, but that he likely would do so within he next few days . It was understood, he said, that he officials of the jockey club as well as the members of the Commission, desired to have the questions at issue decided by the Court of Appeals at the earliest possible moment in order that the decision will be effective before the race meeting next spring, nd for that reason he passed on the motions without writing an opinion.

Judge Kirby said that while it is true, as contended by counsel for the Jockey Club, that the law creating he Commission did not say specifically that it had he right to fix the amount to be offered in purses, uch right was there by implication and that in his opinion the Commission had not overstepped its authority in requiring the jockey club to fix purses at a minimum of $800.

Arguments on the motions were made ten days ago by Harvey Myers, of Covington, representing the Douglas Park Jockey Club, and John T. Shelby, of Lexington, representing the Racing Commission.

Martimas Is Destroyed.

Hamilton, Can., Dec. 13.—The leading Valley Farm sire, the Futurity winner Martimas, is dead. Until stricken with colic last Thursday, he was apparently in the best of health, but the next day he broke a leg and had to be destroyed. He was the largest winning horse owned in Canada, his earnings amounting to nearly $52,000, beginning with the Niagara Stakes at Fort Erie in 1898 as a two-year-old. That was his most successful season from the earnings point of view, as his record included his success in the Futurity, trained by Eddie Whyte and ridden by Harry Lewis, in a field of twenty-three starters. The following season he won the Canadian Derby at Fort Erie, and the next year the Toronto Cup, while he was also a winner three times as a five-year-old.

Though he was practically confined to the mares at Valley Farm after his transfer to the stud, his progeny have won about $70,000. They include the King's Plate winners, Kelvin and Shimonese, and one of the very fastest of Canadian-breds, Slipper Day.

Martimas was a chestnut horse, foaled in 1896, and therefore 20 years old at the time of his death. He was bred by Jennings & Enright, Elmendorf Stud, Lexington, Ky., by imported Candlemas, full brother to St. Blaise, from the Bramble mare Biggonet, and was bought as a yearling by the late William Hendrie, who had the greatest fondness for him as a gallant racehorse and a son of a good mare. Mr. Hendrie never forgot seeing Biggonet win at Saratoga after being more than an hour at the post, and was determined to have her colt when he was offered at auction, even though other good judges near home did not hold such a high opinion of him as a prospect.

—o—

The following new selling race rule is now in effect at Juarez: "Selling Race Rule (Amendment to Rule 142)—Bids for the winner of a selling race must be sealed and lodged with the clerk of the scales within fifteen minutes after the official result of the race has been announced. Each bid must be accompanied by the cash, unless the bidder has a sufficient amount to his credit upon the books of the club. No bid shall be of less sum than the entered selling price of the horse, plus the value of the purse to the winner. When the bids are opened the owner shall be notified of the highest bid and shall have the option of protecting the horse for an additional $5, said option to expire five minutes after the opening of the bids."

◈ ◈ ◈

It is said to be practically assured that Memphis will stage a ten-day meeting following directly on the heels of the Hot Springs season in the spring. The racing last year at Hot Springs was so successful that Memphis merchants have resolved to have a meeting of their own. Joseph A. Murphy is behind the movement and he is expected to put it through.

◈ ◈ ◈

H. C. Hallenbeck, for whom that great horse The Finn performed so well as a star handicap horse during the past season, is coming back on a larger scale next year. During the coming season he will race a string of two-year-olds, and should have some good ones, as he but recently paid $24,000 for a lot of eight imported yearlings that were brought to this country by Duncan Grant of the Rugby Stud.

Speculating on a Mate for Regret.

Regret, Harry Payne Whitney's great race mare, is to be bred during the coming season, and horsemen are speculating as to what sire she will be sent to, and where best results may be had, and wondering if there is one in Mr. Whitney's Brookdale Stud that is suitable for her.

The question of a suitable mate for the great daughter of Broomstick and Jersey Lightning remains an open one. All Gold has been spoken of, but as yet it cannot be said that he has proved himself either a good racehorse or a great sire. Peter Pan, grandly bred, a great performer and an impressive individual, is thought by many to be the logical answer to the question, and his son Pennant, although untried as a sire, has been mentioned, and Friar Rock has been spoken of, though he is not a member of the Brookdale sire contingent.

Whiskbroom II has been suggested by some who have a high regard for the Bonnie Scotland strain through the Bramble and Ben Brush line, but of course there are those who would regard this cross as quite too close, because both Regret and Whiskbroom II were sired by Broomstick, but this would be only a repetition of the experiment made by the late James R. Keene when he bred Commando, the son of Domino, to Running Stream, the daughter of Domino, and obtained the eminently successful sire Ultimus.

Whiskbroom II and Regret were unquestionably great performers, and both were rich in the blood of Bonnie Scotland through its best channel; but this is not all. Whiskbroom II brings into the combination the priceless Maggie B. B. strain through his dam, Audience, by Sir Dixon, who was by imported Billet out of Jaconet by Leamington out of Maggie B. B. Then again the Blacklock strain figures prominently in the pedigree of Whiskbroom II through Audience, by Sir Dixon, he by Billet, he by Voltigeur, and he by Blacklock and through Broomstick, son of Elf, she by Galliard, he by Galopin, he by Vidette, he by Voltigeur and he by Blacklock; and then this same Blacklock strain through Broomstick again would come into the combination through Regret.

But even this it not all the rich Maggie B. B. strain which would come into the proposed combination through the union of Whiskbroom II with Regret. Audience, the dam of Whiskbroom II, was by Sir Dixon out of Sallie McClelland by Hindoo. Her second dam was Red and Blue by Alarm, and her third dam was no other than the same old Maggie B. B. by Australian, so that Whiskbroom II would bring into the combination a double cross of the rich Maggie B. B. strain.

Then again, Regret would bring in, besides the Bonnie Scotland and Blacklock strains, through her sire, the blood of Hamburg through her dam, Jersey Lightning, and that of Longfellow through her granddam, Daisy F., by Riley, the splendid son of Longfellow.

American Influence on English Racing.

Whilst England is quiescent. in a racing sense, Americans are going in for racing as strong as they can to attract racing men from our own country, and are buying all the race horses and valuable broodmares that they can. Americans know that racing and race horses must always abound in rich countries, and that the thoroughbred is a most valuable asset. They know that very few rich men will stay in a country where there is no racing, hunting, or other sport, and they know that no country can thrive unless its rich men spend their money there. When racing was stopped in America a few years ago, the race horses were disposed of, and what was the result? It soon was made clear to the majority that the great industry of breeding half-breds was being destroyed, and in all haste did they set about a renewal of racing and the replenishing of their reduced thoroughbreds from England.

An event having great influence on English racing was the introduction of the monkey seat, seen to perfection in Tod Sloan, who rode for the most part for Huggins' stable. It had been discovered in America that horses could carry weight much more easily on their shoulders than in the middle of their backs, whilst an additional advantage was gained by lying as low as possible on the horse's neck, and thereby avoiding the wind pressure, which must be great indeed when a horse at racing pace is meeting a high wind. For a long time the English owners and trainers held out against it, but certain defeat soon made it clear that the advantage of the "monkey" seat was absolutely overwhelming. By those means the foreigners had a great season of money-making. They came over to make money, and they made it. It must be admitted, too, that they were clever men with horses, and clever trainers. In spite of the money these foreigners were taking away to America with them, they were not bad times, and there is room for much anxiety lest America builds up the greatest horse-breeding industry in the world; and yet almost daily we read about business after the war. After the war, indeed; it will again be months too late!

By a steady and constant drain very many of our surplus horses in training have been scattered all over the world, and it seems to me that next year the two-year-olds will greatly outnumber the older horses. Perhaps it is fortunate that it is so, and certainly at Newmarket we have a greater number and a much better-looking lot of yearlings than we had last year. Looking at the older horses retained in the various stables we first note that no doubtful ones remain.—[Warren Hill in London Sporting Life.

Small Profits Now in War Horses.

Dealers who made big money during the first two years of the war, now say there is little money in the business, according to G. Chaplin of New York who recently gave an interview on that subject. It is the terms of the new contracts that prevent any big profits. The French Commission, it appears, is stipulating that all horses shall be delivered by the American contractors at French ports five days after their arrival there, thus shifting to the shippers all risks of loss, not only in transit but for a short period after the horses are on French soil. The mortality on land and sea averages from ten to fifteen per cent, experienced shippers say, and insurance rates, which cover only losses in excess of ten per cent, are so high that most of the contractors no longer insure their horses but take the risk themselves. Many of those who executed contracts early in the war, when they could deliver horses to the French authorities at the points of inspection or at the seaboard, are now resting on their oars rather than assume the big risk incident to delivery on the other side of the Atlantic.

That the French Commission has rather outmaneuvered the American contractors and succeeded in getting more than its money's worth seems to be indicated by the fact that it is now buying war horses for less money and on better terms than when hostilities began more than two years ago. On the few contracts which then called for deliveries in France the average price was $275, and fifty per cent of the horses were of the light cavalry type costing only about $135 in the West, the other fifty per cent being artillery horses costing about $165, thus making an average market value of $150 at the points of inspection. At present the French government is paying $279 for horses landed in France, but it is getting forty per cent heavy artillery horses costing the contractors about $185 at inspection points, forty per cent light artillery horses costing about $165, and only twenty per cent cavalry horses costing $135, so that the average market value of the horses in the West is now about $166, or $16 more than in 1914. In other words ,the contractors are supplying a class of horses that cost $16 more than those supplied at the beginning of the war and are receiving only $4 more for them.

When it is remembered that almost one million horses and mules have been taken out of the United States since the outbreak of hostilities, it must be admitted that the buyers for the Entente Allies have played their cards better than American horsemen have played theirs to prevent a big rise in prices. That the French are actually buying on better terms than ever today, after one horse in every thirty in the United States has been sent away to the war, is truly remarkable, the more so since nearly every other kind of live stock has advanced rapidly and steadily in price ever since the war demand set in.

Existing conditions in the market incidentally afford a complete answer to those faddists who have been frantically calling on the United States to come to the rescue and supply the alarming shortage of army horses by breeding them under government supervision and at government expense, as they do in Europe. If this country can sell one million horses for export without affecting prices in the home market most horsemen will continue to believe the supply will take care of itself in any circumstances likely to arise, if the government will merely encourage private enterprise in breeding and using horses in time of peace.

The great war, with its vastly increased use of artillery, has presented some new problems in the supply of horses suitable for military purposes. This is strikingly reflected in the fact that the Entente Allies were taking cavalry horses and artillery horses in equal numbers when the war began, while they now buy four artillery horses to one cavalry horse. And besides the horses bought for artillery service they are now buying thousands of big mules for the transport wagons and the guns, about 100,000 mules having been shipped abroad this year. British military authorities, awake to the changed conditions, are giving more attention to the future supply of gunners than to cavalry mounts, and to this end have lately purchased some middle weight Percheron stallions and mares in France as being the best type obtainable to breed for artillery service.

—o—

From Hot Springs, Ark., comes word that two race meetings are assured the Arkansas resort, the first of which will start directly after the close of the New Orleans meeting . This means that the Hot Springs races will open about the middle of March and run until the latter part of April, closing in time for shipment to Kentucky, where Lexington will open the Blue Grass spring season.

◈ ◈ ◈

Trappoid, the filly by Trap Rock—Outcome that is racing at Juarez, has won all three of her starts thus far, one of them a mile in 1:38 2-5. The filly had a bad leg when purchased by Mr. Umensetter, but he has cured this ailment and the chestnut should prove one of the best selling platers at the track this winter.

◈ ◈ ◈

Old Rosebud, the Kentucky Derby winner who went wrong in the Withers Stake at Belmont Park, is fast rounding into condition at Juarez. He is being galloped and will face the barrier before the end of the meeting. Trainer Frank Weir believes Old Rosebud is again sound, and will stand training.

The Christmas Handicap

Up around the upper floors of the tall buildings forming the two sides of Broadway's deep canyon, feathery flakes of snow dashed against the glass or skittered through the wind to fall further down and melt into sleety rain as they reached the ground. It was a reminder of the belated Winter that looks to be upon us, and sent shivering to cover those who in recent days have found it pleasant to congregate about the corners along the thoroughfare. There was some promise of a white Christmas in that snowfall of yesterday, pleasant enough for those prepared for the rigors of winter, and depressing in plenty to those who have found the past days other than prosperous ones.

Back up in a room where the ivory balls were clicking about the green table the Hustling Kid lolled in an easy chair and watched the play of the two expert wielders of the cue. In contrast to the dreariness and cold of outdoors, here bright lights were burning and steam radiators gave off comfortable warmth.

"Why wander out in this weather to look for news when it's yellow backs to a piker's marker that there ain't any news to get?" the Kid inquired, as he reached out to borrow the makings. "This kind of a day makes me feel like traveling toward the sunshine without waiting for the opening at New Orleans next month. If I hadn't planned to spend Christmas in New York I'd be on my way to the Crescent City tomorrow. This snow reminds me of one Christmas time when I was racing where there wasn't much sunshine, and I was there because I didn't have the price of a ticket to San Francisco, and its climate the 'Native Sons' talk so much about."

I knew the Hustling Kid had a story to tell, and at his invitation to "throw off my blanket and rest myself alongside his stall," I paused to hear the story of "Old Doc" Hempsted, the Barefooted Horse and the Big Christmas at Clifton. And as he told it to me there where the smoke was almost as thick inside as was the snow outside the building, I pass it along to the "other members of the club" (as Morty Lynch terms us), for breakfast table consumption.

"It was done at the old Clifton track and so many years ago that I've got to own up that I'm no longer a chicken," the Kid began. "I was there because I was there, and that was about the only excuse I had. I hadn't had a speaking acquaintance with the holder of a winning ticket for days and days, and the man that had the boarding house where I was hanging on to the feed bag had got mighty sore on that 'O, Promise Me' song I'd been singing for him. He'd given me until my week was up to make good, and it looked like I was going to lose my home and my trunk."

The Kid paused and stretched his neck to watch a difficult play on the table near by. The stranger made a good shot, ran out his string and the game was over. I waited while the man with the story lighted another cigarette, and then he went on:

"I was in bad all around. I had a sister up in Brooklyn that I could have gone and hung up with for as long as I liked, but I wouldn't let her know I'd been taking the toboggan since I saw her in the summer when I was there with the bank roll. She'd written me to run up for Christmas and I'd answered that I'd be there and be Santa Claus for her two kids, and that she needn't bother about their Christmas, which I knew would be good news,for she didn't have anything to spend foolishly, even if she did have a little home.

"And here I was, with Christmas two days off, my trunk in hock to the boarding house, and with Izzy Einstein, of the Dollar Book, wearing my diamond ring, and my watch in soak to the feed store man. I'd sent away at least one 'good thing' every day for a week to friends in Philadelphia and New York, and finally had killed every good man I had on my list. Of course, if I'd been the only hard-luck story around the track, I might have grabbed a stake from a dozen different places, but all the gang that had stuck there was in the same fix. I wasn't the only bad account on the boarding house books, by a long shot, or it would have been easy to stall the joint off.

Christmas came on Sunday that year, and it was on the Friday morning before that I got my final notice from the scoffing house man, and, as I mentioned before, he didn't smile when he said I'd have to dig up and kick in. I made a last desperate stab at a client or two that day, taking a chance on one that was in the only handicap of the day and looked like he'd have to step on his own feet to lose.

"The only thing in favor of the busted sports had been the weather, and we'd been having plenty of Indian Summer all along. The track was in good shape, but the horses were the worst you ever heard of. If you got around the stables at night you could imagine that you heard them barking like a lot of fox hounds, and that's just the class they were, with the good ones all gone South and to California or into Winter quarters to rest.

"I got up courage that afternoon to squeeze seven meg more out of Izzy on that ring, and I was so confident of the trick I had dug up and sent out as a tip that I shot in five of the seven for a ticket on him, keeping the other deuce for cigarette money and care fare. And the same old thing happened. It was a mile and a sixteenth race for dogs of all ages and a two-year-old with eighty pounds and a monkey on his back beat the start five lengths and lasted just long enough to get the decision over my 'good thing' by a whisker.

"And it was after this race when I was wishing all the bad luck I could think of on the starter that had let that two-year-old off in front, that I bumped into 'Old Doc' Hempsted. You remember the doc and that bunch of whiskers that saved him the trouble of wearing a necktie in summer and in winter kept him warm enough without a vest. But, believe me, he had it all over the rest of that bunch of gypsies at Clifton when it came to being a horseman. The doc had been having some hard luck along with the rest of us. Some of his feed hounds had been on the sick list and his jockey had been given thirty days on the ground for throwing another rider into the fence. He was headed for the bar and seeing me hanging on the down and out peg asked me along to get cheered up. I didn't touch a drop of the strong stuff then, but I'd heard that three drinks of that racetrack soup would make a stable swipe ready to take a wallop at James J. Corbett, who was then champion.

"I took a little pop and stuck around the old man. Then when I saw he was training for the booze stakes I hung on to him like a woman at a telephone. He had the reputation of being tighter than a rubber overshoe, but I had a hunch that if he got enough of that wildcat milk he might become a philanthropist, if he happened to have any real coin.

"It was another case of a fall for me, though, for after the old man had taken a half-dozen or so glasses of fire water, he quit me cold, saying he was going into town, where there was better and more of it, and that, as I didn't drink, I needn't come along. And I'd counted on putting the bee on the old man for a sawbuck, at least."

The Kid paused for a moment and reached for the papers and tobacco to roll a fresh supply of fuel. Outside, what had promised to be the first snowfall of winter had turned into a drizzle of rain, worse than any flaky fall. I waited for the story-teller to stoke up, and then he went on his reminiscent way:

"It was the day before Christmas, and it looked the part that they hand you in the pictures, so far as weather went. I didn't see any fat turkeys hanging around loose when I got out of the way that morning, but outside there was a full foot of snow. And, believe me, I wanted to go away from that man's race track worse than I'd ever wanted to take any trip in my life. I hardly had courage to go into the feed trough for my scoffings, but finally filled up and ducked out without anybody but the waitress seeing me.

"I'd made up my mind to blow the trunk if I could make a raise to get me back to Brooklyn with enough dough to get that Santa Claus stuff I'd promised my young nephews. The only chance I could see would be to brace 'Old Doc' Hempsted and tell him the whole story. They had a Christmas Day Handicap on the card that afternoon, and I hadn't taken enough interest in it to look at the entries. I did wonder, though, if they'd race in the snow.

"It was 9 o'clock in the morning when I got over to the Hempsted stable, and I didn't see anything of the old man. While I was Sherlocking around I heard a voice in a stall and peeked in through a crack. Sure enough, there was the 'Old Doc' in the stall with Tan Bark, the best horse of his outfit, but even he wasn't much at that time on account of bad legs that burned him when he started to run.

"It didn't surprise me when I saw the old man soaking all four feet of the horse in water. I thought he was just doctoring his dinky pins, so I opened the door and walked in. He didn't seem a bit cordial, and it looked like I'd come to the wrong store for a touch. 'Who asked you in here?' the old guy growled, and I was surprised after he'd been so friendly the night before.

"I apologized and decided to get it over with as soon as possible, and told him what I'd come for. And then he sprung the big surprise.

"'I'll stake you,' was the answer of the old man, 'providing you don't get out of my sight until after that handicap today. I'm going to win that race, and I don't want any touts spreading the glad news. Guess you're smart enough to see what I'm doing and might as well be in it.'

"As a matter of fact I hadn't paid any attention to what was coming off, but it hit me all over at once when I see he had the shoes off old Tan Bark. He was going to run him without plates in that snow and was soaking his feet to soften the hoofs and keep them from breaking and cracking. He might be good enough to win that Christmas Handicap in any case, but barefooted in the snow he was a cinch, and he'd be thirty or forty to one because he hadn't won a race the whole winter season.

"The old doc fixed it up that I was to sneak on his bets for him in fives and tens and twenties, and a twenty-dollar bet was to go for me. Did I stick by him? Did you ever have a chigre on you? Well, that was how close I stuck to 'Old Doc' Hempsted.

"Eight horses went to the post in the Christmas Handicap, and seven of them were shod with plates for the snow to freeze onto. Old Tan Bark went to the post barefooted. He didn't get away in front and he didn't have a good rider on his back, which was one of the reasons why I'd been able to get down about 600 meg at an average of 25 to 1.

"Before they had gone a sixteenth of a mile of t mile handicap Old Tan Bark was twenty lengths front. He shot out and left the others like a boc hound trying to be first with his leg on the rail tween acts at a problem play. And while the oth seven were slipping and floundering all over t track Old Tan Bark finished all alone, and at m night I broke into the little shack in Brooklyn w about everything that Santa Claus had ever promis them kids."—[John Day in N. Y. Telegraph.

THE HORSE SITUATION IN EUROPE.

When the European war will have lasted thr years, what will be the horse situation in those wa ring countries? What shall be the demand for hor stock?

Britain in 1913 imported 12,646 horses and e ported 66,928. Britain is able to produce a quanti of horses and does it. At the end of the war it very probable that Britain will be able to raise mo of the horses that she may want. That country h been able to get army horses from the outside ar has not been obliged to consume her own breedir stock.

France is importing more horses than she export The surplus of the imports upon the exports repr sents some 10,000 horses, most of the draft typ France is able to raise all the light horses wanted i that country. The demand for draft horses in Franc after three years of war is likely to be over 30,00

Belgium was able to export every year 30,000 dra horses, but will not be able to do much for the ne six years. Belgium may perhaps have enough broo mares left to replace those horses that have bee killed and stolen, but she will be unable to expo for many years.

Italy imports 45,000 horses and exports 2,500. Th excess of the imports upon the exports is som 42,000 horses, most of which are draft animals. Afte two years' war, Italy will ask for some 80,000 horse

Russia is raising a world of light horses, but tha country has not been able so far to produce all th draft horses needed. The import of draft horses wa 8,000 a year, or after three years of war she wi need very near 25,000 horses of the draft type.

Germany was importing 133,065 horses in 1913, an exported 8,090. Germany has been unable to ge horses from the outside unless it is from Hollan and Denmark. In the best conditions Germany i short for every year passed at war at least 100,00 horses, mostly draft horses.

Austria imports every year 20,000 draft horses She is well stocked with light horses produce mostly by Hungary. After the war Austria will nee surely 60,000 draft horses.

The other warring countries are able to produc the horse stock wanted by their agriculture and in dustry. To sum up, here are the minimum estimate needs of the countries that will be short:

Russia	25,000	draft horses
France	30,000	draft horses
Germany	300,000	draft horses
Austria	60,000	draft horses
Italy	80,000	draft horses
Total needs	495,000	draft horses

From where shall those horses come?

Any one of those now warring nations will be unable to furnish the horses to the countries wanting them. Holland and Denmark will perhaps be able to furnish 50,000. The United States of America with Canada, to a limited extent, will be called to supply the balance, 445,000 horses, weighing an average of 1,500 pounds.

As soon as peace covers Europe, there will be a very strong demand for draft stock. There will be such a shortage in horses that oxen and even cows will be used in the fields. We must not forget that there are more small farms than large ones in Europe, and that tractors cannot be used with profit on ten-acre farms. For such conditions the demand for heavy horse stock will last for several years and the price of work animals which averaged $375 is likely to jump to $500.—[Ranch Review.

Cost of Boarding Hired Help.

It costs $128 per year to board a hired hand, according to estimates furnished to the Department of Agriculture by 1,000 farmers representing widely separated sections in 14 States. The averages derived from these estimates are embodied in Department Bulletin 410, recently published, entitled "Value to Farm Families of Food, Fuel, and Use of House."

It was found that the total annual cost per person of board for hired help varied from $104 in Vermont and Pennsylvania to $162 in New Jersey, and that the percentage of this cost paid out in cash varied from 15 per cent in North Carolina to 49 per cent in California. This percentage is about one-third in the eastern section studied, about one-fourth in the corn-belt States, and still less in the Southern States.

Says an exchange: Many a man complains that he is losing money in the horse business, but in looking over his plant nine times out of ten you will find that not half a dozen people outside of his immediate neighborhood know that he owns a horse, much less a stallion in service . A little printer's ink scattered round such a place would make grass grow on the barren places and lift the bank account of the whole concern.

Notes and News

A Merry Christmas to every reader.

Make your nominations in the State Fair Futurity.

There were 26 horses in the Chicago Sale this week that have records below 2:10.

Fred Ward won 39 races and over $11,000 with the Hemet Stock Farm horses during the past season.

The fastest trotting gelding of 1916 is M. L. J. 2:05¼ by Red Hill.

The fastest four-year-old trotting colt of 1916 is The Exposer 2:06, son of The Exponent.

Washington McKinney has four new performers in the standard list this year, giving him 27 in all.

With 77 of his produce in the 2:30 list, the dead sire Nutwood Wilkes has five new standard performers in 1916.

The get of Moko have won $82,639.25 in futurity stakes. Nineteen of them have been returned stake winners.

Speak a word to the secretary of the fair association in your town and impress upon him the necessity of announcing his race program early.

Complete, the ten-year-old mare by E. D. Dudley's stallion Palite 45062, reduced her record from 2:16¾ to 2:14¾ trotting this year.

Fourteen new standard performers were added to The Bondsman's list this season, which gaves him 85 in all. He will soon be a century sire. The Bondsman is now 21 years old.

C. K. G. Billings paid $1500 for W. G. Durfee's mare The Lark 2:08¼ at the Chicago Sale. He will probably use her as a brood mare and mate her with The Harvester 2:01.

Asa Pointer by Star Pointer, the pacer bred by Attorney Asa Mendenhall of Oakland, California, took a record of 2:18¼ this year. He was sold at the Indianapolis sale last May.

On January 1st, 1916, there were, according to the United States Department of Agriculture, 28,913,709 horses and mules in the United States, valued at over three billion dollars.

Dick McMahon has been in California for several days, spending part of his time at Pleasanton where he is greatly pleased with the youngsters owned by Mr. R. J. McKenzie, and will probably have a few of them to race next year.

Hemet Queen by Wilbur Lou is not only the holder of the world's yearling pacing record for a filly—2:16¼—but she also holds the world's record of 2:22¼, the fastest for her age and gait on a half mile track.

The dead sire Zombro has eight new standard performers to his credit this year and five new ones in the 2:10 list, while Auto Zombro became his fastest performer by reducing his record to 2:02½ at the pacing gait.

Sidney Dillon, sire of the first two-minute trotter, has just 90 standard performers, and of these 15, or just one-sixth, are in the 2:10 list. That's a prety good average for a stallion that never had any opportunities to speak of until he was ten years old.

All mares booked to Gen. Watts (3) 2:06¾ before January 1st will be bred for a fee of $100. All booked after that date during 1917 must pay $200 for the season. This is a good scheme to secure a full book early.

The average of the first afternoon at the Chicago Sale was $527 according to the dispatches. That was for 22 horses sold and they were probably the W. G. Durfee consignment. We will have full particulars next week.

It is reported that a wealthy Youngstown, Ohio, horseman is negotiating for the trotting mare Blanche Carter 2:09¼, owned by Stout Bros., of Clarksburg, W. Va. A price of $10,000 is asked for the mare. Blanche Carter trotted a mile in a race in 2:07 at Columbus last fall.

Extend 2:19¼, the two-year-old daughter of J. Malcolm Forbes 2:08 and Extasy 2:10½, that sold for $2,800 at the recent New York sale, was so unpromising early last summer that she was given away. Ray Snedeker, who trained her all season, considers her the making of a sensational performer. She is now owned in Massachusetts.

It is not beyond the range of possibilities that Zomrect 2:03½, owned by Mr. John J. Fitzgerald of Covina, California, may enter the two-minute list in 1917. The son of Zombro came from 2:12¼ to 2:03½ in 1916, and was improving right along when the season ended.

Entries will close Tuesday, January 2d, 1917, for State Fair Futurity Stake No. 9, guaranteed value $2500. It costs $2 to nominate your mare that you mated last year with a stallion with the idea of getting a fast trotter or pacer. One week from Tuesday next is the last day for making nominations.

The only California stallion living and owned in this State at the present time that is represented in the table of leading sires of 1916 that have five or more new standard performers to their credit during the year is Hemet Stock Farm's Wilbur Lou (3) 2:10¼, who has five.

The fast and beautiful stallion Axtien 2:06¼, that was operated upon for strangulated hernia in July, is again fit as a fiddle, so much so that he started in a race at his home town, Plymouth, Ill. ,last month, in which the son of Axworthy was separately timed in 2:12½.

From 1911 to 1916 inclusive Tommy Murphy has won in stakes and purses on the trotting tracks, a total of $533,537.50. During 1916 his winnings amounted to $83,503.50, which is more than any other driver has won this year and it is the sixth year he has led all drivers in the amount of money won.

The Christmas Horse Review as usual is a fine number with a beautiful cover picture by Dickey. Never has the Review printed as many "write-ups" of farms, horses and owners as are in this number. It is most generously illustrated throughout and a credit to the staff of the leading horse journal of America.

The champion race winning driver of 1916 is Harry Brusie, of Hartford, Connecticut, who won 42 races during the year, got second money 20 times, third money 26 times, and fourth money 10 times. His total winnings were $13,785, and the fastest heat won was in 2:09¼, when he landed Dusty Dan winner in a pacing race.

Hart Brothers, of Flemingsburg, Ky., were recently awarded damages in the sum of $2,500 for the death of Baron Lassie, dam of Lady Wanetka (2) 2:10 and Peter Billiken 2:06¼. The mare was injured in a railroad accident and died as a result of the injuries. The jury held the accident to have been due to carelessness and negligence on the part of the railroad employees.

Dick W. 2:06¼, the Fresno pacer that Schuyler Walton brought out and sold to Adolph Ottinger, who raced him one season and consigned to the Indianapolis sale in May last, has been expelled from all trotting tracks together with his present owners, M. R. West and Harry Thompson, of West Virginia, who tried to race him under another name during the summer.

Captain Alexander H. Waddell, formerly of the British army, an author and newspaper writer, died at his home in Brooklyn, N. Y., on November 30, aged 58 years. He was born in England, and while in the British army saw service in India and Africa. After coming to this country he was editor of the "Bit and Spur," now known as the "Spur," besides special writer for some of the big metropolitan dailies.

Wilkes Brewer, the daughter of Nutwood Wilkes, has a number of world's records to her credit this year. She trotted on half mile tracks altogether and on the two-laps she trotted the fastest third heat in 2:08¼, the fastest fifth heat in 2:08¾, the fastest three heats in a race by a mare; 2:10, 2:10½, 2:09¾, and won the fastest five heat race in 2:12¼, 2:09½, 2:08¼, 2:13¼ and 2:08¾, Ima Jay winning the first and second heats.

Zombrino 2:06¼, owned by Dr. John G. Belt of Phoenix, Arizona, and driven by Ted Bunch of California, was the champion race winner of 1916. He started in 21 races, of which he won 18, was second twice and once unplaced owing to an accident. This grandson of Zombro was a much traveled horse during the year, as he went from Arizona to Calgary, Canada, for his first start, raced from there through Canada to Vancouver, then back into Uncle Sam's dominions through Washington, Oregon and Utah, back to Phoenix where he closed the season by winning two $1000 purses.

August Belmont, president of the American Jockey Club, says: "If the Federal Government wants to achieve definite success in its breeding experiments, it can't go wrong if it breeds the thoroughbred horse to good trotting mares. The army horse must have stamina. This the trotter already possesses in a superlative degree, and it wouldn't have to be bred into him as would be the case in almost any other type of mare. Generations of racing have developed great lung power in the trotter, and the muscular fibre has been improved in proportion."

The Cuban National Horse Show which is advertised to open February 24, 1917, is to be given under the auspices of the Republic of Cuba, which government has appropriated $25,000 in cash to assist in making the prizes numerous and liberal.

The property at 2934 Fulton street, this city, occupied for many years past by the Park Riding Academy, has been purchased by parties interested in the management of the Riding and Driving School at 701 Seventh avenue, and after January 1st will probably be closed and used no longer for a riding academy.

A circuit of horse shows in the Eastern States is being arranged for 1917. Reginald Vanderbilt has taken the initiative and a meeting has been called to arrange a schedule of dates for next season's shows which will prevent any unnecessary clash of dates, such as has happened nearly every year in the past. The outlook is for a greater number of shows as well as a much larger number of exhibitors than in former years.

The Colorado trotter, A. R. G. 2:13¼, brought $1,700, the top price in the sale of trotters and pacers at the Union Stock Yards, Chicago, on Wednesday. E. B. Brown of Denver bought A. R. G., after spirited bidding. Diumeter, the Grand Circuit pacer, went to H. H. Rogge of Dayton, O., for $1,525. The Beaver 2:03¾, fast Canadian pacer, was bought by S. F. Goodenstein of Milwaukee for $1,100.

The fast and handsome daughter of Bellini 2:13¼, Beatrice Bellini 2:08½, was found dead in one of the pastures at Castleton Farm, Lexington, Ky., a few days ago. She was owned by Hillanddale Farm, where she was bred. Her dam was the double 2:10 producer, Trixy Nutwood 2:18¾, and, although young in the stud, she had already produced Harvette (3) 2:13¼, a filly that has raced below 2:10, Beatrice Mac (2) 2:27¼, and Toniotta (2) 2:23¼. She was mated last spring with Etawah 2:03, and was but 14 years of age.

C. A. Durfee, the veteran Oakland horseman, has driven many a 2:10 performer on the race track, and in his early days could ride a bucking broncho with the best of the vaqueros, but he has heretofore never mustered up the courage to drive an automobile. He had a happy surprise the other day when he received from his son, W. G. Durfee of Los Angeles, a brand new five-passenger Dodge machine as a Christmas present. After looking it over he said all it lacked was a whip socket and he thought he would have one put on. Mr. Durfee is now sitting up nights studying the traffic rules and trying to learn something about gas engines, non-skid tires, inner tubes, punctures and how to treat them, and several other necessary things to know about when driving a gasoline instead of a hay burner. It is reported that after his first ride out towards Pleasanton, he wrote to the State officials and offered to reduce all the bumps on the State Highway with the famous Durfee Dope at so much per bump.

English Now Want Percherons.

One of the interesting results of the war in Europe is the introduction of French Percheron horses in England for breeding purposes and the prospect of an English Percheron stud book in the near future. The active, docile, powerful, willing French artillery horses have made a hit with British army men in France ever since they first came in contact with them, and some of the progressive English live stock journals have for some time advocated the importation of Percheron stallions.

At a recent sale held by the French government the initiative was taken by Lord Lonsdale, Major-General Birbeck and Henry Overman, the latter an army veterinary surgeon. They purchased two gray stallions and several mares, with a view to trying out the French breed in Britain, where there is a conviction among military authorities that the half-bred Percheron fills the bill "best of the many types bought for us the world over since the outbreak of war," as one critic has said.

Many of the grade Percherons purchased for the British army have gone from the United States, and of these the London Live Stock Journal says: "The best of the artillery horses imported from America are as good as anything produced in the United Kingdom. They show strong indications of Percheron blood."

Wintering Dairy Cows.

Quantity of feed ranks next to the kind of feed in dairy rations. Economical feeding demands that cows be fed as individuals, and not as a herd. Too frequently each cow in a herd is fed the same amount of grain, regardless of how much milk she is producing. By this practice some cows will be underfed, while others will be overfed.

It should be understood that an animal always uses a certain amount of the food it receives to maintain the body. This is the first use to which the food is put, and is called the ration of maintenance. This amount is required by the animal whether or not she is producing milk. All feed above this amount is used for milk production, or is stored on the body of the animal as fat. In the case of the young animal part of this excess is used for growth.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Portland Club Election.—Members of the Portland Gun Club met October 12th and elected John G. Clemson president of the organization for the coming year. Clemson is one of the best-known sportsmen in the city, has worked faithfully for the welfare of the club, and his selection is a popular one. He succeeds A. W. Strowger.

H. A. Pollock was re-elected vice-president of the organization and H. R. Everding was selected secretary-treasurer, succeeding Frank A. Templeton. Everding is a former president of the club, and one of its most popular members.

Other directors elected were W. C. ("Bill") Bristol, who will insist that all of the members use 20-gauge guns in the future, and A. W. Strowger.

It was decided that the Pacific Indian shoot would be held at Portland some time in July, and that the Northwestern tournament would probably be held during Rose Festival week.

Members voted a unanimous message of thanks to John G. Clemson and H. R. Everding for their many services rendered the club during the year just being brought to a close.

W. R. Briese was appointed superintendent of the club, and will take charge at once. Briese has a one-year contract.

Biggest Bass of Season.—Unless some skillful angler slips out between now and December 31 and catches a striped bass weighing over 41½ pounds, Fred Engle will be awarded the Ripley high hook medal of the San Francisco Bass Club.

Experts who angle for bass have just about settled in their own minds that Engle is to be the recipient of the fine diamond medal. However, other members of the club still have one week in which to surpass the record.

"Pop" Stranahan carried off the trophy last season. His record catch was a forty-one pound fish. The bass taken by Engle breaks a Bass Club record of many years' standing.

The growing scarcity of bass has impelled the membership of this fishing organization to consider seriously the possibility of the complete disappearance of this gamey fish. Many feel that unless some action is taken toward a more stringent enforcement of the law respecting the size of fish which may be taken the fish will soon be gone.

New Fish Preserve.—The creation of a new fish preserve, to comprise the territory surrounding the new Mt. Whitney trout hatchery, which is being built on Oak Creek, near Independence, will be asked of the Legislature at its coming session by the State Fis hand Game Commission. This announcement was made by W. H. Shebley, who is in charge of fish culture of the hatchery department of the Commission.

Work on the first unit of the hatchery, which is to be the largest and finest in the world, according to Shebley, will be completed by the architectural division of the State Department of Engineering by the first of the year. Arrangements are being made now by the Commission for the operation of the hatchery next spring. It will have a capacity of six million trout fry in the first unit.

The supply of breeders will be procured by the new hatchery from the Rae Lake Basin, in the Whitney range, more than 10,000 feet above the level of the sea. A chain of lakes in the basin afford exceptional opportunities for propagation.

Especial attention is to be paid to rainbow trout, which will be used to supply the streams in several counties of the State.

According to an estimate by James Dean, assistant State Architect, the building will cost about $70,000. It was originally estimated to cost only about half this amount.

November Affiliations with A. A. T. A.—In the month of November thirteen trapshooting clubs made application for affiliation with the American Amateur Trapshooters' Association. Those to be admitted and given the privilege of holding shoots under the auspices of the national organization are as follows:

California—Midwick Country Club, Pasadena; Elmer McGarty, secretary.

Colorado—Oak Creek Gun Club, Oak Creek; Allan Cliff, secretary.

Idaho—Potlach Gun Club, Potlach; W. L. Maxwell, secretary.

Illinois—Evanston Gun Club, Evanston; M. J. Vose, secretary. Trumbull Gun Club, Chicago; C. J. Prokep, secretary

Iowa—Du Pont Gun Club, Moar; A. K. Peters, secretary.—

Massachusetts—Reading Young Men's Club, Reading; T. E. Webb, secretary.

New Jersey—Black Diamond Gun Club, Secaucus, F. W. Meerbott, secretary; Eureka Gun Club, Newark, H. H. Caruso, secretary.

Pennsylvania—Harrisburg Academy Gun Club, Harrisburg, J. H. Troup Jr., secretary; Springhaven Country Club, Wallingford, G. F. Hamlin, secretary; Wissinoming Rod & Gun Club, Wissinoming, Philadelphia, D. R. Jacobs, secretary.

Canada—Greater Edmonton Gun Club—Edmonton, Alta., R. E. Andrews, secretary.

MAY BAR ALIENS FROM HUNTING.

Commission to Introduce Bill to Put End to Lawlessness and Violations.

Aliens are to be forbidden to own, possess or bear firearms, if the bill which the Fish and Game Commission is considering passes the State Legislature. Acting Executive Officer Hunter is authority for the statement that the Commission will introduce legislation at the coming session which will prevent, absolutely, aliens from hunting in this State.

The proposed law is the first outcome of the shooting of Ray B. Heacack and the disappearance of J. S. Squires, both deputies of the Commission. They were involved in a shooting affair, apparently, with Italian bass fishermen on Stockton slough the night of December 12.

Each of the five Commissioners has separately considered this move, says Hunter, and are now ready to take official action. The law, if enacted, will be the most drastic measure accomplished in the history of game control in the West.

Aliens, regardless of character, position or descent, would, by the proposed law, be forbidden to have in their possession any firearms. Market hunters would be especially hard hit.

To support its stringent bill, the Commission points to the following facts:

Eighty per cent of the violations of the fish and game laws are made by aliens.

Deputies continually find their greatest difficulty with them.

In less than three years five killings have occurred. In most cases aliens were involved. The official reports show these cases:

March 10, 1913—Jack Galloway, deputy, attacked and shot in face. George LeCounec and brother attacked him. Galloway lived.

February 2, 1913—Burt Blanchard, shot and killed by meadow lark hunters. Evidence pointed to alien Italians.

April 16, 1913—Earnest Raymond and M. S. Clarke, deputies, attacked by Italian fishermen. Raymond and one fisherman killed.

November, 1913—George J. Randolph killed while arresting Lenciseo and Farnsworth, market hunters.

December 12, 1916—J. S. Squires, shot and killed, Ray B. Heacock missing, probably dead. Alien fishermen suspected as they had warned deputies that they would "get" them.

Five states already have bills which prohibit aliens from bearing arms. They are Massachusetts, North Dakota, New Jersey, West Virginia and Pennsylvania, the first state of all to enact the law. Dr. Joseph Kalbfus, executive officer of the Pennsylvania Commission, says that the enactment of the law not only reduced violations of game regulations, but decreased crime of every description in the state. The bill was passed May 8, 1908. Other states have followed.

Members of the California Commission are certain that game conditions would be improved, crime lessened and the efficiency of deputies increased if such a bill could be put through. They expect to make a fight to have the legislation placed on the statute books.—[S. F. Chronicle.

Tourneys Are Planned.—Fred H. Teeple, secretary of the Los Angeles Gun Club, has mailed out announcements calling for a number of good trapshooting tournaments for the next two months.

The W. A. Cornelius silver trophy will be put up by the club on Sunday, December 24th. This prize will be contested at 100 targets, distance handicaps. The shooter making the highest score will be declared the winner. Ties will be shot off at 25 targets, and to the shooter making the high score in each of the four strings of 25 targets will be given a "take-home trophy."

On December 31st the Henry Pfirrmann Jr. silver trophy will be shot for at the club at 100 targets, distance handicaps . The same conditions will govern this shoot as in the two previous ones.

The H. E. Sargent specially designed solid gold cuff links will be contested for at 25 pairs o ftargets. Twelve-gauge guns will be used in this double shooting event. Three events of 25 targets for take-home trophy will follow the doubles shoot.

The grizzly bear recently shot in the Sierra Madre mountains was identified as the one which escaped fifteen years ago from Echo Mountain, the one one George Wharton James, the writer, used to amuse himself wrestling with; it was identified by former forest supervisor T. P. Lukens by a picture of M. V. Hartranft standing alongside it.

WASHINGTON GAME WARDENS IN SESSION.

Suggestion Made to Change Laws, and Prison Game Farm is Praised.

Tacoma (Wash.)—More than 80 county game wardens and commissioners from the various counties in the state answered roll call at the convention of wardens, commissioners and sportsmen which opened on December 11th in the Commercial Club rooms. The turnout was exceptionally good and but three or four counties failed to respond.

The men began arriving in Tacoma early and established headquarters at the Tacoma Hotel. At 9 o'clock they adjourned to the Commercial Club, but E. J. Merryman of Ellensburg, president of the State Association of Game Wardens and Game Commissioners, was unavoidably detained and no official business could be transacted. Mr. Merryman arrived shortly before noon, accompanied by A. J. Bizzard of Spokane, the association's secretary.

The afternoon meeting was called at 2 o'clock with Mr. Merryman presiding. L. W. Darwin, state fiish commissioner and game warden, was the first speaker. He spoke shortly on the game farm at the Walla Walla penitentiary. Everett Griggs, president of the St. Paul & Tacoma Lumber company, and one of three business men selected to make a report on the farm last summer, was introduced by Mr. Darwin and gave a short address on the advantage of the farm. The men who visited the farm in conjunction with Mr. Griggs were Joshua Green, president of the Puget Sound Navigation Company, Seattle, and J. E. Pettigoe, Walla Walla attorney.

According to Mr. Griggs the farm is ideally situated and provides work for a number of prisoners. More than 1,900 China pheasants were hatched at the farm last year and have thrived. Of 1,800 that were distributed among the state wardens, less than a dozen died, showing how agreeable Washington's climate is to the pheasant.

Chairman Merryman then appointed a committee of seven wardens and commissioners to act on the various recommendations submitted by each county commissioner. He explained that every warden would no doubt have his inside pocket full o fchanges in the laws that he thought necessary, but it would be impossible to put them all before the meeting. A. G. Gray of Spokane county, A. H. B. Jordan of Snohomish county, George J. Hurley of Okanogan county, H. N. Fisher of Clallam county, W. H. Meyers of Lincoln county, R. B. Walkes of Spokane county and W. M. Campbell of King county were appointed to pass on the suggestions. Mr. Gray of Spokane county was named chairman . In selecting his committee Mr. Merryman named one from each part of the state in order to make them more qualified to pass on the general problems.

Recommendations were then turned in by the delegates. Every county presented a varied list, but a majority wanted a closed season on upland fowls, a bounty for coyote hides and a law prohibiting the use of hounds in hunting deer. Especially was this true of the east side representatives.

Wardens were especially anxious to get a law passed in regard to use of hounds while hunting deer. Billy Bishop, popular Jefferson county sportsman and a member of the state legislative body, said he would fight for this provision at Olympia. This announcement drew forth much applause. Several delegates favored the revoking of a hunter's license if he violated this law. Others wanted to make it a penalty to have a dog on a hunting trip, contending that the taking of a dog into the woods was prima facie evidence of guilt.

Wardens were also united in the opinion that a warden should not be arrested for making a false arrest without the consent of the state attorney.

At the present time women must obain a licnse to hunt but not to fish . One member suggested that a recommendation asking women to pay for fishing licenses be put bfeore th elegislature.

"That's right," said Mr. Bishop, "they're our equals on the suffrage question. Make 'em pay."

This announcement drew forth much laughter and the recommendation was passed unanimously by the assembly.

The Pierce county recommendations were presented by Fred Edwards, chairman of the commissioners, W. H. Udall and I. H. Hill, commissioners, and Ira D. Light, warden. The recommendations advised the prohibition of shooting from public highways; providing a system for tagging deer; allowing wardens to hunt; prohibiting the use of dogs when hunting deer; placing a limit of three birds a day during the upland bird season, and taking the gray squirrel and crow off the protection list. These suggestions were well received.

The recommendations were then turned over to the appointed committee. Mr. Gray announced that the committee's final decisions and recommendations would be announced later.

Ralph Martin, a visitor from Los Angeles, while walking along Redondo Beach one day last week, saw a large yellowtail floundering in shallow water, buffeted by the huge breakers which dashed him shoreward. Martin waded out in the surf and catching the yellowtail with both hands, flopped him upon the sand. The fish provided an excellent dinner on the beach for Martin and his friends.

FULL REPORT ON PACIFIC COAST FIELD TRIALS

FLORETTA IS CROWNED WINNER OF ALL-AGE STAKE WITH MAGGIE G. TAKING THE HONORS OF THE DERBY.

BY FISHER HUNT.

[Rod and Gun Editor, Breeder and Sportsman.]

Field Trial Grounds, Bakersfield, December 17—"Ladies and gentlemen, the bird is hatched." Thus did presiding judge John H. Schumacher announce to the gathering of field trial enthusiasts on Saturday at sundown that he and his associates, Phil M. Wand and William Dormer, had settled on Floretta as the best field trial dog in California in 1916. It was a tense moment. Melrose Dude, champion last season and winner in the British Columbia and Washington trials this year, had just finished the last heat and was lying helpless in the arms of his proud and anxious mistress, Mrs. A. G. Wilkes of San Francisco. Melrose Dude finished badly beaten but he was a sick setter and the sympathy of the spectators went out to this game little campaigner.

Floretta is a four-year-old white and black pointer bitch that was imported from Vancouver, B. C., by J. Walter Scott of San Francisco. Mr. Scott handled his new acquisition and should be congratulated on winning the first prize he has ever drawn down. Floretta's last two heats were wonderful performances and there was no questioning them. There was some criticism on her first brace, but after she was allowed in the second series she won on her merits.

Fordney Blondy, an up-standing white and orange pointer, was given second place on his marvelous display of bird work, and S. Christenson's little setter, Forestress, came in third by two great heats of class, style and finish.

The trials, the thirty-fourth in the history of the Pacific Coast Club, credited with being the oldest organization of its kind in the country, were brought to a close today with the running of the Member's stake and the gathering of close to seventy-five members who were in attendance, enthusiastically claim that they were the best in years. Conditions were not the best, the grounds being a bit too dry, but sufficient birds were found and the awakened interest in the sport was most encouraging and pleasing.

President A. G. Wilkes, who was re-elected along with the old officers, is looking forward to the club making giant strides. He called for united efforts of the field trial fanciers up and down the Coast to get together and bring back the game to its former high standard. Next year, he says, he expects to see California dogs striving for honors throughout the Northwest and in turn he looks for outside representatives being here.

It was brought out at the annual meeting that a change of grounds may be necessary for next season. The present location just outside of Bakersfield, that has been used for the past thirty years, may not be available and the executive committee is looking over the situation and gives assurance that if a move is necessary a new home will be found.

Besides President Wilkes, John H. Schumacher, as first vice-president; J. W. Flynn as second; J. Walter Scott as third; S. Christenson as secretary-treasurer, and the executive committee of J. S. French, Phil M. Wand, J. A. Chanslor and J. Walter Scott will look after the club's interests with the same earnestness that called for a vote of thanks from the members. J. H. Bishop Jr., Fred de Augustine, B. W. Thompson and R. C. Hartman were elected new members. The honorary list was increased from two to ten by adding the names of Mrs. Martin I. Smith, Mrs. B. W. Thompson, Mrs. Roy Avery, T. G. Wilson, I. G. Ries, George Fraser and your humble correspondent.

First Day, Thursday.

There was a merry tinkling of the telephone bells in the Southern Hotel on Thursday morning, December 14th. It was the signal to some seventy-five members and guests of the Pacific Coast Field Trials Club to arise and make ready to usher in the thirty-fourth annual trials. Eagerness to get out to the grounds and commence the fun was quite evident, but many of the members had arrived on belated trains and sleep was at a premium.

After breakfast there was more delay as the morning train was late and the officials decided they would wait for all who made the long trip to participate in the fun. It was well after nine before a dozen automobiles started on the pleasant run out to the grounds, which are located seven miles south of Bakersfield. It was only a matter of twenty minutes or so before the members were out at the grounds looking over the dogs that were cooped up in crates.

President A. G. Wilkes almost immediately went into session with Charley Murray, the colored trainer, and after earnest conversation for a few minutes announced that he had purchased, with John McKeon as partner, the highly-touted Maggie G., a black and white pointer bitch fifteen months old. J. A. Chanslor, S. Christenson and other enthusiasts had been busy themselves making new acquisitions so as to be represented in the running of the coveted Derby, with $250 in money and the beautiful Chanslor trophy to go to the winner.

The drawings were held right on the grounds and by 10:30 there was a buzz of excitement as the handlers started taking the first brace from their boxes . First, however, there was the customary picture-taking, mounting of horses and piling into rigs and automobiles to be ready for the day's sport of following the blue-blooded dogs.

The weather was warm and balmy and as J. H. Bishop, Jr., a visitor from the East who is now making his home in Pasadena, remarked, "It is just like a delightful spring morning back East." It was beautiful weather, but it has been dry down here for a couple of weeks and Judge John Schumacher declared that conditions for bird work were not as ideal as on the occasion of the last trials. However, everything else was ideal for a start with interest running at the fever heat point.

Running of the Derby.

Sonoma Boy—Carona Jack—This first brace were cast off in section 16, a wide open country, which gave the dogs an excellent opportunity for pace and range. Sonoma Boy, a black and white and tan setter puppy, owned by J. A. Chanslor and handled by W. B. Couts, showed to advantage in range and speed but did not make a point. The judges ordered the dogs to work over the brush, where quail were likely to be, and Carona Jack, a liver and white pointer puppy, owned by F. W. Emery and handled by Fred Coults, made a pretty point. He flushed his bird, however. Carona Jack proved too rank on Jacks and did not stir up much enthusiasm. . Put down 10.37 a. m., up at 11:10.

Trouble Maker—Sweet Marie—Trouble Maker, a black and white pointer owned by Mrs. Martin I. Smith and handled by Fred Couts, was a seven and a half months old puppy that showed quite well indeed on birds. He made several pretty points and and was steady under gun fire. Sweet Marie, a small Blue Belton setter bitch, owned by F. J. Ruhstaller and handled by W. B. Couts, was a merry goer but wasn't well in hand and showed poorly on birds. Of course, not much criticism can be made on this score with dogs so young and inexperienced. Down at 11:28, up at 12:12.

Maggie G.—Sonoma Girl—This was unquestionably the class brace of the day put down. Maggie G., a black and white pointer bitch, owned by A. G. Wilkes and John McKeon and handled by Wilkes, was handicapped by being in strange hands, it being the first time Mr. Wilkes had ever seen her. The pair were away fast in section 21 and after a fairly good cast, worked in brushy country, where birds were known to be. Maggie G. was a little the faster and wider in range and made a good impression. Sonoma Girl, a black and white setter bitch, owned by J. A. Chanslor and handled by Fred Couts, proved to be a wonderfully developed eight months' old bitch. She proved positive on bird work and outclassed Maggie G. a trifle in this department. Each were credited with three points that were beautiful to behold. Opinion was divided as to the winner and it was admitted on all sides that they are two of the best Derby performers seen on the Coast in years. Down at 12:30, up at 1:18.

J. WALTER SCOTT'S FLORETTA
Pointer that won All-Age Stake of Coast Field Trials.

True Blue—Bender's Ben—After the members had repaired to the Goshen station for a very enjoyable luncheon as guests of the club, the trip was made to Fraser's ranch, where this brace was cast off in a wide, open country. Both proved speedy and ranged well. True Blue, owned by Fred de Augustine, a new fancier from Los Angeles, and handled by Fred Couts, is a seven months old Blue Belton setter and showed to good advantage, except in bird work. Birds were hard to find. A bevy was sighted on the run but moved around so cunningly that the dogs did not register a point, although they covered a wide stretch of country. Both give much promise but True Blue had the better of the heat. Down at 3:04, up at $4:00.

Kenwood Duke—Kenwood Bess.—Kenwood Duke, an eight-months old Blue Belton, owned by S. Christenson and handled by Fred Couts, and Kenwood Bess, another eight months old Blue Belton, was the last brace cast off and conditions were not the best. They were worked over and around the Fraser's ranch but not a single quail was found. Members discovered that the birds had gone back to the ground over which the previous brace had worked. Down at 4:15, up at 4:50.

Result:—Maggie G., first; Sonoma Girl, second; Blue Belle, third.

This decision was not reached until the judges had returned to the hotel and deliberated until 9:30 in the evening. It was evident that it was a difficult decision to render, so close were Maggie G. and Sonoma Girl matched. A. G. Wilkes and John McKeon were accordingly shouldered with congratulations, for it was truly a great victory with a young bitch that looks to have a bright future.

There was the usual evening meeting, when drawings were made for the All-Age stake that was ran on the morrow.

Second Day—Friday.

No time was lost in getting to the grounds on the second day. The opening of the All-Age stake, the feature event of the trials, was the attraction and the fanciers were anxious to see the braces in action. The weather was crisp in the early morn but Old Sol was out in all his glory and it was soon pleasant to be around without any wraps.

The handlers were a little late in getting on hand but before nine-thirty the judges had ordered the casting off of the first pair. Good progress was made and six of the thirteen candidates were put through their paces before luncheon. There was a long delay, however, as the members and their dogs went through some stunts for the moving picture cameras and only two more braces were put down in the afternoon. It left two more braces for the next morning before the second series could be started.

Of the dogs in action, S. Christenson's Forestress made the best showing in general all-around field trial class. E. B. Tinker's up-standing pointer, Fordney Blondy, was the pleasant surprise of the day in some of the best bird work exhibited here in many a day. Mrs. Martin I. Smith's Del Rey Dee also showed to advantage in classy bird work.

In the evening, President A. G. Wilkes entertained about fifty enthusiasts at an elaborate banquet. J. Walter Scott officiated as toastmaster and old and new members and the game in general were toasted in approved style. John W. Considine added life to the party by disputing Mr. Scott's right to be at the head of the table.

Election of officers and general enthusiasm reigned at a meeting, which followed. President A. G. Wilkes spoke of the promising outlook for field trials on the Pacific Coast and called upon the members to get out and bring a dog next year. It was said to be the best meeting ever held by the organization.

Running of the All-Age.

Shasta Water—Blaze of Stockdale.—Little enthusiasm was created by this brace. Shasta Water, a black, white and tan setter, owned by Frank J. Ruhstaller and handled by W. B. Couts, proved a fast-going, wide ranger but did not show much on birds in the limited opportunities offered. Blaze of Stockdale, a black and white pointer owned and handled by T. C. Dodge, proved only ordinary and was rank on jacks. Down at 9:25, up at 10:20.

Forestress—Rod Galderigo.—This pair started off with one of the prettiest casts of the trials. The pace and range of both was very good and both ran with a merry tail. Forestress, a white, black and tan setter bitch, owned and handled by S. Christenson, ran a wonderful heat. Taken on to marked birds on a knoll, Forestress did a little roading to feel out the wind and then struck a beautiful point. She was a trifle unsteady and flushed the birds. Rod also struck a point but was not finished in his work. About this time Forestress swung into a snappy point and was staunch. Mr. Christenson was ordered to shoot and gave the gallery a laugh by attempting to fire with no shell in his gun. The setter made two other points, which were stylish and positive. Rod Galderigo, owned by J. S. French and handled by W. B. Couts, gives much promise with a little brushing up on birds. Down at 10:45, up at 11:24.

Maggie G.—Orange Blossom.—Away to an open field with good cover, the pair showed well in speed and range. A few birds were put up by Charley Murray. Orange Blossom, a small orange and white setter bitch owned by S. Christenson and handled by Fred Couts, made a point where birds had been but was unsteady. Maggie G., a white and black pointer bitch, owned by A. G. Wilkes and John McKeon and handled by Wilkes, carried her pace well after her victory in the derby the day before. Down at 11:47, up at 12:49.

Del Rey Dee—Melrose Chief.—This pair were taken over to Fraser's ranch and ran into birdy country almost at the start. Melrose Chief, a white, black and tan setter dog owned by John W. Considine and handled by W. B. Couts, made a point just after crossing the creek. Del Rey Dee made a back that aroused favorable comment. Melrose Chief showed great speed and a merry way of going but was not finished on bird work. Del Rey Dee, a white and black pointer bitch, owned by Mrs. Martin I. Smith and handled by Fred Couts, turned in some beautiful clean-cut bird work. She made a half dozen points in

approved style and was steady to shot. The pointer bitch was troubled with sore feet and was not much on range but she had the spectators buzzing on her good performance on birds. Down at 2:45, up at 3:21.

Fordney Blondy—Old Forester.—After a short cast, birdy country was run into. Old Forester, a Blue Belton setter dog owned by J. A. Chanslor and handled by W. B. Couts, located the birds first but was out of hand most of the time. Couts was forced to dismount and go into an adjoining field to locate his charge. Fordney Blondy, a white and orange upstanding pointer dog, owned by E. B. Tinker and handled by Fred Couts, went in after Old Forester and handled the birds in wonderful, positive style. Fordney Blondy has been doing a deal of hunting and did not make the most of range although his pace was good. The pointer created the biggest impression so far by his work on birds. Down at 3:35, up at 4:35.

Third Day—Saturday.

After the big evening of entertainment as hosts of President Wilkes, the members were naturally a bit late on the third and what was scheduled for the last day. There was eagerness however, to be in for the big competition of the week.

Gossip was rife as to what dogs of the previous day the judges would take into the second series. There was also a desire to see Melrose Dude and Floretta, two acknowledged contenders, get into action. The pair ran off their heats. Dude ran right to form with an independence and class that left no doubt that he would be in line for the final honors. Floretta was a bit of a disappointment.

After the two heats had been run, Judges Schumacher, Wand and Dormer went into an executive conference on the side of a hill. They debated for half an hour and it was evident that they were having trouble in arriving at a decision. Finally Judge Wand rode up and announced that it was the opinion of the judges that Forestress and Fordney Blondy should run in the first heat and Melrose Dude and Floretta in the second heat of the series.

Of course, there was a deal of comment and discussion, although no loud protests. The surprise was that Rey Del Dee was not taken in preference to Floretta, that had made only a fair showing.

Luncheon followed and the second series started. Fordney Blondy and Forestress had a wonderfully close race and the pointer won out on his superior bird work, although Forestress showed class in her range and pace. Melrose Dude and Floretta also had a hot race. The latter was a distinct surprise in improving over her morning showing by about fifty per cent. The pair did not have much opportunity on birds and the judges ordered that another heat should be run. This beat Melrose Dude.

The famous setter was a tired dog during the thirty minutes' rest and did not look good, while Floretta was fresh as a daisy. When they were cast off, Floretta went out and made three points and while she was unsteady at shot and chased, the pointer made a good showing otherwise. Dude simply blew up and stopped to a walk. At the finish, it was evident that Dude was out of it. He almost collapsed and was a mighty sick dog.

The judges did not debate long in announcing that Floretta was the winner, Blondy second and Forestress third.

Finish of All-Age Stake.

Melrose Dude—Kenwood Beauty.—Interest centered in how Melrose Dude, a white, black and tan setter dog owned by Mrs. A. G. Wilkes and handled by A. G. Wilkes, performed. They did not have to wait long as Dude made a long, wide cast and was right up to form in speed and range. He was independent and wise in locating birds and made a point. Dude was a bit unsteady at shot and did let down some at the finish, but he won easily. Kenwood Beauty,, a white, black and tan setter bitch owned by J. A. Chanslor and handled by Fred Couts, had nice speed and range but was rank on jacks and did not show up any too well on birds. Down at 8:55, up at 9:49.

Floretta (a bye.)—This white and black pointer bitch, owned and handled by J. Walter Scott, drew a bye but at the discretion of the judges was put down with Kenwood Fan, a white and black setter bitch. Floretta did not start auspiciously. She proved slow and had but little class. Later on the bitch proved one of the most industrious searchers of game let down so far. Going into an open woods, she made a staunch point but her handler could not locate birds. Her speed and range were fair and she had a fair way of going. Floretta made another point and displayed style. She pointed again but was a trifle unsteady. The bitch on the whole was a disappointment but showed many good points. Down at 10:00, up at 10:41.

The Second Series.

Forestress—Fordney Blondy.—Birds were found right at the start and not much of a cast was made, the dogs returning to hunt the quail. Blondy pointed where birds had been but nothing arose on investigation. Forestress went ahead and ranged and paced beautifully. The pair worked around to marked birds and it was here that Fordney Blondy got in his best work. The big pointer was sent into the birdy country while Forestress went over a ridge. Blondy handled the bevy well and was staunch and beautiful on singles. Forestress made one back that was a beauty. After his good work, the pointer worked over the hill and located more birds. He made one great point and was steady to shot. All this time Forestress was ranging well but was unable to locate birds, although she did not make a mistake. The pointer, if anything, equaled his great performance of the first series. Down at 1:43, up at 2:20.

Melrose Dude—Floretta.—As in the previous cast, birds were encountered right at the start. No points were made, however. J. Walter Scott took his charge away off to the right and it looked as if Floretta was ranging more than was really the case as her handler was right behind her. The judges finally ordered him back on the course. Dude was working right up to form and making a good showing. Then Floretta started going again and went far and wide in an exhibition of industrious hunting that created a favorable impression. Working along a ditch, Dude and Floretta each made a point but nothing raised. Floretta then made an independent cast to the right of a bank that was one of the widest seen during the trials. Scott was forced to ride after her and was gone for five or six minutes before she was located industriously hunting as before. Nothing else of importance happened, no more birds being located, and the judges called a halt.

After a conference they decided to see the pair in action again. Dude was carried in an automobile while Floretta was walked over towards section 16. It was thirty minutes before they were put down and perhaps Dude contracted a chill. At all events, he did not look like the same champion of the previous two heats. He was slow and took little interest in hunting. Floretta located birds and made three points. She broke and chased at shot but otherwise made a decidedly good showing. Up at 4:30.

Last Day—Sunday.

An agreeable surprise awaited the gathering when they turned out for the last day on Sunday. Only four entries had been expected the day before for the Members' Stake and Lakeside Rank, where birds were known to be, was selected as the scene of activities. When the drawings were made, however, eight were in competition.

The winner turned up in J. S. French's beautiful setter, Dixie Chase, that was successful last year. Admirably handled by A. G. Wilkes, Dixie Chase showed to advantage on birds and range and carried off the trophy. In the Members' Stake, the members shoot to kill the quail over their dogs and a deal of fun and joshing resulted as the proud owners became nervous and excited and could not shoot a lick.

J. A. Chanslor was in good form as was his setter, Kenwood Fan, and he was awarded second place. S. Christenson with Orange Blossom was third. The setter bitch was in exceptionally good fettle but Chris was affected like the others and was all excitement when ordered to shoot. If he had been up to his usual skill, he would have given Mr. French a tussle for first place.

Others in the competition were Fred de Augustine with his newly acquired pointer, Spot; M. I. Smith with two entries, Del Rey Dee and Del Rey Flash; J. A. Chanslor with Kenwood Beauty and J. W. Scott with Western Boy. All the members had a good time.

Right at the close of the trials, Martin I. Smith and friends returned from a hunt to discover Del Rey Flash dead in the kennels. The pointer was apparently in good health after going through a heat but was evidentl ypoisoned by drinking bad water.

Los Angeles Club.—A large and enthusiastic crowd of trapshooters turned out at the Los Angeles Gun Club on Sunday and took part in the special events arranged in honor of "Tiny" Tuckett, who is a visito rin Southern California.

The scores were: At 100 targets—O. Evans, handicap 20 yds., broke 92; L. R. Mellus (18) 92, E. K. Mohler (20) 89, V. A. Rossbach (18) 89, H. E. Sargent (18) 88, P. G. Peterson (17) 88, C. W. Fish (20) 87, H. Cline (18) 85, George Tuckett (19) 84. C. H. Betz (16) 83, B. H. Carnahan (16) 82, A. J. Petersen (16) 82, W. A. Cornelius (20) 82, O .D. Ashton (16) 81, H. Hickman (16) 77, E. W. Selbach (16) 74, J. Mann (16) 75, G. Holohan (20) 55x75, H. A. Tornow (16) 48x50, S. H. Wilson (16) 46x50, J. Funk 43x50, C. T. Greenfield 42x50, T. B. Sloan 41x50, A. Betz 32x50, C. Y. Endsley 30x50, F. H. Teeple 23x25, L. H. Wearne 22x25, F. Schreiner 18x25, L. A. Benton 17x25, G. A. Felton 11x25.

Change in Remington Company.—The Remington Arms Company in the last two years has had such a large increase in business and has had to meet such unprecedented conditions that there have necessarily been changes in the organization and additional men have had to be brought in to meet the new demands.

A Managing Committeze has recently been appointed consisting of Mr. Samuel F. Pryor, Mr. G. M-P. Murphy, Mr. James H .Perkins and Mr. W. E. S. Griswold. Mr. Pryor, who has been president of the company, has been elected chairman of the Managing Committee and Mr. Henry S. Kimball, formerly president of the American Zinc, Lead & Smelting Company, has been elected president of the company. Mr. C. S. Hadley, formerly president of the Laconia Car Company, has become associated with the company in the capacity of treaturer.

With these additional men and with the Managing Committee working in thorough co-operation with the executive offices, the problem of handling the great volume of business has been successfully met. With these increases in the executive organization and with certain adjustments in existing contracts, it is now considered that the affairs of the company are in a very satisfactory condition.

Sportsmen's Row

J. A. Chanslor certainly gets his enjoyment out of the field trials. He was the life of the gatherings and had the pleasure of seeing his dogs make good showings. Sonoma Girl was second in the Derby and Kenwood Fan took second place in the Members' Stake.

• • •

Dr. Arthur Beardslee is a devotee of the field dog. He arrived on Friday morning and was a constant follower of the heats. The Doctor is some walker and was right up with the judges at all times. He has a hunting preserves just below Bakersfield and left to try out the dogs there. In addition he took along John W. Considine's Melrose Chief.

• • •

J. S. French had the mount on a big chestnut horse and towered over the other spectators. He tried out his Dixie Chase over in a field and then had the pleasure of seeing his setter win the Members' Stake with A. G. Wilkes doing the handling.

• • •

Roy Avery was troubled with blood poisoning in his right hand but that did not stop him from following the heats. Seated in a buggy with Mrs. Avery at his side, he made the rounds day after day. J. A. Chanslor presented Avery with Old Forester and you'll see Roy out there next year right in the fun.

• • •

The serving of luncheons at Gosford station every noon were enjoyable affairs. They were happy gatherings and gave an opportunity of reviewing the performances of the mornings.

• • •

J. H. Bishop Jr. of Pasadena was unfortunate in not having a dog at the trials. He sent back East especially to have a setter shipped on but it did not arrive in time. Next year, Bishop declares he will be right there and give all of the fanciers a race.

• • •

Fred de Augustine was fortunate in winning a prize in his first appearance as a member. Blue Belle ran a creditable heat in the derby to come in third out of a field of thirteen.

• • •

Mrs. Martin I. Smith and Mrs. B. W. Thompson, prominent in kennel circles of Los Angeles, were constant followers in a buggy. They did not miss a heat and did not find the pace too great.

• • •

A. G. Wilkes was figuring on sending Melrose Dude back to the National trials, but owing to the unfortunate sickness of his wife's pet will be forced to change his plans and look forward to being represented in 1917.

• • •

L. S. Hawxhurst is an enthusiastic field trials expert besides being a crackajack trap shot. He was down for the entire competition and kept pace with the hikers. Len was figuring on starting a couple of dogs but was unfortunate in having both of them take sick on him.

• • •

J. Walter Scott had reason to feel jubilant over winning the All-Age stake with Floretta. It was the first trophy he ever pulled down and was a beautiful pounded silver pitcher presented by his friend, J. A. Chanslor. Scott on his little pony handled his pointer.

• • •

Wallace Bruce Couts, such a picturesque figure at so many trials, is talking of retiring from the game. He is seventy-three years of age and has been active in running dogs all his life. He will surely be missed for he is a fine old gentleman whose skill and grit have been the source of much admiration. Even at seventy-three he is out handling dogs like a man fifty years his junior.

• • •

Mrs. A. G. Wilkes made a pretty picture on her pony in a beautiful riding costume. Mrs. Wilkes was one of the regulars and became greatly excited when her great setter, Melrose Dude, became sick after the running of the All-Age stake.

• • •

Secretary S. Christenson was a busy man. He was tearing in the morning getting the fanciers together for the ride to the grounds and kept on the jump at all times running off the events.

• • •

The three judges, John H. Schumacher, Phil M. Wand and William Dormer, certainly made the awards after the most painstaking efforts to give each and every one a fair chance. Naturally everyone was not pleased but all agreed that the work of judging was handled conscientiously and honestly. The club is fortunate in having such able and respected gentlemen to do the judging.

• • •

Martin I. Smith brought his wife, and friends Mr. and Mrs. Thompson, to the trials and then was forced to return home. He was back again on Saturday and enjoyed running Dee in the Members' Stake.

• • •

E .B. Tinker, owner of Fordney Blondy, is a new fancier. He is a civil engineer who resides in Arizona and he had a long trip to see his star pointer pull down second prize.

INTERSTATE ASSOCIATION'S MEETING.

Prosperous Season Reviewed and Plans are Laid For Next Year.

The annual meeting of the stockholders of The Interstate Association for the Encouragement of Trapshooting was held at the Association's office with The Corporation Trust Company, 15 Exchange Place, Jersey City, New Jersey, on Thursday, December 7, at 10 o'clock in the forenoon.

The roll-call showed the following members represented: Remington Arms—Union Metallic Cartridge Company; E. I. Du Pont de Nemours & Company; The Hunter Arms Company, Inc.; Winchester Repeating Arms Company; Parker Brothers; The Peters Cartridge Company; The Chamberlin Cartridge & Target Company; American Powder Mills; The Western Cartridge Company; United States Cartridge Company; Hercules Powder Company; Ithaca Gun Company, and the Black Products Company.

The polls having remained open the period prescribed by statute, were ordered closed and the inspectors presented their report in writing, showing the following persons, stockholders of the Association, had received the greatest number of votes:

A. F. Hebard, J. Leonard Clark and T. A. Marshall of the Remington Arms—Union Metallic Cartridge Company; T. E. Doremus, C. A. Haight and L. J. Squier of the E. I. du Pont de Nemours & Company; J. T. Skelly and Edward Banks of the Hercules Powder Company; Jas. F. Carraher of the Hunter Arms Company, Inc.; F. G. Drew, P. B. Keenan and Chas. L. Greene of the Winchester Repeating Arms Company; W. F. Parker of Parker Brothers; C. R. Babson and C. R. Dickey of the United States Cartridge Company; F. E. D. Keplinger and T. H. Keller of the Peters Cartridge Company; Paul North and J. H. Webster of the Chamberlin Cartridge and Target Company; F. W. Olin and A. J. Norcom of the Western Cartridge Company; Murray Ballou and E. B. Drake of the American Powder Mills; W. B. Stadtfeld of the Selby Smelting and Lead Company; George Livermore of the Ithaca Gun Company; C. J. Fairchilds of the Black Products Co., and Elmer E. Shaner.

The chairman thereupon declared that the above named persons were duly elected directors of the Association.

The meeting of the Board of Directors was called to order at 11:25 a. m., with Mr. T. E. Doremus acting as chairman and Mr. E. Reed Shaner acting as secretary. The following officers were elected to serve during the ensuing year:

President, T. E. Doremus; Vice-President, T. H. Keller; Secretary, E. Reed Shaner; Treasurer-Manager, Elmer E. Shaner.

By resolution it was decided to change the time for holding the annual meeting to the first Thursday after the first Wednesday in November.

By resolution, it was decided to continue in 1917 the same general Registered Tournament policy as was in force in 1916. By this ruling, with the exception of State Tournaments, Leagues of Gun Clubs and Special Organizations, all applications to hold Registered Tournaments, carrying requests for contributions, mut be made on or before February 15th, and no application will be passed upon before said date.

By resolution, it was decided that where it is the custom to hold tournaments on Sunday, such tournaments be registered and that the scores made be included in the official averages.

By resolution, it was decided to print in booklet form the official averages of 1916, the booklet to contain a brief digest of 1916 records, Grand American and Subsidiary Handicap data and other matter of interest to the trapshooting fraternity in general. This booklet will be distributed gratis to gun clubs holding registered tournaments and to other interested parties.

By resolution, it was decided to present a trophy to the winner of the High Amateur Average of 1916.

The Gun Club Organization Committee's report was read and, by resolution, it was decided to continue presenting trophies to newly organized gun clubs which have affiliated themselves with their respective State Associations.

By resolution, it was decided to present trophies for team competition. The conditions under which these trophies will be presented will be announced in due season.

By resolution, it was decided that the winner of the Fleet Championship of the United States Atlantic Fleet shall be allowed to compete with the respective State Champions for the National Amateur Championship at the Grand American Handicap Tournament.

By resolution, the following definitions, defining an Amateur and a Professional trapshooter, were adopted:

"Any shooter, not dependent upon his skill as a trapshot as a means of livelihood, either directly or indirectly, or in part or in whole, including employes of manufacturers of, or dealers in, firearms, ammunition, powder, traps, targets and other trapshooting accessories, and who does not receive any compensation or concession, monetary or otherwise, or allowance for expense or trapshooting supplies from such manufacturers or dealers, shall be classed as an amateur."

"Any shooter, including employes of manufacturers of ,or dealers in, firearms, ammunition, powder, targets, traps and other trapshooting accessories, who receives his salary or any portion of his salary, or any expenses of any kind for use in trapshooting, or rebate on the market price of such articles, as compensation for the promotion of the sale or advertisement o fany such products handled by such manufacturers, shall be classed as a professional."

By resolution, it was decided that in 1917 the Grand American Tournament shall be given at Chicago, Ill., under the auspices of the South Shore Country Club; the Southern Handicap Tournament at Roanoke, Va.; the Eastern Handicap Tournament at Hartford, Conn.; the Western Handicap Tournament at St. Joseph, Mo., and the Pacific Coast Handicap at San Jose, California.

The make-up of the Tournament Committee, Trophy Committee, Gun Club Organization Committee and the Committee to allot handicaps to entrants in the 1917 Grand American Handicap will be announced later.

After discussing matters of no particular interest to the general public, the directors' meeting adjourned to meet at Chicago, Ills., in 1917, during the week of the Eighteenth Grand American Handicap Tournament

THE INTERSTATE ASSOCIATION,
E. REED SHANER, Sec'y.

Synopsis of Work in 1916.

Different Trapshooters who took part in Registered Tournaments	10,528
Tournaments Registered	546
Applications Refused	9
Tournaments Registered under the "Old Policy"	295
Tournaments Contributed to	223
State Tournaments Registered	46
Tournaments Registered in Canada	16
Reports Received up to November 10th	501
Reports not yet received	16
Tournaments cancelled by request	29
Applications received	568
Applications received for which we requested a change of dates, in order to avoid confliction, and not heard from afterwards	12
Targets Trapped (501 Tournaments)	6,366,110
Average number of Targets trapped per tournament (501)	12,700
Average Entry per tournament (501 tourn.)	
Amateurs	44.07
Professionals	5.42

GAME CONDITIONS IN OREGON.

State Warden Shoemaker Explains Questions of Feeding Ducks and the Seasons.

Speaking of two of the very important subjects under discussion at the sportsmen's association meeting, which affect all parts of the state, Carl D. Shoemaker, state game warden, sums up the duck feeding and the deer shortening proposition as follows:

"The question of legislating against the feeding of ducks is a mooted one. As the law now stands, there is notning to prevent sportsmen from feeding ducks. As a matter of fact the average sportsman does not get much duck shooting; duck shooting is limited practically to members of duck shooting clubs. All along the Columbia river, in the sloughs and lakes and on the islands, and in many places throughout the valley, property has been leased by duck clubs and no one except members, or invited guests, has been permitted to shoot.

"There is nothing in the law to prevent this form of organization and no legislation could be passed which would affect the right of a number of sportsmen to band themselves together and form a club of this kind. Naturally, all of the best grounds are taken up by these clubs and they obtain practically all the shooting. A great many of these clubs have been formed along the Columbia, and the members have employed caretakers who throw feed along the water to attract the ducks. This has been done for a great many years and there has been pretty good shooting.

"Shooting fell off in the valley and the sportsmen there became aroused over the claim that the feeding of ducks kept them along the Columbia until the season was over and then the ducks migrated into California without stopping or resting in the valley. In order to obtain some shooting in the valley, it was then proposed in the legislature a number of years ago, that the feeding of ducks anywhere in the state be prohibited by law. The vote has been very close in the past, but the bill has never been carried. A compromise, however, was effected by closing the season six weeks earlier in Multnomah, Clatsop, Columbia, Tillamook and Coos counties than in other counties of the state. Duck feeding then would stop on December 31st in the counties first named; the birds would no longer find food and would immediately take up their flight to the southlands, migrating by easy stages through the valley and resting in the waters of the Willamette and its tributaries and the lakes of southern Oregon.

"The federal law stepped in, however, and closed the season on duck shooting on January 15 of each year. This cut off a whole month of shooting for the valley sportsmen and now the old question is raised again.

"The question of closing the deer season 15 days earlier or opening it 15 days later is another one which will demand serious attention. Two years ago the fight was made for a 60 days' deer season, beginning September 1st. The arguments advanced were, first, the preservation of the deer, and secondly, less fire hazard in the National forest; it being contended that if the season opened on September 1st there would be less danger o fhunters setting fire to the timber through carelessness, as the damp season would be coming on.

"However, a potent argument was advanced stating that thousands of people throughout the state took their vacations during the period from June 1st to September 1st and that a great many sportsmen arranged to take their vacations some time during the month of August, in order to get in a deer hunt. This is true o femployes in the railroad offices, banks, mercantile establishments and all big businesses, and the argument was a good one as the legislature listened to it with respectful attention and finally compromised by opening the season on August 15 instead of September 1, thus giving two weeks open deer season during that month.

"But the advocates of game preservation still maintain that a 60 days' deer season is sufficient, and taking into consideration the reasons advanced by many sportsmen who can only take their hunting trips in August, it is now advocated that the 15 days be cut off the tail end of the season; in other words, close the season on October 15 instead of October 31. There does not seem to be a great deal of opposition to the 60 days' deer season and it will probably receive the endorsement of the league, although there are some advocates against it and sufficient strength might be obtained to divert such a recommendation."

Portland Club.—W. C. (Bill) Bristol hung up a mark for 20-gaugers to shoot at when he registered a score of 83 per cent in Sunday's shoot at the Everding Park traps of the Portland Gun Club on December 10th. This is the highest score ever made with a 20-gauge gun at the loca ltraps.

P. J. Holohan, professional, was high man with the score of 92 per cent. E. H. Keller led the amateurs with a score of 90. H. L. Keats, ex-president of the Portland Golf Club, shot traps for the first time and registered a score of 68.

The scores: P. J. Holohan 92, E. H. Keller 90, Al Seguin 88, H. R. Everding 86, J. S. Crane 83, W. C. Bristol (20-gauge) 83, H. A. Pollock 82, Dr. Beeson 80, A. L. Zachrisson 80, and H. L. Keats 68.

Stock Breeders' Page

Appearance Often Deceptive in Dairy Cows.

That the appearance of a dairy cow can not be depended on to indicate he rproduction of milk is illustrated by a demonstration conducted under the auspices of the Dairy Division of the department with a herd of nine cows at the National Dairy Show held recentiy at Springfield, Mass.

A year's record of milk and butter fat already had been made for all the cows of the herd. During the show complete records of production and feed consumption were kept and in every case the previous records were duplicated. Some of the cows were of poor dairy type, yet were good producers; others were of good dairy type, yet were poor producers; still others of similar appearance had greatly different records. Of the last-named class were Nos. 8 and 9. Many experienced stockmen selected No. 9 as the better of the two, but the records showed that for the last year No. 8 gave 8,445 pounds of milk and 346 of fat compared with 4,279 pounds of milk and 198 of fat for No. 9. This served as an object lesson to the hundreds of people who daily viewed the demonstration that good dairy type is not always associated with large production and that poor dairy type does not indicate lack of large yield.

"What does it cost to keep records?" was a common question of the dairymen. In cow-testing associations, where the above-quoted records were made, the charge is $1.50 a month for each cow, and in addition the board of the tester for one day each month. With feed, labor, and live stock so high, it certainly is imperative to eliminate every unnecessary expense like the "boarder" or "robber" cow that fails to pay for even her feed.

In the big room at the dairy show where the cows were stanchioned were several hundred comfortable seats. Here several times each day well-known dairymen from various parts of the country talked to the large audiences on dairy problems ,illustrating their remarks with the cows of the demonstration herd. Especial emphasis was laid upon the value of records in economical management.

Co-operative bull associations were carefully described and their many advantages explained. That it was possible to have high-class bulls of the finest breeding for the use of a dairyman with only a few cows seemed to many farmers as too good to be true, especially when the cost was even less than in the case of scrub bulls. In this connection the charts that illustrated the conditions at Roland, Iowa, before and after the organization of a bull association, elicited much interest. At that place, for a yearly investment of $7.50 each, the members have the use of five $240 bulls for 10 years.

On the walls of the demonstration room were pictures of famous dairy animals, charts showing results of record keeping, etc. Adjoining were skeleton milk or dairy houses, with the sides only partially finished, to show the construction; also a model of a dairy barn and of a silo. In the milk houses was dairy equipment, and a man in charge answered questions on dairying and explained the construction of these and all other kinds of dairy buildings.

At regular periods demonstrations in the sterilization of milk utensils were given with the inexpensive farm sterilizer described in Farmers' Bulletin 748; these demonstrations were well attended.

There was also keen interest in every part of the demonstrations, as may be judged from the fact that about 5,000 people listened to lectures and fully 15,000 viewed the exhibits.

Depredations of predatory animals accompanied by outbreaks of rabies among them in parts of Oregon, California, Nevada, Idaho, and Utah resulted in the shooting, trapping, and poisoning of over 11,000 coyotes during the last fiscal year by hunters in the employ of the Biological Survey of the U. S. Department of Agriculture. Altogether over 15,000 noxious animals, including wolves, coyotes, mountain lions, and bobcats were destroyed. The seriousness of the outbreaks of rabies will be realized when it is stated that more than 60 persons were treated by State authorities of Nevada during the year on account of having been bitten by either wild or domestic animals. The loss of live stock has been very heavy. At Winnemucca, Nevada, a single rabid coyote caused the loss of 27 steers. During the past year over 250,000 acres of government and public lands have been covered with poisoned grain for the extermination of ground squirrels. Large areas of private agricultural land also have been cleared of these pests through campaigns conducted by the owners under the direction of representatives of the Biological Survey.

The W. A. Saunders Live Stock Company that deals in horses and mules, and buys all over northern California, makes Woodland, Yolo county, its assembling and shipping point. Last week this company shipped five carloads of mules to Chandler, Arizona, the consignment being to the Goodyear Rubber Company. This company has gone into the culture of cotton on a 6000 acre tract, the product to be used in its automobile tire factories. Manager Doyle shipped two carloads of mules the next day to New Jersey, the concentrating point of the French government.

EXPERIMENTAL HORSESHOEING IN THE U. S. ARMY.

By the term modified, a number of meanings can be applied, but in connection with the shoeing of army horses in the U. S. Service, it is intended to describe thinness of the shoe. At Fort Riley, Kansas, are ,we believe, more army horses than at any post in the service. And while every detail of military requirements is minutely carried out, the shoeing of troop horses is also given closest attention. The government conducts a school for farriers and horseshoers at Fort Riley, that is in charge of Capt. John A. Degen, and under his inspection all shoeing work comes. The shoers connected with the service must, like other soldiers, attend all troop drills and their shop work must be done between times, either before or after drills. One feature of the shoeing department here is the close attention paid to what city horseshoers would call the very little details. But these details are a necessary part of the service, for it is only through constant experimentation that the latest and very best methods are brought out for adoption.

Among the recent tests made in the Fort Riley School was that on the "modified shoe." Tips and three-quarter shoes all have been given trials and in order that the relative value of the ordinary method of shoeing might be compared with this, the commandant of the post issued an order on Captain Degen to make a thorough test of the modified shoe. The order followed another quasi order that had come from the chief of staff, who had advocated this method and, like true soldiers, the shoers proceeded to carry it out.

"Keep a record of each animal shod with the modified shoe, date of shoeing, reshoeing, lameness and corrective measures necssary." Such was the command. This was in March, 1915, and but three months was given during which to make the test, a limit which did not satisfy Captain Degen, who asked for six or even 12 months. For in the use of the "modified" 'shoe, the foot is brought to as near mother earth when shod as possible.

The aim in view is to give the whole foot ground bearing, frog and sole coming in contact alike with the unshod foot. The shoe itself is about one-quarter to three-eighths inch thick, the web is narrow, and when being fitted the wall must be well grown out in order to allow for reducing to a depth that will provide for natural frog pressure and at the same time a strong wall and sole. In a large way the modified shoe recommended or advocated by the chief of army staff is a more sane and, therefore, safer method than the French method adopted several generations ago by the Veterinarian Charlier. This method may yet be used in France, but if so it is only in exceptional cases, for when looked into, it offers the reverse of anything logical in horseshoeing . The Charlier idea is to use a very narrow rim of metal and after supplying the necessary nail holes, fit this into a shoe cut clear around, the wall being reduced to the necessary depth and width to allow the metal to fit in. And when fitted the inside edge of shoe nearest the foot would be very dangerously close to the life of the foot itself. Probably many a good horse was brought to ruin by this method; anyhow it never obtained a following outside of France and is now almost unheard of. The modified shoe, however, does not have any of the objections of the Charlier method. It is a plain, thin plate, a sort of extension of the tip, "but," says Captain Degen, "it has the defects of the tip."

This practical head of the shoeing department in army service evidently has his own troubles trying to convince his superiors that their ideas on horseshoeing are not practical and he passes on the modified shoe in his report on tests given it after the following manner:

The object of this style of shoeing is to secure adequate frog pressure and through that normal expansion. To correct a pathological condition this is a proper application of the tip. If adopted for normal shoeing it defeats its own object. A horse with a well developed frog properly shod with a normal shoe has the frog in contact with the ground when first shod. As the hoof grows the frog is gradually raised and the degree of pressure and expansion is gradually decreased. It is entirely lost onry when the horse travels on a smooth, hard surface. On soft ground the foot penetrates sufficiently to give contact for the frog at every stride. On hard but rough ground the frog gets contact, due to inequalities of the ground at varying intervals and with varying degrees of pressure. Even if a horse is used entirely on a surface both hard and smooth, an asphalt pavement for instance, frog pressure will not be entirely lost until about the third or fourth week ,after shoeing, depending on the rate of growth of the horn. When the frog is but a short distance from the ground, as from one to three weeks after shoeing, it remains in that position only while the horse is at rest or the foot is not bearing its share of the weight. When the foot is brought to the ground at each stride the weight is transmitted down the bony column and the frog is forced down and contact and consequent pressure are obtained. It varies only in degree from the full pressure that occurs when the frog is in contact while the horse is at rest, as in that case there is nothing more than contact while at rest and the frog does not bear any weight until the horse is in motion. Horses should be shod every four to six weeks, usually about once a month. Six weeks is generally accepted as the maximum interval between shoeings. One horse was barefoot when the modified shoe was applied, leaving 20 horses with a recorded interval since last shoeing. In two of these cases the exact interval was not known and only the known interval, which was less than the actual, was recorded. Of these 20 cases the shortest interval since last shoeing was 40 days and the longest was 123 days, the average interval being 68.35 days. Taking four weeks as the interval after shoeing when frog pressure is lost, in order to make the most favorable showing, it thus appears that in order to apply a special shoe the avowed object of which was to obtain adequate frog pressure, it was first necessary to have the horse go without frog pressure for a period of from two to 13 weeks.

Complaint has been made that the shoeing of service horses is not satisfactory. I believe that this condition is due, not to any fallacy in the accepted principles of correct shoeing as they have been taught at this school since its inception, but to a failure to properly apply those principles in service. I have known very few organization commanders who regularly inspect their shoeing, though doubtless more did so than I knew about. There have been more cases, however, where I knew that the troop commander did not inspect shoeing than where I knew that he did. I have known only one commanding officer who inspected the shoeing of his command ,and that only once during approximately two years that I served under his command. Whether he ever followed up the results of that inspection I do not know, as he had no fault to find with the shoeing of the troop I commanded. I must add that credit for this pleasing condition was not due to me but to the chance that gave me an excellent and conscientious horseshoer in the troop at that time. Until then I had given no more personal attention to shoeing than any other troop commander and not as much as some of them. Lack of inspection is, however, not the greatest cause for poor shoeing. This, I believe, is the general requirement that horseshoers shall attend all drills and instruction. In almost all department instruction orders, the cooks are the only special men excused from drills. No man should be appointed horseshoer until he is thoroughly instructed in the duties of a soldier and thereafter he should be required to attend only target practice and such inspections as would insure his equipment being kept in condition. Shoeing three animals a day all around is strenuous occupation for any man. If he is required to spend several hours a day at drill and stables in addition, the shoeing will suffer. Place the horseshoer on the same basis as cooks regarding drill and similar duties and give his work the same supervision and inspection as is given the work of the cooks, and I believe that in general there will be no fault found with the results.

For the reasons stated the results of this test are inconclusive. That there has been no more lameness I believe is due to the very light work these horses have had. I have observed the condition of the frogs before and after shoeing, but have not noted any general improvement. In one case bar shoes were used to develop the frog so that there would be pressure when the modified shoe was applied . I regret that I did not make notes of the conditions of the frogs before and after shoeing in each case. This should be done if any future experiments of this kind are undertaken, as well as the measuring of the distance between the heels before and after shoeing. The only definite deduction that can be drawn from this experimental work is that by it alone the unsuitability of any form of tips for general shoeing of the service horse has not been proved. —[Horseshoer's Journal.

The present sharp competition in the dairy business and the increased price of feed force the successful dairyman to secure the greatest return possible from his outlay. If he has registered cows he expects more for his progeny than if he had only grades. But to obtain more and enough more to pay to keep pure-bred stock, L. W. Wing, Jr., of the Missouri College of Agriculture, reminds the dairymen that they must be able to answer the following questions from the prospective buyer of a herd sire: Is the sire registered? What is the record of his dam? How many advance registry daughters and proven sons has his sire? And what are the records of his granddams and grandsires? If the breeder is selling a registered cow he must answer: What is her record; the record of her dams and granddams and the ability of her sire and grandsires to produce advance registry daughters and proven sons.

To answer these questions and meet the demands of buyer the breeder of pure-bred dairy cattle must do official testing. This testing is under the supervision of the various state colleges of agriculture. Breeders ready to take up this work or wishing further information should write to the dairy department of the college of agriculture of their respective states.

Now that Allen Farm and Hudson River Stock Farm are no longer devoted to breeding the trotter, Kolaneka Farms, Francis B. Mitchell's breeding establishment at Pittsford, N. Y., is now said to be the largest of the kind in the east, 125 head of trotting stock being quartered there.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

The (P) Brand Quality is always "on the job." Only one standard is used in the Peters factory, and that is the very highest. You cannot go wrong if you buy shells or cartridges with the familiar red (P) on the labels.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . 585-587 Howard Street, SAN FRANCISCO, CAL.

Another WINCHESTER WIN

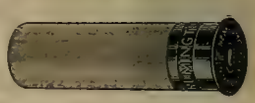
GENERAL HIGH AMATEUR AND HIGH PROFESSIONAL AVERAGE ON INANIMATE TARGETS WON WITH WINCHESTER SHELLS AND REPEATING SHOTGUN AT

GRAND INTERNATIONAL HANDICAP SHOOT

St. Thomas, Ontario

The unexcelled shooting qualities of Winchester guns and shells were again proved at this popular Canadian contest.

F. S. Wright, using Winchester shells, won High Amateur Average, making 384 x 400. F. G. Bills, shooting Winchester shells and repeating shotgun, won High Professional Average by breaking 388 x 400.



In all important matches, the winner is almost invariably equipped with the red W combination, which has been tested for years in all sorts of heart breaking contests, calling for reliable arms and ammunition.

For the beginner or the seasoned shooter, Winchester repeating shotguns and factory loaded shells, unfailingly produce the best results.

All Shooting Records Prove Winchester Superiority

The Subject of Friendly Comment

WHEREVER the "Sport Alluring" grips the minds of men and women who love the great out-of-doors—and that means in nearly every city, village and hamlet in this wide country—you'll find Remington UMC shotguns and "Speed Shells" holding their leading place in the confidence of sportsmen who KNOW.

The Remington UMC pump gun and the autoloading shotgun are chosen by shooters whose judgment is authoritative because their shooting records prove their ability to select the guns they use.

At the traps, in the duck blind, afield—wherever sportsmen gather to show their skill and swap their yarns—Remington UMC, the Red Ball Brand, is the subject of friendly comment.

PARKER GUN

If interested in small bore guns write for instructive booklet which will be sent free on request. For further particulars regarding guns from 8 to 28 gauge, address PARKER BROS., Meriden, Conn. New York Salesroom, 32 Warren Street; or A. W. duBray, Residing Agent, San Francisco, P. O. Box 102

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent. Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies. Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

BREEDER and SPORTSMAN

VOLUME LXIX SAN FRANCISCO, DECEMBER 30, 1916 HOLIDAY ISSUE

REDUCINE

THE HUMANE TREATMENT FOR

Lame, Sore,
Worn, Wounded or Blemished Horses, Etc.

$5.00 PER CAN DELIVERED

Owing to the steady and unprecedented advance in the cost of chemicals, we are compelled to increase the price of Reducine from $4.00 and carriage charges to $5.00 delivered.

We have done this with reluctance, but at the present drug prices, we simply can not manufacture and market Reducine for less and have a fair margin of profit.

One necessary ingredient in Reducine has already advanced in price two thousand per cent in two years—the amount we could buy in 1914 for $600 now costs us $12,000—just twenty times as much.

All the other ingredients have gone up from seventy-five to four hundred per cent.

We might cheapen the quality of Reducine but we will not. We have improved the quality of Reducine until it little resembles the crude product we first sold in this country—one can of the present day Reducine being easily worth four cans of the old make.

Reducine will be sent prepaid anywhere in the United States or Canada on receipt of $5.00.

For sale by Druggists and Horse Goods Dealers generally.

New 164 page illustrated booklet, just off the press, FREE, postpaid. No Horseman or Housekeeper can afford to be without a copy.

THE REDUCINE CO., Inc., Otsego, Michigan

REMOVED FROM 4181 BROADWAY, NEW YORK CITY

REDUCINE

is kept in stock by leading druggists and horse goods dealers in every important town throughout the United States and in every part of Canada. The Retail trade is supplied by the following wholesale firms, each of which buys of us in case lots and always has Reducine on hand. If your dealer does not carry Reducine, he can get it for you at once from either of the following wholesalers. Show him this list. Your retail dealer will furnish you Reducine at $5.00 per can, or we will send it prepaid to anywhere in the United States or Canada on receipt of $5.00.

HORSE HEALTH is best

The remedy with a sane, logical reason behind it

HORSE HEALTH

The remedy that is exclusively used by the world's most successful horsemen.

UHLAN, 1 58, and his trainer, THAD LOGAN

THAD LOGAN Trainer for CurlesNeckFarm
Home of the trotting champion UHLAN 1 58, says
"HORSE HEALTH is the one we use."

OAKHURST FARM, C. W. LASELL, Prop., Whitinsville, Mass.
The home of Henry Setzer, sire of Henry Todd, 2, 2·11¾, says:
"Oakhurst has used HORSE HEALTH during the past 3 years."

WALTER R. COX, - Dover, N. H.
One of the most successful trainers and drivers, says:
"Your HORSE HEALTH is all right."

HUDSON RIVER FARM
Jacob Ruppert, Prop. W. W. Shutt, Mgr.
POUGHKEEPSIE, N. Y.
Home of Oakland Baron, Sir Marque, etc.
"Send at once two large tins of Horse-Health."

PARK FARM
SPRINGFIELD, OHIO.
J. L. Snyder, Prop. Home of Binjolla, Ortolan Axworthy (3), 2.07¼, etc.
"It's a pleasure to buy and use a remedy with the merit of Horse-Health."

THOS. W. MURPHY, Poughkeepsie, N. Y.
The leading money-winner of 1914, says:
"It's the best, that's why we use it."

C. E. CAMERON, Alta, Ia.
President of Iowa State Fair, says:
"My colts respond nicely to the HORSE HEALTH treatment. It is truly a remarkable remedy."

J. P. MULLINS, - Poultney, Vt.
Lumber and teaming contractor, says
"My horses have received great results from HORSE HEALTH. It has certainly saved me money."

E. L. SMITH (Percy), - Westboro, Mass.
Well known turf writer, says:
"HORSE HEALTH has convinced me that it is not only different, but superior to any other."

MORGAN STOCK CO., Union Springs, Ala.
Says: "Our veterinarian advised us to use it over a year ago, and we are mighty glad he did."

When your horse is run down because of Indigestion, Kidney Trouble, Blood Disease, Stomach Worms, or in poor condition after an attack of Distemper or any enfeebling disease, treat the animal with

Premier Reg. U. S. Pat.

HORSE-HEALTH

The world's best equine conditioner. As a tonic for your stallion during his season, as a conditioner for your mare during gestation and nursing time, or as a renovator for your colt, Horse-Health has no equal.

Two Sizes 50c and $5.00

Horse=Health

—is the best remedy veterinary science has produced for its purpose. Horse-Health is unlike any other in formula, action and results. The wonderful results obtained from a Horse-Health treatment are lasting and dependable, because Horse-Health is NOT a "dope." Genuine Horse-Health is made only by The Horse-Health Co., Norwalk, Conn.

WHOLESALE AND RETAIL **J. DAVID WEST** DISTRIBUTOR OF HORSE-HEALTH

NEW YEAR RESOLUTIONS are now in order, and it is an opportune time for the standard and thoroughbred horse breeders and owners of California to resolve that they will get together and assist in the promotion of a circuit of fairs and race meetings during 1917 that will be a credit to all concerned. The country is prosperous, and it will not require more than ordinary enterprise and energetic action on the part of the breeders to organize and promote such a circuit. This is the New Year resolution that every California horseman should make, and that the Breeder and Sportsman hopes will be made. If it is made the greeting we now extend to every reader for a happy and prosperous new year will be brought to an actual realization.

THE RULES OF HARNESS RACING may be uniform all over the United States during the year 1917 if the Joint Rules Committee of the National and American Trotting Associations which meets at Columbus, Ohio, on Wednesday next, January 3d, is a harmonious body. There is no good reason why it should not be, if the members of the committee act in that spirit which should govern men who are working for the best interests of the cause they represent. No personal likes or dislikes should enter into any part of the proceedings. The members of the committee were appointed for the purpose of compiling a set o frules by means of which all harness racing given under the auspices of both associations will be the same. So far as the public knows the Joint Rules Committee has no other work to perform, and we hope it will accomplish that work with credit to its members and for the good of the great and popular sport of harness racing in the United States.

COLTS WITH STAKE ENGAGEMENTS have an earning capacity. Few open races are made by any racing associations for two and three-year-old trotters and pacers because it is considered that a few stake races are sufficient for the youngsters and the stakes provide them. But nearly every owner of a two or three-year-old gives it some training and if it shows speed the stake engagements it may have give the colt a far greater sale value than it would have without them. Consequently the wise breeder is the one who sees that the colts and fillies of his own breeding have some stake engagements. On this coast but one futurity (the Pacific Breeders) for foals of 1917 has been closed thus far, and it received 96 nominations of mares bred in 1916. On Tuesday next another futurity for foals of 1917 will close. This is the California State Fair Futurity No. 9. It should receive the nomination of every mare bred to a good trotting or pacing stallion on this coast in 1916, and we hope it will receive 100 or more nominations. The Pacific Breeders' Futurity received a third more nominations than the stake for foals of 1915, and it is in order now for California horse breeders to make a like increase in the State Fair stake. It will be well for the owners of mares to keep the date of closing well in mind. It is Tuesday, January 2d, 1917, which is the day after New Year's Day. Don't let the celebration of the advent of a new year occupy your time and mind to such an extent that you will forget to make one or more nominations in this stake. It is guaranteed to be worth $2500, and is for three-year-olds to trot or pace in 1920. Look over the advertisement in this issue of the Breeder and Sportsman and mail your nominations to Charles W. Paine, Secretary, Sacramento, California, on or before Tuesday next.

THE SUPREME COURT OF ARIZONA, on the 22nd of this month, decided that Judge McCall, a prominent horseman and County Judge of Cochise county in that State, had not violated any law when he set up and operated a pari-mutuel machine at the Arizona State Fair at Phoenix . It seems that there is a law against gambling in Arizona, which is somewhat different from the California law, but in what particular we are not advised, not having seen a copy of it. At any rate Judge McCall concluded he would test the law. So he secured a pari-mutuel machine and set it up and the Phoenix 1915 fair. He was promptly arrested of course and has been fighting the case ever since. Judge Stanford of the superior court held that the operation of a pari-mutuel machine was unlawful and ordered that Judge McCall pay the penalty. McCall appealed his case to the Supreme Court of Arizona and this court has now ordered that defendant McCall be discharged from custody as he has not violated the law, but whether the decision will be satisfactory to those who desire to use the machines to bet on races remains to be seen. Judge Cunningham, who wrote the decision, holds that the operation of the pari-mutuel machine in itself is not a crime, as the machine does not regulate to whom the bets are to be paid; the result of the race decides that. Neither is the man who operates the machine committing a crime, but whether the people who play the machine are gambling or committing a crime is not settled. Chief Justice Ross especially concurs in Justice Cunningham's decision, but Justice Franklin dissents.

In speaking of the operation of the machine, Justice Cunningham says: "Certainly holding the stake is not playing a game. Dividing the stake and paying it out to the several winners is not playing a game. Holding a commission for the services rendered in the transaction is not playing a game. Neither can the furnishing of the tickets be considered as playing a game. Under the evidence the game played was the horse race. The bets were laid on the result of that contest. If a horse race may be considered a game and a gambling device, as some courts have affirmed and others denied, yet the accused is not charged with playing a game with horses running on a prepared track as gambling devices. The specific charge is that he conducted a gambling game by the use of a pari mutuel machine as device.

"Clearly then the horse race, the tickets sold, the pooled funds in the accused hands, his commissions and the divisions of such funds and his giving them out to the persons entitled, are not involved in this charge because he is not charged with conducting a horse race game in the first place, and in the second place, those things which he did in the premises do not amount to conducting any game whatever."

It will be seen by the above excerpt of the opinion as written by Justice Cunningham, that the conducting of a pari mutuel machine is not a game and that there is a question as to whether or not a horse race is a game. Justice Cunningham closes his decision by ordering the cause remanded to the superior court with instructions to dismiss and discharge the defendant.

In specially concurring in Justice Cunningham's decision, Chief Justice Ross says: "I concur in the disposition of this case as directed by Justice Cunningham, but feel that I should give my reasons therefor, inasmuch as I do not approve of all that is said by my learned associate." The chief justice then recites his reasons for supporting the decision, in the course of which he states as follows:

"The proprietor and owner of the machine, while forming the nucleus of a betting crowd, does not play the game of horse racing—it is the crowd that plays the game—the proprietor and the machine hold the pool and distribute it after the race to the winners, holding a percentage for their services. The machine in and of itself does not determine who wins or loses, it might be used in connection with any physical contest, whether of man or beast, as for instance, in registering bets on foot races, or boxing or jumping matches, or on horse racing or trotting races. In all these cases, however, the winner is determined not by the pari mutuel machine but by the contestants—the men or horses. It will be seen, therefore, that the pari mutuel machine, while used in connection with gambling, is not a device which determins who shall win or lose, and is not a device with which a game is played—it is an instrumentality employed by those gambling, but it is not a device mentioned in the statute with which a game is played."

Justice Ross gives a description of the machine in the following words: "A pari mutuel machine is as innocuous in and of itself as a faro table without cards, a roulette table without the ivory balls, a stein without beer a goblet without wine. These are alike harmless without the complement of cards, balls, beer and wine. So likewise is the pari mutuel machine without the horse race or other contest of chance."

Justice Franklin does not take the same view of the matter as does either of his associates. In the course of his lengthy dissenting decision, he says as follows:

"It is probably not contemplated that a fair association whose corporate life has been granted by the state, and which is under the control of public officers, should claim the right to authorize and rent a place for gambling at the fair grounds. In the absence of specific legislation, this would be somewhat novel. But, nevertheless, those persons whose tastes and wishes can be gratified only by this species of public gambling at race tracks must find relief in legislative action, for no right thinking person would like to see the odious spectacle of the courts of his state pioneering in the path of legislation that must be left open exclusively to another branch of the government. Such an undertaking will inflict a wound upon the law which nothing can heal, for one step in this respect opens the door for others which are sure to follow. The public policy of this state must be announced by the law making power, not by the courts.

". . . A judgment should be entered dismissing the appeal because the proceeding is sham. If the appeal is entertained, however, this court should oust at its root and substance, unfrock it of the mechanical parts, ignore the deadwood, and the shadow of the dry legal rule, and look broadly at the stipulated facts . Our vision of the forest must not be obscured by the tree. . .. While I am convinced that a judge, when he wishes to air his individual opinions of the law, ordinarily should be willing to pay for the same at the current advertising rates, and not aid unduly to stuff these 'fellows in buckram,' nevertheless in palliation of such prolixity, I can only say that my brothers have grievously erred, and grievously have I gibbeted the error."

Don't Try to Sell Horses in Poor Condition.

Some persons never will learn that it pays to pad the ribs of their horses before sending them to New York for sale. There may be a market in some parts of the world where the buyers want them thin and hard and fit, but it must be a good way from the Bowery, for they all want them fat and sleek in that part of the country. E. J. Tranter, who conducted the recent sale of the Allen Farm trotters, estimated that poor condition cost the consignors at least $20,000 on that occasion.

◈ ◈ ◈

Existing conditions in the market incidentally afford a complete answer to those faddists who have been frantically calling on the United States government to come to the rescue and supply the alarming shortage of army horses by breeding them under government supervision and at government expense, as they do in Europe. If this country can sell one million horses for export without affecting prices in the home market, most horsemen will continue to believe the supply will take care of itself in any circumstances likely to arise, if the government will merely encourage private enterprise in breeding and using horses in time of peace.

◈ ◈ ◈

A new high-class quarterly publication devoted exclusively to horses is to be issued shortly in London. It has been named "The Horseman," and the principal aims of this new periodical will be to restore and increase the popularity of the horse; to create equine interest amongst the rising generation; to preserve and improve the various breeds with a special view to national needs; to ascertain the trend of instructed and practical opinion, and to bring the results before the public, and so far as possible to the notice of the government; and to promote generally the welfare of the horse.

◈ ◈ ◈

The North Pacific Fair Association, at its closing session, abolished the early closing entry list in all fairs, except the one to be staged at Vancouver, B. C. Because the Vancouver fair is the first on the list the privilege of having an early entry list was given it. The association went on record as favoring uniform racing events. The events listed in the resolution are trotting and pacing, 2:15, 2:20, 2:25 and free-for-all. All races, except the free-for-all, will be under the "every heat a race" plan.

Horses and Horsemen

Several Trainers at Stockton Mile Track.

A. T. Jackson was down from Stockton this week and reports that once famous trotting horse centre as far from being entirely out of the game. Mr. Jackson has that wonderful sire for his opportunities, Royal McKinney, sire of Leata J. 2:03, etc., and bred him to about 25 mares last season. He also has a trotter he calls The Icicle by The Iceman that he thinks will make a great race horse. He has been a mile in 2:16¾ and a half in 1:04½. He is also looking after a two-year-old trotter and a yearling by Royal McKinney that are excellent prospects.

W. H. Williams is training a green pacer by Demonio that has already trialed close to 2:10, that is owned by James Peirano, of Lodi, and a bay mare owned by Williams & Akers that has trotted miles in 2:12, and another said to be by Del Coronado, owned by a gentleman at Lodi.

Farmer Bunch is still in the ring and handling a few youngsters. He has a trotter owned by Ed Lavin and another owned by Mr. Miller, both of which are eligible to the two-year-old stakes of 1917.

John Rowan has six head in his stables, one a colt by The Bondsman that will make the two-year-olds step to beat him next summer.

Trainer Humphreyville has moved to Stockton from San Jose and has a trotter and a pacer that are good gaited and very promising.

Frank Groom has his stallion Dexter Derby and a colt by him out of a Director mare that is very speedy.

The Stockton track is in fair order and there will be many more horses trained there as soon as the rainy season is over.

$7,000 for Races at Vancouver.

The Vancouver, B. C., Exhibition Association held a meeting last week and received the report of Secretary H. S Ralston in regard to the harness racing program for next summer's exhibition. The program as tentatively drawn up shows a total of $7000 in purses, which insures that the Vancouver summer meeting will rank with any on the North Pacific Fairs Association.

The members of the latter association have come to a better agreement on the handling of the various meets on the circuit, in the way of making the classes more uniform, slightly raising the purses, enforcing rules as to drivers' uniforms and suspending offending drivers and owners.

Mr. W. C. Brown, chairman of the racing committee, informed the directors of the exhibition that this concerted action will exert a beneficial influence upon the conduct of racing meets in the North Pacific area, and will benefit the local exhibition, inasmuch as suspensions made at any one meeting under the auspices of the association will be recognized by every member of the body. Heretofore, half the number of suspensions ordered locally were ignored by the half of the units of the circuit belonging to the National Trotting Association, and in consequence the directors have in the past found it difficult to enforce collection of the fines imposed as penalties.

The following shows the tentative program of racing events drawn up for next summer's meeting:

Tuesday, Aug. 21.—2:15 pace, $1000; free-for-all trot, early closing, 3 in 5, $800; running, half mile dash, no entry fee, $100; local 2:15 pace, early closing, no entry free, $100.

Wednesday, Aug. 22.—2:15 trot, early closing, $700; three-year-old pace, early closing, $300; running, one mile dash, no entry fee, $125; local 2:20 trot, early closing, no entry fee, $100.

Thursday, Aug. 23.—2:20 pace, $500; three-year-old trot, early closing, $300; running half mile dash, no entry fee, $100; local 2:25 pace, early closing, no entry fee, $100.

Friday, Aug. 24.—2:20 trot, early closing, $500; free-for-all pace, early closing, 3 in 5, $800; running, six furlongs no entry fee, $100; local 2:30 trot, early closing, no entry fee, $100.

Saturday, Aug. 25.—2:25 trot, $1000; 2:25 pace, $700; running, one mile, no entry fee, $100; local race, early closing, Fields & Boyd trophy.

In local races drivers must be amateurs and horses must start three times in British Columbia matinees during the season.

Grand Circuit Colt Sweepstakes.

Horsemen will recall the announcement this summer by Cleveland, Grand Rapids, Detroit and Kalamazoo of a series of sweepstakes to be raced during the Grand Circuit season of 1917.

Two events were announced by each of these cities, for two and three-year-old trotters, a $5,000 purse to be guaranteed for each division.

The initial payment was fixed at the nominal sum of $100 and entries finally closed August 15, 1916. The plan under which the events were to be raced out was as fair and equitable as it was possible to conceive of and was so arranged as to give the colt trotters of moderate speed a chance to win as much money in this series of sweepstakes as the champions of their year.

If final payments were made on twenty or more colts three races would be given, the purse divided equally, and not more than seven starters in each race. If a larger number entered purse and classes were to be divided with not more than seven starters in each. At the first meeting these divisions would be selected by the officials of the association, but thereafter starters would be classified in accordance with performances.

It was confidently expected, in the light of the great interest shown in juvenile racing at the present, a large entry would be secured, but for some reason or other no publication of the numbers was made at the time, although the entry was announced as satisfactory. Now that the time approaches for the second payment, January 2, 1917, we learn that over four hundred entries were received at North Randall, truly remarkable when one considers what a short notice was given of these events.—[The American Sportsman.

Hemet Stock Farm Babies Break Records.

This model trotting horse breeding farm, the youngest and at the same time the most complete trotting horse breeding form in California, made a good record this year. It sent out Hemet Queen, who now holds the world's championship for yearling pacing fillies with a record of 2:16¼, made at Phoenix, Arizona, November 15, 1916. Hemet Queen also holds the world's record for yearling pacing fillies on a half mile track, 2:22¼. She was sired by the farm's premier, Wilbur Lou (3) 2:10¼, that himself once held the world's record for a yearling trotter. The dam of Hemet Queen is Hemet Girl by Geo. W. McKinney 2:14¾, her second Lady Woolsey was by Woolsey, an own brother to the ex-champion Sunol 2:08¼, and her third dam was by Crichton, a thoroughbred horse whose daughters and granddaughters

Edith Carter 2:18¼, Fastest Yearling Trotter, 1916.

were wonderful producers of speed at both trot and pace.

Another baby from Hemet Stock Farm that achieved distinction is Edith Carter, a yearling daughter of Kinney de Lopez, another of the farm's stallions that is by Kinney Lou 2:07¾. Edith Carter trotted the fastest mile trotted in 1916 by a yearling when she circled the Phoenix track in 2:19¼, and this mile was within three-quarters of a second of the world's record for her age and sex. Edith Carter's dam is Louise Carter, also dam of Wilbur Lou (3) 2:10¼, Mamie Alwin 2:12, Louise de Lopez (2) 2:14¼ and Martin Carter (3) 2:29¼.

A daughter of Wilbur Lou that was also bred at Hemet Stock Farm is Zeta Lucille, that trotted a mile in 2:19¼ over a half mile track as a two-year-old during the summer of 1916, and then trotted a mile over the Phoenix mile track in November in 2:12½, which is a new record for Pacific Coast two-year-old trotting fillies.

Orloff Trotted Quarter in 31 Seconds.

With the return of Frank Caton to the United States from Russia, writes W. J. Carter in The Evening News of Richmond, Va., and his recent visit to Virginia, when, as the guest of Charles Tanner, he made an inspection of Curles Neck Farm, the splendid breeding establishment of C. K. G. Billings, at Richmond, interest in the Orloff trotter has been given further impetus, and Mr. Caton's comments on the breed have been widely disseminated through the turf journals and other sources. Noting the fact D. Scott Quintin, now directing head of a big manufacturing plant at Petersburg, Va., but formerly one of the best-known trainers and drivers in the country, became reminiscent and, reverting back to 1893, related a most interesting experience with the Russian nobleman, Count Ishmailoff, who brought over a stable of Orloffs from the imperial stud for exhibition at the world's fair of 1893 at Chicago. From the latter point Krakcus and five white stallions were shipped to Quintin, who then had training quarters at Trenton, N. J., but soon afterward went to the kite track of Dr. J. C. McCoy at Kirkwood, Del. It was there that Krakcus, with Quintin up, trotted a quarter in thirty-one seconds in the presence of Count Ismailoff, and did it in an impressive manne too Soon afterward the white stallions passed W. E. D. Stokes, who later attained internation fame as the master of Patchen Wilkes Farm, hon of Peter the Great 2:07¼, but Krakcus was shippe to California and wintered by Orrin Hickok, wh returned the proud Orloff to his native heath in th land of the czar. Quintin relates that the caretak of Krakcus was a big Russian soldier, who donne brilliant uniforms morning, noon and evening, dail and seemed to fairly worship his charge while dev tion to Quintin, his newly-made American frien was attested by a kiss on each of the latter's plum and rosy cheeks as a parting salute. Not so, hov ever, with another well-known horseman of tha period, for the big Russian, who could neither spea or understand English, delivered a smashing blo in the face when a proflered tip, in the shape of fat roll of notes, was construed as a bribe, again which the foreign caretaker of Krakcus had doub less been warned. Reviewing scenes of those day Quintin says that he found agents of the Russia government prompt and liberal as paymasters, whil through Count Ismailoff came a substantial offer t train for the imperial stud, yet the former Phil delphian looked upon home ties as too strong to b denied and remained in the land of his birth.—[American Sportsman.

Getting Ready for 1917.

Sutherland & Chadbourne have quite a string o horses at Pleasanton, that they are getting ready fo the California Circuit of 1917. Among them ar A. B. C. 2:07¼, owned by S. Comisto, Ferndal Verna McKinney 2:09¼, owned by Roy D. Mayes o Dixon, Bon Cres 2:10¼ and Baron C. McGregor 2:2 owned by J. J. Campbell of Pasadena, Don McKi ney by Washington McKinney, dam by Daly, a prom ising trotter owned by Dr. Sayre of Bakersfield, Jak Logan (3), trotter by Prince McKinney, and a tw year-old pacer by Jim Logan owned by J. G. Ange vine of San Jose, a three-year-old trotter by Stanfor McKinney, dam Cora Wickersham, owned by H. Mon roe, of Oil Fields, Cal., a two-year-old trotter by Th Proof 2:09¼, dam Deviletta 2:10½ by Diablo 2:09¼ owned by W. S. Harkey of Gridley, and a bay mar named Gusher by imp. Kismet, owned by D. Powe of Bakersfield. This stable of ten contains a hig percentage of fast ones and will be able to make good showing when the racing season begins.

Owner of Champion Objects to Early Closing Stakes

After ten years' experience in campaigning trotter and pacers through the Grand Circuit, A. H. Cosden owner of the champion two-year-old, The Real Lad 2:04¼, says he is through with the so-called stak system for aged horses.

"If a man could reasonably expect to get bac what he has to pay out in entrance fees, trainin bills and shipping charges after he has bought an paid for his horses. I wouldn't give it up," he sai recently to a reporter of the N. Y. Herald, "becaus I like the sport. But it is too one-sided to be enjoy able . Besides, I like colt racing better, and so I an going in for two-year-olds and three-year-olds."

Mr. Cosden's criticism of the prevailing system o entering harness horses, not only in the Grand Cir cuit but on nearly all of the leading tracks, is likely to call forth expressions of approval in many quar ters, for the country is full of owners who have hac the same experience and reluctantly reached the same conclusion concerning the early closing races which are miscalled "stakes."

One Born Every Minute, Said Barnum.

It is a great commentary on the intelligence of ou American people when so many of them are caught by the wild horse swindle. A gang of rascals has been working down in the central states getting victims to put up great sums of money for some imaginary wild horses represented as running around on the plains of Arizona. It would be just as sensible for some rogue to go out selling the vagrant clouds that fit around in the sky. One fellow was caught for $35,000 and the gang is now on trial at Omaha. The government alleges that the sales of these wild horses aggregate nearly $1,000,000 and one would wonder if there are any more suckers left to bite at such incredulous bait. There are certainly a lot of people in this world who are devoid of common sense or they would keep out of such traps.

Nutwood Wilkes Only Sick a Day.

Mr. John H. Wilson of Springfield, Ohio, who purchased the California bred stallion Nutwood Wilkes 2:16½ when he was sold at the dispersal of the Nutwood Stock Farm after the death of its founder, Martin Carter, writes us that Nutwood Wilkes was never sick a day after he reached Ohio, until the day of his death on the 29th of last October. The cause of his death was acute indigestion. Nutwood Wilkes is now the sire of 76 standard performers, and there will be many more added to his list during the next few years.

Robert Seale of Berkeley, Cal., owner of the stallion Burbank that he races with the Oakland Driving Club horses during the summer season, also breeds this horse to a few mares every year. Mr. Seale now owns a two and a three-year-old by Burbank that are very promising. Messrs. Seale & Curran also have the stallion Palo King, owned by the late Dr. Harry Calmes of Berkeley.

Thoroughbred Matters

Racing Tax in Canada.

The tracks operating in Montreal, Canada, and vicinity, will either use pari-mutuels next season or go out of business, owing to a new tax law passed by the Quebec legislature. The tax provided for the mile courses in Montreal and neighborhood is $1000 per day in place of a percentage as was originally suggested. The half mile tracks, charging not more than 50 cents gate admission, will be only taxed $300 per racing day. This applies to tracks operating the pari-mutuel system of betting.

For associations using the bookmaking system the tax will be doubled and, in addition, each bookmaker will have to pay a license of $100 per racing day to receive a license to operate. The local jockey clubs were well represented at the Legislature when the bill was passed, and the majority of them have already decided to install the mutuels.

Each of the half mile track managements will be put to an expense of about $10,000 in installing the plants. The bill does not say what percentage is to be taken, but it is likely that the Government will confine itself to 8 per cent at the largest.

There are now seven tracks being operated in Montreal which gives ninety-eight days' racing, so that the revenue derived from them will be a handsome one. The passing of the Syndicate Ring is looked on as a good thing for the racing generally in the province.

Two-Year-Olds Will Race at New Orleans.

That meeting of horsemen down at New Orleans this week at which it was agreed to race two-year-olds from the start of the meeting on New Year's day, just as if there had been no adverse ruling by the turf powers of the East, West and Canada, bears no particular significance because it always had been expected that the winter tracks would have racing for the "babies" regardless of the rule.

It is fairly safe to estimate that not many more than 200 youngsters will come under the ban, and this will cut no great figure in mid-summer racing, at which time the two-year-old division will be most prominent. It certainly will be interesting to watch what develops from the ruling against the racing of the young thoroughbreds before the first of April. That much good may come of it is beyond question. The rule provides that any two-year-old that is raced before April 1, shall be barred from racing on any track under the supervision of The Jockey Club in the same years. After consideration of the matter, the same ruling was made in Kentucky and Canada, so that now, the only tracks left open for such as may violate the rule will be the "bush" meetings.

The ruling only bars those violating it during their two-year-old form, so that should any great ones develop at any one of the winter meetings, it only will be necessary to have them rest up through the remainder of their juvenile period and then they can be entered in any of the stakes of the following year that are open to three-year-olds. After an early season of racing, the rest may prove all the more to their advantage, but that will be something for time to show.

Good Racing at New Orleans.

Word already has been sent out that those contemplating spending the first months of the coming New Year at New Orleans had best send ahead for hotel reservations. It was because of the skipping of New Orleans after racing had been given up there that the business men got together and made it possible for the return of the sport. Those who took part in bringing back the racing have realized even more than they expected, all of which made it possible to buy out H. D. (Curley) Brown, when a race-track war was threatened there last fall, rather than cause any conflict that might bring the sport into bad repute. Had Brown not cut in with his proposition to reopen City Park there might have been greater offerings of purses and stakes than now are on the books of the New Orleans Association. As it is, however, they have hung up stakes to a total of $23,700, aside from the probable increases in money added to the overnight events. The Crescent City Handicap will have $5,000 added money for the good horses that may be elected to go the mile and a quarter distance. There are many other events with added purses of $1200 up to $4000, besides cups and other trophies contributed by the New Orleans merchants.

Saratoga Held Great Meeting.

Never in the history of racing has Saratoga seen such crowds, such horses and such fields of thoroughbreds as were seen during last August at the Spa. It was the greatest of all meetings held in New York and greater than any other held in the country during the year, when it is considered that there was practically a full month of the sport on the one track. All those of the old timers who could get there were on hand for the first day's racing. Also there were hundreds of newcomers to the turf, and they helped to swell the attendance and the entries for the races.

A STORY OF ED. CORRIGAN.

During what has been called the "palmy days" of Pacific Coast racing, that era between the establishing of winter racing in 1893 and its suppression by the Otis-Walker betting law of 1909, one of the most prominent of the men who made racing a business was Edward Corrigan, who, barred from racing at the tracks around New York, finally came to the Pacific Coast and soon became one of the leaders in racing affairs. He was the horse owner's friend as he persistently fought any lowering of the value of purses below $400, and it was his antagonism to the Williams interests that resulted in the magnificent racing plants at Ingleside and Tanforan being constructed. John Day had a story of Corrigan in a recent number of a New York journal that will bear repeating here:

No one ever was known to refer to Corrigan as other than "Ed," except at times he was designated as "Big Ed," and big he was in every way. But scarcely is it necessary to refer to Corrigan in the past tense, for he still is of the turf, and was a familiar figure about the Kentucky tracks during the past season. Also he undoubtedly will be among those present when the meeting is on at New Orleans after the first of January.

Huge of frame and big of brain, Corrigan always has been a fighter, and yet while always he won his physical encounters, he carried his business fights so far that seven years ago he found himself against the wall and a bankrupt after having owned one of the greatest racing stables in the world, various race tracks and a great breeding establishment.

Born in Canada, Corrigan drifted across the border in his early teens and journeyed westward to Kansas City, although he was actively engaged much farther West as a youngster. From rock crusher on railroad construction work, Corrigan became a contractor for his own account in this same line more than fifty years ago. He was one of the contractors in the building of the Colorado Southern in the early eighties.

It was about that time he got his first taste of racing—quarter-horse racing. He bought Little Casino and raced him all through the western country at distances from a quarter up to six furlongs. At St. Louis in 1881, he bought Pearl Jennings from the late Maryland Jennings of Baltimore. With Pearl Jennings he beat all comers, east and west. One of his first races with her was at Salt Lake City against a sprinter named Red Bird, for $5000 a side. Corrigan won easily.

Then he came back to St. Louis and tried to get on a match with the best in Milton Young's stable, but though Young had some of the best on the turf he declined the issue.

In those days Clifton Bell, a famous western sporting man, owned a sprinter at Denver that had beaten everything that had come along. Corrigan took Pearl Jennings to Denver and got on a match for $5,000 a side. Difficulty arose as to the selection of a judge and stakeholder. The Denver sports realized that the race might be a tight fit. They knew that both Bell and Corrigan might become intractable under such circumstances. They sidestepped. Corrigan finally said:

"See here, Bell, I know you are a square man and I know you won't give me the worst of it. You be the judge and hold the stakes, and whatever you say will go with me."

Pearl Pennings was an easy winner.

That race paved the way for Corrigan on the turf as an owner of importance. In 1883 he bought from F. B. Harper that great son of Longfellow, Freeland, then a three-year-old. With Freeland he beat General Munroe, who later on won the Suburban Handicap . In 1884 Corrigan came east and got on a match for Freeland with the Dwyer Brothers' Miss Woodford, which he won at a mile and a quarter at the old Monmouth Park course. Then there was a return match at Brighton, which Freeland won easily. In his string that year under the supervision of John W. Rogers, Corrigan had such great flyers as Modesty, first winner of the American Derby; Lizzie Dwyer, Ada Glen, Irish Pat, Pearl Jennings, etc.

It was along about 1887 that Corrigan became interested in racetracks, taking a part in the ownership of the Garfield Park course in Chicago. It was this interest that started his battle with John Condon, the Chicago gambler, which was of long duration and which had for one of its incidents the raid on Garfield Park, in which Jim Brown was shot to death, after having slain two policemen who were shooting at him.

The first and last Futurity in which Corrigan was interested was that of 1891, which was won by David Gideon's His Highness. Corrigan had Huron entered in this Futurity, but it was the contention of the Coney Island Jockey Club that Huron had been declared out of the race. Corrigan declared that no one ever had authority to declare the colt out except himself and that he proposed to run. He was allowed to start Huron, which finished second. The placing judges ignored the Corrigan colors and Huron was placed last, while Yorkville Belle was given the place and Dagonet was placed third.

Corrigan was an angry man after this procedure and entered suit against The Jockey Club. The suit went against him and a ruling was made that his entries would not be received on any Jockey Club track.

Corrigan confined his racing efforts to the West from that date and built the Hawthorne track, which, by the way, was the last of his possessions to pass out of his hands. Tom Carey, contractor and politician of Chicago, long a friend of Corrigan, took over the Hawthorne course and owns it today. It was there that the race meeting of fifteen days was held last summer.

Corrigan turned his attention to racing in California and had a long fight with the late Tom Williams, principal owner of the Emeryville track. Later he fought with the Cellas at St. Louis, and then had a big interest in the building of the City Park track at New Orleans, which raced in conflict with the Fair Grounds track until adverse legislation stopped racing altogether at the Crescent City.

With the passing of racing from New Orleans began the passing of the Corrigan fortune. In 1908 he was known to be in financial difficulties, and in 1909 he went into bankruptcy, claiming Lexington, Ky., as his home. His stable of good horses, which once had numbered as many as seventy in training, went under the hammer, as did his stock farm. Hawthorne was mortgaged to the last dollar, and there had been no racing in Chicago since 1904, so the track was a white elephant and an expensive one to keep up. Carey gave Corrigan $2,000 for a quit-claim deed, paid off the mortgages and took over the ownership of the property in 1909, but he lost nothing by the transaction, for the property has doubled in value within the last ten years.

Corrigan is now far past 70 and still is to be seen about the tracks of the West whenever there is racing, and has made known his intention of being at New Orleans all this Winter.

After one got around Corrigan's rough corners they always found a man. He was a good hater with a long memory, but of disloyalty to his friends no man ever accused him. His kindness to horsemen in distress was multitudinous while he was prosperous. Many a feed bill has he paid for an unfortunate, and many a stranded owner, some of whom are racing today, has been started on a new road to success through the kindness of Corrigan.

Turf Prosperity in the East.

Eight months of racing is a goodly season, and that is the one that was completed with the running of the seventh race at Bowie Thanksgiving Day. It is indeed a big sport that can hold interest for so long a time, but if the climatic conditions would permit, there would be the same interest in the sport in December as there is in August.

Time was when Maryland did not cut a very important figure in the Eastern racing. That was when the New York season began April 15 and continued without interruption until November 15. With the shortening of the season in New York, Maryland grew in importance. The New Yorker must have his racing and Maryland was none too far to go to enjoy the sport.

The season that has just come to a close has been by long odds the most profitable ever enjoyed by any of the Maryland associations, and the immense crowds that turned out day after day were just as eager in their cheers for the victors on Thanksgiving Day as they were on April Fool's day eight months before. The crowd that thronged the Bowie track Thanksgiving Day was by long odds the largest gathering that had been on the grounds, and it was the last day of that long season of sport.

Bowie has at once taken the place in the circuit that was so long adequately filled by the Washington Jockey Club at the old Benning course. James F. O'Hara and his associates in the Southern Maryland Agricultural Association, were the last ones to come into the Maryland circuit, and they had to take the least desirable dates—those that raise the curtain in the spring and ring it down in the fall. It is a season when the weather is frequently uncomfortably cold or stormy, but with all this handicap Bowie has enjoyed an instant popularity and it has become a most important part of the racing scheme in the East.

Plans are already being made for the opening next April and another effort will be made to have better transportation facilities for the faithful. It was in this one department, and one over which the track management had no control, that Bowie suffered a real handicap all through both meetings this year.

Macomber Horses Won $13,290 on New York Tracks.

A. K. Macomber, with one of the biggest stables to race in the East, saw his colors finish in front but eight times during the past season in New York. With his winning of the Lawrence Realization and the Locust Valley Handicap, Star Hawk was the largest winner for the Macomber stable, making a total of $4,120.

Boots, the imported five-year-old gelding purchased by Mr. Macomber from Oscar Lewisohn during the Maryland season, helped to raise the Macomber winnings, which totaled $13,290 for the season, by winning one stake under the Macomber colors . The one race that Boots won was the Washington Handicap at Laurel.

Star Master, the imported two-year-old, was the first one to win a race for his owner. Other races won by the Macomber horses in Kentucky are not included in these figures.

The Grand Circuit Stewards will meet at Atlanta, Georgia, January 23rd to make arrangements for the season of 1917.

THE CHICAGO SALE.

List of Horses Sold That Brought $200 or Over at Auction This Month.

Chicago's best sale of many years closed Friday, Dec. 22nd, after five days' selling. The offerings were as a rule of a desirable class and attracted buyers from all over the United States and Canada. The feature of the first day was the sale of the W. G. Durfee horses. The Lark 2:08¼, topped the sale for that day, she bringing $1,500 and going to "Doc" Tanner as agent for the Curles Neck Farm, Richmond, Va. Tanner also secured My Irene S. 2:28½, the dam of Esperanza 2:08¼. The second highest price on the first day was brought by Great Northern 2:12½, the famous western trotting gelding, who went to Frank Callahan, Tiffin, O., at $1,250.

Diumeter 2:03½, the good Grand Circuit winner of 1916, was the high priced horse the second day and went to R. H. Rogge, Dayton, O., for $1,525. Ned McCarr secured The Beaver 2:03¾ for $1,000 and he joins the Pittsburgh matinee colony.

Wednesday's offerings were mainly from the Gumaer ranch in Colorado and the first horse offered, A. R. G. 2:13½, brought $1700, the top price of the sale. He was bought by L. E. Brown, Denver, Colo., after spirited bidding, and will be raced by Joe McGuire in 1917.

Thursday's horses were of a lower grade but the sale was brought to a brilliant closing Friday evening when the horses of the Densmore Stock Farm were put up. Don Densmore 2:02¼, the noted sire and race horse, brought $1600 while the Deputy Sheriff 2:04¼ made $1,425. It is reputed that the Densmore Farm bought him back again after the sale.

Taken as a whole, the sale must be accounted a brilliant success from all standpoints. More horses were offered than at any sale in a great many years and the average price obtained was the highest, while more horses sold for large prices than ever.

President Palmer L. Clark added materially to his already great reputation as a sales manager and everything moved off with the promptitude and satisfaction that always rules at Chicago. During the week many consignments were made to the next sale of the company which will be held the week commencing Monday, March 26th. The sales were as follows:

My Irene S. (2) 2:28¾, ch m (12) by Petigru—Johanna Treat by Thomas Rysdyk; Curles Neck Farm, Richmond, Va. ..... $ 775
Rayo de Oro 2:27¼, ch g (4) by Copa de Oro—Easter D. by Diablo; S. Thompson, Leonardsville, Kan. 700
John Warwick (2) 217, g g (5) by Carlokin—Alameda Maid by Eros; Frank Lindsay, Falmouth, Ind.. 510
Blanche 2:06¾, b m (10) by Menlow—Subito by Steinway; Patchen Wilkes Farm, Lexington, Ky. 350
Clara Mac 2:04½, bl m (8) by Expressive Mac—Clara by Howard St. Clair; J. Weinberg, Chicago, Illinois 650
De Ora (3) 2:17, b h (5) by Copa de Oro—Ola B. by McKinney; D. D. Merrymon, Shortsville, N. Y... 410
Ethel D. (3) 2:11, b m (5) by Carlokin—Roberts Madison by James Madison; W. W. Collier, Detroit, Michigan 300
La Gitana, b m (7) by Del Coronado—Subito by Steinway; Nat B. Young, Mt. Sterling, Ky..... 220
Alfredo (2) 2:20, b h (2) by Copa de Oro—Lady H. by Del Coronado; E. E. Beckwith, Aurora, Ill... 450
Carl (3) 2:14½, bl g (4) by Carlokin—My Irene S. by Petigru; E. R. Little, Mt. Sterling, Ky..... 470
Hermes (3) 2:13¾, b c (3) by Carlokin—Miss Queely by Moko; Ned McCarr, Pittsburgh, Pa..... 750
Chango (3) 2:12¾, b g (3) by Copa de Oro—Lady R. by Del Coronado; John Sangert, Chicago, Ill.. 400
La Cresendo (2) 2:27¼, b f (2) by Cresendo—La Gitana by Del Coronado; Dr. W. F. Gorsline, Chicago, Ill. 210
Honey Healey 2:08¼, br m (9) by Zombro—Ella J. T. by Bob Mason; R. A. Smith, Los Angeles, Cal. 500
The Lark 2:08¼, b m (5) by Carlokin—Subito by Steinway; Curles Neck Farm, Richmond, Va.... 1,500
Rags (4) 2:09½, b g (6) by Del Coronado—Atherine by Patron; Geo. McCrea, Columbus, O..... 425
Pavlowa B. 2:22, ch m (11) by Petigru—Subito by Steinway; Nat Young, Mt. Sterling, Ky..... 200
Belle Rice, br f (2) by Moko—Silurian by Wilton; A. M. Newbert, Boston, Mass. 585
George Hammett 2:15½, b s (7) by Nutwood Wilkes—School Bell by Prodigal; H. C. Smith, Manchester Iowa 300
John N. (2) 2:27½, b g (2) by The Jurist—Ripple by Glenbrook; H. C. Smith, Manchester, Iowa..... 200
Great Northern 2:12½, br g (7) by Wayland W.—Cecile M. by Robin; Frank J. Callahan, Tiffin, O. 1,250
Bon Courage (4) 2:08¾, ch g (5) by Bon McKinney—Helen Keyes by Sidney Dillon; Gen. Vogel, Solon Mills, Illinois 400
Oro Lou 2:19½, ch g (4) by Kinney Lou—Neta W. by Nutwood Wilkes; F. Callahan, Tiffin, O..... 275
Lord Wilbur, b c (1) by Wilbur Lou—Lady Zombro by Zombro; Haynes Dunn, Paducah, Ky..... 200
Ceylona Forbes, b f (1) by J. Malcolm Forbes—Ceylona by General Forrest; Dr. S. E. Kent, Jackson, Michigan 200
Illinois Todd, b c (weanling) by Kentucky Todd—Emma Conductor by Conductor; S. S. Ferguson, Murdocksville, Pa. 295
Boreal Todd, b c (weanling) by Kentucky Todd—Dolly Celi by Boreal; S. S. Ferguson, Murdocksville, Pa. 200
Rick McKinney 2:16, b s (6) by Henry McKinney—Minnie P. Wilkes by Baron Wilkes; E. R. Little, Mt. Sterling, Ky. 300
Mary Knight (2) 2:23½, b f (2) by Border Knight—Fanny Black by Betterton; Arlie Frost, Monroe, Wisconsin. 250
Still Herr 2:19½, bl m (6) by Charley Herr—Stilleta by Stillson, Jr.; J. Weinberg, Chicago, Ill..... 220
Dick Sentinel 2:06¾, b g (10) by Iowa Sentinel; Robt. Nedl, Burlington, Wis. 260
Lady Forbes, br f (1) by J. Malcolm Forbes—Lady Williams by The Hobo; Arlie Frost, Monroe, Wis. 300
The Pythian Knight 2:22½, bl g (4) by Directum Spier—Bida A. by Red Arthur; E. D. Pendleton, National Stock Yards, Ill. 310
Peter Handspring, b c (2) by Peter the Great—Spring Chimes by Handspring; Dr. S. E. Kent, Jackson, Mich. 210
Peter Alcyon, ch c (2) by Alcyon—Miss Petreni by Peter the Great; P. Changelon, Iron River, Wis. 420
Bugger Bells, ch f (1) by Bugger Gall—Miss Petreni by Peter the Great; Wm. Marvin, Lafayette, Ind.. 450
Miss Petreni, br m (7) by Peter the Great—Ione Churchill by Walkinn Prince; Will L. Brown, Rushville, Indiana 475
Bar Dillon (3) 2:18, b s (9) by Sidney Dillon—Ione Churchill by Walkill Prince; W. C. McKinley, Smithville, Missouri 285
Brighton Belle 2:13½, br m (6) by Echo Bell—Dolly Patchen, by Joe Patchen; L. E. Trimble, Rochester, Pennsylvania 460
Mac Arthur, ch g (2) by Hollywood Boy—Black Hawkess by Heir-at-Law; H. C. Perry, Edinburg, Illinois 25
Lady Bever 2:21½, br m (5) by Lindell—Breanna Direct by Direct; John Shaw, Chicago 42
Irene Patch 2:09¾, b s (9) by Great Heart—Crowford Maid by Pilot; L. A. Gay, Kirwan, Sask., Canada 320
Lucille Forbes, bl f (1) by J. Malcolm Forbes—Arla by Alcantara; J. W. Rewey, Rewey, Wis..... 240
Elmer Dickson 2:06¼, bl s (7) by Red Medium—Miss Dickson by Alcymont; J. C. Keefe, Moravia, New York 335
Wiggins Lass 2:15¼, br m (8) by Wiggins—Oakland Lass by Oakland Baron; C. H. Griswold, Bradford, Illinois 210
Direct Line (4) 2:08¼, br s (5) by Baron Direct—Woodland Echo by Woodline; J. T. Clark, Middlesex, Pa. 375
The Beaver 2:03¾, b s (7) by Searchlight A.—Ripple by Glenbrook; Ned McCarr, Pittsburgh, Pa..... 1,100
Harm Patterson 2:11¼, b s (8) by Alfred G.—Fannie Alexander by Captain Cook; C. B. Brockway, Winnipeg, Man., Canada 300
Gipsey Burrs 2:10¼, b m (8) by Pilot Burns—Minnie S. by Major Strathmore; N. E. Winslow, Taylorville, Ind. 295
Diumeter 2:03¼, b g (7) by Dium—Esther B. by John G. H.; H. Rogge, Dayton Ohio..... 1,525
Harvest Reaper, b s (4) by The Harvester—Erla Goedin, by Early's First; Robt. Knapp, Ashton, Illinois 280
Chikashia Bill 2:17¼, b s (7) by Blanchard—Martinee by Addition; John Shaw, Chicago, Ill..... 250
Pacific Express 2:28, b g (3) by Atlantic Express—Moline by Mobel; D. D. Merrymon, Shortsville, New York 220
Bob Axworth, ch g (2) by Morgan Axworthy—Miss Greville by Greville; H. N. Cross, Brown Lee, Sask., Canada 210
Sahib 2:17¾, br s (5) by Eingen—Lady Ethelynn, by Jackday; Saugerties Farm, Saugerties, N. Y..... 210
Regeneration, ch m (6) by Peter Wood—Ina Ames by Athégent; Chas. Barrett, Park Hill, Ont., Can. 220
Azarath, b c (2) by The Earl—Flightbar by Silver Wing; Chas. Bowman, Savannah, Ill..... 220
Doc Allerton Jr. 2130, br s (7) by Doc Allerton—Alice Grattan by Grattan; W. Donnelly, Chicago 330
Charley Payne, br c (1) by Peter W.—Dorothy Payne by Red Cameleon; H. A. Busby, Chicago 270
Ruth Payne 2:26, b m (5) by Peter W.—Dorothy Payne by Red Cameleon; H. E. Winslow, Taylorsville, Illinois 200
A. R. G. 2:13½, b s (5) by Gumaer Hal—Claudie Chimes by Chimes; L. B. Brown, Denver, Col..... 1,700
Baron Direct, bl s (12) by Direct—Ebbiemore by Baronmore; A. R. Manifold, La Harpe, Ill..... 410
Gumaer Hal, ch s (11) by Direct Hal—Gismonda by Dare Devil; Frank Lindsay, H. W. Flick, Butler, Penn. 325
Peter E., bl s (4) by Gumaer Hal—Claudia Chimes by Chimes; R. B. Reed, Pittsburgh, Pa..... 475
Miss Denver Direct, bl f (5) by Baron Direct—Braden Lass by Brown Hal; L. B. Brown, Denver 300
Sister Braden, bl f bby Baron Direct—Braden Lass by Brown Hal; L. B. Brown, Denver, Col..... 325
Miss Braden Direct, bl f (1) by Baron Direct—Braden Lass by Brown Hal; L. B. Brown, Denver 200
Braden Lass, bl m (6) by Brown Hal—Kate Braden by Bay Tom; E. R. Little, Mt. Sterling, Ky..... 335
Direct Ree, b m (5) by Baron Direct—Episode by Ambassador; Midway Farm, Kearney, Nebr..... 400
Sue Spilter, ch m (9) by Peter the Great—The Prima Donna by Betterton; E. R. Little, Mt. Sterling, Ky. 285
Whitney Direct, bl c (3) by Baron Direct—Gismonda by Dare Devil; Wm. Rush, Memphis, Tenn..... 360
Gismonda, b m (17) by Dare Devil—Beattie by Mambrino King; Jno. Kirk, Kirksville Ill..... 500
Easter Boy 2:17¼, br g (8) by Cubanola—Madean by Dean Sage; E. J. Hanson, Savage, Minn..... 300
Peter Bing (2) 2:19½, b c (3) by Peter the Great—Miss Eodena by Binger; Al. Koepke, Chicago, Ill. 335
Azie Hall (2) 2:24½, br f (3) by Azoff—Linka Hall by Walnut Hall; Geo. Vogel, Solson Mills, Ill... 210
Wotan 2:17¾, b s (13) by Bingen—Roxana by King Wilkes; J. Weinberg, Chicago, Ill..... 320
Gordon Russell, b c (3) by Guy Axworthy—Gardenia by Ashland Wilkes; J. J. McCarthy, Chicago, Ill... 250
Count Marque 2:08¼, b g (6) by Sir Markue—Countess Cecil by Gambetta Wilkes; H. E. Spratt, St. Joseph, Mo. 480
Lord Duke 2:14¼, b g (10) by Jackdaw—Oakland Baroness by Oakland Baron; Pat Chantelois, Iron River, Wis. 300
Don Densmore 2:02¼, b s (10) by Pactolus—Ina Densmore by Hamdallah; Jas. Black, Lowell, Ind. 1,600
The Deputy Sheriff 2:04¼, b g (5) by The Sheriff—Jennie K. by Oneida; E. J. Morierity, Chicago, Ill. 1,425
Mabel E., by Canada Lane—Jennie K. by Oneida; Carl Mueller, Rock Island, Ill..... 300
Dr. J. P. Buckley 2:13¼, b g (6) by Emmett Grattan—Vyzelia by Vyzant; J. Weinberg, Chicago, Ill. 375
Lieut. Aubrey (3) 2:21¼, b g (4) by Capt. Aubrey—Anable of King Hill by Bow Bells; E. E. Schmodt, Chicago, Ills 350
Josephine, br f (1) by Dromore—Directum Maid by Directum Boy; Chas. Dean, Palatine, Ill. 200
Lloyd George, gr g (6); D. Shilling, Chicago, Ill.... 700
Edna Leyburn 2:15, b m (3) by Ario Leyburn—Ruby Ashland by Ashland Wilkes; W. F. Converse, Minneapolis, Minn. 275
Azoff Jr. 2:22¼, ch c (4) by Azoff—Ethel Egotist by Egotist; Walter Palmer, Ottawa, Ill..... 425
Rolly Canewood 2:09¼, ch g (6) by Canewood Baron; Martin Powers, Milwaukee, Wis. 370

Kern County Fair Netted Over $3,000.

Bakersfield, Dec. 26.—The Kern County fair was a financial success, the profit side of the ledger showing $3184.65 cash in bank, according to the report of T. F. Burke, secretary of the association, to the directors. The total receipts were $20,580.10, of which nearly $12,000 was paid admissions. Floor space exhibitors contributed $2817 and the board of supervisors gave a donation of $2000.

The list of expenditures included $2386, or 20 per cent of the gross admissions to the fair association; $1208 as premiums; $3002 for races for horses; $2172 for motor races; lumber, $2772; rent of tents for pavilions, $1011; free entertainment, $966; salaries, $1233; advertising, $690, and general and miscellaneous expenses $1873.

One of the sources of revenue was the premium book, the advertisements therein netting $1011, and receipts from the Trail concessions and privileges of selling on the grounds brought in $1161.

It is planned to hold a still better fair in 1917, for which many improvements are to be made and the half mile track will be given a coat of clay.

Howard Perry, who is wintering Graustark 2:12¼ at Shreveport, Louisiana, says the son of Aerolite 2:00 is sound and all right every way and will be ready to make a better campaign in 1917 than he did in 1916, as he is now a seasoned horse and has learned the racing game well.

THE YEAR'S BEST RECORDS.

Following are the best records made during the year 1916 by trotters and pacers of the different ages:

TROTTERS.

One-Year-Old.

Filly—Edith Carter, by Kinney de Lopez 2:23, dam Louise Carter 2:24, by Chestnut Tom 2:17¼ 2:18½
Colt—Dr. Elmore, by J. Malcolm Forbes 2:08, dam Mendosa Worthy 2:17¾, by Axworthy 2:15½ 2:24½

Two Years Old.

Colt—Buck Watts, by Gen. Watts 2:06¾, dam Miss Belle Chimes, by Liberty Chimes 2:22½ 2:09½
Filly—The Real Lady, by Moko 24458, dam Fruity Worthy 2:25¼, by Axworthy 2:15½ 2:04¼

Three Years Old.

Colt—Harrods Creek, by Gen. Watts 2:06¾, dam Axalea 2:24¼, by Chimes 5348..... 2:06¾
Filly—Volga, by Peter the Great 2:07¼, dam Nervolo Belle, by Nervolo, p. 2:04¼..... 2:04½

Four Years Old.

Colt—The Exposer, by The Exponent 2:11¾, dam Emma Conductor 2:21¾, by Conductor 2:14¾ 2:06
Filly—Mary Putney, by San Francisco 2:07¾, dam Mendolita, by Mendocino 2:19½..... 2:04¾

Aged.

Stallion—Lee Axworthy, by Guy Axworthy 2:08¾, dam Gaiety Lee 2:16¾, by Bingen 2:06¼ 1:58¼
Mare—Mabel Trask, by Peter the Great 2:07¼, dam Miss Nutonia, by Nutwood 2:18¾, and Lucile Spier, by Directum Spier 2:11¼, dam Lucile 2:07, by Brummell 9679 ..... 2:03¼
Gelding—M. L. J., by Red Will 32948, dam Narcissa 2:28, by Marquette 9941..... 2:05¼

PACERS.

One-Year-Old.

Filly—Hemet Queen, by Wilbur Lou 2:10¼, dam Hemet Girl, by Geo. W. McKinney 2:14¼ 2:16¼

Two Years Old.

Colt—Poorman, by The Northern Man 2:06½, dam Mary Lloyd, by Vice Commodore 2:11 2:07¾

Three Years Old.

Colt—Peter Look, by Peter the Great 2:07¼, dam Pilatka 2:14¼, by Bingen 2:06¼..... 2:03
Filly—Sis Bingen, by Bingen 2:06¼, dam Sis Directum, by Directum 2:05¼..... 2:06¼

Four Years Old.

Colt—Gen. Todd, by Geo. L. Todd 2:07¾, dam Miss Chorister, by Oratorio 2:13..... 2:04
Filly—Miss Harris M., by Peter the Great 2:07¼, dam Mary Allen Stout, by Ondale 2:23½ 2:01¼
Gelding—Young Todd, by Director Todd 2:07¼, dam Woodford Belle, by Ondale 2:23½ 2:02¼

Aged.

Stallion—Napoleon Direct, by Walter Direct 2:05¾, dam Lady Erectess, by Tom Kendle; Directum L, by Directum Kelly 2:08¼, dam Izetta R. 2:13½, by Pactolus 2:12¾.. 1:59¾
Mare—Miss Harris M., by Peter the Great 2:07¼, dam Mary Allen Stout, by Ondale 2:23½ 2:01¼

CHAMPION TROTTING RECORDS AT ALL AGES.

1 yr. Airdale, b c. by Tregantle 2:09¼....1912—*2:15¾
2 yrs. The Real Lady, bl, by Moko 24457..1916— 2:04¼
3 yrs. Peter Volo, br c, by Peter the Great, (4) 2:07¼ .....1914— 2:03½
4 yrs. Peter Volo, br c, by Peter the Great, (4) 2:07¼ .....1915— 2:02

20 yrs. Goldsmith Maid, b m, by Abdallah 15.1877— 2:14½
*Against time

The great war, with its vastly increased use of artillery, has presented some new problems in the supply of horses suitable for military purposes. This is strikingly reflected in the fact that the Entente Allies were taking cavalry horses and artillery horses in equal numbers when the war began, while they now buy four artillery horses to one cavalry horse. And besides the horses bought for artillery service they are now buying thousands of big mules for the transport wagons and the guns, about 100,000 mules having been shipped abroad this year. British military authorities, awake to the changed conditions, are giving more attention to the future supply of gunners than to cavalry mounts, and to this end have lately purchased some middle weight Percheron stallions and mares in France as being the best type obtainable to breed for artillery service.

STALLION FIGHTING IN ICELAND.

Graphic Account of a Sport that Flourished in the Fourteenth Century.

Life is an unceasing struggle of the individual against the mass. It is a life and death strife which results ever in the survival of the fittest. In the whole realm of nature fortune favors the bold and the intelligent.

In a square, open contest for supremacy between adversaries comparatively equal there is always some fascination. In the sport and play world competition has always been the feature of greatest interest. Human nature is such as to thrill at fight, to cheer struggle and to hail victory. This is the fact, irrespective of the motive underlying the struggle, be it the brutal and barbarous beast element, or the enraptured spirit of innocent play. Whatever the phenomenon may be, it is an instructive expression of evolution.

All this at first glance may seem a commonplace generality, but the remarks lead directly up to the thought of ancient pastimes in which fights of one kind or another often played the most prominent part, and for that matter, they do to this day among many peoples. With this fact in view, let us consider specially the practice prevailing among certain Teutonic nations of matching horses in fights for the purpose of trying out the merits of the animals and to serve as popular entertainments. This sport reached perhaps its highest development in the Icelandic Republic where horse-breeding and stallion-fighting had a direct relationship. When Iceland was settled by the Norsemen and the Celts in the years from 874 to 930 the colonists imported to the islands the domestic animals of their respective countries. Horses were of course indispensable to the colonization, both as mounts and as beasts of burden. The settlers, accustomed to an adventurous life and travel, and to diverse occupations, took a keen interest in horse husbandry and showed a warm appreciation of equestrian sports. Hence the horse industry entered upon a course of rational progress as the standard of breeding from the best was established and maintained.

The horse fight, or hestaat, as it was called, certainly was a thrilling pastime of a people which appreciated valor and paid homage to the competitive game of life.

Imagine a fair autumn day in far-off Iceland. On a wide and level river bank, adjacent to the valley's slopes, lies an open-air amphitheatre set in complete order for the event. The people gather in groups to attend the meet. Nearly the whole community turns out for the occasion. Dressed in picturesque and gaily colored robes, the people come along the trails and highways leading to the center of the day's interest. The silver bells and diadems of the maidens gleam in the sunshine, and behind each chief are soldiers wearing shining helmets and armed with gleaming swords. It is a chivalrous society, jealous of honor, elevated of ambitions and appreciative of culture and action.

Arriving at the fields the spectators are seated on the stage overlooking the arena by the river. Every mind is tense and obviously the suspense is great; on the outcome of the contest personal interests are also concerned.

Now the game is about to begin. Two small groups of horses are driven forth. Each group is headed by an imperious steed. Evidently the stallion is considered worth as much as all the rest of his fellow.s In the beautiful animal one may note a fine uniformity of color and conformation. Line-breeding and good management account for these facts. We shall soon observe the merits of the animal—his vigorous constitution and symmetrical conformation. These, combined with an indomitable spirit, are the primary requisites of the performance.

The stallions are matched against each other and the combat begins. Two men stay close by and direct the fight with wooden sticks. But such stimulus becomes quite unnecessary as the battle increases in fury. Rising on their haunches the horses attack each other, using hoofs and teeth to the fullest advantage. Every muscle in their bodies is at high tension, every nerve is on the alert, while the eyes glow like blazing coals. Like lightning both descend from their erect positions. The strategic trick is to tear open the other's abdomen or to bite him lame. There is agile and powerful exchange of blows and biting and the battle rises to a climax as the enraged steeds test their sagacity and courage. Finally when one or the other yields—"consummation est." The end of the duel may be fatal to one of the combatants, but whatever the outcome the struggle for supremacy has furnished sufficient evidence of the merits of each horse. Their respective owners value them accordingly.

In the first place, the reputation of possessing a horse of exceptional merit carries with it a certain prestige. Second, a stallion that has met successfully the test for vigor, endurance and prepotency has a large financial value. Both factors are duly appreciated and no effort is spared in obtaining a high standard in horse husbandry, which is considered the most fascinating branch of animal industry. The favorite steed is given special care; the animals are kept by themselves on the range where they graze on the luxuriant herbage, but when winter is severe they are housed, exercised and fed liberal rations of hay and grain. The management consists of simple methods, for nature's way is after all the most rational one. Health and fecundity of the breeding stock are admirably maintained, while the real worth of the animal is tested by actual performance.

Such was the status of Icelandic horse husbandry in the republican days. The nation as a whole took deep interest in equestrian sports, as was evidenced by the great care taken in developing good strains of horses and the fact that horsemanship was a common attainment. The stallion fight was a peculiar feature of the horse industry. In the humane light of modern times it may appear as a brutal and barbarous practice; but let it be observed that each age has its characteristics and it must be admitted that from a thremmatological point of view the practice had an important bearing upon horse-breeding in general and stimulated all rural industries. Gradually the horse fight lost its popularity and became an abandoned pastime until finally, in the 14th century, it was totally omitted from public entertainments. But still the effects on the horse of the fighting test and rigid selection for propagation may be seen in the physiological charactersitics of the breed. Such morphological characters as could partly be attributed to the selection referred to are a large head, firm bones, excellent muscular system and great stamina.—[P. A. Ingrason in Breeder's Gazette.

NOTABLE FEATURES OF THE YEAR 1916.

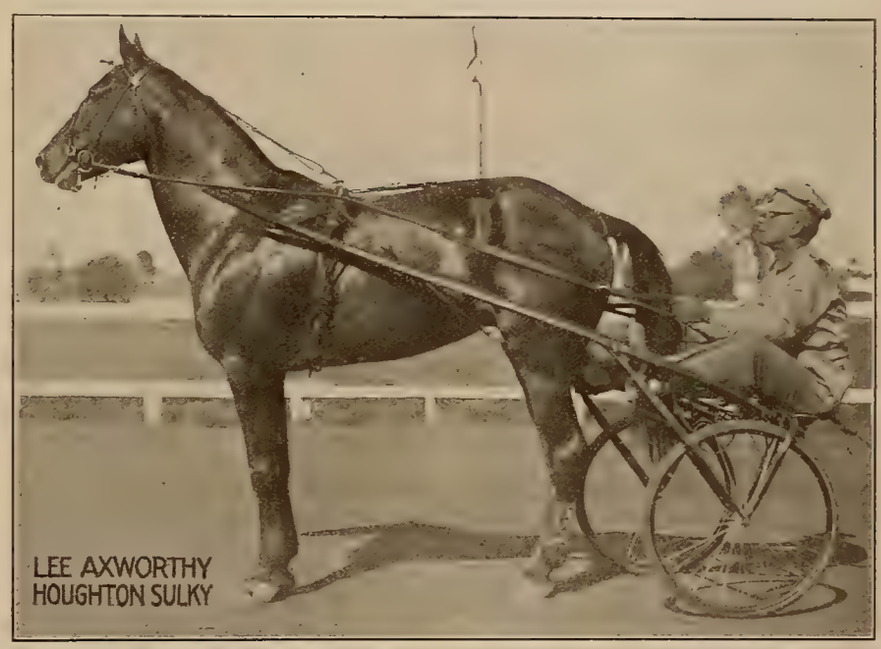
In point of fast average speed, season records, championship performances, number of 2:10 trotters and pacers, and total number of separate meetings, harness racing in this country during the season of 1916 was one of the most notable in history.

In the matter of fields of starters there was a noticeable decrease on mile tracks everywhere, including the Grand Circuit, with an apparent tendency on the part of owners and drivers to shift to half mile tracks, where an unusually large number of $1000 and $2000 stakes and $500 purses were offered to campaigning stables, besides the four seconds of time allowances when racing material was shifted from mile tracks to two-lappers.

The time allowance rules by parent associations and circuit organizations proved rather a drawback to the Grand Circuit, as a great majority of former horses that were expected to return to the big line with better chances to win, either drifted to half mile tracks, or proved unavailing to compete with the regulars, so that the liberal rules, expected to increase the field of starters, did not take place, while those that came under this grant were practically failures.

Due to the three-heat plan, every heat a race and three separate divisions of every purse and stake, it helped make money distribution wider among a larger number of starters than was recorded in the previous season, while the best specialties in the trotting division were not prevented from winning all they could. Under the changes the season closed with a larger number of money winners in small or large amounts in proportion to the number of starters than had been the case in any past year.

Speed and plenty of it was on tap from start to finish of the season, due to the rule under which winrace marks alone affected the eligibility of horses for future racing, with the result that the season closed with an unprecedented fast time for year's records, in a wonderful list of fast horses and also some notable changes in the table of world's championship trotting and pacing marks, most of which are already familiar to interested horsemen.



A brief comparison of 1916 season's best trotting records for age and sex with world's championship marks up to the close of 1915 will show that some wonderful marks were made last season, the most notable being that of Lee Axworthy 1:58¼, the first trotting stallion in the world to trot a mile faster than 2:00, or rather 2:01, the latter being the fastest up to this year.

The mile of The Real Lady, a two-year-old filly, in 2:04¼ in a race, wiped off the best record for age and all sexes, the former best being 2:04½ by Peter Volo, while the marks for fillies and geldings were respectively 2:07¾ and 2:11¼. Buck Watts was the year's champion two-year-old colt in 2:09½, a record for age and sex that was beaten only three times on the harness turf.

Harrods Creek, a three-year-old colt, trotted a mile in 2:06¾, a record for colts that was beaten only twice by Peter Volo and Colorado E. and was equal to third best former world's mark, while the mile of Volga 2:04½, a three-year-old filly, lowered the world's mark for age and sex, 2:05½, held by Mary Putney.

The Exposer was the year's fastest four-year-old colt in 2:06, a mark for age and sex which Directum held in 2:05¼ for twenty-four years until Etawah lowered it to 2:03¼ and Peter Volo to 2:02 in 1915, so that the mile by the season's champion was a meritorious one compared with past performances. Mary Putney, the year's champion four-year-old filly in 2:04¾, now divides honors with Joan, the holder of that record since 1910.

St. Frisco was the season's champion stallion in a race—2:03¼, a mark beaten previously by The Harvester and Peter Volo, both in 2:02, in a race. The fastest mare of 1916 was Mabel Trask 2:03¼, against Margaret Druiens 2:04¼ last year. Two two-year-olds, The Real Lady 2:04¼ and Harvest Gale 2:07¾, beat and equaled last season's best record for a green performer, namely Volga 2:07¾.

The latest and most authentic reports indicate that no less than eighty-seven trotters are entered in the new 2:10 list of 1916. This is an even dozen more than the former mark for one season, namely in 1915, when a total of seventy-five entered the fast list at the end of the racing season, consequently a new record of its kind for the harness turf.

Twenty-six trotters that formerly had records of 2:10 or faster, reduced their marks during the racing season, or just one more than the year before, and peculiarly enough all but four gained faster records in actual race—Lee Axworthy, Lucille Spier, Peter Scott and The Exposer—a smaller percentage of the total than has been recorded in any former season, and shows that the faster contingent was well represented in the season's contest.

That the younger element was well represented in the fast trotting list is shown by the fact that of the eighty-seven new performers forty-six were 2, 3, 4 and 5-year-olds, as follows: Seven two-year-olds, the same number of three-year-olds, fifteen four-year-olds and eighteen five-year-olds, while in the reduced list two were each three and four-year-olds and ten five-year-olds.

Judged by the steady additions that were made to the new 2:10 trotting list it is useless to even make a guess at the number of new 2:10 pacers of the season until the official Year Book is published, except that all available returns on hand show that the fast pacing list will contain the names of 102 new performers. The correct list of reduced record pacers is merely a guess work.

It looks very much as if the East will be as strong with Grand Circuit meetings in 1917 as the West. Among the tracks that will join in are Readville and Brooklyn, two that have not been represented for several years.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Do Ducks Go to China?—Seward, Alaska.—Game wardens along Cook Inlet again have raised the question whether the ducks, which summer in Alaska, pass the winter in China and the Philippines. This question was first raised when the ducks with rice in their craws were killed on Seward Peninsula.

This winter the ducks summering on Cook Inlet had not migrated south on November 1, although zero weather already prevailed. Early in October reports were received that ducks were migrating from Canadian lakes, and from California came word that ducks were arriving in the Sacramento valley a month ahead of time. It was then evident that the migration of Alaskan birds had nothing to do with the arrivals on the southern coast.

Anchorage hunters, hearing that ducks in large numbers were still to be found on the flats, braved the cold late in October to bag them. Several hunting parties nearly came to grief. One party of seven left Anchorage late in October for a day's hunting at Fire Island and returned nearly dead from cold and hunger 10 days later. Most of this time was spent in an open dory bucking the ice. It was too cold for the duck hunters then, but not for the ducks. On November 9 came a break in the weather and a sharp rise in the temperature.

With the warm spell and rain, the ducks decided it was time to move and the fast gasoline boats coming down the inlet noted the first of the migration. These ducks were flying, not southeast toward the coast states, but down Shelikoof Strait to the southwest. This way leads to Asia, by way of the Aleutian Islands and Japanese archipelago.

More Wardens Wanted.—Although $33,500 in fines was collected by the State Fish and Game Commission through arrests made by its game wardens during the past biennial periods, the Commissioners are working for more deputies, and if sufficient funds are available more wardens will be added.

At present there are sixty-eight wardens in the employ of the Commission, but owing to the large size of the State, each warden must patrol a big area, in some instances as large as the State of Vermont.

In his biennial report, President Newbert of the Commission declares that in spite of these handicaps practically all offenders have been arrested and over 83 per cent of the cases resulted in convictions, a higher percentage than is obtained in any other class of cases of like degree.

Seattle Association.—The program on Sunday, Dec. 17th, turned out to be one of the most interesting held on the Association's grounds this season. Using the yardage handicap the "birds" were more evenly distributed than by any other method. With but possibly one exception the turkeys went to the shooter with the medium score.

L. H. Reid, professional, stood at the head of the list for high score and by shooting out an additional fifty targets made a total of ninety-nine out of the hundred. Visiting shooters with the club were Messrs. A. Riehl of Tacoma, Wash., and C. E. Owens of Wenatchee, Wash.

Those shooters who were lucky in drawing down prizes were: J. H. Hopkins, Matt Grossman, Ralph Kinzer, C. E. McKelvey, W. B. Taft, A. Riehl, Hugh Fleming, Harry Williams, Fred Landwehr, George Scripture, R. S. Searle, Hi Follerich, D. F. Williams, H. P. Warner, C. R. McConnell, Dr. Hill, Dr. Kidd.

Considerable interest has been created by the announcement of a trap shooting league in this vicinity, an organization of which is to take place in the near future, to be known as the North West Trapshooter's League and will number all of the active gun clubs of Western Washington. The scores:

At 16 yds. handicap—L. H. Reid 49, C. E. McKelvey 47, Hugh Fleming 47, J. H. Hopkins 44, R. S. Searle 44, Matt Grossman 43, Harry Williams 43, Hi Follerich 43, L. S. Barnes 43, Geo. Scripture 42, A. Riehl 42, C. E. Owens 40, Ralph Kinzer 34. At 16 yards— Joe Bacher 42, Fred Landwehr 40, D. F. Williams 40, H. B. Warner 39, W. B. Taft 38, C. W. Bandy 36, C. R. McConnell 36, Dr. Kidd 33, Dr. Hill 27, Van M. Woodaman 22.

Yours,

Seattle, Wash. E. A. FRY.

Quick Growth of A. A. T. A.—The rapid increase in the number of clubs affiliated with the American Amateur Trapshooters' Association gives some idea of the increasing popularity of medal shooting. There are now 1282 clubs affiliated with the national organizations. Distance or nationality is no barrier to the growth of the A. A. T. A. for the latest census of affiliated clubs shows that there are 55 in Canada, two in Alaska and one in Hawaii.

The wide distribution of clubs belonging to the A. A. T. A. is shown by the following:

Pennsylvania 169, New York 114, New Jersey 54, Wisconsin 51, Minnesota 36, Kansas 31, Massachusetts 29, California 25, Montana 23, Oklahoma 16, Delaware 14, Colorado 13, North Carolina 12, Ohio 11, New Hampshire 10, Idaho 9, Mississippi 8, Maine 7, Louisiana 6, Georgia 5, Utah 5, Rhode Island 4, South Carolina 2, Wyoming 1, Dist. of Columbia 1, Canana 55, Illinois 126, Iowa 93, Indiana 52, Michigan 46, Missouri 35, Maryland 29, Nebraska 27, connecticut 23, Kentucky 21, Virginia 16, Washington 14, Oregon 13, West Virginia 12, Arkansas 10, Vermont 10, Alabama 8, Florida 7, North Dakota 7, Arizona 5, Tennessee 5, Nevada 4, New Mexico 1, Alaska 2, Hawaii 1.

IT'S A HAPPY NEW YEAR FOR HUNTERS.

Deer and Ducks Winging This Past Season Best in Years; Quail Go Out on Last Day.

In the twenty-fourth biennial report of the Board of Fish and Game Commissioners to the Governor, accounting for its stewardship of the license moneys contributed toward conservation by hunters and fishermen of California, fresh from the State presses, appears a wealth of information of great interest to sportsmen. For example, the value of the public resource in fish and game is suggested by the conservatively reached estimate that the known 165,000 hunting and 85,000 angling lecensees of 1915 expended not less than $20,000,000 in the pursuit of fish and game.

The legal department points with some pride to the fact that the Fish and Game Commission not only made more arrests in the last two fiscal years than in any other like biennial period; but that of the 882 fish and 1205 game cases brought, no less than 1742 resulted in convictions, a percentage of 83.6, far ahead of that obtained in any other class of cases of like degree. The fines from these convictions aggregated $33,415 and 3103½ days of jail was added. The cases were divided roughly into, deer 227, trout 100, song-bird cases reached the astonishing total of 115, while deputies made 512 searches of markets, restaurants, conveyances, for suspected illegal fish and game.

Add to these pleasing reports, the good sport experienced so far during the season and you can appreciate that California hunters are naturally going to celebrate a Happy New Year. The scatter gun fraternity up and down the Coast have had nothing but the most successful outings in quest of ducks, geese and deer.

Hunting has really been the very best. The severe winter of 1915-16 played havoc in exterminating deer in the mountainous country and it was expected that game would be scarce. On the contrary, however, an estimate places the number killed as more than in the previous year. The best part is that many does are still left to replenish the herds for the coming year.

AL DURNEY IN ALL HIS GLORY

Popular Alameda Hunter Had Some Good Sport This Year at the Mud Hen Club at Alvarado.

The rather dry spring, migratory law and the fact that hunting stops on the last day of January to give the birds a chance to nest are held responsible for the number of ducks and geese that have been in evidence.

The quail season has not been so prosperous, so far as limit bags are concerned, but birds have been reported as very numerous. The trouble has been in the dryness of the grounds, which makes it difficult for the hunters to locate their game. The season goes out on the last day of the year and it is pleasing that birds have been left to provide sport in 1917.

CHANGES IN WASHINGTON LAWS.

H. M. Fisher is Elected President of State Game Wardens at Meeting.

Tacoma, Wash.—H. M. Fisher, of Port Angeles, was elected president of the State Association of Game Wardens and Commissioners at the concluding session of the annual convention. Many revisions in the game laws were suggested and a committee was named to go to Olympia and urge the importance of the changes on the legislature. North Yakima will be the next meeting place of the association and the date for the convention was set for February, 1918.

CLOSE-UP VIEW OF CANADIAN GEESE

You Find These Beauties Around California Fields and Many Local Hunters Have Bagged Them.

Other officers elected were: First vice-president, A. H. B. Jordan, Everett; second vice-president, George J. Hurley, Okanogan county; third vice-president, James Henderson, Yakima county; secretary-treasurer, James Zizzard, Spokane, re-elected; members of legislative committee, A. G. Gray, Spokane county; George J. Hurley, Okanogan county; R. B. Wales, Spokane county; L. J. Essex, Grays Harbor county; Ira D .Light, Pierce county; H. M. Fisher, Clallam county, and I. H. Hill, Yakima county.

Fully 100 delegates attended the business sessions and the major share of them remained over for the annual game dinner held by the Pierce County Game and Game Fish Protective Association. The visitors declared that the Tacoma meeting was the largest in point of attendance ever held and was one of the most successful from results accomplished. All but seven of the 39 counties of the state were represented.

Many phases of the game laws were taken up in the recommendations sifted out by the legislative committee, which considered all the amendments desired by delegates from every county. The work of L. H. Darwin, state game warden, and his chief deputy for eastern Washington, R. B. Wales of Spokane, was commended, as were Gov. Lister's vetoes two years ago to certain sections of the game laws.

The following are the recommendations made by the association:

That a bill be drafted appropriating money to be paid for bounties on the now existing predatory animals and to include foxes.

That black and brown bear be protected from May until September, inclusive.

That the killing of two-horned deer and that the killing of spotted fawns or does be made a gross misdemeanor at any season of the year.

That any dog hunting deer in the woods that the owner be made responsible for his acts.

A state game farm in or near the vicinity of Walla Walla. where convict labor may be used and asking that $25,000 be appropriated for that purpose out of the now existing game fund.

An amendment to the powers of the game commission giving it gthe right to use money to maintain this association.

A closed season on mountain goat.

Fixing bag limit to have in possession of upland birds to 15.

A law licensing trappers and laws for the protection of fur-bearing animals.

Amending the game laws so that any violator of game laws forfeit his license for that year.

Ask for appropriation out of game fund to pay deputy game wardens in certain sections.

Ask legislature to set aside Ringold island, Brown's island and others in the Columbia river as refuges for migratory birds.

A law to compel screening of irrigating ditches and prohibiting killing of deer one hour before sunset and one hour after sunrise.

Giving game commissions right to open and close season on upland birds in each county at their own discretion.

Clarence Nauman is going in for the 20-gauge gun.

* * *

W. W. (Bill) Richards claims the hunting season on Suisun marshes is the best in ten years.

Sportsmen's Row

A happy and prosperous New Year!

* * *

We extend thanks for the support of our subscribers and advertisers during the past twelve months.

* * *

The Breeder and Sportsman aims to cover the rod, gun and kennel fields in this department and is always open to suggestions.

* * *

Why not boost a home publication by sending in your subscription?

* * *

The Breeder and Sportsman is the oldest sporting publication on the Pacific Coast and is out with the up-to-date news every Saturday.

* * *

To start off the New Year we wish:—

Frederick K. Burnham a pleasant trip to Australia in quest of big game and fish.

Toney Prior more power in busting the blue rocks.

Clarence A. Haight his smile and host of friends.

Heine Pfirrmann a dozen more 100 straight runs.

Frank Ruhstaller continued good sport with his gun and dogs and horses.

Dr. McGettigan good form with his twenty-gauge.

Billy Price more time to get out and bag some ducks.

Portland Gun Club the old spirit of boost and entertaining visitors.

John W. Considine a welcome back at the traps with his gun.

Len Hawxhurst the same old eye and nerve of 1916.

Dick Reed another high average and successful year.

Miss Meyers and more ladies in the game.

W. A. Joslyn a welcome into our ranks.

California Anglers' Association more pleasant excursions.

J. S. French another good setter like Dixie Chase.

Vernon Club the same big tournaments.

Phil Bekeart good healthy recreation out in the fields.

Seattle Association still another banner season.

By all precedent the duck shooting season should just now be productive of many good hunting stories, but the good weather we have had around Vancouver for the past two months has rather put a damper on the claims o fenthusiastic shooters, who have in the past returned to the city boasting of overflowing bags. There is no complaint of a shortage of ducks, at least among the regular hunters, but it is only on odd days just now that they come within reach of the 12-bores. For two months past anyone could walk down to the seaward shore of Sea Island and see away off from shore apparently thousands of fat waterfowl basking in the sunlight on the calm water. —[G. W. T., Vancouver, B. C.

• • •

Gamekeeper Clapp, who looks after the welfare of birds in Golden Gate Park, has found that many of the canvasback ducks which have taken up winter quarters on Spreckels and Stow lakes are dying. Harold Bryant, expert of the Fish and Game Commission, investigated one of the dead birds. He could find no trace of disease, but reported that the birds are extremely thin.

Deny Disease Among Quail.—Placerville (El Dorado Co.).—Hunters who for years had never returned on a Sunday evening with a good bag are now coming in without quail. The hunters say the birds have been afflicted with disease, but Game Warden Euell Gray says this is not so. Both are equally positive in their statements and the hunters have an unprecedented scarcity of quail in this section to back up their statements.

Deputy Gray don't know just what is causing the scarcity. He admits that hunters who never failed before are failing steadily this year; but says that the great numbers of nimrods who have invaded the favorite haunts of the quail in the Shingle Springs vicinity have scared the birds to cover. He says the cold weather would not drive the birds away.

At any rate, in all sections of El Dorado county, the quail hunting is reported very poor.

Deputy Commissioner George Neale of Sacramento, although he has not yet received definite reports from Game Warden Gray, states it is unlikely that there is disease among the quail because they are the one species of birds in the State which has always been in healthy condition.

"The reason they are scarce," says Neale, "is probably because they have moved 50 or 60 miles away in search of food. Although not migratory, quail will move short distances when food becomes scarce in one locality. The present cold weather may have added to their discomfort in El Dorado county, although as a rule the cold does not affect quail."

Rabbit Hunt For Poor.—Salt Lake sportsmen who were members of the excursion party to Cedar valley December 17th, had their fill of rabbit shooting. Not the most picayune could say that the trip was not the most successful of its kind held by the local lodge of the Woodmen of the World, and as a result E. B. Heagren has more than 5000 bunnies to distribute to the Salt Lake poor.

The excursionists — ninety-four strong — left the Union depot at 7:15 in the morning over the Salt Lake Route. Everything was provided for their comfort on the train, from the big, healthy sandwiches and coffee to the best brand of "two-fora-quarters."

Wagons met the huntsmen at their destination and conveyed them to the hunting grounds, which were literally overrun with rabbits. The snows and cold weather had driven the rabbits from the foothills and they had congregated in such swarms that the huntsmen could almost pick them off with their eyes shut.

E. B. Heagren, his brother, H. W. Heagren, and Joe Reese proved themselves the best shots and won the oyster dinner offered for the team which should return the largest shoot. These three killed between 1000 and 1200 rabbits, practically one-fifth of the entire number killed. Their shoot alone filled three wagons.

HAPPY MOTHER AND TWO BABES
This Doe is on a Ranch at Geyserville, Cal., and is Raising Her Family Unmolested.

Casting Plans Popular.—W. F. Backus, one of the most prominent fly and bait casters in the state and a nofficial of the Multnomah Anglers' Club, has received a communication from Paul W. Shattuck, of San Francisco, an enthusiastic caster and angler. It is the purpose of Shattuck and his associates to form an organization of Pacific Coast fly-casting clubs, which will include members at all important points up and down the Coast.

Backus is enthusiastic over the proposal, and has alrcady sent word that he will do all in his power to help along any such organization. The plan is to hold tournaments between clubs at Los Angeles, San Francisco, Portland, Seattle, Tacoma and possibly San Diego.

Clubs in these cities are too far from the East to enter the general competition with the Eastern clubs, o rto enter the national tournament, held each year, but with such an organization held on the Coast this, in addition to the Northwestern tournament, which was held in Portland last year, will tend to make more competition and bring Coast anglers closer together.—[Portland, Ore.

Trap Shooters Are Hardy.—Trapshooting is the only outdoor sport that knows no season and is followed regardless of weather conditions.

That breaking the clay saucers is unique as an all-the-year-'round recreation is proved by the pursuit of the game in northern States when the thermometer lingers at zero or below, and that a majority of the big handicaps are shot in the summer season when the mercury is sizzling in the nineties or above the 100 degree mark.

A principal reason for the seasonless feature of the blue rock shooting is that the game is not played on the ground, as are golf, cricket, polo, soccer, football, etc., nor is it necessary to have a clear field for the base runner, as in baseball.

Another reason is that the original "players" in the trapshooting game were hunters who used the inanimate targets to keep in form for field shooting or found in the clay birds a substitute for the vanished game of wood and marsh.

However, the sport is not limited to enjoyment by those who have "roughed it," but is now followed as much by the office or professional man as the outdoor devotee, but even so it numbers no mollycoddles or those who "live softly" in its ranks for its pursuit, especially in the many matches held, requires that the upholding of the individual or club supremacy frequently means disregard of heat or cold, sunshine or storm, and during the winter season shooters are sometimes called on shoot their score standing in snow, ice or slush.—[By "Trapshooter."

Plans For Coursing.—The Capital City Coursing Club has voted to affiliate with the National Coursing Association, the governing body of coursing throughout the United States. The Secretary will correspond with Secretary C. E. Root of the National body to determine whether the Sacramento club will be admitted.

The club also decided to co-operate with the California Club of San Francisco so that no conflicting dates for meets will be arranged.

Secretary Eugene Panario submitted his resignation, but the club refused to accept it, and laid it aside for further consideration.

The club will stage a meet before the end of January. The next meeting will be held January 3d.

WILD DUCKS SURROUNDED BY HOME LIFE

Mrs. Theo Kytka, wife of the handwriting expert, is shown feeding domesticated wild ducks in the back yard of her home at 2682 Union Street, San Fra ncisco. Notice the interest of the pointer dog.

MT. WHITNEY HATCHERY ALMOST READY.

Greatest Plant of its Kind in the World Has Been Officially Christened.

On Oak Creek, four miles northwest of Independence, stands practically complete a great and picturesque structure architecturally unique in America—the Mt. Whitney Fish Hatchery, now officially christened. Workmen are putting on the final interior touches. By January 15 it will be turned over to the California Board of Fish and Game Commissioners in readiness to receive a few months later the 6,000,00 to 10,000,000 eggs which will be the initial yearly capacity.

It is the most artistic, modern, complete and beautiful institution of its kind and will ultimately be the world's largest. This is the first unit of a group for which plans have already been prepared. It cost about $75,000 and modestly shows its class, which is A. Instead of being the last word in hatcheries it is the first letter or which words are made. Even the aristocratic trout of the future must be proud to have made a start in such a place.

The building holds a commanding position at an altitude of 4300 feet and is strikingly distinctive in many ways. It is a fine example of the Swedish type, particularly the massive tower. In a different invironment it might easily be mistaken for an old English church, since the Britons borrowed that style of orchitecture from the Norsemen: But it was designed to harmonize with its grand setting out there on the sagebrush slope at the feet of our own Alps, the profile of its majestic range especially considered. It fits snugly and impressively.

It fronts east. Before it stretches the Owens Valley to the towering barricades of the White Mountains and up and down as far as the eye can reach. Near by work is in progress on El Camino Sierra, the State highway which bisects the valley lengthwise. Behind it rises an eternal gray wall, granite pile heaped atop of granite pile two and a half miles into the blue sky—the awe-inspiring, white-topped Sierra Nevada. Over this Titan wall guarding the beauty of the vale summer sunsets flaunt endless streamers of purple and pearl and pink against a background of golden flame. From the serrated summit edges, the truncated and pointed cones and the icy ridges snow banners now fly in the winter gales. Imagine if you can the view from that hatchery observatory!

The structure is 200 feet long by sixty-five wide, and the tower eighty-five feet high and thirty square. The walls throughout are of rubble work with steel re-enforcement, generally three feet thick and nowhere less than two, and guaranteed not to crumble until the mountains shall fall. They contain approximately 3500 tons of boulders of various soft shades, all picked up within a quarter of a mile. A remarkable feature in this connection is that not a single stone on the outer surface of the wall was cut or even broken. They were sorted to fit, and all show their natural faces. Even the keystones in the arches and the flat, square ones in the lintels and steps were found ready to place. There were seventy windows and eight doorways to be thus provided for . Including the floors, foundations and hatchery equipment there is over 500 cubic yards of concrete.

Spanish tile, ranging in color from cinder brick to straw and matching the walls, make an effective roof, practically and esthetically. There are deep strata of red in the upper mountain background and these balance the color values. The tile came from Lincoln, a little town just above Sacramento, where the clay is found in the natural tints desired.

The hatchery proper, which is the reason for the building's existence, is a snow-white room, 45x155 feet. It will have the latest possible appliances, and the best. The installation of basins and fixtures is under way. Connected with it is a splendid laboratory. Its water supply comes through a twelve-inch pipe from an intake for which Oak Creek was dammed below the junction of the north and south forks. The water is exactly right for its purpose. For domestic use and fire protection a high-pressure four-inch pipe has been laid from another dam on the south fork. A stream can be thrown over the tower. Though the building is fireproof no precautionary measure has been overlooked.

The main entrance, huge and imposing and gracefully arched, is in the center of the tower front, and leads to a large reception hall, outer and private offices, laboratory and other rooms on the first floor. On the second floor, reached by inner and outer stairways, are attractive and spacious quarters for the superintendent and his family, including a model kitchen and a southern-exposure sleeping porch with an outlook to make an artist dream—or despair. In the tower on this floor is a beautiful guest chamber, and above that, lighted by immense windows, the observatory . Here padded cells may have to be provided for artists, though no such suggestion appears in the plans. The panorama in any direction is entrancing. At the opposite end of the building, over the hatchery, are dining and living rooms, laundry, bedrooms and other accommodations for the employees. Wherever needed are large stone fireplaces with heavy mantels, so that the many rubble chimneys which adorn the structure are really useful as well as ornamental . All the wood-work is rough finish, gray-stain effect inside, except in the white hatchery, and brown outside for contrast with the walls. All electric wires are in conduits. The commission will put in its own generating plant, utilizing the water power abundantly obtainable.

The building, with the exception of the roof, was put up entirely by day labor under the direction of H. V. Grant, superintendent of construction for the State Department of Engineering, who began the task May 1st and is now finishing. He is a young man, but has been with the department eight years and has handled a number of the State's large works. About 500 men from all points of the compass have been employed, some thirty minutes and others six months. At the height of operations there were sixty-five on the pay roll. The edifice was designed principally by Charles Dean of the State Department of Engineering in co-operation with and following out the general lines suggested by the Fish and Game Commission. Commissioner M. J. Connell of Los Angeles is credited with the match-the-mountains and last-forever ideas embodied. The bare building cost $50,000, and the garage, dams, pipe lines, water and sewer systems $10,000, making $60,000, which the Engineering Department is expending. The fish commission provides the balance.

Eventually the Mt. Whitney group is to consist of two more hatcheries of the same type, without towers, and several other necessary buildings. There are forty acres of grounds, rough and strewn with boulders the size of elephants, and there is opportunity for a comprehensive parking scheme which is to be carried out, and the like of which does not exist elsewhere. The natural features are to be little disturbed, but their charm enhanced. English ivy will be liberally used, on the rocks as well as the walls, and there will be cascades, fish ponds, hedges and tree clumps, all in accord with the symphony already started.

Frank Shebley, an expert, and brother of W. H. Shebley, in charge of fish culture for all the State hatcheries, is believed to be slated for the superintendency of the new plant. During the summer he made a complete survey of Rae (re-named Naylor) Lakes for the purpose of collecting rainbow trout eggs, which will be hatched exclusively here. The vast number of fish found on the spawning beds assures a full supply. The Mt. Whitney hatchery will furnish fry for all California from the Yosemite south.

The demand on the commission for trout to stock streams and lakes has been multiplied by five in the past few years and is still increasing in the same surprising proportion. Better roads, more automobiles and a consequent hegira to the land of outdoors brought it about. The commission is sometimes kept jumping sideways. It now contemplates hatcheries of somewhat similar design to the Mt. Whitney, though less pretentious, at Lake Tahoe and near Santa Cruz and the Big Trees, as well as remodeling the Mt. Shasta (formerly Sisson) wooden buildings to make them permanent.

The trout has become a whale of a factor in California life.

NOT BROTHERS, NO RELATION

It's a Fawn and a Hunting Dog Making Friends and Forgetting Past Differences.

Don't Fool With Laws.—There is a movement on foot in some portions of the country to pass laws prohibiting the feeding or baiting of wild duck, but it would be far better for the duck shooters in this country if there were a law passed making it obligatory upon each one to do his proportion of the feeding.

The difference between good and bad seasons for wild fowl in this country depends much more upon the favorable or unfavorable conditions afforded for feeding grounds and loafing grounds than on any change in the numbers of birds from season to season.

We can state without fear of contradiction, that Northern and Central Mexico in the winter season afford the greatest rendezvous for migratory ducks in the world today, and the greater percentage of these birds pass in flight over some portion of the United States on their way South in the fall.

BANNER FIELD TRIALS YEAR AHEAD.

Clubs Along the Coast Are Reviving Interest in the Aristocratic Sport.

Pacific Coast followers of the artistocratic sport of field trials have reason to rejoice over the prospects that loom up in the New Year that is about to come in. Indications point to more dogs being in competition and more interest taken in the pastime than in seasons past.

There was a noticeable revival during 1916. Washington, Oregon and British Columbia got back on the map by staging trials and the parent body, the Pacific Coast Club, held its most successful events at Bakersfield than in some time. The beauty of the sport is that new fanciers are commencing to take interest and the veteran members are sprucing up.

J. S. FRENCH'S DIXIE CHASE

Winner of Members' Stake at Bakersfield Trials This Year.

As President A. G. Wilkes of the Coast Club said in his address at the annual meeting, the right way in which to promote the best interests of field trials is for every fancier on the Coast to get in and try to put in an attendance and to run a dog. "It will not do," he argued, "to let just a few members run five or six dogs. Let every one plan to start at least one dog and then you will find competition keener and more dogs and more people at our trials.

"The Coast Club is recognized as one of the oldest, if not the oldest, field trials organization in the country and we are expected to take the lead in boosting. What we should do for the coming season is to make arrangements to send some dogs to the northwest trials and if possible make a trip up there to get acquainted with our neighbors. In turn they would send down some setters and pointers to our trials and in course of time we could work up quite an extensive circuit, the same as they have in the south and other sections of the country. We all have dogs and love the sport but in the future we will have to get together better and make for more success."

The Coast Club is counting on holding their thirty-fifth annual trials in the month of January for the coming season, which brings them to 1918. Under the present game laws, the quail season goes out on December 31st and it compels holding the trials in December when conditions are not the best. The ground is usually dry and it makes harder work on birds.

The field trial members seem to think that the quail season will be extended until January and that will give them an opportunity of enjoying their sport at the time when everything is ideal.

Finding a new home is a problem that the field trial members may also have to solve. They may be forced to move from Bakersfield, where they have been going for a matter of thirty years past. The executive committee of J. A. Chanslor, J. Walter Scott, Phil M. Wand and J. S. French will take up the matter and have several sites in mind.

From Oregon, Washington and British Columbia come encouraging reports and the field trial enthusiasts can look forward with much joy to a prosperous and bright New Year.

Licenses Fall Off.—Klamath Falls (Ore.).—Two thousand five hundred and ninety-one licenses to hunt and fish in Klamath county were issued by C. R. De Lap, County Clerk, and his deputies during the year 1916, according to a report sent by him to the State officials.

For those 2,591 licenses, $3,054 was received. Of this sum Klamath county got $2,898.45. The licenses for 1916 were divided as follows: Non-resident, 30; combination, 160; anglers, 1,027; hunters, 1,373.

The sale of licenses this year fell short of the record for 1915, when a total of 3,137 licenses were issued, or 546 more than for this year. Clerk De Lap was not able to account for this discrepancy.

COAST TRAP SHOOTERS ARE HAPPY.

Registered Tournaments on Sundays Will be Means of Giving Sport Its Biggest Boost.

Looking back over the season of 1916, trap shooters along the Pacific coast can congratulate themselves on the successes and achievements that have been accomplished. Old-timers proclaim it the best in the history of the blue rock pastime. Certainly more newcomers made their appearance and the performances were better than ever before.

The new year looms up with even better prospects. From the northern coast of British Columbia, clear down to San Diego in Southern California, the trap shooting clubs are preparing to usher in the banner season of them all. One big reason for the celebration was the permission granted by the Interstate Association in permitting registered tournaments on Sundays. For years, the Western shooters did not have a chance to figure in the averages by reason of no registered targets on Sundays.

The Breeder and Sportsman modestly claims some credit for giving the local shooters a chance to enjoy their sport on their favorite day at the traps. This paper was the first to call attention to the unjust legislaion of the national association and others all over the country saw merit in the argument and gave their aid to letting down the bars. The result will be that the sport out in this section will be given the biggest boost it has ever enjoyed.

Another thing that can be looked forward to with a deal of pleasure is the many trapshooting leagues that are springing into existence out on the Coast. In the Eastern States circuits of clubs holding events from time to time have been popular for some time and it is with much pleasure that we note the shooters of the Northwest getting together with Seattle, Portland and Spokane lined up against each other in friendly competition. A movement is on foot here in Northern California to get a circuit started and perhaps later on the Southern California scatter gun artists will organize a circuit. The Elk lodges are talking of getting in the fun and all told, the outlook is bright.

READY TO HUNT IN AUSTRALIA

Frederick K. Burnham, Well-Known as a Hunter and Fisherman and Trap Shot of Martinez, is Going on a Pleasant Trip This Year.

Then, the individual clubs are commencing to talk of events for an early date. In Seattle, Portland, Spokane, Los Angeles and other points the clubs stage their shoots right on through the year round. About San Francisco Bay the gunners are so busy hunting wild game that they do not turn out at the traps, but the interest is there and when the opening gun is sounded in February or March you will see a big gathering turn out.

The game seems to be in line for twelve months of prosperity. Old-timers are coming back and recruits are getting in and the men who have been following the sport loyally are wearing wide smiles of contentment.

That the Coast is not alone in the advancements being made is indicated by the report of E. Reed Shaner, secretary of the Interstate Association, who makes the following interesting and pleasing comparisons in his annual report:—

	1914	1915	1916
Different Contestants in Registered Tournaments	7,049	8,140	10,528
Tournaments Registered	314	333	546
Applications Refused	15	76	9
Tournaments Registered, "Old Policy"	69	104	295
Tourn'm'ts contributed to State Tourn's Registered.	245	229	223
Tournaments Registered in Canada	39	42	46
Reports Received	14	11	16
Tournaments Canceled	313	332	501
Targets Trapped	11	11	29
Average Number Targets Trapped, per Tourn't	4,780,690	4,814,260	6,366,110
	15,273	14,500	12,700

Trap Scoring Machine.—A mistake in the scoring of the targets broken by A. R. Stevenson, of Jewell, Iowa, in the Iowa State shoot in Mason City, in 1914, prompted that gentleman to invent a machine for the scoring of trapshooting competitions.

The machine, ready for work, is situated about half way between the firing line and the traps, and is operated by means of two levers, connected with the machine by jointed rods, from behind the shooter. The operator is also the referee. The figure 1, two inches tall, is marked for a broken target, and an 0 of the same dimension for a lost target.

The feature of the machine is that the score is always visible to the trapshooters, and should a mistake occur it could be corrected immediately. At the present time the scoring is done to the south of the fifth peg on the firing line by an assistant to the referee, and as trapshooters seldom ever look at the score until through firing at their full quota of targets it is then too late to make corrections if a mistake has been made.

These mistakes occur at times—as we mentioned in the opening paragraph one happened to Mr. Sternerson,, and he hopes through this machine to avoid mistakes in the future. In the Iowa State shoot in 1914 Stevenson broke 15 targets at Trap 1; 14 on Trap 2: 15 on Trap 3, and then another 15 on Trap 1. After this Stevenson took a look at the scores and found that he had been credited with only 13 breaks on Trap 3. To say he was somewhat peeved is putting it mildly. He was so peeved that he at once formed a plan to eliminate the scorer—which will occur if the machine is universally used.

Sometimes mistakes are blessings in disguise.

Shoot With Both Eyes Open.—As to whether it is better to trapshoot with both eyes open or to shut the eye not directly concerned with the sighting, seems to be a source of considerable worry to some shooters, especially beginners.

If a shooter is possessed of a pair of normal eyes, undoubtedly the proper way to sight a shotgun is to keep both eyes wide open and focussed on the target in a natural and easy manner.

The advantages of sighting in this way are a clear view of the entire field, including that part which would be otherwise cut off by the gun barrels, and freedom from the eye strain which results from any unusual use of the eyes.

I should certainly advise all new shooters to learn to shoot with both eyes open, unless some actual optical defect makes it impossible.

Older men, who have been shooting for a great many years with one eye sighting, as constant practice, will have crystallized into a second nature the habit of closing one eye.

A point to be considered, however, is that you have nothing to lose by the test, as it is easy enough to to go back to the old system again, if necessary.—By Trapshooter.

NOT AFRAID, BUT JUST CURIOUS

A little white fawn at the State Game Farm at Hayward is investigating the remains of a coyote that was trapped and killed. If the coyote were alive the investigation would doubtless prove quite costly to the beautiful little creature.

HEARD ALONG KENNEL ROW.

San Joaquin Valley to Have Big Club.—George Thomas Loses Airedale.

What fun is there in buying a dog to win? That was discussed with a prominent breeder. The writer insisted that there was more fun and real sport in breeding a winner. The fun comes when you buy a dog as a puppy and take a gamble, condition him and watch him grow up—so said a vertain exhibitor. She maintained that there was just as much sport in doing a thing like that as in breeding one yourself.

* * *

George Thomas has been shedding a few tears these days over the loss of Double Decker, an Airedale which he says is the best in the world. George bought the dog over in England and had all arrangements made for his shipping. The crate arrived ship-shape at Liverpool but there was no dog in it. No trace has been found of him since.

* * *

As the result of a dog exhibit held by San Joaquin Valley fanciers at Fresno the past week, a movement has been launched to organize a kennel club, with headquarters in Fresno.

The movement is headed by R. L. Bettis, owner of the Hy-Born kennels. Mr. Bettis served as judge at the recent Fresno exhibit, and declared Gypsy Queen, a pointer owned by C. E. Burke, winner of the sweepstakes. The attention bestowed upon the dog exhibit was such that Mr. Bettis concluded that the San Joaquin Valley is entitled to a regularly organized club, and took the initiative in the matter. A meeting of fanciers to discuss the formation of the proposed club will be held in Fresno within the near future.

* * *

The winners at the recent exhibit at Fresno were as follows:

Pointers—Dog, first, Duke, W. D. Crichton; female, first, Gypsy Queen, C. E. Burke; puppy, Duke, H. W. Stitt. Best in class, Gypsy Queen.

Airedales—Dog, first, Highbinder, S. S. Hubert; females, first, No Name, E. W. Whalen; second, Queen, Evelyn Eckman; puppy, first, L. K. Marshall. Best in class, Highbinder.

Bostons—Dogs, first, Bert L. Allyn, Sanger; second, D. Leland; third, W. Warnekros. Females, Nellie first, T. M. Harkness; second, Midge, Mrs. Grace Fisher; third, Mrs. C. E. Cornell.

Irish setter—First, Uno D, A. N. Dillingham.

Collie—First, dog, C. G. Fleischauer.

English Bull—Dog, first, Lawton Thomas; second, Mrs. C. E. Cornell; third, G. R. Duncan; puppy, J. L. Miller.

Sweepstakes—Gypey Queen, pointer, C. E. Burke.

* * *

It's an ill wind, and so forth. The war over in Europe has done a lot of things, and among them now comes the news that America is likely to get the best dogs that England ppossesses. A certain British woman, who is one of the leading breeders and judges, said the other day that there was every chance in the world that an embargo would be placed on dogs in England. She stated that it looked as if there was going to be a meal check system put into force in England, and for that reason the dogs would have to go by the board.

* * *

The butcher on the Baltic said the other day that the smallest Pekingese he had ever brought over came on his last trip. It was consigned to Mrs. Leslie Hall. He came from Mrs. Herbert's English kennel. He is a bold little chap and looks like the makings of a regular dog when he grows up. There were five others, all reds, and pretty good looking ones, too.

THE FARM

Not Result of a Long Purse.

That it was not a long pocketbook which won for the University of California the Grand Championship at the International Livestock Show at Chicago, with the steer California Favorite, of the University's own breeding and raising, is a source of special pride to the College of Agriculture.

This wonderful California steer was sired by a bull for which the University paid only $400. From this same sire the University has raised bulls which it has sold at from $500 to $700 each to practical breeders. The dam of California Favorite cost the University $267. Thousands of breeders throughout the United States are paying prices many times as large as this for animals they regard as desirable for building up their commercial herds, as distinguished from the rich man's show herd. The herdsman who feeds and cares for these splendid beef animals raised by the University of California at the University Farm at Davis receives no more wages than hundreds of herdsmen of other pure-bred herds.

The feed cost of raising this calf, and keeping his dam one year, charging everything to it from birth to the International, was seven and a fraction cents per pound. This steer and the animals shown at this International, or any State Fair, by the University of California, have not, and never have received any more care than any breeder of pure-bred animals can afford to give the few exceptional animals in his herd which are worthy of being shown at a public exhibition.

It is a mistake, says the University, for any breeder to take his best animals direct from the pasture lot to a show and then apologize for their rough appearance. A show is a place where contenders for prizes expect to show the excellence of their best animals and their greatest skill in preparing them for show.

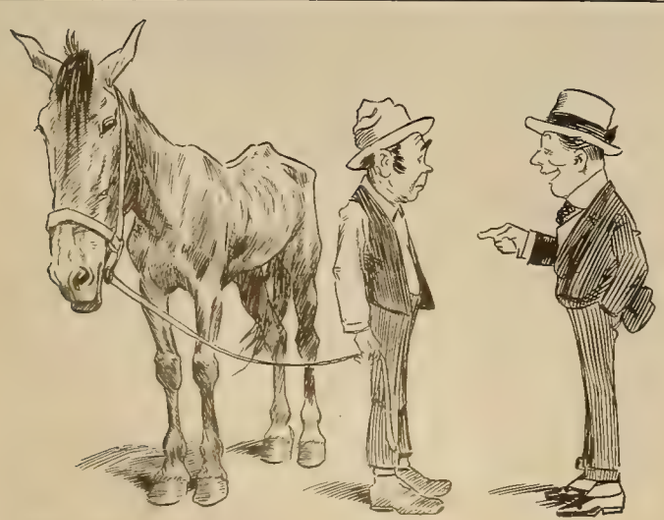
The University Farm has never exhibited any animals not bred and fitted by the University. During the past four years it has won eighty championships, of which eight were grand championships, in addition to many first and lesser prizes.

The value of showing University animals is two-fold. It demonstrates to the students and the public the fact that the instructors who select and direct the care and handling of these animals are commercially practical men, who can not only select but breed wisely, and successfully feed, care for, and manage the animals throughout the year. Further, it illustrates to the students, who become familiar with the animals in classes, the fact that the animals they are working with are the kind which disinterested judges, often from other states, consider the best types of the several herds.

The winning of the International Grand Championship by California Favorite against the rest of the United States and Canada not only directs attention to the State of California's possibilities for livestock, but illustrates what can be done without corn in the fattening ration.

Cost Seven Cents a Pound to Raise.

The steer bred and fed by the University of California that broke the world's record by selling for $1.75 a pound, on the foot, after winning the Grand Championship at the International Livestock Show in Chicago, was produced by the University at a cost of only 7.35 cents per pound. It cost the University Farm at Davis $77.98 to raise this steer, and he sold for $1959. His showyard winnings amounted to $398, so he brought to the University of California a total of $2359. Had he been sold at the top market price that day ($12.50 per cwt.), he would have brought $243.75, a profit of $165.77.



Never until the University of California won the Grand Championship and the Reserve Grand Championship at the recent International Livestock Exposition at Chicago with steers of its own breeding and raising, had one and the same exhibitor won both of these prizes on animals of his own breeding. This is the ninth time an international grand championship has been won by an agricultural college, but never before has a college won with a steer of its own breeding, as has the University Farm at Davis this year.

Hide Prices Have Doubled.

A comparison of current raw hide prices with those of recent years reveals sharp general advances. Heavy native steers hides that were listed at fourteen and one-half cents ten years ago now command from twenty-eight and one-half to thirty cents. Heavy range steer hides that ten years back went at thirteen cents now bring twenty-seven to twenty-seven and one-half cents, extreme light steers that then went at ten cents now make twenty-seven cents, branded cow hides that a decade since went at nine and one-half to nine and three-fourths cents have been marked up to twenty-six and one-half cents, while light native cows that then sold at twelve to twelve and one-fourth cents now command twenty-seven and one-half to twenty-eight cents. The strong position of the hide market is a factor of great underlying strength for the canner and other low priced cattle.

Woolgrowers at University Farm.

To further the interests of the sheep and wool industry of California, the State Wool Growers' Association and the University of California have invited all wool growers and others interested in the problems of wool growing to visit the University Farm at Davis on Friday and Saturday, January 5 and 6. There will be a carcass and shearing demonstration on Friday afternoon, January 5 ,and on the following afternoon a demonstration in docking and dipping. There will be addresses and demonstrations by members of the faculty of the College of Agriculture and other prominent speakers. A feeding experiment with some four hundred old ewes will close at that time.

JIM: "Where are you taking your old favorite, Mike?"
MIKE: "Down to the auction to get what I can for him, he's all in."
JIM: "I had one worse than that and HORSE HEALTH put him back in nice shape. Take my advice and give him a treatment. It costs little and works wonders."

SAVING SEED CORN.

The Value of Seed Corn Depends Largely Upon Proper Sorting.

Corn contains a high per cent of moisture in the fall, and, according to Professor E. G. Schafer of the experiment station at Pullman, Wash., unless it is cared for properly, the vitality may be greatly reduced, or even destroyed. The injury results from moulding before the ears are dry. This injury may be largely averted by proper storing. The ears selected for seed should be put in a dry place, where there is free circulation of air. A good method is to tie the ears to binder twine and snspend them from the ceiling of the seed room or attic. The ears should be arranged so as not to touch each other. After the ears are thoroughly dry there will be little danger of moulding.

More than enough ears should be saved for planting the next year's crop. The final selection and preparation of seed corn may take place in the early spring. Ears which are not in good condition at this time should be discarded.

Home-grown seed is superior to other seed because of its becoming acclimated. It requires from seven to ten pounds of shelled corn to plant one acre.

PREPARE FOR WINTER DAIRYING

The manner in which cows are fed and managed during the six to eight weeks' period prior to calving has much to do with their year's production. Improper feeding or failure to give proper rest between lactation periods usually results in a decreased production for the lactation period, no matter how near perfect the feeding and management may be after the cow has freshened.

Winter dairying on the farm has many points in its favor as compared to summer dairying, so it is best to have most of the cows freshen during the fall and early winter. It has been proved that cows bred to freshen in the fall will produce from 15 to 25 per cent more milk in the year than if they freshened in the spring, because in the former case, if given half a chance and supplied with good corn silage and alfalfa hay they will still be producing a fair quantity when they go out on grass in the spring while if they freshen in the spring they are subject to hot weather, flies, and usually by a scarcity of food, and soon decline in the flow. Another point to be considered in this connection is the fact that irrespective of time of freshening, cows give a slightly higher per cent of fat during the winter months, the distribution of labor, summer months. The higher price paid for butterfat during the winter months, the distribution of labor, as it brings the most work during an otherwise slack season when it can receive the attention it deserves and the fact that calves born in the fall have a better chance for growth during the first year.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

Every bottle of Caustic Balsam sold is warranted to give satisfaction. Price $1.50 per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

THE LAWRENCE-WILLIAMS COMPANY, Cleveland, Ohio

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

A Perfectly Safe and Reliable Remedy for Sore Throat Chest Cold Backache Neuralgia Sprains Strains Lumbago Diphtheria Sore Lungs Rheumatism and all Stiff Joints

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

REMOVES THE SORENESS—STRENGTHENS MUSCLES

Cornhill, Tex.—"One bottle Caustic Balsam did my rheumatism more good than $120.00 paid in doctor's bills." OTTO A. BEYER.

Price $1.50 per bottle. Sold by druggists, or sent by us express prepaid. Write for Booklet R.

Red Ball Stock Food Co.,
OAKLAND CAL.

BETTER SURE THAN SORRY

Every horseman wants to know how he can get the best results for his money. If you use the right remedy, it will save you money. **Look into the Question.** It is one that has been settled to the satisfaction of the most progressive owners and trainers. Send for sample of our contract and unquestioned proof.

WHERE IS HE LAME? CAN HE BE CURED?

It is surprising how accurately it is possible to diagnose the most chronic, complicated and uncertain form of lameness—and to treat **ALL** such cases successfully by the aid of our **FREE BOOK.** It is a book of facts—nowhere else found—our discoveries of over 21 years. No horse owner should be without it.

This Book and a Bottle of Save-The-Horse Makes Him $800

Ogden, Ia., April 18, 1916.

TROY CHEMICAL CO., Binghamton, N. Y.

Gentlemen:—I have used Save-The-Horse for years and I never found any case but it would do just what you claim for it. At present I have a horse I want to race and want your advice and another book. I lost or mislaid mine. The last time I bothered you, your advice and treatment did the work, and I sold the horse for $800.

Yours truly, H. S. HELPHRY.

Spavined Mule, Plus Save-The-Horse, Profit $300

Here is a typical case—Mr. C. B. Warner, Port Crane, N. Y., bought a team of mules cheap, because one was lame. He located the trouble by the aid of the "Save-The-Horse BOOK," and treated with SAVE-THE-HORSE REMEDY as directed. In a short time he made a complete cure, and now has one of the finest teams of mules in his county—he was offered twice what he paid for them!

SAVE-The-HORSE (Trade-Mark, Registered) WILL CURE IT!

OVER 200,000 cases of lameness successfully treated with **Save-The-Horse.** It is a by-word among noted horsemen and breeders that **Save-The-Horse** is a prompt-acting, sure-cure remedy.

BEAT OUT THE HUMANE SOCIETY

This is constantly happening in large cities. Take no chances in driving a lame horse; be guided by the experience of racing men, as in this instance:

C. O. Brown, 340 Emerson Place, Youngstown, O., writes: "I used Save-The-Horse for a splint; she was so dead lame 'Humane Society' would have had me arrested had they seen her. Veterinary said stop work and blister. Instead sent for Save-The-Horse. Never let her up. She was worked right through and no one ever saw her take a lame step."

A Winner Again — Thanks to Save-The-Horse

Geers, Murphy, Cox and other famous trainers all attest to the remarkable cures made with Save-The-Horse.

SAVE-THE-HORSE TRADE MARK REG'T.

is for Ringbone—Thoropin—**SPAVIN** or **ANY** Shoulder, Knee, Angle, Hoof, or Tendon Disease, no matter how old, serious or complicated.

$5 and every bottle of **Save-The-Horse** is sold with Signed Contract-Bond to return money if remedy fails.

Write for copy of this contract and our 96-Page **BOOK.** It goes to the root of 58 kinds of lameness, and our expert veterinary's advice is free to horse owners and managers. Be sure to send today for this **FREE BOOK.**

TROY CHEMICAL CO., Binghamton, N.Y. Druggists Everywhere sell Save-The-Horse with CONTRACT, or we send by Parcel Post or Express Paid.

D. E. NEWELL, Agent, 80 Bayo Vista Ave., OAKLAND, CAL.

$2,500 GUARANTEED **GUARANTEED $2,500**

The State Fair Futurity Stake No. 9.

TO BE GIVEN BY THE

CALIFORNIA STATE AGRICULTURAL SOCIETY

For Foals of Mares covered in 1916 to TROT and Pace at Three-Years-Old, 1920.

Entries Close: Tuesday, January 2nd, 1917

$1,500 FOR THREE-YEAR-OLD TROTTERS. **$1,000 FOR THREE-YEAR-OLD PACERS**

CONDITIONS

Entrance and Payments—$2 to nominate mare on January 2, 1917, when name, color, description of mare and stallion bred to must be given; **$5** May 1, 1917; **$10.00** on Yearlings May 1, 1918; **$10.00** on Two-Year-Olds May 1, 1919; **$10.00** on Three-Year-Olds May 1, 1920.

Starting Payments.—$35.00 to start in the Three-Year-Old Pace and **$50.00** to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place. Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Races three heats, money divided 25 per cent to the first heat, 25 per cent to the second heat, 25 per cent to the third heat and 25 per cent to the race according to rank in the summary. Money divided in each division 50, 25, 15 and 10 per cent. Should two or more horses be tied for first place at the completion of the third heat, such horses only shall contest in a fourth heat and money divided according to rank in summary at the termination of that heat. A horse having won the first two heats and drawn or distanced in the third heat shall not lose position in the summary.

If a mare proves barren or slips or has a dead foal or twins; or if either the mare or foal dies before January 1, 1918, her nominator may sell or transfer his nomination or substitute another mare or foal, regardless of ownership; but there will be no return payment, nor will any entry be liable for more than amount paid in or contracted for.

Entries must be accompanied by entrance fee.
Nominations liable only for amounts paid in. Failure to make any payments forfeits all previous payments.
This Society is liable for $2500.00, the amount of the guarantee only.
Hobbles will be barred in trotting and pacing divisions.
Right reserved to declare off or re-open these Stakes in case the number of entries received is not satisfactory to the Board of Directors of this Society.
There will be no more moneys in each division or heat than there are starters. Entries open to the world.
Other than exceptions made on this entry blank, rules of the National Trotting Association to govern.

JOHN M. PERRY, President.

CHAS. W. PAINE, Secretary,
Sacramento, California.

$10 DUE ON FOALS OF 1916.

Third Payments:

JANUARY 1st, 1917.

Pacific Breeders Futurity Stakes No. 16---$3,000

Get Your Horses Sound

REMOVE blemishes and stop the lameness so that you can get the top price at the sale or have sound, strong horses for next season's work. The time to do this is NOW and the best Liniment I know of for the purpose is

ABSORBINE
TRADE MARK REG.U.S.PAT.OFF.

Absorbine is used by successful breeders year after year. To the owner of high-grade stock, the first requisite for a liniment is that it shall be absolutely safe, and no matter how carelessly used, cannot injure the animal. Absorbine is purely herbal and can do no harm. It does not blister or remove the hair and horse can be used. Then they must have results — the liniment must allay pain and take out inflammation and soreness quickly, reduce the swelling and thickened tissue. It must be healing, cooling, soothing and strengthening. Absorbine does all these things quickly and effectively.

In addition Absorbine is a positive antiseptic and germicide and when applied to all irritated surfaces, boot-chafes, sores, galls, cuts and lacerations, it kills any germs that may be present; makes the part aseptically clean and causes a healthy healing.

USE ABSORBINE to reduce Bursal Enlargements, Bog Spavins, Thoroughpins, Puffs, Shoe Boils, Capped Hocks, Swollen Glands, Infiltrated Parts, Thickened Tissues, Rheumatic Deposits, Enlarged Veins, Painful Swellings and Affections, Strains or Lameness; to repair Strained, Ruptured Tendons, Ligaments or Muscles; to strengthen any part that needs it.

You can buy ABSORBINE at regular dealers, price $2.00 per bottle or sent postpaid with full instructions. Write me about any special case on which you would like advice.

W. F. YOUNG, P. D. F.
54 Temple St., Springfield, Mass.

Election in the Equine Republic

Naturalists have long ago established the fact that all animals in a natural state have forms of governments of their own.

This sagacity is instinctive, and very nearly approaches reason, and gives the lower animals the power to select what is best for them.

In the cartoon is depicted the character of the voters personified, and is a revelation what the faithful, dumb friend of man would do to assuage the suffering among his kind.

The aspect of seriousness of the voters is characteristic of all animal organisms, great or small, when controlled by physical environment, in an effort of self-preservation.

If the **22,000,000** of the Equine Family in the United States could, in their natural language, tell their owners and keepers, over **95%** of them would say **"SPOHN'S"** —according to the sales of **SPOHN'S COMPOUND,** as compared to all others.

The Tally Sheet in this **Contest** shows that, east, west, north and south, this marvelous veterinary medicine is the common choice of all.

Spohn's Distemper Compound

is the most extensively known and used remedy for contagious and infectious Diseases of the Domestic animals in existence.

THE REASONS: Based on the **Double-Germ Theory of Disease;** removes the cause; absolutely safe at all times, for all ages, under all conditions; acts as a preventative as well as a cure; and sold at a price obtainable by anyone; sold by all good turf goods houses and by the leading druggists; or direct from the manufacturers. 50c and $1 a bottle; $5 and $10 a dozen. Write for free booklet—"Distemper, Cause and Cure."

Buy A McMurray!

The Real Lady (2) t. 2:04¼, world's champion two-year-old, established two new world's records the first time hitched to the New McMurray Sulky.

Every race record of two minutes or better in 1916 was made to the new McMurray Sulky.

The Golden Anniversary Catalogue shows the complete line of McMurray "Easy Riding" Jog Carts in which horse action is absorbed into the springs—The Model 80 "Flyer," the last word in a training cart—The New Model 44 "Featherweight" Racer for racing, training or Matinee driving, and is gladly mailed free.

Remember, McMurrays build Sulkies and Carts exclusively. Their mechanics are specially trained, and by devoting their entire time to one line, are better able to furnish a first quality article at lowest cost.

Let McMurrays tell you what they can do for you.

The McMurray Sulky Company

288 N. Main St., Marion, Ohio

BEGIN YOUR 1917 STALLION AD. NOW

THE Man

W. H. HOUGHTON
whose fertile brain has been responsible for most of the improvements in sulkies and carts in the past 25 years.

When BEN WHITE wanted a light special built-to-order sulky for Lee Axworthy—

When THOMAS W. MURPHY wanted six special built-to-order high wheel carts for his winter jogging at Poughkeepsie—

When CHARLES VALENTINE wanted a special built-to-order pole cart to use in teaching a horse to score—
They placed their orders with the Houghton Sulky Co.

If YOU want something in the cart or sulky line you should consult the Houghton Sulky Co.

If you have a horse to race next year, give him every possible advantage, by ordering a Houghton sulky. We measured Lee Axworthy 1:58¼, for a sulky. We can measure your horse too.

Send for "The Story of Lee Axworthy 1:58¼," 'by Tom Gahagan. It contains no advertising and it is free.

Remember there are almost as many Houghton sulkies manufactured as all other makes combined.

Send for the booklet "What Sulky"—it is free.

If you want the easiest riding jog cart on the market, the kind used by Thomas W. Murphy, Walter Cox and other prominent drivers, send for "The Houghton Cartalog," a new free booklet, which will tell you more about high wheel carts than any booklet ever published.

If you are interested in rebuilt carts and sulkies, send for list No. 204. Houghton buggies are described in Booklet 207.

VOLUME LXX. No. 1. SAN FRANCISCO, SATURDAY, JANUARY 6, 1917. Subscription—$3.00 Per Year

U. OF C. JOCK

1st Prize and Champion Angus Steer and Reserve Grand Champion Steer at the recent International Livestock Exposition at Chicago. Weight, 1870. Born Jan. 11th, 1914. Sold for 19½c a pound. He was also the Grand Champion Steer at the P.-P. I. E. Bred and raised by University of California.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California and fifth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09½, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

THE BREEDER AND SPORTSMAN has purhased the subscription list and good will of the issouri Stockman, which has been discontinued and osorbed by the Breeder and Sportsman. The Misouri Stockman was one of the leading journals evoted to its special interests published in that art of the West.

Curtis P. ("Jump") Cauthorn, who has been the ve wire on the Missouri Stockman and to whom s success is largely due, has taken an interest in he Breeder and Sportsman, and will take an active art in the management of the paper and in the litorial department.

Under Mr. Cauthorn's direction the Breeder and portsman will broaden its scope and will make the eneral livestock breeding and news a prominent eature. The acquisition of the business of the Misouri Stockman, which was published weekly and xtensively circulated throughout the middle west, nd more particularly in Missouri, Texas, Nebraska, ansas, and Illinois, added to the circulation of the reeder and Sportsman, will make this paper one of he most influential publications in its field in the nited States and of great value to advertisers who re looking for business in the sections covered.

A CONFERENCE WILL BE HELD in San Franisco on Tuesday, the 16th inst., between as many of he secretaries or other representatives of the fair nd harness racing associations of this State as can e induced to attend. The conference has been alled by Secretary F. W. Kelley, of the Pacific Coast rotting Horse Breeders' Association, and the purose of the conference is to see if a circuit of harness acing cannot be arranged and dates announced. It ill be a meeting in which every breeder of light arness horses, every owner and every trainer and aretaker will be vitally interested. That harness acing conducted according to the rules laid down y the National and American Trotting Associations s the leading American sport is fully attested by he statistics of this sort of racing. The number of arness race meetings held in the United States very year runs up into the thousands, and probably wenty thousand horses take part in them. At the tate and county fairs harness racing is the chief musement and beyond all question the greatest rawing card. California once had a circuit of fairs hich received State aid and in those days the trotng and pacing races were the chief attraction. ince the State aid was discontinued, a vast majorty of the district agricultural societies have gone ut of existence, and as a result the race meetings ave been few. But nearly every year has seen more r less racing, and last season, under most unfavorble conditions, no less than nine harness race meetngs were given at which the racing was good and he attendance fair. It has long been the opinion of orsemen, that were the secretaries or other responible representatives of the fair and other associaions promoting harness racing, to get together early n the year, select and arrange their dates and if ossible announce their programs, there would be wice as many entries received and a great deal more nterest manifested than has been the rule under he usual haphazard way of arranging a racing ciruit, by which it was impossible for a horseman to now before May or June whether he would have a hance to race his horses or not. Consequently a novement has been made this season to get representatives of the different California associations together in January to see if a circuit cannot be organized and dates selected. The principal thing to look after is to see that every delegate to this conference comes with the authority that his association will give a meeting and announce the dates on which it will be given. When and where the meetings will be held is what the horsemen want to know early so that they can commence their training work. No association should hold aloof from this conference because it feels itself unable to give as large purses as the State Fair and the Pacific Coast Trotting Horse Breeders hang up. Each association should give what it can afford and give no more. The little but enterprising town of Dixon gave a successful meeting last year with $300 purses as the rule, and came directly between the big Breeders' meeting at Santa Rosa and the State Fair at Sacramento, where the purses ranged from $900 to $3000. The Breeder and Sportsman hopes to see a large attendance at the conference to be held in this city on Tuesday, January 16th, as on this conference will depend the fate of a California circuit for 1917.

The 1915 YEAR BOOK issued by the Missouri State Board of Agriculture is at hand and is a sumptuous volume of over 600 pages, beautifully illustrated and handsomely printed. In the volume is included the 47th annual report of the Missouri State Board of Agriculture, which gives much valuable information about the resources and the products of that great State. Many special articles, written by experts, are included in the work.

COLONEL FRED A. LAWRENCE, an enthusiastic lover of horses and a real sportsman, died in New York December 24th, aged 83 years. Col. Lawrence was a prominent man in horse affairs in the days when Budd Doble made Dexter the world's champion trotter. The Trotter and Pacer of December 28th says: "Personally Col. Lawrence was one of the most charming of men, kindly, unassuming, courteous and punctilious as to honor in sport as well as business. He was dearly loved by all who knew him, and we doubt not that, although he had been off the stage for some years, there are still many of our readers who remember him, and will mourn the loss of a tried friend and true sportsman."

PROPOSED STATE RACING COMMISSION.

Draft of the Bill That Will Be Introduced in the California Legislature by Senator Nealon of San Francisco.

Following is a draft of a bill which will provide a racing commission for this State and permit parimutuel betting on racing. The bill was prepared by the Golden Gate Thoroughbred Breeders' Association of which Charles W. Clark of San Mateo is president, and James C. Nealon, secretary, and the following are among the members: E. R. Armsby, George N. Armsby, Gordan Armsby, C .B. Alexander, Captain John Barneson, Charles Butters, W. P. Bourn, J. Cheever Cowdin, Charles Templeton Crocker, William H. Crocker, John B. Coleman, F. J. Carolan, Walter Dupee, M. H. de Young, John Drum, Thomas B. Eastland, Herbert Fleishhacker, F. W. Fuller, A. B. Flint, J. D. Grant, M. Gunst, W. F. Humphrey, Colonel D. C. Jackling, A. K. Macomber, Walter S. Martin, Captain J. H. McKettrick, J. R. McKenzie, Andrew G. McCarthy, Lawrence McCreery, John H. Rosseter, R. M. Tobin, J. S. Tobin, J. O. Tobin, W. G. Van Pelt, Arthur H. Whitney, James Wood, Harry Payne Whitney, Vincent Whitney and others.

An act to regulate the racing of horses in the State of California, and to establish a State Racing Commission, and to define its powers and duties, and prescribing a penalty for the violation thereof.

The People of the State of California do enact as follows:—

Section 1. Any association or corporation formed for the purpose of racing and breeding or improving the breed of horses and conducting races and contests of speed between horses shall have the right and power, subject to the provisions of this act, to hold one or more race meetings in each year and to hold, maintain and conduct horse races at such meetings. At such meetings the corporation or association or the owners of the horses engaged in such races, or others who are not participants in the racing, may contribute purses, prizes, premiums or stakes to be contested for; but no person or persons other than the owners of a horse or horses contesting in a race shall have any pecuniary interest in a purse, prize or premium or stakes contested for in such races or be entitled to or receive any portion thereof after such races shall have been finished; and the whole of such purse, prize, premium, or stakes shall be allotted in accordance with the terms and conditions of such race.

Section 2. The Racing Commission established by this act shall have the right and power, and it shall be its duty to allot periods for the holding of such race meetings among the several counties of the State. Such race meetings shall not exceed in the aggregate in any county sixty days racing in any one year, nor shall any meeting continue in any county for more than thirty days. Thereafter no other meeting shall be held in such county within four months after the conclusion of such meeting; provided, however, that such meetings throughout the State shall not exceed in the aggregate 122 days.

Section 3. No meetings shall be given where bookmaking is allowed, nor shall any person, associations or corporations furnish to poolrooms or their agents any information whatever in regard to racing, or knowingly permit to be furnished from any course or premises under their control any such information; provided, however, that nothing herein cointained shall be held or be construed as prohibiting the purchase or sale of combination or French pools or pari mutuels at such race meetings. Any person or persons, associations or corporations who shall conduct any race meetings contrary to the provisions of this act, or engage in bookmaking on horse racing, or furnish or knowingly allow to be furnished, any information whatever, to a poolroom or poolrooms contrary to this act, are hereby declared to be guilty of a misdemeanor; or any person, association or corporation acting or aiding them shall be deemed guilty of a misdemeanor, and upon conviction shall be fined not less than $500 nor more than $1,000, or be imprisoned in the county jail for a period of not less than 30 days nor more than six months, or by both such fine and imprisonment.

Section 4. No horse races are authorized or shall be permitted between sunset and sunrise or on Sundays.

Section 5. A State Racing Commission is hereby established to consist of three persons to be appointed by the Governor within twenty days after this law shall be in force. The members of the said commission shall hold their offices for a term of six years; provided, that the Commissioners first appointed shall determine by lot, one to go out of office at the end of each two years. The successor of each commissioner so going out of office shall hold office for the full term of six years.

Section 6. Such commission shall appoint a secretary who shall serve during its pleasure, whose duties it shall be to keep a full and faithful record of its proceedings, and preserve at its general office all books, maps, documents and papers intrusted to its care, and perform such other duties as the commission shall prescribe. He shall be paid a salary to be fixed by the commission at a rate not exceeding $1,800 per annum which, together with other expenses of the commission, shall be paid by the racing corporations or associations who shall obtain licenses from said commission. The commission shall biennially make a full report to the Governor of its proceedings for the two-year period ending with the first day of January preceding the meeting of the legislature, and shall embody therein all suggestions and recommendations as it shall deem desirable.

Section 7. Such commission shall have the power to prescribe the rules, regulations and conditions under which horse races shall be conducted in this State, and no races shall be conducted except by an association or corporation duly licensed by said commission as herein provided. Any association or corporation desiring to conduct such races may apply to the State Racing Commission for a license to do so. The Commission may, in its discretion, grant the same for not to exceed one year, and every such license shall contain a condition that all races or race meetings conducted thereunder shall be subjected to the rules, regulations and conditions from time to time prescribed by the Commission, and shall be revokable by the Commission for any violation thereof, or wherever the continuance of such license shall be deemed by the Commission not conducive to the interests of legitimate racing. But if said license is refused or revoked said Commission shall cause its reasons for so doing to be written in full in the minute books of said Commission, which books shall be open at all times to inspection to anyone known to be interested in the breeding or racing of horses.

Section 8. Every race meeting held or conducted, except as allowed by this act, is hereby declared to be a public nuisance and every person acting o raiding therein shall be deemed guilty of a misdemeanor and punished by a fine of not less than $500 nor more than $1,000 for each day of such meeting and racing; and a restraining order may issue against any proposed, unauthorized race meeting at the suit of the State Racing Commission.

Section 9. The provisions of this act shall not apply to race meetings conducted by any State Fair Association, agricultural society, county fair, or any other association to which state or county aid is given; and no such state fair association shall hold a race meeting for a period of more than 12 days in any one year; and no such agricultural society, county fair, or other associations to which state or county aid is given shall hold a race meeting for a period of more than six days in any one year.

Section 10. Any association or corporation conducting horse races in this state, at which combination or French pools or pari mutuels are purchased or sold, shall take out such commissions from all money received from the sale of such pools as may be prescribed by the State Racing Commission, not to exceed 8 per cent, one-fourth of which shall be paid by said associations or corporations daily to said State Racing Commission and shall be paid by said State Racing Commission to the State treasurer for the exclusive use and benefit of the State School Fund. It is hereby made the duty of the State Racing Commission, and it is hereby granted the power, to inspect the books of any such association or corporation and to revoke their license unless the said books are fully, accurately and fairly kept.

Section 11. It shall be unlawful for any person or persons to bribe, influence, or have any understanding or connivance with any jockey, owner, groom or any one connected with any of the stables, horses, racing or races at any race meeting, and anyone violating this provision shall be guilty of a felony and upon conviction shall be imprisoned in the State prison for a period of not less than three years nor more than ten years.

Beautiful holiday numbers have been issued by the Chicago Horse Review, American Horse Breeder of Boston, Horse World of Buffalo and Western Horseman of Indianapolis. All are extensively illustrated, and contain many statistical tables and special articles of great interest and much value to trotting horse breeders.

◆ ◆ ◆

What is believed to be the prize porker of all prize pigs was brought into Healdsburg, Sonoma county, one day last week and sold to a local butcher. The squealer brought the sum of $35. It was grown by S. Patterson of Alexander Valley, and was a year old. It tipped the scales in the butcher shop at 635 pounds. This hog is considered the biggest for its age that has ever been brought to that city.

◆ ◆ ◆

Grant Hugh Brown, of Goshen, New York, has recently imported the 16-year-old stallion Flotsam by that royally bred son of St. Simon, Frusquin, and out of the fashionably bred dam The Float. He beat Rock Sand twice as a two-year-old and was quite a race horse as a three-year-old, as in the Two Thousand Guineas he finished second to Rock Sand, while Rabelais, the famous French race horse and sire, was third in the race; and in the Derby he ran third to Rock Sand and Vincius.

Horses and Horsemen

MEETING CALLED TO ORGANIZE CIRCUIT.

Secretaries Will Meet in San Francisco January 16th to Arrange Dates and Programs.

It begins to look very much like a good circuit of harness racing will be arranged for the season of 1917 in California. Secretary F. W. Kelley, of the Pacific Coast Trotting Horse Breeders' Association, has received letters from nearly every fair association secretary and track owner in the State replying to his call for a conference to agree on dates for the meetings of 1917, and they have all agreed that Tuesday, January 16th, will be a most convenient date on which to hold said meeting, consequently it has been called for that date.

It now remains for every association and track owner who desires his town to be a member of the California circuit of fairs and race meetings to see that the representative who attends this conference shall have full power to agree on the dates which the delegates may fix for this circuit and to transact any other business that may come before the body.

It is expected that representatives from Salinas, San Jose, Pleasanton, Santa Rosa, Dixon, Woodland, Marysville, Sacramento, Stockton, Merced, Modesto, Fresno, Hanford, Bakersfield, Riverside, Ventura and other places will be present at the conference, and if each comes with the authority to act for his association there will not be any great difficulty in arranging a circuit that will be by far the best and the largest that California has had in years.

We desire to impress upon every horse owner as well as every owner of livestock that believes in county fairs and race meetings that he should suggest to the directors of the different fair associations the importance of having a responsible delegate at the conference.

The conference is going to be held on Tuesday, January 16th, and your town should be represented, as a circuit will be organized and if your town has no delegate present it may be overlooked in the arrangement of the circuit. With a pull all together we can have a circuit of fairs that will be a credit to the State. So, let every one help as much as he can .

A Word to County Fair Managers.

There has never been any unanimity of action among the county fair managers in California, and to show them how advertising and publicity are managed by the fair circuits beyond the Rockies, we would like to call attention to the following from a recent number of a Chicago paper:

"At the Auditorium Hotel, Chicago, December 9th, the day following the annual meeting of the American Association of Fairs and Expositions, representatives of seven of the largest fairs met and organized a publicity bureau. The persons who attended the meeting were A. L. Sponsler, Kansas State Fair; W. H. Stratton, Texas State Fair; I. S. Mahan, Oklahoma State Fair; W. J. Gooch, Kentucky State Fair; W. R. Hirsrh, Louisiana State Fair; John C. Simpson, Eastern State Agricultural and Industrial Exposition, and Thomas H. Canfield, Minnesota State Fair.

"Each fair belonging to the bureau is to contribute three per cent of its advertising appropriation to maintain it, and give counsel in spending the other ninety-seven per cent of it. The bureau is to be located at the Minnesota State Fair and is to be in charge of Ray P. Speer, publicity manager of the Minnesota State Fair.

"The service rendered is to include a thorough survey of the advertising policies of all members; assistance in making up the 1917 budgets as soon as all comparative information has been assembled; the preparation of a large part of the publicity matter used, including hangers, posters, billboard posters, car cards, window cards, newspaper ad designs and borders, and similar matter, and the creation of new ideas.

"It is believed that greater efficiency will not only result but that economies will be effected which will save each member several times as much money each year as is needed to pay the expense of maintaining the bureau.

"It is the intention of the seven charter members to wage a determined campaign to interest other fairs in the bureau. Although no formal application has been obtained by any of the seven fairs, it is known that several dozen others intend to join as soon as the matter can be taken up with the boards of managers of the institutions."

W. W. Percival, who has lived at Independence, Oregon, for a great many years, and who was a prime mover in all that pertained to good racing in that section of the country, passed away December 24th. Mr. Percival has been in failing health for some time and when the cause of illness was finally determined it was found to be cancer of the stomach. In the death of Mr. Percival the racing interests lost a good friend.—[Rural Spirit.

CIRCUIT MANAGER SUGGESTED.

Sonoma Driving Club Takes Initiative in Proposing That Mr. Joseph Waddell Be Engaged.

The Sonoma County Driving Club of which Mr. L. L. Cannon is president, Henry H. Elliott, treasurer and Jack Forsythe, secretary, has sent a circular letter to other organizations that may give harness races in California this year, suggesting the engagement of Mr. Joseph Waddell of Baker, Oregon, as circuit manager. Mr. Waddell was the manager of the Inter-Mountain Circuit of eight meetings last year, and every one of those meetings, with one exception, was a financial success. At that point a rain that continued through the meeting kept the gate receipts down so that there was a slight loss. The largest list of entries ever received in that section was the result of Mr. Waddell's work, and he was an active manager all through the circuit, arranging with the railroads for the transportation of the horses and attending to all matters that pertained to the racing programs, etc. The circular letter which the Sonoma County Driving Club has now sent to the different fairs and racing organizations in California, is as follows:

"Santa Rosa, Cal., Jan. 2, 1917.

"Dear Sirs: The president of our Association, L. L. Cannon, made a trip through the Inter-Mountain Circuit last summer and was most favorably impressed with the work of the secretary, M. Joseph Waddell.

"The Inter-Mountain, through the work and energy of Mr. Waddell, secured the biggest entry list of any western circuit in 1916.

"While Mr. Waddell's services are wanted by the Inter-Mountain Circuit, he would like to come to California.

"In conversation with Mr. Cannon, Mr. Waddell said he would be willing to come to California and work up a circuit, provided he was assured of funds sufficient to pay actual expenses while working up the meetings.

"At a meeting of Sonoma County Driving Club it was decided to take this matter up with various persons, clubs and racing associations in the State to see if the services of some one of Mr. Waddell's ability was wanted.

"This club voted to donate $50.00 for the above purpose provided enough other places would fall in line to make the proposition feasible.

"Hoping to have a prompt reply and that 1917 will show California's best racing circuit, we are,

"Sincerely yours,

L. L. CANNON, President.
"JACK FORSYTHE, Secretary."

Kinney de Lopez at Los Angeles.

Budd Doble, the dean of all trotting horse trainers and drivers, who has now retired and is living a life of ease and comfort at Los Angeles, was in San Francisco during holiday week, having run up for a day from San Jose, where he had been visiting relatives during the Christmas season. When asked about his grand young stallion Kinney de Lopez 2:23, he stated that this chestnut son of Kinney Lou 2:07¾ and Betsey Direct by Direct 2:05½ will make the season of 1917 at Agricultural Park, Los Angeles. This will be good news to the breeders in that section as this eight-year-old stallion is starting out with a record as a sire of early and extreme speed that will place him among the leading sires of the country if he can be given fair opportunity. Kinney de Lopez will never be trained or raced as he received an injury that has caused him to show lameness when given fast work, but one would never think so to see him as he jogs sound and is full of vim and go. He had as much speed as any horse before his lameness ,and quarters in 30 seconds or better seemed easy for him. He has sired only about eighteen foals, never having been mated with more than twenty-five mares, but the speed shown by the few youngsters old enough to train is marvelous. Edith Carter, a yearling by him, trotted the fastest mile trotted by a yearling in 1916. The mile was in 2:18½, and is within three-quarters of a second of the world's record for a yearling filly. Louise de Lopez, a two-year-old by him, took a record of 2:14¼, was raced all through the middle west and never lost a heat. Then his three-year-old Don de Lopez started in thirteen races during 1916, winning 12 of them and $3170. Another of the get of Kinney de Lopez was worked as a two-year-old at San Jose and trotted a mile in 2:17¼. These four are about the only ones of the get of Kinney de Lopez old enough to be trained, so his showing is all the more remarkable. Kinney de Lopez is one of the most perfectly gaited trotters ever hooked to a sulky. In fact, every horseman that has ever seen him in action calls his gait perfection. That he has a great future as a sire is certain.

According to latest reports the Hillanddale Farm string, to be wintered at Macon, Ga., in charge of Trainer John H. Dickerson and his assistant, Harry Fleming, will consist of twenty-three head, one of the largest W. B. Dickerman has had for many years in winter training. Among the record horses are Bonington 2:04¾; Barbara King 2:07¾; Tacita (2) 2:07¾, while the juvenile section is made up of a dozen yearlings, four of which are by Bonington and will naturally receive the best of attention.

Two Fastest Stallions in California.

Pleasanton Stock Farm, Mr. R. J. MacKenzi owner, offers to the trotting and pacing horse bree ers of California this season the services of the fas est trotting and the fastest pacing stallions in th State. The Anvil 2:02¾ is the trotter, and he the fastest horse at that gait ever standing for ser ice on this coast. The Anvil was a great race hors in his day—one of the greatest that ever scored fo the word as his former trainer, Ed Geers, has e pressed it. This endorsement is enough so far as hi racing qualities are concerned. That he is a gran individual will be admitted by every man that ha ever seen him. Not a big horse, but like Lee A worthy, champion of all trotting stallions, a con pactly made, smooth fellow, of just the right size fo a race horse and a sire. He was sired by a rac horse, Sir Valiant Vincent 2:11¾, that was b another race horse, St. Vincent 2:13½. His dam by Emperor Wilkes, a 2:10 sire of the famous Wilke family. The Anvil is bred to race and to sire rac horses which he will undoubtedly do. His servic fee will be $50 for the season.

Vernon McKinney 2:10½ is the fastest pacing sta lion in service in California, and has the fastest re ord of any horse now on this coast. He was bred i California and all breeders know his history. H was also a great race horse and while his campaign were not extensive he got the money — the histori Chamber of Commerce being one of the big race to his credit. He is by Guy McKinney, one of th very best sons of the great McKinney, while his da is from a family of fast ones and great money wi ning race horses. He has already proven himself sire as the first of his get to start was the stak winner Verna McKinney that took a record of 2:1 as a two-year-old and 2:09¼ as a three-year-ol Vernon McKinney's fee will also be $50.

More facts about the pedigrees and performance of these two stallions will be found in the adve tisement which appears in this issue of the Breede and Sportsman. Both horses will be at Pleasanto in charge of Geo. Ryan, superintendent of the Plea anton Stock Farm, and we advise every person wh has a good mare to breed this year to visit tha beautiful stock farm and take a look at these chan pions, or write to Mr. Ryan for any informatio wanted.

The Orloffs and How They Race Them.

The native Russian Orloff is a wonderful typ There are few of them that if trained our way coul not trot in 2:30. The evolution of the breed shoul convey a lesson to the United States. It has take since the time of Peter the Great to bring the typ to perfection. The pure bred ones are black or gra in color, but when crossed with the American trotte or thoroughbred, bays are occasionally seen. Non of the males are castrated and they are raced t twelve years of age, the limit for the mares bein ten.

The great interest in harness racing in Russia undoubtedly maintained by the custom of giving 2 per cent of all the horse's winnings to his breeder.

Trotters race over a sand-covered asphalt trac and they never postpone unless the thermomete drops beyond 16 degrees below zero. Sometime there are as many as twenty-two races a day, con mencing at 2 o'clock and continuing till 9. The ligh ing system is so perfect that there are no shadow Everything goes like clockwork. The timing is don by electricity and all finishes are photographed b two cameras, which are released by a cord. Th grandstands are heated, and they have restaurant and all other conveniences for patrons.

No two-year-olds are raced and the three-year-old are only asked to try conclusions in a dash of two thirds of a mile. All races for older horses wer formerly at two miles, but now about half are at mile. Entrance fee is only 1 per cent, and there ar no other deductions. Horses are classified accordin to their winnings, and are arranged in groups, th slowest being the ninth, which is for those that hav not won 2,000 roubles. All trots are under the aus pices of the Imperial Trotting Club, which hold twelve meetings yearly in centers of population. Th half-bred can beat the native, and the America is the daddy of them all. There are only thirtee races open to all, and these are known as Interna tionals. They are of a value of 25,000 roubles o more.

ANSWERS TO CORRESPONDENTS.

Mr. C. J. Snyder of Hanford asks for the breedin of the stallion Milorod, son of Albenard and a mar by Shadeland Onward. Mr. Snyder evidently refer to the bay stallion Milord, register No.35783, foale 1900, bred by The Highland Stock Farm, Denver Colorado. He is by Albenard 22249 (son of Allerto and Banca by Onward), his dam is Belle Barlow b Shadeland Onward 6010, second dam Maud W. b Weisbaden 1629, third dam Daisy, pedigree no traced.

Thomas Russell of Milpitas asks what time Mr Barstow's horse paced in at Santa Rosa and on wha date he left for the east. We suppose he refers t All McKinney. This horse was given a breeder's record of 2:04 at Santa Rosa on Saturday, July 8th 1916, and a few days later—we think it was the fol lowing Tuesday—the horse was shipped east.

Thoroughbred Matters

Successful Sires in United States.

The chief test of a stallion's merit lies in the performance not only of his three-year-olds, but of his juvenile performers, and from this point of view Star Shoot, Ogden, and Ballot, must be regarded as the most successful sires of the season in the United States, writes an English racing authority, in commenting upon the successful American stallions of the year. He says in part:

"To the end of last month Star Shoot had sired no fewer than twenty-five winners of sixty-five races. Ogden was responsible for eighteen winners of forty races, and Ballot's young stock, or rather nineteen of them, had secured a total of thirty-eight.

"It redounds to the credit of our Island-bred stock that both Star Shoot and Ogden were bred in the United Kingdom, although Ogden was actually foaled in the States, his dam, Oriole, having been sent out there after being mated with Kilwarlin. It is curious that Star Shoot should year after year take a high place—he has been first on several occasions—among the leading stallions in the States, whereas his half brother, Telescope, which was likewise a successful race horse, begot nothing of special note at the stud with the exception of the Caste gelding and the steeplechaser, Deerstalker. Telescope, however, was a descendant of the decaying Beadsman line.

"Star Shoot is a son of Isinglass, one of the greatest sons of Isonomy, the Stirling, or Oxford line of Birdcatcher. This is the male line of Eclipse, but so, too, was that of Telescope. The latter, however, was too much inbred to Eclipse to do good—his Herod blood being feminine—unless mated with mares exceptionally strong in Herod and Matchen blood, whereas Star Shoot's sire had in his make-up a plentiful supply of both these necessary strains of blood—through his sire, Isonomy, for instance.

"As to Ballot, he was an excellent race horse, both in the United States and here, and as a five-year-old in this country he gave ten pounds and a beating to the three-year-old Valens in the Select Stakes. It is interesting to note that Ballot is by Voter, which was by Friar's Balsam, the latter a son of Hermit, whose male line in this country is almost extinct, although doing well in the United States.

"It is on the cards that a more recent importation into the United States in the shape of Short Grass may in due course develop into a stallion of the first order, the more particularly as the Bend Or male line, of which he is a member, has topped the winning list in England for the last three years by aid of Polymelus. Sol Joel's champion goes back to Bend Or via Cyllene and Bona Vista, whereas Short Grass, which has proved his worth in handicaps in the United States, carrying the colors of Emil Herz, is a degree nearer to Bend Or, being by the 1880 Derby winner's son, Laveno. There is no doubt that Laveno was a magnificently bred horse, for he was by Bend Or (1) out of Napoli (1) and both his sire and dam were grandchildren of Thormanby.

"What inbreeding to Thormanby means we have seen in quite recent years in the case of The Tetrarch, which, except for his habit of striking himself when galloping, would doubtless have shown himself as far in front of his peers at three years of age as he had done in the course of his brilliant juvenile career. On his dam's side Short Grass, which won the One Thousand Sovereigns London Cup and other good races here, was equally well bred, for his dam, Outburst, whose first foal he is, was got by Enthusiast, son of Sterling and conqueror of Donovan in the Two Thousand Guineas, out of Sunburst, by Hackler out of Solstice, by Solon.

"Outburst was also the first foal of her dam, which goes back in the female line to The Deformed, by Burgundy or Harkaway out of Welfare by Priam. As every one knows, Priam was one of the early Derby winners that was sent to the United States. This was before his daughters, Miss Letty, Industry and Crucifiex had won The Oaks three years of out four. It might be urged that Priam was chiefly remarkable for his good fillies, but he got many winners in the United States.

"Short Grass is a really good-looking big horse, and his sire Laveno, before him, showed himself to be a horse of high class by winning the Jockey Club Stakes. In addition to being a brother to that good race horse and sire Orvieto, Laveno was brother in blood to such good sires as Ormonde, Bona Vista, and Martagon."

A dispatch from London says the Duke of Westminster has announced his intention to sell off the whole of his blood-stock, horses in training, brood mares, foals and yearlings, which has caused general regret in racing circles, for no colors are more popular than those of the house of Grosvenor. It will never be forgotten that from the Eaton paddocks came Bend Or, his son Ormonde, Orme, the son of Ormonde and Flying Fox, the son of Orme. The Duke, who has been on active service with the Armored Car Division since the beginning of the war, is at present home on sick leave.

ECLIPSE AS RACER AND AS SIRE.

[By W. H. E. Wanklyn.]

It is a popular idea that Eclipse was a great racehorse.

The test of greatness in all speed competitions is not governed by a time test, but in the meeting and succeeding with the best, and Eclipse's performances on the turf were, with one exception, hardly such as to impress the follower of racing in the present day as being anything out of the ordinary.

Eclipse was bred by H. R. H. the Duke of Cumberland in 1764, and being foaled during the eclipse of that year, was so named. He was by Marske from Spilletta by Regulus. Marske was not a great racehorse, only starting in three events, none of which he won. Eclipse's dam Spilletta only raced once, but her claim to fame does not rest with her famous son, as she is the foundation mare of the family from which Weatherbit, Oxford, Adventurer, Scottish Chief, and Prince Charlie descended. At the death of the Duke of Cumberland, his stud was sold and Eclipse fetched 70 guineas, but Mr. Wildman, a salesman at Smithfield, arrived just after he was knocked down, and protested that the sale had started before the advertised time. He was therefore put up again, and Mr. Wildman secured him for 75 guineas.

He was two years old at this time, and looked to be anything but a bargain: his temper was so bad that it was seriously considered whether it would not be better to have him gelded. However, he was given to a rough rider who added to his income by poaching; and after being worked hard all day had to assist in the poaching affairs of the evening. This treatment did not affect his powers or improve his temper very much, but he became sufficiently amenable to start racing as a five-year-old on April 3rd, 1769, at Epsom in a £50 Plate, two four-mile heats. He won both heats easily enough, in fact, he distanced his four opponents in the second heat, but they were of very inferior class. He next appeared at Ascot in a £50 Plate, two-mile heats, his solitary opponent, a poor performer, Creme de Barbade, being easily beaten in both heats. The King's Prize of 100 guineas at Winchester, two four-mile heats, in June, saw him defeat a field of five, of which Chigger was the best of a very inferior lot, and at the same meeting, as well as at Salisbury a fortnight later, he walked over. On the second day of the latter meeting a horse named Sulphur and one other were behind him in the City Free Plate, but Sulphur was not as good as Chigger. At Canterbury on July 25th he walked over for the King's Plate, and at Lewes two days later he beat a very poor horse in Kingston, winding up the season at Lichfield by beating Tardy, who was hardly above a Selling Plater. His six-year-old career began at Newmarket April Meeting ,when his owner (still Mr. Wildman) staked 600 guineas to 400 guineas that he would beat Bucephalus, by Regulus, whose two previous starts had been wins, but he was of inferior class and no use to Eclipse over the Beacon course . At the same meeting he won the King's Plate, two four-mile heats, from Pensioner, Diana, and Chigger, and at Guildford, Nottingham and York he walked over for King's Plates. At the latter meeting he met Tortoise and Bellario in the Great Subscription of £319 10s, and this was really his only performance against high-class horses. He started three times afterward, two were walks over and in the other his only opponent, Corsican, was not nearly in the same class. Bellario and Tortoise were both good horses, but there were others better at the time that Eclipse never met in Trentham by Sweepstakes, the unbeaten Goldfinder by Snap, Gimcrack by Cripple, and Tortoise by Snap. He only started in 18 races, of which eight were walks over, and the others were apparently only exercise canters. As a sire, Eclipse's name stands quite by itself, and deservedly so. During his racing career Mr. Wildman sold a half-share in him to Mr. O'Kelly for 650 guineas, the latter subsequently buying him right out for another 1000 guineas, and a veritable gold mine he turned out.

Compared with Herod and Matchem he did not get a large number of successful horses on the turf, but this was probably due to the fact that his owner kept him more or less exclusively for his own mares or those of his friends. Whether this was the case or not, from the year 1774 until 1787 Mr. (or rather Colonel O'Kelly as he was then), helped himself pretty freely to many of the good things at Epsom and Newmarket. His success, mainly with the sons and daughters of Eclipse, was something phenomenal. Of those raced by O'Kelly, the brothers Mercury, Jupiter, Volunteer, and Odonis and their sister Venus, the brothers Chaunter and Hautboy and their sister Scota, the brothers Dungannon and Serjeant, the brothers Boudrow and Vertumnus, the brothers Clarinet and Serpent, the brothers Soldier and Gunpowder, and King Fergus and Young Eclipse, were the best. But he had quite as many who were not quite up to their standard. Other sons and daughters of Eclipse who raced successfully were Pot 8 o's, Eagle, and Poor Soldier (brothers to Everlasting), Don Quixote and Alexander (brothers), Saltram and his sisters Maria and Annette, Alphonso, Giant, Dido, Meteor, and Planet.

The only male lines of Eclipse to survive are those of Pot 8 o's and King Fergus, the latter through Blacklock to Vedette, Galopin and St. Simon, and the former through Whalebone to Camel and Touchstone, and Sir Hercules to Birdcatcher, whose two branches, Oxford and The Baron, bring us down to Sterling with the former, and Stockwell with the latter. The Tramp and Whisker lines are still represented mostly on the Continent, but they look perilously near extinction.

Eclipse died early in 1789 at the age of 24, but he did not get any important sons or daughters after 21. The only son worth mentioning was Clarinet's brother Serpent, who was probably the poorest of his prominent sons, and left no descendants. At the age of 20 he covered the famous Tartar mare, who produced more great sons and daughters than any other mare in the Stud Book, and she must have been at least 28 (it was asserted that she was 36 years at the time), the result being a daughter, Queen Mab, whose descendants are still with us producing winners, but there are not many good sires, the Derby winner Daniel O'Rourke by Birdcatcher being the most prominent. Two other daughters, Violet and Bobtail, were got in the same year, but their lines did not survive. Queen Mab is another instance of old age in the parents not affecting the productiveness of the female, as she had ten sons and six daughters, several of the former being good racehorses, but Remembrance is the only one of importance to leave descendants, and they were females.—[New Zealand Referee.

Polymelus Leading Sire in England.

The stallion Polymelus for the third time running has wound up the season at the head of the winning list of English sires. This is, of course, excellent testimony to his merit as a sire, but by no means a record. His paternal ancestor, Stockwell, for example, headed the list for three years in succession from 1860 to 1862, and subsequently improved upon that performance by heading the list from 1864 to 1867, inclusive. But for being relegated to second place in 1863 by his old rival, Newminster, which beat him by something like £1,500, the mighty chestnut would have had an unbroken sequence extending over eight seasons.

As matters stand the record is held jointly by St. Simon and Hermit, each of which figured at the head of affairs for seven consecutive years, Hermit from 1880 to 1886 and St. Simon from 1890 to 1896. In earlier days there was annually a keen struggle for supremacy among such famous old-time sires as Orlando, Birdcatcher, Touchstone—sire of Orlando—and Melbourne. But for the last named the line of Matchem would nowadays be extinct, and since his time its fortunes to a great extent have hung on the slender thread of Barcaldine. The latter, in a brief stud career, sired a number of good race horses, which, like Barcaldine himself, did well at the stud.

Among the most prominent of these were Wolf's Crag, Winkfield, and Marco. Winkfield did not win much on the race course owing to something being wrong with his back, but he sired excellent stock, among his get being the sensational Cambridgeshiire winner, Winkfield's Pride.

Chaucer, the second on the list of winning sires, is a member of the St. Simon family, while Sunstar, which comes third, belongs to a branch of Blacklock, which is different from St. Simon. Fourth stands another descendant of Bend Or in Radium, which was one of the 1880 Derby winner's last crop of foals.

Not a Pleasant Journey for Horses.

Horses sent across the Atlantic for the war have a rather strenuous time of it on the eight weeks' voyage. Each horse is put into a narrow stall two feet by six inches wide and separated from his neighbor by two narrow top and bottom slip rails only. During the long journey the animal can never lie down and is prevented from moving backward or forward by the partitions. The wooden floor is removed for cleansing purposes and to do this effectually every fifteenth stall is vacant so that twice a day they are shifted from right to left while the portable parquet is washed over. Grooming in transit is never done with a brush, but a soft cloth is used instead. Four times a day they are fed and watered and ten minutes of walking exercise follows after one of the grub seances . After the first day out these travelers accommodate themselves to their new surroundings and are content. After standing three or four weeks the horses become so restless and exhausted that it is found necessary to adjust a canvas sling beneath their bellies so as to partially relieve the strain upon their feet and legs. When they land it requires several days for the horses to get off their sea legs so as to walk steadily on the ground and the most of them seem to be partially paralyzed from the constant cramping in close quarters.

Handsome is as handsome does, is an old saying. By winning the Melbourne Cup, Sasanof, the New Zealand three-year-old gelding, scored a marked triumph over the equine beauties of the turf (says the Melbourne Age). In appearance this great little galloper is a most commonplace sort of fellow. He has no good looks to commend him, and when the horses filed to the post for the big event he was undoubtedly the ugly duckling of the party. "Gee! look at the rabbit," exclaimed an overseas visitor as Sasanof made his way down the course. As the finishing post hove in sight the ragged New Zealand horse shot clear ahead of the field, leaving behind him a toiling procession of "beauties in distress." After the race he became the hero of the hour.—[N. Z. Referee.

SADDLE and SHOW HORSES

Capt. Dilham, the well known riding instructor, is conducting a class in riding for both adults and children at the old Park Riding Academy on Fulton street.

◈ ◈ ◈

The Park Riding and Driving Club stables on Seventh Avenue has a large number of riding classes and there are over 150 saddle horses quartered in this fine building.

◈ ◈ ◈

Lady Dilham, once champion of the National Horse Show, got the gate at the recent International Horse Show in Chicago, with William A. Moore and Robert A. Fairbairn judging. The reason given in their report was, "Too severely bitted."

◈ ◈ ◈

W. R. Brown, who recently purchased J. A. P. Ramsdell's racing pony Mashalla, now has four Arab stallions at Waynesboro Farm, Berlin, N. H., where he is going to breed pure Arabs . The others are Khaled, a chestnut, 15.3 hands high; Abu Zeyel, a chestnut, 15.1 hands, and Jerrede, a bay, 15 hands. Mashalla is 15.2 hands.

◈ ◈ ◈

Geo. A. Kingsley of Minneapolis, Minn., who owns several fine saddle horses, was an interested visitor at The International. Mr. Kingsley, who is an attorney, attends the horse sales of Missouri and Kentucky regularly and has achieved the reputation of being able to pick the winners.

◈ ◈ ◈

John K. Branch, of Richmond, Va., paid $3,025 at auction for the Clydesdale mare Osco Darling during the recent International Horse Show in Chicago. He also purchased for $1,550 the six-year-old stallion Fairholme Warrior and presented him to the Governor of Virginia for use in the stud at one of the State agricultural schools.

◈ ◈ ◈

The Park Riding Academy has been removed to the splendidly appointed Hulda Stables at 1530 Fell street, just west of Baker street, San Francisco, and right opposite the panhandle entrance to Golden Gate Park. Woodland Hackney Stud, owned by Mr. Edgar J. Depue, will also make its city headquarters there and now has on hand a few high class saddle horses for sale.

◈ ◈ ◈

D. Schilling, who recently purchased the Missouri saddle stallion, Noble Rex, will exhibit him at the National Western Horse Show, at Denver, January 12 to 22. Noble Rex is now in the stable of Blades & Holman, Holliday, Mo., where he is receiving the attention of that experienced trainer, Dell Holman, and well informed horsemen who have seen him work declare Noble Rex is destined to be one of the best studs brought out in recent years. Mr. Schilling bought him for his ranch, the J. O. D. at Aroya, Colo., but it is understood that he has about decided to keep him in Missouri and have him exhibited in stallion classes in 1917.

◈ ◈ ◈

One of the most interested spectators at the recent International Show was William Wallace, of Philadelphia, who recently purchased Jump Cauthorn's stallion, Marshall Chief. This was the first opportunity Mr. Wallace had of seeing his horse and he was delightfully surprised. In a letter to the writer, Mr. Wallace makes the following comment on the Milwaukee Charity Horse Show, which was conducted by that popular sportsman and horse lover, Hans Berg: "The show was a wonderful success. Marshall Chief was exhibited in the five gaited class by 'Splint' Barnett, and made a brilliant and perfect showing. I think he was the most admired horse at the show and in addition to the championship ribbon, won a beautiful vase, presented by Mr. Chas. F. Preister."

◈ ◈ ◈

The well known breeder of saddle horses, French Field, of Mexico, Mo., should be justly proud of the recognition of the sensational three-gaited mare, Pretty Baby, which the Lexington, Ky., horseman Hugh Willoughby sold this week. Fields has always declared this mare would be a winner, and when Willoughby told him when he bought her last spring not to publish the price, for he was ashamed for anyone to know he would go so high for a green one, Fields offered to bet him he would have won a championship and given her a big selling before a year. Willoughby did both.

◈ ◈ ◈

Rufus Jackson, who is known throughout the land as one of the most instructive and capable writers on saddle horse affairs, will not be out of touch with the saddle horse lovers of this country, and will conduct a column of reliable news of Missouri and Kentucky in the Breeder and Sportsman. Mr. Jackson is one of the most influential men in public life in Missouri, and is responsible for most of the reputation Missouri has achieved as the leading saddle horse state. He is furnishing this news as an accommodation to the publishers, realizing that at the same time he is continuing in his endeavors to keep the Missouri saddle horse industry in the lead.

The Milwaukee Charity Horse Show.

Probably the best horse show, in point of attendance, in the showing of fine horses, in the receipts and in the general interest shown, was given in the Milwaukee Auditorium December 21. It is estimated that $5,000 was turned over to the Milwaukee Children's hospital as a result of the activity of the promoter Hans Berg, the women of the hospital, and of the participants in the various classes, the members of the Milwaukee Riding and Washington Park Driving clubs. Ira G. Sharp of Sharpsburg, Ill., was the judge.

Milwaukee society, a kaleidoscope of shimmering twentieth century colors, the bare shoulders of women, white shirt front, silk hats and walking sticks, formed a brilliant circle around the center of activities.

Among the horses, Marshall Chief, a handsome black stallion, entered in the five gaited saddle class by William Wallace, was one of the sensations of the performance. He has won purses ranging from $500 to $2,500.

Miss Isabel Earling rode her mare, Juanita, who was entered in the five gaited saddle class, winning third place.

Mrs. William Woods Plankinton, driving Satire, formerly of the Wild Rose farm, won the silver cup presented by the board of directors of the children's hospital in the single harness horses' class. Mrs. Plankinton, smartly costumed in brown, drove like an expert. Sunny Jim, Miss Lorraine Freuler's roan gelding, won fourth place in the event, in which he was driven by his young mistress.

The Admiral and Silver Piece, owned by Ferdinand Schlesinger, won second and third places in the event for single harness horses.

One of the prettiest events of the evening occurred when Fred Pabst drove out with his coach and four. His passengers were a group of daintily clad young society girls—mostly debutantes. They were the Misses Gertrude Marker, Edith Thompson, Louise Schneider, Margaret Forsyth, Marian Russell, Constance Miller, Josephine Dyer, Eliot Smith and Edith Courteen.

As in former years, horses from the Pabst stock farm at Oconomowoc carried away many of the prizes and were displayed to great advantage when driven by Mr. Pabst himself. Their rivals this year, who really acquitted themselves with great honor, were entries from the stables of Ferdinand Schlesinger, who has purchased a number of new horses the last year.

Parson, a fine grey gelding, owned and ridden by Michael Cudahy, won first place in the jumping event, however, the entries from Woodin farm coming in second, third and fourth.

Miss Ernestine Blatz, mounted on Diamond, won a silver cup in the ribbon chase, which was ridden by nine girls, led by Carl Wiesel, and which elicited frequent bursts of applause.

In the three gaited saddle class, Mrs. Hans Berg's Beachwood won first place from thirteen other aspirants.

California Girl Used Her Riding Crop.

"You recall," the story teller said, "the row that was raised over the alleged lack of police protection during the woman's suffrage parade on Pennsylvania Avenue, Washington, the day before the Wilson inauguration. A Miss Kent was in the mounted troop of that parade. As she was about to mount her horse in front of the Kent home, her father, an M. C. from California, returning from a trip iover the route of the parade, noticed that his daughter carried a light crop. He gave her a heavier one, saying, 'If you need a crop at all you'll need a heavy one.'

"You remember how the hoodlums annoyed the paraders, and would have broken up the march entirely had it not been for the work of a few of the young women riders. Among them was Miss Kent, who handled her horse with the skill of a New York mounted cop in pushing back the roughs who were trying to manhandle the marchers.

"At one point a hoodlum darted from the sidewalk jeering at Miss Kent, who when she saw him coming raised her crop over her head. But the hoodlum didn't know that the rider he had selected to bait was famous even among California women tennis players for her terrific drives. He pinched her booted leg and then fell back shrieking with a bleeding welt across his face.

"'You say it was a slip of a girl with a riding crop?' the ambulance surgeon asked the policeman who was giving him operating space on the sidewalk. 'Some girl, then, for this ruffian will carry a scar from the top of his forehead across his mug to the end of his chin as long as he lives.'

"The Kents are a family of notable independence of action," concluded the narrator.—[Rider and Driver.

———o———

Col. Paul Brown, the millionaire horse lover of St. Louis, is now riding the stallion Foss McDonald through the St. Louis parks every day. Foss McDonald was reported to be a "bad egg" but this veteran sportsman has made an ideal pleasure horse in the few weeks he has owned him. In a recent letter to the writer Col. Brown declared Foss McDonald the best saddle horse he had owned in many days. He is a seal brown, one of the grandest lookers on earth, and those who know Col. Brown can imagine what a sight it would be to see them on the St. Louis bridle paths these frosty mornings.

Standing Room Only at the Horse Show.

Ivanhoe Whitted writes as follows of his efforts attend the great horse show at the Internation Live Stock Exposition at Chicago last month:

"But the night horse shows! Really and trul 'cross my heart and hope to die' if I ever saw su a jam; such a wild, riotous mob as the aggregatic that besieged the doors each night waiting for t show to begin; such a crazy, pushing, toe-trampir herd of lunatics, every separate individual obsesse with the one central aim and idea of beating som body else to a favorable spot at the ringside. A when at 7 p. m. the gates swung back maybe it wasn a stampede. Standing room? It was standing roo that this giant mob of ticketless humanity was figh ing each other for. About 4 o'clock Wednesday afte noon I dropped around to a ticket booth to get a b of pasteboard entitling me to the privilege of a cha for the evening show. The booth was deserted b the young woman I had noted earlier in the day. Th wicket was closed and a card announced "Sold Out. So I watched the crazy ones fight for standing roon meanwhile making a mental reservation to emulat the praiseworthy example of the early bird on th following day.

So at noon on Thursday I approached the booth laid down one good iron man and asked for the bit c pasteboard. The very blonde lady behind the bar smiled sweetly and spoke tersely, 'Sold Out.' 'Wha are those people selling for, then?' I questioned, ind cating the occupants of an adjoining booth. 'Fo Saturday night's show,' she replied; 'tonight and t morrow night both sold out."

Well, there was only one thing to do—join th mad 7 o'clock rush for standing room.

So early in the evening I edged as far into th rapidly growing mob as possible and waited. Whe the gates were opened I got pretty close to the ra without very much effort on my part. Several thou sand anxious people in my rear propelled me, insist ently if not quietly to my place. We were packe in like California prunes or figs. Between me an the rail were two layers—thin ones—of humanity At my right was a husky guy; at my left a slip o a girl, who, before the show was over, was squeeze until there wasn't even a giggle left in her. Behin me a million men and women were pushing an pushing. It was hot, beastly hot. I was caught i the jam with a heavy coat on. I sweated and swel tered; my collar wilted; the perspiration trickle down my legs and soaked my socks. I was packe so tight that I couldn't have got out of that overcoa on any kind of a bet, and there was no place to pu it, anyway. But if misery loves company everybod had plenty of it. The show was long, but I stuck i out because I couldn't get away."

Teaching the Rack and Fox-Trot.

A successful teacher of the saddle horse gait says the best way to teach the rack and fox-trot i to first get the colt handy in a snaffle bridle. Above all things, teach him to walk properly at the start It has been frequently remarked that a good, flat footed walk is the foundation of all the saddle gaits If the fox-trot is the slow gait which he wishes t develop, the colt should be urged out of the walk until he takes it. It will probably require much patience and much taking back before he knows what is wanted. Before teaching the colt to single foot or rack, he should be got used to the double-rein bridle. Take his head up pretty high, "jiggle" the curb in his mouth, and urge him rather strongly out of the walk into a rack. No attempt should be made to rack the colt except on smooth, firm footing. It may help some if he is shod rather heavy behind and light in front.

Buys Champion Saddle Mare.

John P. Crozer, of Upland, Pa., has purchased of Hugh Willoughby the chestnut saddle mare Pretty Baby, that went through from the novice class to the championship without meeting defeat at the Kentucky State Fair this year. She is just under 15.2 hands high and has been looked upon as one of the best of her size and type in Kentucky. She is a saddle bred mare, by Grand McDonald out of Martha Field, by Aaron Pennington, a thoroughbred race horse, and was bred by Frenchdale Farm, Mexico, Missouri. Mr. Crozer, who is a wealthy manufacturer of Chester, Pa., will have a strong stable of saddle and harness horses out next season. He exhibited Rectina, Lee Chief and Sunflower with much success last summer, winning four blue ribbons with one, six with another and eight with the other, according to the Horse Show Blue Book. Thirty years ago he was a prominent breeder of trotting horses, and a little later the owner of the famous high jumper, Filemaker.

◈ ◈ ◈

Lovers of saddle horses are paying considerable attention to The Leading Man, a beautiful chestnut gelding owned by Langhorne Tabb Anderson of Maysville, Ky. In fact, some of the best judges believe he will be the most important candidate in Kentucky next year. He was only exhibited once in 1916—at the Ohio State Fair—and won over the "would-be wonders" of the present time. It is understood Mr. Anderson has refused several offers from Eastern men for this gelding, and horse lovers of Missouri and Kentucky are congratulating him for not doing so. The Leading Man is one of the kind that can go out and win several thousand dollars at the shows, and his owner knows it.

Notes and News

A California Circuit is incubating.

◈ ◈ ◈

Representatives of a large number of associations and track owners will meet in this city January 16th.

◈ ◈ ◈

It is proposed to arrange a circuit, select dates and announce programs and purses.

◈ ◈ ◈

A draft of the proposed racing commission bill will be found on another page.

◈ ◈ ◈

Very nearly 100 trotters and pacers are wintering at the North Randall track, Ohio.

◈ ◈ ◈

An offer of $20,000 has been refused for the champion half mile track trotting filly Emma Magowan (2) 2:07½.

◈ ◈ ◈

And now Jacksonville, Florida, and Peoria, Illinois, both want to hold Grand Circuit meetings, and have made applications for membership therein.

◈ ◈ ◈

Lee Bros., of Mexico, Mo., have recently sold several three gaited horses to Godfrey Preece, the New Yorker, who has picked so many winners in Missouri.

◈ ◈ ◈

It has been figured that the sum of $803,665 has been awarded in premiums to breeders and exhibitors at the National Horse Show since its inception in 1883.

◈ ◈ ◈

Bert Webster, who has given first lessons to as many good horses as any trainer in California, is at Pleasanton with five head of trotters and pacers that he will get ready for the racing season of 1917.

◈ ◈ ◈

L. H. Michales, a horseman of Brookside, Ossining, New York, writes the Breeder and Sportsman that he contemplates selling out his interests in the Empire State and locating in California.

◈ ◈ ◈

Bob Smith, of Los Angeles, purchased Honey Healey 2:08¼ by Zombro at W. G. Durfee's Chicago sale and has sent her to Mount Sterling, Kentucky, to be bred to J. Malcolm Forbes (4) 2:08.

◈ ◈ ◈

Al Thomas is now educating sixty yearlings that are to be consigned by Walnut Hall Farm, Lexington, Kentucky, to the Midwinter Sale at Madison Square Garden in February. The education consists in learning to lead fast at the trot.

◈ ◈ ◈

C. B. Johnson, of Ogden, reached Pleasanton recently with four head of trotting bred horses, one a good race mare that he will breed to The Anvil 2:02¾. The others are colts and fillies that will be put in training.

◈ ◈ ◈

The complete racing career of the pacer Billy M. 2:03¾, that died recently, shows that he started in 69 races, was a winner in 38, second in 12, third in 18, fourth in two, unplaced in but five. His gross winnings were $15,540.

◈ ◈ ◈

A new departure at the London Hackney Show of 1917 will be a competition for stallions suitable to get artillery and army horses. "High action will not be taken into consideration," so the conditions read. The exhibition is scheduled for March 6, 7 and 8.

◈ ◈ ◈

W. G. Durfee consigned 35 head to the Chicago sale. They brought an average of $350 per head. Only the sales of horses that brought $200 or over were reported in the accounts of the sale sent on from Chicago and printed in the Breeder and Sportsman last week.

◈ ◈ ◈

The horses of the late M. W. Savage's International Stock Farm have been sold at private sale since the death of that gentleman. Up to the present time 165 horses have been sold at an average of $250 each. The majority of the purchases were by Minnesota buyers, but 25 states and Canada bought horses through correspondence. Louisiana took 16, South Carolina 12, New York 9, and Western Canada 12. The weanlings were in demand and went to buyers in all directions.

◈ ◈ ◈

Presence and style are characteristics which a good many judges seem to overlook, or ignore, while the public is sometimes so swayed by them as to overlook other essentials. Possibly it was this difference between the official and the unofficial point of view which caused the spectators in Chicago to show their preference for Lady Dilham by continued cheering and applause throughout the contest in which the judges placed her fourth to Princess Shella, Rillington Nimble and Gypsy Girl. There are not a few harness horses that excel Lady Dilham in conformation and that go higher, especially with their hocks, but the little mare in her twelve campaigns has never met one that could take the attention of a crowd away from her when she is stepping and going at her best, so proudly and daintily does she carry herself, and so full of life and spriit does she seem to be.

The Yolo County Fair will be held at Woodland this year. The Yolo County Farm Bureau directorate is already discussing preliminary plans for a fair that will be wide in its scope and typical of that section. The bureau as an organization will offer four prizes—one of $50, one of $25, one of $15 and one of $10—for the four exhibits in the order named, which are composed of the greatest variety of products exhibited by one farmer.

◈ ◈ ◈

If a stable has just finished a disastrous campaign does the owner quite the game? inquired Jesse Shuff, the Kentucky correspondent of the American Sportsman. Not by a jugful . He may be a little blue, but it is so easy to avail himself of any of a hundred and one excuses why his horses failed to connect with the big end of the purses, or he just peddles off one or two of them and starts out on the hunt for a trotter that can win.

◈ ◈ ◈

J. G. Truman, one of the largest importers and breeders of Shire and Hackney horses in the West, was indefinitely suspended as an exhibitor at the International Horse Show during the recent exhibition in Chicago. He lost his temper when his Hackney stallion Romping Flash, champion of the last National Horse Show in New York, was placed second to John J. Mitchell's Kingfisher, and used offensive language to the judges, William H. Moore and Robert A. Fairbairn, as he was leaving the ring.

◈ ◈ ◈

The Department of Commerce reports 29,590 horses and 15,309 mules exported from the United States in the month of October. Their value was $9,719,594. In the ten months ended October 31 the number of horses exported was 239,894, and the number of mules 106,334, making a total of 345,228 head, valued at $74,700,433. During the same period last year the number of horses was 391,059, and of mules 105,238, making a total of 496,297 head, valued at $101,388,938.

◈ ◈ ◈

The next big trotting horse auction will be the Mid-Winter Sale at Madison Square Garden, New York. The highest prices ever obtained at this famous annual sale were for Baldy McGregor, at $16,000, while three other aged horses were sold at $4,000 or more; Peter Billiken, $5,000; Charley Mitchell, $4,500, and Mr Hawthorne, $4,000. The highest-priced mares sold in the same sales were Helen Hale, $8,000, and Adioo Dillon, $4,500. Only two two-year-olds have been sold for $3,000 or over—Katy O'Neill, $3,850, and Rose Knight, $3,000.

◈ ◈ ◈

Dick McMahon, after a week's visit in San Francisco and Pleasanton, has been spending several days in Los Angeles looking over some of the prospects he has heard about. He will probably take three or four back to Libertyville with him from Mr. R. J. MacKenzie's Pleasanton Stock Farm. Mr. McMahon's injured ankle is giving him a good deal of trouble and he expects to go to the celebrated Mayo Brothers, surgeons at Rochester, Minn., to have an operation performed in the spring if the ankle is not improved by then.

◈ ◈ ◈

W. R. Murphy, of Santa Ana, has moved to Los Angeles for the winter and has five head of horses at the track there that he is getting ready to race. The five are Bellwig Boy by Wiggins out of a mare by Bow Bells that looks like a classy trotter; a two-year-old by Junior Dan Patch 2:04½, dam by Roy Wilkes 2:06¼; a two-year-old by Red McK, dam by Ignis Fatuus 2:20½; a four-year-old by Hal McKinney 2:06¼, and a bay mare by a son of Barondale 2:11¼ out of a mare by Atto Rex. All these horses are green and have not had any work as yet since last summer.

◈ ◈ ◈

A New York daily quotes Mr. A. H. Cosden, owner of The Real Lady (2) 2:04¼, and for many years one of the best supporters of Grand Circuit racing, as opposed to the present system of early-closing installment plan purses, usually misnamed stakes, and determined to patronize them no more. "If a man could reasonably expect," Mr. Cosden is reported as saying, "to get back what he has to pay out in entrance fees, training bills and shipping charges, after he has paid for his horses, I wouldn't give it up, because I like the sport . But it is too one-sided to be enjoyable. Besides, I like colt racing better and so I am going in for two- and three-year-olds."

◈ ◈ ◈

W. S. Harkey, of Gridley, was in town this week for a few days' recreation. Mr. Harkey bred the good mare Deviletta 2:10½ and Sutherland & Chadbourne now have a two-year-old from her in their string that looks like a real good one. He is by The Proof 2:09¾ and if there is anything in looks and breeding he will be an honor to both sire and dam. Mr. Harkey, who is an extensive farmer, has added a herd of 40 milk cows to his farm, and sells his milk to the creamery . He sows the most of his acres to grain, however, and has a lead mule on one of his plow teams that he says is the best jerk line mule in the State. This mule is out of a trotting bred mare by Moses S. 2:19½, and no day is too long for him. He is kind and gentle, afraid of nothing, yet is up in the collar from morning until night, and carries his head in the air like a show horse. Mr. Harkey also has a fine young mule out of Deviletta that he says can trot your eye out.

Mutual Betting Is Popular.

Excepting the bookmakers ,who lost their occupation when the pari-mutuel machines were introduced in Kentucky and Maryland, nearly everybody in those States seems to be pleased with the mutual system of betting. In Maryland, where a very prosperous racing season ended in November last the track managers are enthusiastic. The average daily amount at the Laurel and Pimlico fall meetings was considerably more than $200,000, it is said, and in one day at Laurel the total was $290,000, while at Pimlico the high water mark was $316,000, which stands as a record for the Maryland tracks.

What the mutuel system means to the tracks is readily seen when it is remembered that in the old days of book betting there were never more than thirty-five bookmakers at Pimlico, and they paid $100 each for the privilege of operating. This arrangement limited the income of the track from this source to $3,500 a day, whereas it was something like $17,000 on the best day of the fall meeting this year, with an average of more than $10,000 a day for twenty-six days of racing, or approximately $300,000 for the year.

In Canada and Kentucky, as well as in Maryland, the mutuels are supplanting the bookmakers on all running tracks, and their popularity now extends to the trotting tracks, machines having been used last year at several meetings in the Grand Circuit. At Windsor, Ont., which is just across the river from the flourishing city of Detroit, there are now five or six running tracks operating the machines, and at Montreal a lot more tracks have come into existence since the profitable mutuels supplanted the bookmakers.

Breeder of Lee Axworthy Buys Peter the Great Colt.

That sons of Peter the Great 2:07¼ will be as successful in the stud as the sons of any other trotting sire in the world is the confident bleief of William Bradley, treasurer of the Fiss, Doerr & Carroll Horse Company of New York and breeder of the champion stallion Lee Axworthy 1:58¼. Mr. Bradley has just backed his opinion in the matter by purchasing the grand looking young stallion Little Peter 2:22¾, by Peter the Great, to put in the stud at his Ardmaer Garm, Raritan, N. J., where Lee Axworthy was bred.

Little Peter belies his name, for he is 15.2½ hands high and is powerfully as well as finely formed at all points. He is four years old, and is a dark, rich mahogany bay in color. He was bred by H. B. Clay of Paris, Ky., and is out of Bettie Wiggins, by Wiggins 2:19½, son of Aberdeen and sire of many crack trotters, including four in the 2:10 list. Nellie Tourney 2:21¼, the grandam of Little Peter, is the dam of Aunt Molly 2:16¼ and Baron Allerton 2:15¼. She was by Baron Wilkes 2:18, the sire of Moko, and was out of Belle Medium, one of the best producing daughters of Pilot Medium, sire of Peter the Great.

Little Peter's record was made as a three-year-old, with very limited training, and in his work at that age he trotted in 2:18¼ over a half mile track.

Probably no other horseman now living has owned three such sires as Mr. Bradley owned in Bingen 2:06¼, Todd 2:14¾ and Guy Axworthy 2:08¼, and his choice of a son of Peter the Great for stud purposes is therefore especially significant. Referring to the doubts expressed recently by some horsemen as to whether Peter the Great is going to breed on, Mr. Bradley said recently:

"Why in the world shouldn't he? He is as great a sire as ever lived, and I am confident he will breed on as well as any of them. If I didn't think so I wouldn't have bought Little Peter."

———o———

E. B. Jermyn, Mayor of Scranton, Pa., a wealthy coal baron, shipped to Toronto in charge of Trainer Jas. Terrell four head of new candidates for the ice. Lottie Hall, brown mare, 2:20¼, by Walnut Hall, dam by Moko, is a trotter, the balance of the string being pacers; Light Silk, chestnut mare, green pacer, by Silk Cord, dam Headlight by Dictator Chief, by Dictator; Lady Alice, brown mare, 2:19¼, by Joe Patchen 2:01¼, dam Dower 2:12¼; Polly Ann, brown mare, 2:06¼, by Alstrath, by Alcyone, dam by Wilkes Boy. The four head landed in good shape and have all taken to their work nicely. Mr. Jermyn, who will arrive on the opening day of the races at Hillcrest Park, is a devotee of the harness horse, and keeps his string for the pleasure he derives from seeing them race, and as a recreation from the business worries that naturally beset a man in his position. Mr. Terrill ,the trainer, feels sure he has four good horses in his string, and if they take to the going over ice they will certainly give a good account of themselves.—[Trotter and Pacer.

◈ ◈ ◈

Dates for some of the big Western horse shows to be held next season in connection with State and district fairs have lately been arranged, as follows:

Des Moines, Iowa	Aug. 37-31
Detroit, Michigan	Sept. 3-7
Hamline, Minnesota	Sept. 3-8
Indianapolis, Indian	Sept. 3-8
Springfield, Illinois	Sept. 10-15
Milwaukee, Wisconsin	Sept. 10-15
Syracuse, New York	Sept. 10-15
Louisville, Kentucky	Sept. 10-15
Nashville, Tennessee	Sept. 24-27
Sedalia, Missouri	Oct. 9-13
Kansas City, Missouri	Oct. 1-6
Atlanta, Georgia	Oct. 15-20

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Steelhead Angling.—Anglers by the score betook themselves to the Russian river over the holidays to enjoy the steelhead fishing which is now allowed in District Two.

The limit is two per man per day, but the fish are large and a limit catch often means that fisherman has from ten to twenty pounds of trout. Reports during the week have told of fifteen pound catches and of many smaller ones.

The stream is running freely across the bar and the present storm should increase the run of steelhead up the river. The fish are quick to find fresh water inlets at this time of the year. A freshet, which will thoroughly wash out the stream and decrease the saltness of the water, should bring an increased run of fish.

Some fishermen will not take fish from this stream until after a freshet. They believe that the water of the lower reaches of the river is so polluted during the summer months, and so saturated with decayed redwood, that the fish partake of the flavor of the water.

A number of sportsmen took limits last week, among them R. E. LaCoste, Jnc. LaFranchi, Harry Lep, E. Snider, E. Foresti, C. M. Morrill, J. C. Parmier, Wm. Kimball, Edward Feranes, Tom Eckert and F. V. Ogburn.

Boosts Migratory Law.—Washington, D. C.—The magnitude and importance of the wild fowl of the United States is shown in these plain statements of facts given out recently by the Department of Agriculture:

"The State of Maine estimates the annual income from its game resources at $13,000,000, of which about 5 per cent, or $650,000, can safely be allotted to the returns from migratory wild fowl.

"Oregon values the annual returns from its game resources at $5,000,000. Of this amount about one million dollars may be attributed to migratory wild fowl.

"It is evident that the actual annual returns from this source in the several states reach a very large amount, and the value of this resource to the nation amounts to hundreds of millions of dollars.

"The benefits of the migratory bird law in conserving and increasing the wild life of the country is not confined solely to the game birds. This law also protects at all times throughout the United States our insectivorous birds, which inhabit every state.

"The bureau of entomology has estimated that insects injure agriculture and farm products to the amount of $652,000,000 annually. When it is considered that insectivorous birds constantly prey upon and devour myriads of injurious insects throughout the country, the benefit of these birds in maintaining the balance of nature and in limiting the increase of our insect enemies is of untold value."

Talk With Bill Richards.—"The best duck season in ten years, that is what I think about it," said Bill Richards when asked how brids were going over the Suisun marshes this year.

Bill Richards is one of those sportsmen who has mellowed with the game. When you write his name you think "Bill" and put down, in parenthesis, "W. W.," and as an afterthought add "Richards." He is sixty-two.

"You see," said Bill, as he tilted back and propped his feet up on a dwarfed desk stool, "you see, I always figured that a man's business was entitled to three days a week."

And then something that Harold C. Bryant once remarked became clear. "If I should want to find the man who knows most about Suisun marsh I should hunt up Bill Richards." And Bryant knows a thing or two about birds himself.

"I began shooting in that marsh in '77," continued Richards. "This season is the best that has come along in recent years. The reason? Well, I think it's this: We had but little rain after the middle of February. It gave the ducks time to nest and rear their ducklings without the usual losses. Breeding conditions were better all the way through and that is what counts.

"The Federal migratory bird law is another thing that I think helps. The good effect of this law is going to be felt more as the years go on.

"We have had good shooting on the marsh. It's a sprig camp—that marsh . We've had limit after limit. Yes, sir, the best season in ten years."

Green Lake Club.—The Green Lake Gun Club was formed three years ago with ten members, consisting then mostly of people in the immediate vicinity of Green Lake. In 1915 the membership was pushed up to seventy-five. In 1916, realizing the growing needs of the club, the officers voted an expenditure for a new club house and improvements to their grounds. That this work has brought forth its fruits may well be evidenced from the fact that the club now consists of 120 members in good standing.

During the meeting of the Washington State Sportsmen's Association held last May, the Green Lake Club was awarded the state shoot for 1917, the trapshooting classic of the year for the state of Washington . Plans are now being formed which the club believes will result in bringing together the largest number of contestants the state shoot has ever drawn.

A cordial welcome is extended to all to come out and get acquainted wit hthe sport that has proved so attractive to more than 600,000 sportsmen throughout the United States, all being invited to participate, whether members or not.

TALK OF CLOSED SEASONS IN SOUTH.

Slaughter of Game Is Pointed Out with Thousands of Hunters in Field.

Los Angeles, Cal.—Some drastic action must be taken hurriedly if Southern California is to have any wild game at all. Last season the killing was veritable slaughter. Two or three more such and the deer will take its place with the stuffed buffalo in some museum.

The automobile and the good roads have brought the forests and the waste places where the wild animals live within a few minutes' ride of the city huntsman's door. It used to be when a man went deer hunting, he was gone for a week or a month. Now he merely rises at daylight, jumps into his machine and is back for work at 9 o'clock with or without his deer, depending on his luck

The result has been that thousands are hunting today who did not hunt three years ago. They didn't have the time, nor the willingness to rough it, nor the hunter's instinct.

Last year a man stood along the Malibu and counted the hunters as they passed. Between daylight and darkness, 117 went by; 117 hunters passing one place in twelve hours—that means that probably a thousand were out that day. It means that thousands were out during the season. No game can exist long in the face of mobs like that.

So the deer and every other wild game is going. The sport of the hunt has decreased and the lust to kill has increased as the means of access to the forests have become easier.

Killing chickens in one's backyard isn't much success as a hunt. The only way anybody can get any excitement out of it is seeing how many they can kill in an hour or in three shots. The whole object with the hunters nowadays is to see how many limits they can get and how fast they can get them. That is the only sport a man can possibly get when he motors to the scene of the hunt in a limousine and tramps around in his bedroom slippers.

Not only have the uneducated army of hunters, the spoilers, killed merely for lust's sake, but they have killed blindly. Does, fawns and spike bucks lie rotting in the canyons.

So great has the killing become, that the animals cannot possibly breed as fast as they are killed, or even one-half as fast.

When they are gone, they are gone for all time. Streams can be stocked with trout from hatcheries, but you cannot restock the forests with deer, no more than the plains could be restocked with bison.

The real hunters of the South, seeing the imminent danger, have proposed a closed season for the next four years. In that time the fast thinning game would have a chance to breed and grow unmolested. They should easily more than double. Then the bars could be taken down again, probably never as far as today, but enough.

Portland Club.—Dennis J. Holohan, a visitor from Burley, Idaho, was high amateur at the Everding Park traps of the Portland Gun Club on December 24th. He tied his father, Peter J. Holohan, a Portland professional, for high honors of the day. Each broke 88 per cent of the bluerocks thrown to them.

Following are the scores recorded: Dennis J. Holohan 88, P. J. Holohan* 88, A. W. Strowger 82, C. N. Parker 81, Henry R. Everding 80, Homer A. Pollock 72, Dr. A. J. Brock 70, J. S. Crane 70, John G. Clemson 70, William C. Bristol, with his regular 20-gauge gun, 65.

Hunting Dog Wears Glasses.—Moultree (Ga.)—Fanny, a thoroughbred setter, wears spectacles. She was fitted with glasses by an oculist, who found that she had astigmatism.

For years Fanny has been known as one of the best hunting dogs in this section. Before the opening of the quail season this year she went to the fields b yherself, and on returning showed evidence of bad falls. Fanny could not help falling into ditches and running into trees. Then it was discovered that her eyes had become affected.

It is believed that the glasses will correct the trouble. At least Fanny now is doing her work as well as usual.

DEFINITE STEPS FOR RATING DOG SHOWS.

Present Point System For Championship Likely to be Abolished by A. K. C.

New York.—The quarterly meeting of the American Kennel Club was held last week at headquarters, No. 1 Liberty street. Although nothing of a radical character resulted, many incidents of significance for the future transpired. The meeting, although in itself purely routine, indicated that much may be expected at the annual meeting to be held in February.

One thing seems certain ,and that is the present point system governing ratings for championship titles will be dropped overboard. From what one could gather, the conferences which have been held between the Rules Committee and the License Committee have resulted in the conclusion that the present system utterly fails to meet the situation. Furthermore, the discriminating manner of apportioning winners' classes according to breeds will not be presented for ratification at the annual meeting.

The system which seems likely to be put into effect is one based on the average number of dogs per class. At present it looks as if each breed will sail under its own flag. In other words, according to the average per class in each breed, so the points credited to the winner's class for that particular breed.

In the light that half a loaf is better than no bread, such a system must be sweepingly beneficial. Its weak spot, however, lies in the fact that breeds in which bitches produce large litters have a big advantage over breeds in which bitches produce two or three in a litter.

Naturally one must take the good with the bad, but the writer thinks some consideration should be given to the fact that some breeds are more prolific than others; also that the young of some breeds are much harder to raise to maturity than others. It is not numbers alone which count. I have in mind one breed so prolific in its producing powers that "the market" is flooded with specimens, most of which are much below the standard for show purposes. Yet because this breed's classes fill well—more for dealing purposes than in the hope of winning a prize—the road to a championship would be much easier, owing to the number of points its excessive "output" would give to the winner's class.

Again, if each breed went off its own bat, shows of distinctive importance would lose all that, or one might say would lose their identity.

As regards specialty club shows, however, such a system is absolutely necessary. A little coterie can get together and under the pretext of holding a specialty club show have as many gatherings per annum as are necessary for their dogs to become champions. An examination of the awards list in the Kennel Gazette for the last year or two will disclose this.

For shows not confined to a particular breed, however, it would, perhaps, be more equitable to take the grand average—i. e., if a show gives 100 classes and has 500 entries, the average would be five per class.

Whatever may be determined on at the annual meeting I would suggest that it be specifically stated that dogs entered for "specials" only or "not to compete in this class," will not be considered as far as the rating is concerned. FOX HILLS.

New Coursing Club.—The California Coursing Club, an organization recently formed around San Francisco bay section to revive interest in the racing of greyhounds, has determined on January 14th as the date for the initial meet. It will be run off at Sacramento. The members are figuring on using the Tanforan race track later on in the year. At present the coursing enthusiasts have no park, as their place at Ingleside was cut up several years ago.

The Capitol City Club has grounds at Sacramento that have been tendered to the local organization. R. J. Malcolm is president of the California Club, with George Heintz of Oakland, secretary, and John H. Rosseter, Roy A. Avery and H. H. Deckleman on the executive committee.

A number of the members are starting to acquire greyhounds again. Rosseter recently imported two dogs from England and Avery has just received two dogs from the East. One of them is Wild Night, that divided a sixty-eight and won a sixteen stake in the Middle West.

Snow at Bear Lake.—Heavy snowfall and freezing weather has chased out the remainder of the Bear Valley ducks and put an end to the sport for the season. Gus Knight of Los Angeles has several firm convictions regarding the regulation of the fishing and shooting which is the chief asset of that beautiful mountain resort, behind them being his forty years' experience of the local conditions. Knight thinks all motors should be forbidden in duck hunting, and might well add fishing also, but doesn't. The veteran thinks the small hook and fine gut system of murdering fish should be forbidden by law, this being the worst year of trout-wasting by hook-killed trout he ever saw, and he strongly advocates prohibiting all market fishing in Bear Lake. An expert, Knight has finally come to advocate strongly all sane protective measures as essential if the supply is to be kept up against the wonderfully-increasing demand.

PLENTY OF QUAIL ARE LEFT.

Season Is Now Over and Conditions Are Favorable For Breeding.

Although the quail have been hunted long and persistently this season, close observers are rather surprised at the number that have survived, and the present snowfall will prove to those who go forth in it that there is at least as big a breeding stock left over now as a year ago, ready to take advantage of the favorable breeding season which a continuance of the present rains assures.

Upon the big preserved ranches of the Simi Valley, more quail are to be seen today than a year ago. The bunches range from thirty to fifty individuals, and every spring has its following, sometimes a band in every little draw. This breaking up of the big droves is considered one of the best developments possible as inducing a heavy general breeding, the birds separating in pairs with the coming of warm weather, and repopulating every canyon.

The maintenance of quail shooting in limit possibility for those who not only know where to go, but how to hunt and can hit when they get there, this in face of over 30,000 registered hunting licensees in the southern end of the State is one of the most encouraging tributes to scientific game law enactment and administration, quite at variance with the usual good sport, drastic prohibition and no-increase program exemplified in the East.

Californians who study fish and game problems feel much encouraged at the uniformly good sport of 1915 and 1916, and the idea is growing that the Fish and Game Commission should be given power to shorten seasons if in its judgment the need should develop between two Legislatures, through very bad weather, dry winters or other features likely to curtail breeding.

Harry Sutherland of San Luis Obispo states that the quail are more plentiful thereabouts than in years; rabbits so pestiferous that farmers are complaining. Duck shooting near San Luis and west of Santa Maria has been very good. The wild pigeons are so numerous that upland stock-raisers complain because of the acorns they eat, which make such choice pork. Traveling sportsmen who have not made the acquaintance of this section have overlooked good shooting country that is not generally appreciated at its true worth.

Places For State Shoots.—Thirty-seven State trapshooting associations have selected the cities where they will stage the 1917 State championship tournaments. Here is the list of States and the fortunate cities:

Alabama—Brmingham. Arkansas—Texarkana. Arizona (not selected). California (not selected, probably Del Monte). Connecticut (not selected). Delaware (not selected). District of Columbia (affiliated with Maryland). Florida (not selected). Georgia (not selected). Idaho—Twin Falls. Illinois—Streator. Indiana—Indianapolis. Iowa—Waterloo. Kansas — Larned. Kentucky — Louisville. Louisiana—Alexandria. Maine — Rockland. Maryland — Baltimore. Massachusetts (not selected). Michigan—Birmingham. Minnesota — Brainerd. Mississippi—Natchez. Missouri—Springfield. Montana—Anaconda. Nebraska (not selected). Nevada (affiliated with California). New Hampshire—Manchester. New Jersey (not selected). New Mexico (affiliated with Colorado). New York—Syracuse. North Carolina—Wilmington. North Dakota—Minot. Ohio — Cedar Point. Oklahoma — Tulsa. Oregon — Salem. Pennsylvania—Bradford. Rhode Island (not selected). South Carolina—Greenwood. South Dakota—Alexandria. Tennessee (not selected). Texas — Houston. Utah—Oregon. Vermont—Randolph. Virginia—Roanoke. Washington—Seattle. West Virginia—Richwood. Wisconsin—Wausau. Wyoming—Casper.

Are You a Sportsman?—Can it be said of you that you are satisfied with a reasonable bag? Does the man that comes after you get any of the sport? In many localities such sportsmen exist. They are interested in the protection and perpetuation of the country's game resources. They get what they want, but they have conservative wants. They never fire a gun at any kind of game if they thought by so doing they would injure the prospects for the increase of that game supply. In some sections wild water fowl are exceptionally good this year, the increase being attributed to the migratory bird law and to gunners who on previous gunning trips only shot enough for their actual needs and never more than the law limit.

This could be true of all other game. Don't shoot more than you need. Don't shoot just for the sake of hitting something. If you feel that way about it, go to the nearest gun club and break targets. It's a fine sport and you are not killing off or reducing chances for future supply, no matter how many clay birds you kill.

Be a considerate sportsman.

Swift Killed Near Arbuckle.—A large, almost full-grown swift, a cross breed between a coyote and fox, was killed by Ernest Sachreiter about eight miles east of Arbuckle. The animal had been seen several times lately but no one had been able to get near it. Sachreiter, on a horse, chased the swift for eight or nine miles before it finally became exhausted and stopped.

HOW DID MOTHER-LOVE BEGIN? ARE ANIMALS' MINDS LIKE MEN'S?

SCIENTISTS TAKE UP QUESTIONS AFTER DEVOTING MUCH STUDY

How did mother-love, self-sacrifice, and intelligence come into the world? To help solve such puzzles, the scientists are turning to man's cousins, the animals. Some of the curious and illuminating results are set forth by Dr. S. J. Holmes, Associate Professor of Zoology in the University of California, in his book just published, "Studies in Animal Behavior."

Why do mother-birds go to the trouble of brooding over their eggs, and if eggs won't hatch unless they are kept warm, where did the first bird come from?—this is an old-time puzzle. Professor Holmes's answer is that the first bird was not a bird but a reptile. This ancestral reptile come up out of the sea to live on the land. Those which acquired the habit of guarding their eggs had more descendants than those which did not. As the cold-blooded reptiles in time changed into warm-blooded creatures, the habit of lying near or over the eggs while guarding them helped along the process of hatching, until finally warm-blooded birds developed which must brood over their eggs if their own kind was to continue.

The development of parental care was a long, slow process. The lowest creatures multiply by just splitting in two—but even in that there is a beginning of altruism and egoism. Among the lower invertebrates the young are left to shift for themselves from the first. There is an interesting crustacean, Amphithoe, which carries her eggs and her young for a few days after they hatch out, in a brood-pouch under her body. When agile enough, the young creep out and swim away, and this mother manifests her fondness for her children only by devouring them if she has a chance.

But family life is impossible on a basis of purely egoistic behavior, and all autruism grows out from the beginnings of parental care. The first manifestation of parental care is the instincts for finding proper surroundings for the eggs—instinct found in creatures which will never see their young and could not recognize their own offspring. The botfly lays its eggs on the hair of the living horse or cow. Among certain solitary wasps, the mother digs a hole, catches a particular species of insect or spider, and deposits an egg in the body of the victim, thereby paralyzing it so that it cannot crawl away but must remain entombed alive where the wasp has buried it. So, when the wasp's egg hatches, her offspring will have living, undecayed fresh meat on which to feed.

The female scorpion displays interest in her young, for she tears away the egg membranes to help the young escape, and then the tiny scorpions mount on their mather's back . She then remains for several days in her nest.

The male Obstetrical Toad of Europe carries the eggs of his mate coiled in strings about his hind legs until the young are ready to hatch. The Running Spider, Lycosa, carries her cocoon about with her, and when the spiderlings hatch out they cling in a squirming mass to her body.

The alligators guard the spot in the sand where they have buried their eggs . The pythons coil about their eggs and help them to incubate. It is seldom, however, that snakes show any such solicitude for their eggs, and active care for their young is practically absent among reptiles.

The father is the defender of the family among the dogfish and the sticklebacks. The male fish builds the nest, remains in it or near it to drive intruders away, and for several weeks after the eggs hatch out, swims about with the young fish valiantly defending these small fry.

Most insects are indifferent to their young, but certain of the solitary ants and solitary bees leave an ample provision of food with their eggs so that the young may be fed. It is a natural development from this beginning to the habit of continuing to bring food and of caring for the young larvae. Socities grow out from the family. The typical insect community is an enormous family with but a single mother.

The higher the scale of life, the fewer the offspring and the greater and longer the care the young receive. So develop sympathy, affection, and the emotions of family life.

The lower birds build only crude nests and hatch many young, which are active early in life, but a large proportion of the young die. Among the higher songbirds, however, few eggs are laid, but those are in a well-prepared nest. The young are helpless, and so are fed, kept clean, carefully guarded, and educated.

Our monkey cousins show a tenderness little short of human, driving away the flies from the monkey baby, washing a young one's face in a stream, monkey mothers dying of grief over the loss of their young, and other monkeys promptly adopting orphans.

With the doctrine of evolution universally accepted by scientific men, a particularly active endeavor nowadays is to trace the process of evolution of particular instincts and of particular mental faculties.

Explanation of the tropisms of the lower creatures is made more difficult by the fact that behavior may be extremely varied even without the slightest evidence of intelligence.

Many lower creatures, however, show the beginnings of intelligence in that they can learn by experience. Out of purely instinctive behavior has grown a power of associative memory—though there is little ground for believing, thinks Professor Holmes, that animals have general ideas or the power of deliberate reasoning. They do have, however, ideas of a simple sort and a certain power of inference. A crayfish can be taught. One crayfish was put in a box divided by a partition. If it went to the right, it was stopped eventually by a plate glass. If it went to the left, it found an open passage to a tank of water. In the first ten trials the crayfish took the wrong road as often as the correct one. In the next ten trials the percentage of correct choice increased. Finally, the crayfish came to know the correct path to the open tank, so that it rarely made a mistake. Similar experiments have shown that crabs, fishes, and frogs can slowly learn.

The curious ways in which certain creatures feign death has aroused much interest. There is a caterpillar of one of the geometrid moths which clings by one end to a twig in such a way that it looks exactly like a fork of the twig. Many insects on being touched will feign death. Certain crayfishes, frogs, lizards, snakes, birds, and mammals by manipulation may be put into a sort of hypnotic state. In large part these feignings of death are not an intelligent intention, but automatic, and the result of a contact-shock. The young terns have a strong instinct for feigning death.

"Playin' possum" is proverbial, and foxes will pretend to be dead and open their eyes surreptitiously to see if it is safe to scamper off. In the birds and the mammals such feigning of death involves a more or less deliberate intention to profit by deception, though it is probably not a result of conscious reflection, but based on instinct.

The profoundly important role of sex in evolution is pointed out by Professor Holmes. Were it not for the necessities of sex, there would be neither color nor scent in flowers.

The processes of wooing and mating have been responsible for the sharpening of the senses, the development of strength and acuteness, and the evolution of the higher qualities of mind. The vocal apparatus, for instance, has as its primal purpose the sex call . Later came the development of the voice as a means of protecting and fostering the young, and then the development of speech for social communication—and from that the whole development of intelligent human society.

Mayor of Alvarado.—Bill Robinson is the Mayor of Alvarado, so the boys say. He lives in a cabin on the drawbridge and conducts his tuleborough with much more efficiency than a hunter for political favor.

Bill Robinson leaves San Francisco each year with the opening of the season, and from then until ducks are no longer to be shot he keeps his abode on the bridge . The Mayor, though he always must walk with a crutch, never fails to have game—limits mostly. The Mayor doesn't sell his game. It goes to his friends or is roasted and served to hungry parties right in the Mayor's hall.

Robinson's father was a great hunter, too. He was Richard Robinson ,who won distinction as the champion wing shot of Canada.

Biggest Hatchery in World.—The Sisson hatchery is the largest in the world, according to the report of the State Fish and Game Commission.

The hatchery has an annual capacity of 50,000,000 trout and salmon fry, and during the last season distributed 18,400,000 quinnat salmon and 9,597,000 trout fry. The hatchery turned out 11,372,000 trout fry more than could be shipped, this resulting in plans for a better distribution system.

The hatchery has on hand at the present time 313,204 trout, including 9000 mature rainbow trout, 9600 Eastern brook trout and 12,650 Loch Leven trout.

Got a Hungry Goat?—Two hundred hungry goats are wanted by the forest service. They must be hungry, says W. L. Whiteman of the local office.

Most ordinary citizens will think that the specifications concerning the appetite is superfluous. A goat without an appetite is as unthinkable as a burro with a pleasant disposition.

But the Forest Service is quite in earnest when it declares that the goats must be free from stomach trouble, have good teeth, and, above all, husky appetites.

Eating is to be the main business of these angoras, which labor undoubtedly brings a mere goat as close to his seventh heaven as he will ever reach. These two hundred dyspepsia-free beasties are to be banqueted on the fire breaks of the Angelus forest. They are to take the place of brush cutters, who each year clear the growth which springs up on these protective trails.

The service expects to be able to herd the goats up and down these clearings and allow them to mow the brush before them. It all rests, however, with the goats, say the officials. There must be no dieters among the two hundred.

Sportsmen's Row

President F. M. Newbert of the State Fish and Game Commission states that he does not know of any bill to be introduced by the committee forbidding the use of salmon eggs as bait for trout. "I do not wish to go on record in favor or against such a measure until I see the bill," says Newbert. "There are things in favor of the bait and there are things against it. As far as I know the Commission has taken no action either way."

* * *

Members of the San Francisco Fly Casting Club recently elected officers for the new year as follows: President, Frank J. Cooper; first vice-president, F. W. Webster; secretary, Paul Shattuck; directors, Dr. B. W. Westphal, W. F. Bokart, W. J. Davis Jr., Stanley Forbes, Walter Mansfield and J. S. Siebe.

* * *

Cards have been received here carrying the announcement that the Wilmington, Del., Gun Club, of which T. E. Doremus is president, held a shoot on December 30 in honor of "Ted," as he is known to his many friends. The occasion is the celebration of his 29th birthday. Mr. Doremus was recently re-elected president of the Interstate Trapshooters' Association, which controls organized trapshooting in the United States. He is well and favorably known here, having been in attendance at the Pacific Coast handicap shoot staged at Portland in September.

* * *

Canvasback shooting on the mountain lakes showed improvement over last year, the feed beds at last having caught up with the sudden raise in the water levelsin the spring of 1915 further swelled last January. The chief food supply of the canvasbacks in Crane and Castais lakes is sago pond weed (Potamogeton Pectinatus), but those frequenting Bear Lake are drawn by a water smartweed and another plant very closely resembling the famed "wild celery" or "eel grass" (Vallisneria Spiralis) of Chesapeake Bay.

* * *

Rabbits appear to be more affected by parasitic and other disease than by law, which is the explanation of conflicting reports, some sections noting a decrease even under shorter seasons and the fifteen-per-day bag limit, but in general both sage and cottontail species seem to have held their own or better.

* * *

Awakening to the real value of fishing and hunting as assets to the community at large through the interests built up about these sports has been more noticeable during the year just closed than ever before and is considered by conservationists as an earnest of continuance in the program of wise laws well enforced; that there may be more fish to catch and more birds to hunt. Even the deer bag showed an increase, although admittedly the hardest problem with which game lawmakers or their administrators have to deal.

* * *

Angling licensees who exercise the privilege in the surf attribute the scarcity of their favorite species to current changes rather than over-fishing, either sporting or commercial, as the surf fishes have been given protection for a number of years, and more arrests were made than usual through closer surveillance rather than greater violation.

* * *

Dove hunters enjoyed as good a season as the necessarily-delayed opening permits, the famous "flights" that used to be so marked a feature of Southern California sport being so essentially a feature of the breeding period that they must be foregone if the dove is to be maintained as a game bird at all.

* * *

The International trapshooting tournament at St. Thomas, Ont., in December was the biggest ever held in Canada. Bob Emslie, the baseball umpire, is president of the St. Thomas Association.

* * *

Joe Bush, a member of the present day Athletics, and Chief Bender, a pitcher of the once champion Athletics, engaged in a 100 clay target match in Camden, N. J., a short time ago and Bush broke 94 targets to 92 for Bender.

* * *

The Minneapolis Athletic Club, the largest and strongest social organization of business men in that city, has gone in for rifle shooting and trapshooting.

* * *

Thirty girls of the State College of Washington are given instruction weekly in the use of fire-arms.

* * *

Employees of the Twin City Telephone Company in Minneapolis and St. Paul, Minn., have formed a rifle club.

* * *

Trapshooting trade representatives of Missouri, Iowa, Wisconsin, Illinois, Kentucky, Indiana and Michigan have formed an organization known as the Miwikims and an annual tournament on the same order as the Westy Hogans will be conducted.

* * *

Thirty-five States allow the killing of deer.

* * *

Wyoming is the only State in the Union where the big horn sheep may be killed.

The States—Nevada and Texas—and the Province of Manitoba are the only places where antelope may be hunted.

* * *

Moose may be killed in nearly all of the Canadian provinces, and in Wyoming under a special license fee of $100.

* * *

The United States Government has appropriated $300,000 for the destruction of noxious animals in the mountains.

* * *

The Connecticut Fish and Game Association has increased its membership more than 500 souls during 1916.

* * *

New Mexico has such a progressive State Association for the protection of game that there are few violations there

* * *

Elk may be killed in three States—Montana, Wyoming and Idaho—and in four Canadian provinces—Yukon, Manitoba, Saskatchewan and Northwest Territory.

* * *

Some hunters do not look before they shoot—and that is the reason five men were killed in New York and fuor in Michigan during the few days of the deer season.

* * *

Pennsylvania gunners assert that the deer season in that State, the first 15 days in December, is too late for the comfort and pleasure of the hunters, and say also that the venison is not fit to eat so late in the year.

* * *

Colusa (Colusa Co.)—The shooting preserves in the vicinity of this city have yielded nearly forty tons of ducks for visiting hunters. More than 1,000 hunters, averaging a kill of 25 each, have been in Colusa since the opening of the season. This would indicate the slaughter of 25,000 ducks, totaling at the very least 5,000 pounds or nearly forty tons. These figures do not include the number of ducks killed by local gunners.

• • •

News have been received of the deaths of two of the most famous bulldogs in England. Ch. Felton Comet, whose winnings ran into four figures and who was victor in practically every competition worth while, is gone. So is Aquitania. The latter had trouble in whelping, and not only succumbed herself, but so did a litter of seven puppies.

* * *

J. F. W. Moore—"Just wait for me"—has returned from a pleasant vacation in the South. The local trap shot took in all the sights in Southern California and crossed over to Tijuana to see the races. J. F. W. M. found the hunters busy in getting game, and prospects bright for the trapshooting sport.

* * *

Hugh Poston has happily recovered from his recent illness and is up and about again greeting friends.

* * *

J. A. Chanslor thinks a deal of his little setter, Sonoma Girl. The bitch is only eight months old and looks like the best bet for the Derby at the next trials. Last month Sonoma Girl was just beaten by Maggie G. by a margin.

Vernon Club.—Mr. and Mrs. C. E. Groat tied for the gold bar emblem put up for competition in a 50-bird handicap trap shoot Sunday morning by the Vernon Gun Club. Both shot from 18 yards and broke 48 birds. They shot off at their allotted handicaps. Groat won, breaking 24x25 and Mrs. Groat 23x25. The race was closely contested as the scores indicate.

The four beautiful oil paintings, painted by Fred Kimble and donated to the club as season prizes, were awarded as follows: Stanton A. Bruner, first choice of pictures; C. E. Groat, second choice, Mrs. C. E. Groat, third choice, and J. W. Meek, fourth choice of pictures.

The loving cup donated to the club by Mrs. Groat was won by William Pugh, the most faithful and enthusiastic follower of the trapshooting game in Southern California.

Secretary Stan Bruner announces that another set of season trophies will be placed up for competition as soon as the game season closes. The clay bird season never closes and the followers of this sport have that advantage over the field stalkers, being able to shoot the year around. Sunday's scores follow:

	Hdcp.	Total	Practice.
C. E. Groat	18	48	45
Mrs. C. E. Groat	18	48	45
J. D. Dierdoff	18	46	45
Kinney	16	47	37
Spafford	16	43	42
Wm. Pugh	18	45	43
Bob Bole	18	39	41
A. W. Bruner	16	47	42
Chas. White	16	..	49
Yorby	16	..	39
Billy Neil	16	..	50
Ed Bohring	16	..	25
Wm. Brawner	16	..	25

COAST HANDICAP LATE IN MAY.

Interstate Association Announces Dates and $1300 Added Money for San Jose.

Editor "Breeder and Sportsman":

Please announce to the readers of "Breeder and Sportsman" that the Eighteenth Grand American Trapshooting Tournament will be held at Chicago, Ills., on August 20, 21, 22, 23 and 24, 1917, under the auspices of the South Shore Country Club. There will be $4,000 or more added money. The winner of first place in the Grand American Handicap will be guaranteed $500 and a trophy; the winner of second place will be guaranteed $400 and a trophy; the winner of third place will be guaranteed $300 and a trophy; the winner of fourth place will be guaranteed $200 and a trophy and the winner of fifth place will be guaranteed $100 and a trophy. Numerous other trophies will also be awarded.

Also announce that the Twelfth Southern Trapshooting Tournament will be held at Roanoke, Va., on May 8, 9, 10, 1917, under the auspices of the Roanoke Gun Club. There will be $1,00 added money. The winner of first place in the Southern Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded.

The Twelfth Pacific Coast Trapshooting Tournament will be held at San Jose, Cal., on May 28, 29 and 30, 1917, under the auspices of the San Jose Gun Club. There will be $1,300 added money. The winner of first place in the Pacific Coast Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded.

The Eleventh Eastern Trapshooting Tournament will be held at Hartford, Conn., on June 20, 21 and 22, 1917, under the auspices of the Hartford Gun Club. There will be $1000 added money. The winner of first place in the Eastern Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded.

The Twelfth Western Trapshooting Tournament will be held at St. Joseph, Missouri, on July 17, 18 and 19, 1917, under the auspices of the St. Joseph Gun Club. There will be $1000 added money. The winner of first place in the Western Handicap will be guaranteed $100 and a trophy; the winner of second place will be guaranteed $75 and a trophy and the winner of third place will be guaranteed $50 and a trophy. Several other trophies will also be awarded. Yours very truly,

THE INTERSTATE ASSOCIATION,
ELMER E. SHANER,
Pittsburgh, Pa. Treasurer and Manager.

Oregon Duck Season Over.—The duck hunting season, which by the state law closed the last day of the year in Multnomah, Columbia, Clatsop and Tillamook counties of Oregon, has been above the average, both in the number of limit bags secured and in the quality of the birds.

This has been due to exceptional weather conditions, which favored the sportsmen until the cold weather of this week arrived.

Last year was an unusually poor season, especially the latter part, when the unusually heavy snow and low temperature drove all of the ducks south. Earlier in the open season it was very dry along the Columbia river and on many small lakes in the vicinity of which are the favorite haunts of the mallards, teal, sprig-tails and widgeons.

State Game Warden Carl D. Shoemaker said recently that local sportsmen, as a rule, haven't done much protesting on closing the season December 31, as demanded by the state law. Heretofore it has been the custom to follow the federal statute in this respect, which requires the duck season to close on January 15th.

The season opens two weeks earlier in the counties mentioned, according to the state law, than it does in the rest of the state, and it seems unfair to give the sportsmen of these districts a longer shooting period than is enjoyed in other sections.

Mr. Shoemaker is not figuring on putting on any additional force of deputy wardens to handle the situation in these counties at present, he asserts, but will do so later. There are some sportsmen who don't believe the ruling is legal, but any person caught hunting ducks will be arrested and tried. Mr. Shoemaker is confident the statute will be upheld.

Traps For Yacht Clubs.—William H. Johns, Commodore of the Bayside Yacht Club, Bayside, Long Island, in his annual December report has the following to say about trapshooting:

"In our trapshooting work 26,326 shots were fired during the season, and the interest in this splendid winter sport is growing with every year."

The above seems to express in very few words the attitude and feeling of many clubs, not alone gun clubs. The sport has made wonderful progress in the last few years and is now an important feature of many country, golf and yacht clubs.

HOW TO ORGANIZE A RIFLE CLUB.

Government Is Anxious to Encourage Men to Become Crack Shots and Offers Inducements.

[By E. C. Crossman.]

The old gentleman with the striped trousers and the white goatee is anxious to see as many Americans shooting the military rifle as possible and to that end our Uncle Samuel has made available the purchase of the army New Springfield and the obsolete, but still serviceable, Krag, with ammunition at reasonable prices to fit both arms. Reputable civilians who sincerely desire to perfect themselves in rifle shooting, who have good reputations, who have organized a rifle club under the rules of the National Rifle Association, and who have equipped a military rifle shooting range, find their shooting quite reasonable in cost through the low prices of the government arms and ammunition sold to such clubs.

But what the old gentleman does to the grafter going into such a club only to get possession of a government rifle, and who does not intend to qualify as a sharpshooter or expert, is a sin. The sale or loan of government rifles to civilian rifle clubs affiliated with the National Rifle Association is just as strictly regulated as is the issue of a rifle to a member of the State Militia. Rifles turned over to civilian rifle clubs are the property of the clubs, and must be ready for inspection at all times by government officers who may recall them if they choose.

They are not the property of individual members until such members have qualified as sharpshooters over the difficult government course up to 600 yards, then after considerable red tape, the rifle is finally transferred to the lucky man. Under no circumstances is the rifle the personal property of the civilian shot until he has complied with the government regulations, which require about four months' time and some skill, not to mention a completely-equipped rifle range, which is also essential before the rifles can be purchased.

The regulations of the War Department say:

"The sale of arms and equipment is made on the condition that they shall remain the property of the club, and be retained under its control and subject to inspection by officers or agents of the United States any time. Rifle clubs are authorized to transfer title to one arm of a model, purchased by the club from the ordnance department, to any member of the club who qualifies during the calendar year as sharpshooter or expert rifleman, N. R. A. course, provided the member has affiliated with the club as a member or with the N. R. A. as a member for the next following year.

"Provided, further, that the transfer of title shall not be made without the approval of the recorder, national board for the promotion of rifle practice in the United States. The secretary of the club shall make certified report of the qualification and request for authority to transfer the property on special form for that purpose in triplicate. Two copies of the approved request will be returned to the club secretary, who shall deliver one copy to the member, which will be his authority for having the arm and stores in his possession."

In other words the man butting into a rifle club with the idea that he can thereby obtain a cheap rifle and ammunition finds that he must first qualify as sharpshooter over the course, which means making 190x250, at 200 and 300 yards, timed fire, and 300, 500 and 600 yards slow fire, ten shots per range. It may be noted that making these scores with the Krag is difficult even for the skilled shot. Then if he does qualify, he must pay his dues to the club for the next year or send $2 to the N. R. A. for the next year, after which his scores and request are sent in triplicate to the War Department for authority to transfer the gun to him. Until that time the rifle may be seized at any time by United States officers or agents.

Uncle Sam is generous to those honestly intending to make shots of themselves; he is merciless to the "rifle and ammunition moochers," who try to take advantage of his generosity. Nobody on earth has the slightest right to promise government arms and ammunition at any price to anybody, the man getting them must first demonstrate that he is fit to own the rifle, and this means with the arm loaned to him, even though he's paid for it, he must qualify as stated.

To organize a government rifle club ten or more citizens of the United States foregather and form a club, applying for the proper papers to the secretary, National Rifle Association, D. C. On the papers being properly filled out, they are sent to the State official for his O. K. and if he is in the least doubt as to the honesty of those back of the movement, or doubts that the arms are desired for bona-fide rifle practice under government restrictions, they are not passed. Government arms are too low-priced to take chances with the sponger element.

If the papers pass, then the club is given its charter, and it must then proceed to build and equip a rifle range up to 600 yards, before it can purchase the rifles or ammunition, because the requisition blank must show the equipment of the club for carrying on rifle firing, and it must be so the government course can be fired over it. With this finished, then the papers necessary for the purchase of government rifles are filled out and sent in—not before. About six weeks' time then intervenes.

The government sells to clubs its regular service rifle, the Springfield, for $17.37, plus freight, and ammunition at $26 per thousand. New Krag rifles cost $5.56, plus freight, used and very doubtful Krags, half worn out, cost about $4, but no rifleman intending to qualify buys such an arm. Ammunition for the Krag costs $15 per thousand in thousand-round lots, plus freight. Being old, it is doubtful in accuracy, and the riflemen of the Los Angeles Rifle and Revolver Club never use either Krag—old or new—because they are s omuch outclassed by the new Springfield.

If the rifleman has to qualify as sharpshooter, anyhow, to get legal possession of the rifle, and if he really intends to go in to make a shot of himself, it pays him to get the present service rifle, the Springfield, as the red tape is no more for this than it is for the Krag. The government also loans its Krag rifles—second-hand and half worn out—on the putting up of a bond of $10 for each rifle and paying the freight and boxing and making a report of the rifles on hand each quarter. Such rifles are loaned to civilian clubs in the proportion of one to every ten bona-fide members, and 120 rounds of ammunition per man is also issued, which must be expended under strict supervision and each shot accounted for every three months.

Riflemen intending to follow the game and make real shots of themselves rarely waste much time with the Krag, because the man with the Springfield is bound to win and nobody likes a licking. The ammunition for the Springfield is, after all, not costly, 25 cents for ten shots, and it is the best in the world.

No demon organizers are necessary to get up rifle clubs, merely ten or more honest and reputable citizens who will guarantee to shoot and who have one or two men who are willing to tackle the hard work of keeping up the club without compensation. There is no way in which anybody can make any money handling a government rifle club, nor would the government permit it.

In a city the size of Los Angeles or San Francisco there should be a score of civilian rifle clubs and a club league, both on the outdoor range and indoors, during the rainy season, as in the East. Several clubs may band together to fit up a range and use it in peace and harmony. There is plenty of room for twenty clubs in the city without conflicting with one another, and plenty of members to fill them up.

The officers of the Los Angeles Rifle and Revolver Club as the official representatives of the N. R. A. in the south, or Col. T. F. Cooke, 631 South Spring street, the N. R. A. director for California, are glad to aid in the organization of civilian rifle clubs. All that is asked is that the men organizing them have no financial "graft" in view, which is impossible if the club is honestly handled, and that those joining them have in mind perfecting themselves in the art of rifle shooting, not merely the "grafting" of a government rifle at the government's generous prices. Uncle Sam has put the kibosh on the graff game.

Against Net Fishing.—About a week ago a delegation of 75 business men visited the Bonneville hatchery, and while there saw millions of chinook salmon eggs in the process of incubation. All of these eggs were taken from the finest spring run variety of chinook salmon and a good portion of them came from the Upper Willamette and McKenzie rivers. Fully one-third of the eggs, however, were taken from the Umpqua as the amount of eggs received from the Willamette river run was not sufficient to fill the hatchery troughs.

The fact that it is necessary to draw on the Umpqua for an additional supply of eggs is one of the principal reasons why the State Fish and Game Commission is anxious to close the Willimette river to all net fishing for salmon, as they realize that if a larger portion of the spring run of fish was allowed to get over the falls they could depend on a sufficient supply of eggs from the Willamette river run each year. As matters now stand the number of fish which reach the spawning ground depends a great deal on water conditions in the Willamette during the month of April.

The main run of spring salmon reaches Oregon City about the middle of April, and if water conditions are normal they ascend the fish ladder and go on up stream without any delay. It frequently happens, however, that an April freshet will cause a three or four-foot rise in the river. This puts such an immense volume of water over the falls that the salmon are unable to reach the fish ladder, much less ascend it. When this happens the fish are forced down stream into the wider portion of the river, where they can rest in the eddies until the flood waters subside.

The netting season opens May 1st, and if the river happens to be at a high stage at that time the net fishermen make a huge haul, as they take out most of the fish which are gathered in the low reaches of the stream and get nearly all of those which come up after that date. In 1914 conditions were favorable to the fishermen. They made an immense haul the first week in May, and the egg take on the upper McKenzie was correspondingly low. In 1915 the salmon had a little the best of it, as the water was low at the time the net season opened and a good take of eggs above the falls resulted.

Some people are inclined to blame the fish ladder when but few salmon get over, but this is not the place t oput the blame . A dozen fish ladders would not help matters when the river is on one of its periodical April freshets. It is simply a physical impossibility for any salmon to breast the fearful torrent of water which comes over the falls and sluices through the fish ladder at that time. When the water conditions are at the normal stage salmon are frequently seen going over the ladder at the rate of 30 or 40 a minute.

Trapshooting Develops Boys.—A new, though logical, development of the sport of trapshooting is the forming of "junior" clubs as auxiliaries of trapshooting clubs.

Naturally ,the ranks of the boys' organizations are largely recruited from the families of members of the senior clubs

The pioneer in the movement was the Columbus (Ohio) Gun Club, and the plan worked so successfully that many other trapshooting clubs throughout the country have adopted the idea.

Aside from the perfectly naturad desire of the average American boy to shoot, there is no sport better adapted to the development of manly qualities than trapshooting.

Perhaps no other game requires so much or such rapid head-work as the breaking of the clay skimmers.

An analysis of the apparently simple act of hitting the flying target shows that it includes a certain degree of courage to fire the shot; quick judgment in deciding the angle of flight and elevation, the effect of wind in deflecting the target from its normal course, and equally rapid action in following, leading, etc., and firing the charge.

Steadiness, cool-headedness, nerve, judgment and physical control result from regular work at the traps.

Favor $1.50 Angling License.—At a meeting of the Multnomah Anglers' Club held December 26th in conjunction with a luncheon, the board decided in favor of increasing the cost of fishing and hunting licenses from $1 to $1.50, which would make the combination cost $3.

The board also expressed the opinion that not more than 25 per cent of the cost of the work on steelheads at the Bonneville fiish hatchery should be charged to the fish and game fund. The bill for the closing of the Willimette river to net fishermen was drawn and will be presented at the Legislature by Senator John Gill. A switch was made in the regular bill establishing the deadline at the Hawthorne bridge.

The following members of the executive committee were present: Walter F. Backus, Dr. Earl C. McFarland, John Gill, H. B. Van Duzer, Lester W. Humphreys, A. E. Burgduff, William M. Umbdenstock, Ray C. Winter, W. E. Carlon and Will C. Block. William F. Finley, State Biologist, was the only one who is not a member of the committee present.

Trapshooting School.—The Atlantic City (N. J.) school of trapshooting—the first of its kind in the United States—attracted 5122 persons during the period from March 27 to November 18, which, we might say, speaking by and large, is quite a crowd.

There was some doubt when the trapshooting school opened as to whether or not it would be successful. All doubt has been removed. It was clearly demonstrated that a school for the instruction of trapshooting was something that was needed.

Of the 5122 persons who placed the 12-gauge guns to their shoulders and gred at the flying clays over the blue waters of the Atlantic Ocean from the Million Dollar Pier, 2806 never before had handled a gun. That means there are 2806 more trapshooters now than there were when the school opened—for there are no backsliders in the "sport alluring."

Of these novice shooters 2483 were men and 323 women. This means that of the regular shooters there were 2312. Of this number 2264 were men and 52 were women.

The number of targets thrown was 249,125. An equal number of shells were fired. From every point of view the trapshooting school was a success. So much so that the better class of hotels at all the winter and summer resorts have added trapshooting schools to their establishments. Indications at this time are that a public trapshooting school will be opened at one of the bathing resorts in Florida either this winter or next. The Atlantic City school will reopen next March.

The best score at 100 targets during the season was 99 out of 100 by Barton Pardee of Atlantic City. The best score by a woman was 90 out of 100, by Mrs. B. G. Earle, of New York city.

Portland Shot Goes East.—Members of the Portland Gun Club had planned a complimentary shoot, which was to have been held at the Portland Kun Club range at Everding Park December 27th. The occasion was in the nature of a farewell to John G. Clemson, newly elected president of the organization.

Mr. Clemson has left for an extended trip East. Most of his time will be spent in New York, where he will attend the automobile show. It is also possible that he may be induced to go to Pinehurst, North Carolina, to participate in the Mid-Winter handicap which will be held there during the early part of January.

When the trap shots who were planning to unlimber their artillery arose and saw the ground covered with its mantle of white ,they decided that they had better let wel lenough alone and not tempt fate by taking a chance on shooting.

Stock Breeders' Page

Bridgford Farm Adds to Herd.

The Bridgford Company of Knightsen, eastern Contra Costa county, breeders of fine Holstein-Friesian cattle and gaited saddle horses, have received from New York a car of registered Holsteins containing thirty head of high class females, which will be added to their present splendid herd.

The Bridgford Stock Farm is one of the big show places of Contra Costa . It is located about five miles from Knightsen, on the Bethel Tract. Among the lot of new animals are:

Two heifers sired by King Segis Pontiac Alcartra, the $50,000 bull, one out of a 31 pound dam, one out of a 19 pound two-year-old who has a 37 pound dam. The first six dams of this heifer average over 31 pounds of butter in seven days, including her own dam of 19 pounds.

Three daughters of Spring Farm Pontiac Cornucopia, the $15,000 bull, who is a son of the 44 pound cow King Pontiac Pontiac Lass. One of these heifers is from a 30 pound dam, one that gave 29 pounds and one 27 pounds of butter in seven days.

Three daughters of Spring Farm King Pontiac, who is a 37 pound son of King of the Pontiacs—one from a 21 pound dam, one from a 28 pound dam and one from a 27 pound.

Two heifers by King Pontiac Konigen, who is from a 37 pound cow and by King of the Pontiacs.

Six daughters of King Walker 5th, who is a son of King Walker and out of Paula of Chagrin Falls 3rd, who has a record of 30.82 pounds of butter in seven days from 751 pounds of milk, milking 10,112 pounds of milk in 100 days. She was winner in the Aged Cow Class at the last National Dairy Show. All of these heifers are out of good A. R. O. dams—one with a record above 30 pounds and two above 29 pounds of butter in seven days.

One heifer by a 33 pound son of Pontiac Korndyke. This heifer just dropped a nice bull calf by a 34 pound son of King Segis Pontiac Alcartra.

Also several good record cows bred to the 44 pound bull Spring Farm Pontiac Cornucopia.—[Byron Times.

Ox Warbles Damage Cattle.

The characteristic lumps or swellings which may be found under the skin on the backs of many cattle from January until April contain grubs. If these grubs are allowed to remain, they will complete their growth, drop to the ground and transform to heel flies which may reinfest the cattle during the spring and summer, according to T. J. Talbert of the University of Missouri College of Agriculture. The grubs weaken the cattle, cause them to fall off in flesh and milk, and decrease the value of the hide. The beef in the immediate vicinity of a grub becomes slimy and of a greenish color, and is known to the butcher as "licked beef." On an average, the damage to the hides is placed at one-third their value and the loss of beef to each infested animal ranges from three to five dollars.

The grubs may be pressed out through the opening at the top of the swelling . A sharp knife and a pair of tweezers will often facilitate the work of removing the grubs. Care should be taken to crush all the grubs removed, to prevent their further development and transformation into flies. It is advisable to examine the cattle for lumps or swellings over the back every two or three weeks during late winter and early spring to detect the pest. Various oils are often used. The lotion is either smeared over the infested region, or applied to the mouth of the breathing hole of the grub. One or two applications will usually be sufficient. The objection to this method is that the wounds do not heal readily unless the grubs are removed.

Some have claimed that the arsenical and coal tar dips can be used in the case of large herds which cannot readily be treated by direct removal of the grubs. It still remains to be determined, however, whether practical means of eradication can be made by the use of dips. Dips applied during spring and summer will no doubt kill many maggots, and eggs which are attached to hairs on the animals' bodies.

The adult of the ox warble is a fly about half an inch long, very hairy, and resembling a small black honey bee. The females in depositing their eggs on cattle worry and torment the animals and frequently cause them to stampede for shelter or water. The fly does not sting or bite, but the animals seem to have an instinctive dread of its approach just as the horse has for the bot-fly.

Fish oil, train oil, and other substances are often recommended as spray to keep off warble flies. To be effective, their use would have to be continued during spring and early summer, and such a practice would be difficult and expensive and impracticable except in the case of small herds of valuable cattle.

The flies do not appear to attack cattle which stand in water or in dense shades.

H. G. Humphrey, a Nevada stockman, says the lamb crop of Nevada for 1916 added about three million dollars to the revenue of that State as 600,000 lambs were sold at $5 each, the highest price ever known.

EX-FIRE HORSE IS SAVING LIVES.

He Supplies Tetanus Antitoxin Used in the War Hospitals.

When the army surgeon at the field hospital on the French front stands over a soldier maimed and torn by shrapnel and lifts a shining needle-tipped instrument and fills its tube with tetanus antitoxin, he may pour it into a liquid that came from the veins of Dan, an old retired New York City fire horse, who lives on the Health Department sanitarium farm at Otisville, N. Y.

In the last five years, since he was discarded by the Fire Department, Dan has supplied diphtheria antitoxin and tetanus serum which would have cost its users $200,000 in the open market. At least 100,000 European soldiers, it is estimated, have been treated with antitoxin taken from the veins of this old horse. He has been so inoculated with tetanus germs that he now produces the serum periodically and will so long as he lives.

The rescue of the police mount Laughlin from the auctioneer's block recently because of resentment at the city's throwing to their fate the horses that have grown old in its service, makes of peculiar interest the role played by Dan after he outlived his active usefulness.

Since the war started the New York City Health Department has been selling tetanus antitoxin to the fighting nations at the rate of $30,000 worth a year. In the first months of the war a shipment of the antitoxin was sent to Austria, but it is not known whether it ever reached its destination; the rest of the antitoxin sold has gone to the allied nations. Dan and four other horses have produced this serum, from which was made antitoxin which has brought to the Health Department about $70,000.

There are now on the Otisville farm about twenty horses. Under the New York City laws the Health Department produces the antitoxins for distribution in the city, free of charge to hospitals and those who cannot afford to pay for them. The law also provides that if the Health Department produces more antitoxins than is needed in the city, it may sell the surplus, the revenue to be used for Health Department purposes. Up to the beginning of the war, most of the serum produced at Otisville was for diphtheria antitoxin, there being very little demand for tetanus antitoxin in New York.

When the war started the department had a surplus of tetanus antitoxiin, which it sold in Europe and, inasmuch as the expense of producing more was not large, five horses instead of one were set to manufacturing the life-guarding fluid. The department has been supplying its European market and now has about 800 quarts in reserve. Dan, who used to make diphtheria antitoxin for use in the city, now makes tetanus serum.

Dr. W. H. Parks, head of the Health Department laboratory, said last week that probably as many as 400,000 wounded soldiers had been treated with the tetanus antitoxin the department has sent abroad, with the result, he was sure, of the saving of many thousands of lives. Dr. Parks explained that the horses suffered almost nothing. He said the diphtheria inoculation made the animals a bit groggy, and perhaps might shorten their lives, but that the horses treated with the tetanus germs were all in the best of health. Animals in very poor shape, when taken to the farm, have soon become sleek and handsome, despite the germs they carried around. The animals do no work and are fed on clover and all the other things that a horse likes to eat.

When the horses are first received at the farm, they are gotten into good condition. Then it is decided which of the serums the horse is to be used to produce. Dr. Parks said that it was practicable to have a horse produce two serums at once, that there would be no quarrel among the germs. But he said that in practice, inasmuch as old horses were easy to get, only one serum was made by one horse.

The animals are inoculated with the germs of either diphtheria or tetanus, and the dose is gradually increased, the animal's system all the time manufacturing antitoxin—a sort of super-vaccination. When a certain stage has been reached, the blood vessels in the animal's neck are tapped and an amount of blood taken from which the antitoxin is made in the Health Department laboratories. Diphtheria inoculation must be made more often than that for tetanus serum.

It was after Dan had turned out many quarts of diphtheria serum that the war turned him into a lockjaw serum plant. He was "fed up" before the treatment was started. It took about three weeks of inoculation treatment before his blood was in the proper state to produce the best serum. The tetanus germs caused the making of antitoxin to counteract them, and gradually Dan's blood came to the point where he could make a very large amount of antitoxin needed to combat the germs shot into his veins. He is now regularly led up to the stables, and the blood taken from his neck. The doctors who do the work say that he suffers no pain except the slight prick of the needle, which doesn't cause him to move in his tracks. After the blood is taken, Dan goes on about his business of doing nothing in particular. Another horse that has produced perhaps almost as much antitoxin as Dan is Old Faithful, who was retired from the Street Cleaning Department several years ago.

Dr. Parks said that all of the horses on the Otisville Sanitarium farm had been obtained from the Street Cleaning and Fire Departments after they had outlived their term of service. He said that while there was no use on the farm for all the horses the city retired, and while he said it was not his province to say what could be done with them, the example of the horses at Otisville was a consummate example of service which no human ever excelled.

"These horses have saved many lives," he said. "Twenty-six thousand persons annually in New York City are treated with the diphtheria antitoxin made at Otisville, and hundreds of thousands of soldiers who have received wounds on Europe's battlefields have been helped in their fight for life by the serum which flowed from the veins of Old Dan and his partners."

Wormy Horses Do Not Thrive.

Many horses lose condition, or fail to make gains during winter months, because they are infected with worms. This is especially true of colts. Horses suffering from worms generally have a good appetite, but apparently benefit little from the food eaten.

There may be no symptoms which point conclusively to worms, but this trouble is so common that if the colts and horses are not doing as well as they should for the food given, a worm remedy may prove of decided value. In treating horses for worms, Dr. L. S. Backus ,of the University of Missouri College of Agriculture, suggests it is well to keep in mind that the drug is meant for the worm rather than the horse and should therefore be given in as concentrated form as possible. To insure this, little or no bulky food should be fed during the course of treatment, and as the parasites are stupified by worm remedies rather than killed, the animal's bowels should be kept in an active condition so that the stupefied worms may be passed out before they regain their vitality. A well salted bran mash once a day will generally insure such an action.

The following formula is a worm remedy which is also of value as a tonic: Powdered Nux Vomica 2 ounces: Powdered Gentian Root 4 ounces; Powdered Areca Nut 6 ounces; Sodium Chloride 4 ounces; Arsenious Acid 2 drams. Mix.

Give one heaping teaspoonful to every 250 pounds weight, every morning and evening for about ten days. The medicine may be mixed with ground feed or sprinkled over oats or corn which has been dampened.

Harness Prices Going Skyward.

As one of the results of the great war in Europe there is a shortage of harness in the wholesale markets of the United States, which threatens soon to be sharply felt by the consumer. Prices for all grades of harness leather have advanced again and again in the last few months, and now comes word from some of the largest producers that business is at a standstill because the supply of hides has given out.

Retail dealers in harness in New York say they have not yet put their prices up, but those who renew their stock hereafter will have to do so, according to all experts in the manufacturing industry, some of whom predict an advance of 60 per cent before spring.

There has been a noticeable increase lately in the demand for second hand harness, and though much of it has come into the market this winter the sellers are getting better returns than at any other time in years.

Some of the men in the harness trade predict an unprecedented shortage even after the war ends. One of them said the other day that soaring prices are going to teach American horse owners in the near future to take better care of their harness. This expert estimates that dirt and neglect now shorten the life of the average set at least fifty per cent.

To keep harness in proper condition it should be taken to pieces every now and then, and washed with warm water and castile soap. Then it should be oiled before it is put together again, and when hung up for any length of time should be covered to keep the dust from settling on the leather. Harness that is hung up for the winter without washing and oiling will go to pieces twice as fast as if it were used daily, and the man who neglects it this winter will probably find next spring, when in need of a new one, that the set for which he has been paying $100 will cost him $200 or more.

Mrs. Eliza Shepard, superintendent of the Jack London ranch at Glen Ellen, Sonoma county, reports the sale of twenty-five Duroc Jersey hogs to the Western Meat Company. The shipment, which averaged 205 pounds, killed out 81 per cent, and brought the fancy price of 10 cents per pound on foot. The London ranch culls out closely and keeps only the finest for breeding. A. E. Gaige, the Glen Ellen butcher, had a bet with Mrs. Shepard that 9½ cents would be the top price. The clever woman rancher wins and Mr. Gaige must buy the bonnet. Mrs. Shepard and Mrs. Jack London contemplate a trip to the East next month, to buy short horned heifers, which will be added to the prize stock at the ranch above Glen Ellen.

◆ ◆ ◆

J. C. Bruss, of Tulare county, has received twelve head of Tamworth hogs from Bear Creek Farm, Palmer, Illinois, and plans to raise this breed of hogs on a ranch near Tulare. These hogs are from registered stock and premium winning sires. English bacon is made from this kind of hog. Mr. Bruss has raised Tamworth hogs in the past, and feels that the business can be profitably conducted in Tulare county.

THE FARM

DRAINING WET LANDS WITH DYNAMITE.

The success of a crop depends largely upon being able to get it planted in time. Nature sometimes hinders us with too much rain, and many times, on days after heavy rains, we find the farmers waiting for the land to dry off sufficiently so they can do their plowing.

This was the case with my land. Thinking that the condition could be remedied by doing the plowing in fall, I did most of it at that time. The next thing was to devise an economical way to drain it. Not being blessed with an abundance of money, I resorted to blasting as the most immediately practical expedient.

I decided to blast the subsoil to make top-soil porous. After the wheat had been cut a man was put to work making holes two inches in diameter and three feet deep, every 15 feet. The land was in good condition to blast, being perfectly dry. After the holes were made, with the assistance of the man I loaded each hole with half a stick of 20 per cent dynamite. These charges were lightly tamped with a wooden tamper. When a row of holes had been loaded they were discharged and in due time the entire field was gone over. The land was fall-plowed and left until spring.

We were eager to see the results obtained, if any. In the spring, to our surprise, we were able to work the blasted field exactly nine days sooner than we could the adjoining piece that was not blasted.

The blasted piece of land was manured and worked and corn planted. The corn grew and grew and at last we obtained something like a crop for our trouble. The next fall the other portion of the land received a good shaking up with the same results. The breaking up of this tough subsoil caused the water, that usually lay in the top soil, to be filtered down into the subsoil.

This blasting was done four years ago and ever since then we have been able to get on the land when we were ready.—F. A. Kuhn.

Shortage of Wheat.—For the first time in fifty years our wheat crop is not big enough for our own requirements. The government's estimate on September 8, 1916, was 611,000,000 bushels. The United States requires 625,000,000 bushels for bread and for seed.

Fortunately a surplus of 163,000,000 bushels was carried over from last year, but this will not serve to keep prices down if the war continues. The price of flour has been rising all fall, and bakers in the cities are cutting out the 5-cent loaf of bread and making the 10-cent loaf smaller. The crop was short all over the world. The foreign buyers, of course, came after the Canada crop and actively bid for our own small surplus.

Should the war end soon, and the three-year surplus of Russia's crops be moved to market, the situation would brighten for those who must buy flour or bread. As it is, all the joy gleams in the situation are for the farmers who have wheat to sell, and for the speculators.

We can feel happy that a few farmers are making some money, but we are decidedly lacking in enthusiasm regarding the speculator's profits. We would like to see him accumulate a little more experience in the tedious details of raising wheat and much less in the pocketing of gains from crops that others toil to produce.

A "365" Day Liniment

YOU ARE SAYING TO YOURSELF—"If I only knew of something to stop that Backache—help my Rheumatism—cure my Neuralgia, I would send and get it at once."

Get It. Relief. Gombault's Caustic Balsam will give you immediate A Marvelous Human Flesh Healer and a never failing remedy for every known pain that can be relieved or cured by external applications. Thousands testify to the wonderful healing and curing powers of this great French Remedy. A Liniment that will soothe, heal and cure your every day pains, wounds and bruises.

Gombault's Caustic Balsam
The Great French Remedy
Will Do It

It Helps Nature to Heal and Cure. Penetrates, acts quickly, yet is perfectly harmless. Kills all Germs and prevents Blood Poison. Nothing so good known as an application for Sores, Wounds, Felons, Exterior Cancers, Burns, Carbuncles and Swellings.

"I had a bad hand with four running sores on it. The more I doctored the worse it got. I used Caustic Balsam and never needed a doctor after that."—Ed. Rosenburg, St. Ansgat, Ia.

Mrs. James McKenzie, Edina, Mo., says: "Just ten applications of Caustic Balsam relieved me of goitre. My husband also cured eczema with it, and we use it for corns, bunions, colds, sore throat and pain in the chest."

A Safe, Reliable Remedy for Sore Throat, Chest Cold, Backache, Neuralgia, Sprains, Rheumatism and Stiff Joints. Whenever and wherever a Liniment is needed Caustic Balsam has no Equal.

Dr. Higley, Whitewater, Wis., writes: "I have been using Caustic Balsam for ten years for different ailments. It has never failed me yet."

A liniment that not only heals and cures Human Flesh, but for years the accepted Standard veterinary remedy of the world.

Price, $1.50 per bottle at all Druggists or sent by us express prepaid. Write for Free Booklet and read what others say.

THOROUGHBRED STALLION FOR SALE

Brown, six years old, sired by Orsini, dam Leta Trix by Brutus, sound. Bred by J. J. Moore. Address JAMES LAYNE,
26 S. River Street, San Jose, Cal.

Black gelding, six years, 15.2 hands, 1,050 lbs., perfect beauty and a show horse. Kind, gentle and fearless. Absolutely sound. Natural smooth pacer. Wears neither boots or straps. Sired by Vasser 2:07. First dam Zenobie 2:19 by Zombro, 2d dam by Truman 2:12, son of Electioneer. This horse paced a mile as a 3-year-old at 2:14. If given a chance, he is rugged and strong, and with his racing qualities I think he will make a 2:05 pacer. For sale reasonable.

H. OLSEN, 1450—46th Ave., Oakland.

FOR SALE—THE ICICLE by The Iceman 2:10, dam California by a son of Sable Wilkes, next dam thoroughbred. Handsome dark bay horse with black mane and tail, star, and both hind pasterns white. A remarkably showy horse, weighs 1000 pounds, stands 15¾ hands high and can show five gaits under saddle. Has trotted a mile in 2:16¾, last quarter in 32½ seconds; trotted a half in 1:04½. Kind disposition and intelligent. One of the most desirable horses to ride, drive, or show, in California. Will be sold cheap. Address

A. T. JACKSON,
R. 4, Box 11, Stockton, Cal.

I WANT TO BUY.—I have sold eleven horses in the last few months ranging from $2,000 to $200. If you have a horse for sale and will write me, I will tell you what my system is. It is a winner. I find there is a buyer for every horse for sale at the right price. It is just a question of getting the buyer and seller together. If you have one for sale let me hear from you. MAGNUS FLAWS,
542 S. Dearborn St., Chicago, Ill.

Choice Land in Idaho
FARMS FOR SALE

Lewiston, Idaho, is situated at the forks of Clearwater and Snake rivers and has transportation to the coast.

960 acres 7½ miles from Lewiston, Idaho, 4½ from Lapwai, Idaho, on main traveled road, all in cultivation except about 15 acres, all level land, just a little rolling, 320 acres of fall wheat in, 225 acres fall plowed for spring crop, about 30 acres in alfalfa. All fenced and cross fenced. Two good springs with big cement water troughs, well, windmill and cement reservoir, water piped to house, 7 room house, hot and cold water and electric lights. Large horse barn with hay mow in the center, electric lights in barn; cow barn with two box stalls; hog pens, shade trees, chicken houses, blacksmith shop, wagon shed, granary, outdoor cellar with bunk house overhead. $85 per acre; will take one-third down, time on balance to suit purchaser, at 7 per cent interest. One-third of crop goes with place if sold any time up close to harvest. Mild climate, can raise all kinds of fruit, grain and vegetables. Wheat in this country goes from 35 to 65 bushels per acre, barley 40 to 80 bushels per acre.

320 acres 4½ miles south of Vollmer, Idaho, 275 acres in cultivation, balance in pasture and timber, farm land lays practically level, one-third of crop goes with place if sold before harvest. Some fall wheat already sown. All fenced and cross fenced. Quarter section of it fenced hog tight; good four-room house, wood shed, and out of door cellar, nice grove around house, well at house, fair stabling and out buildings, spring and spring creek close to barn, three springs on place. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

238 acres 4½ miles from Lewiston, Idaho, 175 acres in cultivation, 25 more can be cultivated, balance good bunch grass pasture, fenced and cross-fenced, good spring creek runs across place, small house, station on place for Johnson R. R., two grain warehouses at station. Price $70 per acre, one-third cash, balance at 7 per cent. Time to suit purchaser.

Drawer 447, San Francisco, Cal.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

STAR LEADER

The magnificent two-year-old Berkshire boar sold this week by the University of California, to Mark Regua, of Orland, California, for $1,500. Star Leader is by the Grand Champion, Grand Leader 2d, and was bred by A. B. Humprey, of Escalon. He was junior and reserve grand champion at the P.-P. I. E.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California and fifth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¾, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

A CALIFORNIA CIRCUIT will probably be organized and dates for the different members agreed upon at a meeting of county fair and track representatives to be held in the Pacific Building, S. F., on Tuesday afternoon next, Jan. 16th. This meeting has been called by Secretary F. W. Kelley of the Pacific Coast Trotting Horse Breeders' Association, who has aimed to get as many associations represented as possible by their secretaries or other persons who will be clothed with the authority to report that their associations will give harness races in 1917, and who also have the authority to name the dates on which those races will be given. If on Tuesday next this conference can agree on dates for enough meetings to form a circuit and will announce the same, the California harness racing season of 1917 will have made a start that will lead to a successful conclusion. Fair and other associations that make harness racing a part of their programs all desire large entry lists to assure good fields and successful racing, and if they will only realize that an early announcement of dates and racing programs is the very first step to take to insure such results, they will see that their organizations are represented at the meeting next Tuesday. It is certain that nine or ten fairs are to be given in California this year and it is probable that twice that number will be held . If these fairs will organize into a regular circuit, with dates arranged so that exhibitors can ship from one to another by the shortest route and at the least expense, and make an early announcement of the same, one-half of their battle will be won. The live stock men, the manufacturers, the fruit growers and the horsemen are only waiting for such an announcement to begin work preparing for these fairs. Horse owners especially must prepare their horses for the races and this takes time and costs money. A very large number of them will keep their horses running at pasture unless a good circuit is advertised early. Consequently the result of the conference which is to be held next Tuesday will be awaited with anxiety by every harness horse owner in California. We hope to be able to announce in the next issue of the Breeder and Sportsman that complete success has crowned the effort to organize a California circuit.

ANOTHER CHICAGO SALE is announced by the Chicago Horse Sales Company, whose December sale was such a success. Already there have been consignments of California horses to the March sale and horse owners who desire to sell should read the preliminary advertisement in this week's Breeder and Sportsman and then write to the company for further particulars.

George Ryan, superintendent of the Pleasanton Stock Farm, has purchased from Lawrence & Comstock, owners of the Oakwood Stock Farm, Lincoln, California, all the thoroughbreds remaining on that farm. There were 28 head in all, including twelve two-year-olds by Rey Hindoo, eleven two-year-olds by Salvation, five two-year-olds by Tim Payne and two three-year-olds, one by Salvation and the other by Tim Payne. A number of these are out of producing mares, among them being full sisters or brothers to Rhymer, Elizabeth McNauton, Premo Vera, So Eze, She Will, Little Ford, Rey Ennis and other two-year-old winners in 1916. Mr. Ryan is now having the two-year-olds broken, and they are about evenly divided as to sex, there being 13 colts among them. He expects to start several of them this year.

Stake Races Would Build Up Harness Racing.

John E. Madden, whose Kentucky thoroughbred breeding stud is the most noted of its kind in the United States, made his start in the horse business with the trotters and he makes no secret of the fact that personally he likes the trotter much better than the thoroughbred and he owns and conducts a very select trotting stud, but on a much smaller scale than his thoroughbred stud. Mr. Madden declares that it is only the greater financial returns which thoroughbred breeding results in that keeps him in that branch of breeding; that if harness racing was marked by the same degree of stake racing that is in vogue on the running tracks his trotting stud would far overshadow his thoroughbred breeding operations. He declares that if the system of stake racing now in vogue on the running turf were to be dispensed with, the standard of racing would be so reduced and the earning capacity of the horses would be so impaired that the good performers would be buried and the breeding studs devoted to the production of race horses would go out of existence. With the stake system, Mr. Madden says, dozens of possible winners of each big fixed event are picked months before the date of the race and every horse's chances are discussed for weeks before the event. Few persons go to the races nowadays, the Kentucky turfman asserts, simply to gamble, and to do away with these stake events would destroy public interest in racing to the extent that would mean the end of high-class racing. How much the stake system would do for harness racing is pointed out by Mr. Madden, in connection with the lessons taught by last month's big sale of trotters in New York. Two-year-olds, yearlings, and weanlings brought prices way up in the thousands when engaged in futurities, but those equally well bred and of equal promise were almost unsalable when not eligible to those events. There are indications that Mr. Madden's views are getting the indorsement of many of the prominent men in harness racing circles and it is within the range of probability that some concerted effort to make stake racing more of a factor on the harness racing tracks than it is now is, may be made.

Word comes from Ireland that H. R. A. West, who has just returned from the war, and who is a well-known trainer (Eastern Circuit) is leaving for Canada on the S. S. Pretorian, with a shipment of thoroughbred horses . All these horses except the yearlings have shown good form in Ireland and they will be disposed of on arrival in Canada. Mr. West will act as the agent of the Irish Bloodstock Agency of Dublin, and will be located at Hamilton, Ont. This firm, whose advertisement will be found in the columns of the Breeder and Sportsman, has sent many good horses to this country, among them Fair Mac, property of Grant Hugh Browne. They are also sending to Canada Opera Glass, chestnut colt (3), by William Rufus—Spyglass, by Royal Hampton, winner of many races. The horses Mr. West is bringing over are as follows:

Never Fear, b g, 9, by Clonmell—Lady Glenwood, by Hackler.

Iron Cross, b c, 2, by Galloping Simon—Madame Gull, by The Gull.

Annie Edgar, b f, 2, by Sir Edgar—Lady Castle, by Gallinule.

Bachelor's Bliss, blk c, 2, by Tredennis—Lady Black, by Le Noir.

Bachelor's Blend, ch f, 4, by Tredennis—Lady Dern, by Derncleugh.

Kilcroney, br f, 1, by Tredennis—Inocency, by Derncleugh.

Royal Spinner, br m, 6, by Royal Hackle—Queen's Weather, by Royal Hampton.

Royal Spinner won three steeplechases running this year and Never Fear won many 'chases including the Galway Plate, which is probably the best steeple-chase in Ireland.

"The past season has demonstrated that the American thoroughbred is the equal of any in the world at any distance," remarked John E. Madden the other day. "The Lexington blood in the horse Star Hawk, that came from England, and other winners in America, shows that American blood will assert itself," continued Mr. Madden. "While in England Richard Croker's stallion Orby, whose dam is by our Hanover, may be mentioned. Orby, you know, is sixth on the leading sires' list this year, among his winners being Diadem (two-year-old winner of $12,915, the largest two-year-old winner in England only having $16,875 to his credit), Eos (three-year-old winner of $10,345), etc. The marked improvement of the race horse of today, and the demand for the service of the thoroughbred sire by the farmers, show its increasing popularity. Another pleasing feature of the situation at present is the large increase of patrons from the leisure class, both as breeders and attendants at the race track. It is to be regretted that the western associations, Kentucky among the number, have abolished steeple-chasing, a sport admired by all and especially by the ladies. The war in Europe has awakened the authorities to the great necessity of having good thoroughbred stallions for our native mares, and those who formerly abused the running horse now stand in the ranks of those who see much virtue in them."—[Thoroughbred Record.

◈ ◈ ◈

Sad Sam holds a record at the Juarez track. He won the second race December 28th and a $2 ticket on him paid $445.80.

North Pacific Fair Association.

Seattle, Wash., January 4, 1917.

Breeder and Sportsman, San Francisco, Cal.—

Gentlemen: At its recent annual meeting in Portland the North Pacific Fair Association revised its By-Laws to take in affiliated members,—those that cannot give the requisite number of purses. County fairs and exhibitions may be included and receive the benefits of protection in concessions, amusements, etc.

In addition to others the following classes were agreed upon for the seven active members:

Trotting—2:15, 2:20, 2:25, F.F.A.
Pacing— 2:15, 2:20, 2:25, F.F.A.

All events will close August 1st, with 5 per cent entry fee. In all the classes except the Free-for-All, the every-heat-a-race plan will be followed.

The effort to make racing more attractive culminated in a resolution compelling members to enforce the rule regarding colors, caps, and jackets for drivers and riders, and coats for grooms appearing on the tracks during the racing period.

The racing season will begin at Vancouver, B. C., on August 20th, including Southwest Washington Fair, Chehalis; Spokane Interstate Fair, Grays Harbor County Fair, Washington State Fair, New Westminster, B. C., and ending with the Oregon State Fair, Salem, the first week in October.

The Stake Book will be issued early in 1917 and is to be had for a postal card to Jno. W. Pace, Sec'y, Seattle, Wash., or to any of the individual secretaries.

Very truly yours,
NORTH PACIFIC FAIR ASS'N,
By JNO. W. PACE, Secretary.

Grand Circuit Stewards Will Meet January 22d.

Homer J. Cline, secretary of the Grand Circuit stewards, who for years has been the originator of ards, who for many years has been the originator of novelties in connection with matters pertaining to the harness turf, is now the author of another, namely, an official itinerary of the stewards' annual meeting. In years past all interested horsemen could know of these important sessions was the date and the place where they were to be held, without any further information as to where the track managers could be found, when and where they held their preliminary meetings or what time and when the executive sessions were in progress.

According to Mr. Kline's official notice, the Grand Circuit stewards will be at the Georgian Terrace Hotel, Atlanta, Ga., on Monday, January 22, and Tuesday, January 23. At 10:30 a. m. Monday, the schedule committee, Ed. A. Tipton chairman, E. W. Swisher and A. A. Shantz, will be in executive session at Parlor A, to go over the applications, arrange the date schedule after a careful consideration of all matters pertaining to that important feature of the annual meeting.

At the same hour the committee on rules and regulations, composed of Edward Schoeneck, president of the New York State Fair Commission and State Fairs' Racing Commissioner, H. N. Bain, secretary of Hudson River Park track, Poughkeepsie, and H. K. Devereux, president of the stewards, will meet at Parlor E, and receive all suggestions from members and outsiders, as to changes or additions to the already existing regulations in force on the Grand Circuit.

In case applications for racing dates and suggestions for changes of rules and regulations now in force have not been previously filed with Secretary Kline, 1853 East Eighty-first street, Cleveland, Ohio, they can be addressed direct to the hotel in Atlanta for consideration by the proper committee.

The sessions of both committees will reopen at 2:30 the same day, after a luncheon for stewards, their secretaries and friends, the afternoon sessions being followed by a dinner at which the stewards, secretaries and friends will be present.

At 11 a. m. Tuesday there will be an open meeting of the stewards to which all interested in the breeding and racing of trotters and pacers are invited to attend and make any suggestions they may have, looking toward the improvement of both, either personally or by letters. The luncheon, after this open session, will be a family affair, as only stewards and their secretaries will be present. The executive session in which reports from committees will be presented and everything pertaining to the season's date schedule, rules and regulations arranged, will be held at 1:30, and the closing session will be celebrated by a banquet starting at 7:30. Mr. Kline will gladly furnish any further information wanted by stewards or horsemen who intend to be present at the meeting.

An interesting item of news from Holland is that the law which was passed five years ago forbidding bookmaking and the use of the totalizator on Dutch race courses is to be rescinded . The reason for the removal of the prohibition is that it caused great injury to horse breeding in Holland. That racing cannot flourish unless accompanied by some form of speculation every one possessing practical acquaintance with the subject is well aware. Similarly it has been made plain since the beginning of the war, how grievously the horse breeding industry has been affected by the closing of many of our race courses, and in the circumstances the lesson from Holland is one that should not lightly be passed by.—[London Sportsman.

Harness Horses and Horsemen

SANTA MARIA, CAL., AND ITS HORSEMEN.

Something About a Young Trainer Who Put His First Four Horses Raced in the 2:10 List.

[By C. C. Crippen.]

It was during the spring and early summer of 1914 while at the half mile track at Santa Maria, that I made the acquaintance of a young amateur horseman (and a lot of other good fellows, too) who impressed me with his natural horsemanship and ability to drive a horse well in a race, and in a letter I wrote in June of that year for the Breeder and Sportsman, I said of him:

"Wm. Finley owns Pope Hartford, a four-year-old son of Wild Nutling that is a matinee winner and recently worked a mile in 2:20. By the way, the young owner and trainer of Pope Hartford is a natural born reinsman, and, while he trains and races his colt for pleasure only, should he choose to become a professional driver of harness race horses he would undoubtedly win success; he is rapidly learning the tricks of the trade. With other horses than his own he has been equally successful and he has won more matinee races than any other member of the club this season."

And the boy has made good; fulfilled my prediction that he would make a winner if he ever took to professional racing, and as far as I know he is the only driver that in his first two seasons of professional races has taken but four horses to the races and each horse returned with a winning race record better than 2:10, and it is probably true that in this respect "Billy" Finley of Santa Maria, Cal., holds a world's record, and I congratulate him. He is deserving of success as he is well bred, well raised and as gentlemanly a young native son of the Golden West as ever entered into the harness horse racing game.

In 1915 young Finley set forth for the first time on the professional track and invaded Colorado, Wyoming and New Mexico, with a quartet of side-wheelers consisting of the three green ones, Ben Corbett Jr., Pope Hartford and Mono Ansel, and the record mare Pointer's Daughter 2:11¾. He started Pope Hartford 12 times, winning three first, five second, three third and one fourth moneys. The horse took a mile track record of 2:09¼ in a winning race at Denver, Colo., and a half mile track record of 2:11¼ at Casper, Wyoming, which is the record for that State. The free-for-all pacers, which included Leata J. 2:03 and Waynetta 2:04¾, raced over the same track the following day, but did not equal the time made by the automobile horse. I will here mention that his young owner did not drive Pope Hartford in the Denver race, where he made a record of 2:09¼. "Joe" McGuire was behind him that day. But Finley gave him his entire training, and his development is the result of his young owner's maiden efforts as a trainer of race horses. He paced the Denver track in 2:08 and the Pueblo half mile track in 2:10. In 1916 he was turned out and not raced, as he was eligible to the same class as Ben Corbett Jr. and Pointer's Daughter, but his owner hopes to race him in 1917 and will soon start getting him ready for the coming year.

Ben Corbett Jr. started twelve times and eight times headed the summaries, was second once, third once, fourth once and once behind the money. He took a winning race mile track record of 2:09¼ and a half mile track record of 2:14¼.

Mono Ansel answered the call of the bell eight times, was first twice, third once, fourth twice and three times out of the money. He took a winrace record of 2:19¼ over a half mile track and was timed in 2:08 over the mile ring at Denver.

Pointer's Daughter raced eleven times against fields composed of such fast ones as Leata J. 2:03, Red Rock 2:10, Waynetta 2:04¾, College Gent 2:06½, and Hal Boy 2:01½, and finished second to the last named horse at the Exposition meeting in San Francisco. She was first once, second four times, third five times and once behind the banner at the Exposition when, on a muddy track, she was sent away on the run. She finished ahead of Leata J. 2:03 in two races and in two races beat Waynetta to the wire. She went several miles better than 2:10 over half mile tracks that were far from being fast.

Altogether, "Billy" Finley started in his first year of professional racing four horses 43 times, was 14 times first, 10 times second, 10 times third, 4 times fourth and 5 times where they didn't pay off. This includes the one race that McGuire drove for him at Denver. Reader, can you call to mind any other young driver that in his first season of professional racing ever made as good a showing as the young man from "Windy Maria"? I don't think you can.

During the season just past Finley has raced successfully Ben Corbett Jr. 2:06¾, Mono Ansel 2:09½ and Pointer's Daughter 2:09½. Their performances are too fresh in the minds of the readers of this paper to call for any summarizing. I will only state that for the number of starts he made and number of horses in his stable he was more times first and second than any other driver whose campaign was confined to California and Phoenix, Ariz., and will add that in his first two seasons of professional race-driving he has campaigned four horses and each of the four has acquired winning race records better than 2:10. Who can beat it? At Phoenix Ben Corbett Jr. won a third heat in 2:06¾ after being second twice in 2:07¼, and Mono Ansel was timed a mile in a race in 2:06 and stepped a half in better than a minute. Both these horses are perfectly at home on half mile tracks and were consistent winners at Hanford, Bakersfield and Riverside. Pointer's Daughter was expected to be able to bring home all the 2:10 class money in California but went lame at Santa Rosa and was unsound all through the season. She won a good race at Fresno in straight heats, pacing the third in 2:09½, but hopelessly broke down at Riverside.

Young Finley has fortunately had for a partner and counsellor in the racing business a capable and experienced horseman in Garrett Blosser, and to him in no small degree is due the success of the stable during the two seasons they have raced. The firm will prepare their stable for another campaign in 1917 and if all goes well will have some additional members. In Garrett B., by Wild Nutling, they have a promising trotter, and a fast green pacer in R. W., a half brother to Ben Corbett Jr. that has been a mile in 2:08, also a brother to R. W. that is a promising young pacer.

Santa Maria will send other horses to the races next year besides those of Blosser & Finley. C. W. Short, who raced the good little pacer Silver Tips 2:12¾ (half mile track record), will be out again with the brother to Chorro Prince 2:08 and a green trotter that is thought very highly of in Santa Maria. He is called Trigione, by Skidoo Wilkes, and has been a mile in 2:16 over the half mile track there. Mr. Short also has some promising colts that are entered in the California futurities; also a good gaited and fast trotting mare by Morris A., owned by Mr. Spooner of San Luis Obispo, that may also be good enough to try for the money.

"Con" McCormack has the pacing stallion, Show Willy by Wild Nutling, owned by F. Buzzini, that with little work has been in 2:24, and several youngsters of his own by the same sire, one in particular, a filly that shows all the earmarks of a fast pacer.

James Hall has a handsome and fast three-year-old filly by The Proof 2:09¾, that can beat a 2:20 clip.

Frank Treanor has two fillies by the same sire and Harry Steinhart has a Proof colt. All are trotters of promise and only require a little more work to demonstrate that the colts by the good son of The Exponent have all got speed at the trot.

J. E. Moshier is working a four-year-old trotter by Rapallo (trial 2:08), the half brother to San Francisco 2:07¾ that bears a very strong resemblance to his famous "Uncle" and will make a fast trotter.

Wm. Mead, the popular clothing merchant of Santa Maria, has a four-year-old filly by El Zombro out of My Trueheart 2:19¼, dam of True Kinney 2:12, that is a beautifully gaited trotter and one that cannot possibly help going fast with development. She can brush close to a two-minute clip now. She was bred by Keefer & Spencer, from whom she was purchased in 1914 by her present owner. And that reminds me that probably one of the best prospects that will be in the stable of Blosser & Finley is a black pacer called Melvin K., that Garrett Blosser purchased from Mell Keefer as a two-year-old in 1914. He is a full brother to Adansel (3) 2:14¼ by Prince Ansel, dam Advosta by Advertiser 2:15¼, next dam by Nutwood 600. He is said to be a very oily going side-wheeler with a lot of buzz.

A few good race horses have gone forth from Santa Maria and won money and helped to advertise their home town, and more will follow and continue the good work. Many people will come to know that there is such a place as Santa Maria, Cal., that might never hear of that prosperous little out-of-the-way city were is not for the horses that come from there. Santa Maria has a present population of 4,000 and is growing. It is centrally located in the rich and productive valley of the same name whose tillers of the soil are rich and getting richer. This was an unusually prosperous year for the farmers of Santa Maria. They raised thousands of acres of barley and sold it for $1.50 per hundred. They raised thousands of acres of beans which they sold for $10 per sack. One farmer sold 100 sacks for $1100, another received a check for $90,000 for his entire crop. A big beet sugar factory at Betteravia, nine miles from Santa Maria, has used the products of 10,000 acres of beets this year, and the beet growers have had a rich harvest. The oil fields near Santa Maria are booming. One man has just bought a tract of land for which he paid $1,800,000, besides several smaller tracts. The Santa Maria Valley, in the northern part of Santa Barbara county, California, is about the most prosperous valley in this great state today. We are interested in all the products of the valley that bring prosperity to its population — barley, beets, beans and oil—but the horses are our hobby, and here's hoping they will bring home more bacon in 1917 than ever before!

Andrew Albright, proprietor of Prospect Farm, Hilton, N. J., the home of Nathan Axworthy 2:09¼, has rented the palatial Stony Ford Farm Stable located at the Historic Track, Goshen, N. Y.

◈ ◈ ◈

The Chicago Horse Review has advanced its subscription price from $2.50 to $4 per year and the American Horse Breeder has advanced its price from $2 to $3.

PACIFIC BREEDERS' FUTURITY STAKE NO. 16.

The following fifty-one payments were made on the first of January in Futurity Stake No. 16, for foals of 1916, now yearlings. This stake had but 71 original nominations, and of these 62 were kept eligible on the second payment and now 51 have had third payments made on them. This is a large percentage and presages as many colts to be trained and kept eligible to start as have been kept in stakes with a much larger original entry list:

J. N. Anderson's b g Derby Dillon by McDillon, dam Della Derby by Chas. Derby.

I. L. Borden's f Cleo Barnato by Barney Barnato, dam Cleopatra by Zolock; br c Robert Barnato by Barney Barnato, dam Roberta by Robert I.; b f Miss Stone by Ed. McKinney, dam Miss Volo by Antevolo.

J. L. Bulloch's ch c Lindon Hall by Black Hall, dam Gadsky by Athablo; br c Chester W. by Black Hall, dam Cora Wickersham by Junio.

T. L. Carey's ch f Quinie Star by Hallie's Star, dam Quinie Direct by Quintell.

J. M. Clark's b c by Jim Logan, dam Ruby C. by Palo King.

I. J. Cornett's bl f by Vernon McKinney, dam Malvina by Oh So.

Hazen Cowan's br c by Guy Dillon, dam Maud Wilkes by Lynwood W.

S. H. Cowell's foal by Peter McKlyo, dam Dione II by Cupid; foal by Panama, dam Hulda C. by Dexter Prince; foal by Peter McKlyo, dam Eleanor Sears by Searchlight.

Wm. E. Detels' br c by Mahomet Watts, dam Daphne McKinney by McKinney.

J. F. Dunne's bl f by Mahomet Watts, dam Letter B. Jr. by Benton Boy.

W. G. Durfee's b c by Carlokin, dam My Irene S. by Petigru; b f by Carlokin, dam Atherine by Patron; b f by Carlokin, dam La Gitana by Del Coronado; b c by Carlokin, dam Ezelda by Del Coronado; ch f by Copa de Oro, dam Pavlowa B. by Petigru; ch c by Copa de Oro, dam Subito by Steinway; b f by Copa de Oro, dam Leonor McKay by McKinney; foal by Copa de Oro, dam Rosebud by Directo.

Wm. M. Ferguson's rn f Miss Helmont by Alton, dam by Jay Bird.

Sam Flynn's f Healani Maid by Healani, dam Dictatus Maid.

L. L. Gilpin's b c Freddie C. by Palo King, dam Beautiful Morn by Iran Alto.

W. S. Harkey's b c by Robert Bingen, dam Deviletta by Diablo.

H. H. Helman's b g Dick Dillon by Warren Dillon, dam Mollie McNeita by McKinney.

Hemet Stock Farm's b f Zeta Lucile by Wilbur Lou, dam Zeta W. by Nutwood Wilkes.

H. A. Hershey's b f Mable Bell by Jim Logan, dam Palo Maid by Palo King.

A. W. Longley's bl or br f by Bond Wilk, dam Sidbar by Sidney.

R. J. MacKenzie's b f by Mahomet Watts, dam Martha Spy by The Spy; bl f by Quintell, dam Baroness Psyche by Baron Review; b f by Mahomet Watts, dam Mildred Togo by Togo; b c by Mahomet Watts, dam Zombro Belle by Zombro.

Roy D. Mayes' br c Master Derby by Jim Logan, dam Ramona by Demonio; b f Miss Logan P. by Jim Logan, dam Bally Pointer by Star Pointer.

J. E. Montgomery's b c by Jim Logan, dam Edna R. Diablo by Diablo.

Theo. Mueller's b c Alto Thorn by Richard Alto, dam Madge by Mechanic.

Geo. F. Ryan's b f by Vernon McKinney, dam Miss Harris by Sidney Dillon.

W. L. Selman's ch c Bill by Otis Jr., dam Miss Delta by J. J. M. Jr.

J. E. Short's b c Valador by Skidoo Wilkes, dam Honda Girl by Rubino; b f Lady Earl by R. W., dam Keno by Prismo.

Chas. F. Silva's b f by Teddy Bear, dam Normono by Demonio.

Jas. H. Spafford's b c Stockton Lad by Royal McKinney, dam Libby H. by Bronzo McKinney.

A. B. Spooner's b c Pecho Morris by Morris A., dam San Luis Belle by McGinnis.

L. H .Todhunter's bl f Jean McKlyo by Peter McKlyo, dam Leavinettie by Zombro.

D. W. Wallis' b c Easter Angelus by Bondholder, dam Mary W. by Dictatus.

M. L. Woy's br f McKinney B. by Stanford McKinney, dam Loma B. by Stam B.; b c Woy's Express by Expressive Mac, dam Florence B. by Bon Voyage; br f Alice W. by Expressive Mac, dam Strathaile by Strathway.

Several eastern papers gave out that Havis James made the trip to California with Dick McMahon. All the California horsemen would have been glad to greet Mr. James, who formerly resided at Pleasanton and managed the Pleasanton Stock Farm as well as trained the string of Mr. R. J. MacKenzie, but Mr. James did not make the trip.

◈ ◈ ◈

The dead sire Zombro 2:11 now leads his sire, McKinney 2:11¼, as a sire of 2:10 trotters. He has 18 to his credit and McKinney 17. Peter the Great 2:07¼ is the only stallion that has sired more and he has 39 trotters in the 2:10 list, four more than McKinney and Zombro combined.

SADDLE and SHOW HORSES

Horseback riding has been at such a comparatively low ebb for the last few years that more than passing interest is being taken by San Franciscans, in the number of prominent citizens who have swarmed in a general "back to the horse" movement. At the San Francisco Riding Academy on Seventh avenue there are more than 100 fine saddle horses quartered. Of this number fifty are the property of the academy and the remainder are owned by San Francisco's horse lovers.

While the majority of the horses being used are of the average Riding Academy class, there are an exceptionally large number of splendid horses. Many of them are noted for their achievements in the show rings, and for their blood lines. Probably of these the mare, Mavis, which was the sensational debutant of Kentucky two years ago, is the best known and most important. Mavis, it will be remembered by horsemen, was brought out by Kentucky's premier exhibitor, "Exquisite" Billy Shropshire, who also brought out Hazel Dawn, Hazel Dazzle, Jack Barrymore and Blanche Ring. She was sold by Mr. Shropshire to Henry Ahlers, of San Francisco, who is her present owner. She shows that she has had good treatment since coming west and with a little preparation could go to the select show rings and win.

E. Courtney Ford is another local sportsman who has one of the attractive saddle horses in the Academy, his good gelding Golden being one of the most admired horses on the equitation paths. This gelding is a big fellow, built for endurance and speed as well as attractiveness and represents one of the rarely successful crosses between the Thoroughbred and Hackney; he being sired by the imported stallion Manchester and having the much talked-of Avail for his dam . Mr. Ford is one of the most enthusiastic horse lovers in the city and few professionals can ride a horse to better advantage and at the same time look so well themselves while riding.

Sanford L. Goldstein, treasurer of the California Fruit Packers Association and one of the leading sportsmen of the Pacific Coast, has three good saddle horses in the academy. Mr. Goldstein and his talented daughter, Miss Edyth, are among the most regular patrons and the best part of their riding is their evident knowledge of what they are about, which is a rare thing at riding academies. Mr. Goldstein has three horses in the academy—the bay gelding Mexico, which he uses personally; Melba, an attractive pony used by his daughter, and the splendid young stallion Chief Eagle 6073, which is in training. This is one of the best bred horses in the records, despite the fact that he was foaled in Oklahoma. He is sired by Regal Rex 5010, by Rex McDonald Jr. 1418, by King Eagle 750. He was brought to California by J. M. Townsend of Yosemite, who later sold him to D. J. Desmond of San Francisco. Mr. Desmond sold him to Samuel Kramer, manager of the academy, who sold him to Mr. Goldstein.

However encouraging it may be, by the number of sportsmen who are taking an interest in saddle horses in San Francisco, the steadily increasing number of children who are taking lessons at the academy means more to the game in California than any other thing. There are from 40 to 50 children in many classes ,and the way they are riding "rings" around some of the older devotees is not only amazing, but amusing.

It brings to mind the assertion of the late J. A. Potts, who was the father of the saddle horse industry in Missouri, when watching a crowd of kids (both white and black, riding some colts, and of which the writer was a member), that a person was not and could not be a real horseman unless brought up in the saddle.

On December 29 Mr. Kramer conducted the first annual Children's Horse Show, and the nine classes had an average of eight entries. The pavilion was filled and as it was confined exclusively to children's events, it has created a desire among them to know how to handle their mounts as well as to own the best horse. The judges in this event were Mrs. Phil Wand, Miss Jean Wheeler and Miss Ysobel Chase.

The next important event on the horse show calendar will be the Denver show, which is conducted in connection with the National Western Stock Show. In addition to the attractive heavy leather and light harness horse classes, a stake of $1,000 for five-gaited saddle horses and a $500 junior saddle stake will be given. The best horses in the East will come together for the opening show of 1917. The show will be conducted under the same liberal lines as in 1916, which was supposed to be the best horse show ever conducted west of the Mississippi. Fred P. Johnson, the secretary, is one of the best known officials in the country and offers exhibitors every possible opportunity for a profitable week. Denver is one of the best horse show towns in the West, and the show always attracts good crowds. The feature of the show, however, is in the number of sales made during the week. The show will be held from Jan. 22d to 27th.

An Inquiry From Portland, Maine.

In a letter to "Jump" Cauthorn, of the Breeder and Sportsman, Fred A. Thomas, of Portland, Maine, who is an old and valued subscriber of the Missouri Stockman, seeks information in regard to saddle horses and mules. His letter follows:

"The gaited horse is a rare thing in this vicinity. There are no mules at all. Being an old subscriber of your paper I have naturally become interested in them. At the present time I have 18 saddle horses, that is, horses used for saddle purposes . What kind of horses should I buy? There are a lot of people here who would ride regularly if they could have an easy-going horse . If they try to ride a horse that trots it is hard for them and they soon become discouraged and give up. If they had a horse with a good easy gait they would ride regularly and many would buy horses. What kind should I buy,—a good nodding walker or one that is educated for the five gaits? Are such horses used in harness?

"I use a number of work horses weighing from 1,200 to 1,500 pounds and would like to know how mules compare with them. Are they lazier than horses?"

ANSWER.

Saddle horses are used at the present time more for exercise than anything else. The majority of buyers want a walk, trot and canter horse. Just the kind Mr. Thomas wants to avoid. In his case, I should say a well educated, five-gaited horse, would come nearer filling the bill. A real nodding walker usually referred to as a plantation horse is seldom a good driving horse, while the properly schooled five-gaited horse is an ideal harness horse. The best explanation is that a nodding walker is a natural gaited horse and a five-gaited horse is trained. If he is a real five-gaited horse, he will have an excellent trot, permitting of his use in harness to good advantage. However, for the ease and comfort in the saddle, suggested by Mr. Thomas, more attention should be paid to the slow gait, and if it is the right kind the horse will give an easier ride than the nodding walker.

It is conceded that a 1400 pound mule will do the work of a 1600 pound horse. They are not lazy and working by the side of a good horse the mule will always hold his own. However, he is noted for taking care of himself. No one ever heard of a mule being over driven. As drivers, they do not compare with good road horses, but are far better on the road than the average farm horse. They are easy keepers, can stand work, hardships and abuse, but appreciate good treatment as much as a horse.

Dr. Gadsby Buys Two Kentucky Stars.

Dr. W. C. Gadsby, of Kirkwood, Mo., invaded Kentucky during the holidays and purchased two of the most noted show horses in the Blue Grass, getting the stallion, Crimson Chief and the mare, Blanche Ring (Regina Loyd). The stallion was bought from Mode Nichol of Lexington and the mare from "Billie" Shropshire, of Winchester. There has been some speculation in regard for whom Dr. Gadsby was acting. It has been reported that he bought them for Adolphus Busch III, of St. Louis, who has been keen to get in the saddle horse game for some time, while other rumors suggest they were purchased for G. S. Parsons, a St. Louis sportsman, who recently established a country place at Benson, Vt. More familiar friends of Dr. Gadsby, however, believe he bought them on his own account. The price paid for the two was $7,000. Outside of the consignment Dr. Gadsby bought in Kentucky last February, this is one of the best sales made in that state this year.

Crimson Chief is by Red McDonald and out of a daughter of Bourbon Chief. Blanche Ring is by the noted sire, Rex Peavine, and has for a dam that most noted of Kentucky matrons, Mary Dick, by Chester Dare 10. She was brought out by Brock Bros., of Georgetown, who sold her to Shropshire last spring. Well informed horsemen who have seen these young stars perform declare they are the most brilliant horses sold in Kentucky this year.

Champion Hackney Pony.

Tissington Amity, an English hackney harness pony, owned by Charles E. Coxe, of Philadelphia, was the busiest and most successful show horse of 1916. Competing in forty-five classes she won forty-three first prizes, ten of which were championships. At the National Horse Show in New York, she won first in every class in which she was shown, winning the open class for harness ponies, the American Hackney Horse Society's special and the championship of the show, to wind up her remarkable campaign. Her earnings for the year were $1,795 in money and $300 in plate. Tissington Amity is a bay mare, 13.3 hands high. She was bred by Sir Gilbert Greenall, of Warrington, England, and imported by Mr. Coxe in 1914. Her sire, Sir Horace, was one of the greatest hackney pony sires of his day. Her dam, Ailsa, was by Goldfinder VI, another noted bantam hackney sire in England ,and through sire and dam she is closely inbred to both Denmark and Lord Derby II. Frank E. Palmer has trained her and driven her in all her winning performances.

We are in receipt of our annual New Year remembrance from our good friend, Jack O'Brien, the popular Chicago horseman, which, as in former years, is a splendid lithograph calendar.

NOTES.

The horse show to be held in connection with the National Western Stock Show, at Denver, January 22-27, gives every indication of eclipsing the successful shows held under the same management in previous years . Advices from Chicago are to the effect that Mr. Frank Peabody will show his stable of hunters, as well as the favorite heavy harness mare, Lady Tuck, and a pair of walk trot saddle horses. Mr. and Mrs. Peabody will leave Chicago in their private car, stopping at the Denver Show en route to the Pacific Coast. Mrs. Peabody is a charming young Chicago matron, a favorite in society circles, and the presence of herself and Mr. Peabody will lend prestige to the social functions already being arranged for by the Denver folk. In addition to the Peabody stable, the Denver entry list will include the stables of J R. Thompson, Chicago; Miss Long, Kansas City; J. R. Peak, Winchester, Ill.; O. J. Mooers, Columbia, Mo.; Tom Bass, of Mexico, Mo.; Blades & Holeman, Holliday, Mo.; Joe T. Harris, Columbia, Mo., and other exhibitors of note.

◈ ◈ ◈

D. Schilling, chairman of the Horse Show committee, has announced that the classes will be passed upon by Judges Walter Palmer, of Ottawa, Ill.; Billy Roberts, Lexington, Ky.; and James Lockridge, of Fayette, Mo.

◈ ◈ ◈

One of the most important sales of saddle horses in Missouri since the new year, has been the sale of the handsome young stallion, Jack Kerrigan, by Judge J. W. Dempsey of Shelbina, Mo., and J. J. O'Brien, of Chicago, who owned him jointly, to A. R. Lewis, a prominent banker of Marsailles, Ill., for $900. Jack Kerrigan was one of the good junior horses in Missouri in 1916. Exhibited by John Wood, he was in the money at the St. Louis fair and at The International. The sale was made by Mr. O'Brien, who is one of the leading dealers of high class horses in Chicago.

◈ ◈ ◈

D. Schilling, proprietor of the J.O.D. Ranch, Aroya, Colo., has recently purchased the black saddle stallion, Grassland King 3530 by Forest King 1462; dam Rozella 2877 by Rex McDonald 833; 2nd dam, Romola C 2437 by Harry Montrose 3rd by Black Squirrel 58. With Mr. Schilling's other recent purchase, the stallion, Noble Rex, by Rex Hardwick, Grassland King will be shown at the Denver Show.

◈ ◈ ◈

At the Chester Atterbury sale, near Madison, last week, a good Rex McDonald mare sold for the very low price of $75, while her colt by Rex Cloud Chief only brought $23. Their purchasers got two exceptionally low bargains.

THOROUGHBRED NOTES

To bring about larger fields, handicapper W. S. Vosburgh suggests divided handicaps. "What I call a divided handicap," says the New Yorker, "is one for which all the horses nominated are weighted the same as in any handicap; then divided into two classes—those handicapped above—say 105 pounds or 100 pounds to form Race No. 1; those weighted below that figure, to form Race No. 2; only that the weights in Race No. 2 are raised 10 pounds or 15 pounds. By these means we are enabled to have a race between horses of the first class without their being compelled to concede undue weight to inferior horses—something approaching a weight-for-age race with classification. In Race No. 2, raising the weights renders the horses probable starters, as it enables them to be ridden by competent jockeys—something which under their original allotment is rarely possible. In addition, it enables horses to win a handicap which they could not otherwise, being outclassed. Such horses at present belong in the selling race class, yet their owners rarely care to sell them. To this class the divided handicap would open a new field of usefulness and thus help simplify the selling race question which has, is, and threatens always to be a vexatious one.

◈ ◈ ◈

Campfire was far and away the largest money winning two-year-old in the United States in 1916. He won $48,965, and next to him were Hourless $16450, Harry Kelly $13,544, Hwfa $7,350, Manokin $6,885, Bondage $6,685, America $6,495, Crank $6,290, Deer Trap $6,250, Koh-i-Noor $5,970, Ticket $5,825, Yankee Witch $5,460, Fan G. $5,250, Tom McTaggart $5,200. No other two-year-old won as much as $5,000.

◈ ◈ ◈

The New Orleans meeting opened January 1st. The big feature of the afternoon was the New Year's Handicap, and while Jefferson Livingston's Syrian was an easy winner over Typhoon and Hanberk it was a thoroughly good contest and the track condition undoubtedly had very much to do with the ease with which the son of Electioneer scored. Nine horses contested for the stake, which was worth $1,380 to the winner.

◈ ◈ ◈

The Jockey Club has changed the definition of a maiden and now any winner of a race on the flat is no longer a maiden. Under the old rule no penalty was provided for the winner of a sweepstakes or match race and a horse that had won a five or ten thousand dollar sweepstakes could start in a regular stake race later on with a maiden allowance.

Sixty-Eight Nominations in State Fair Futurity No. 9.

A slight increase in the number of nominations made in State Fair Futurity No. 9, over those made in Stake No. 8, is gratifying. While the increase is not large, five more mares have been named over last year's list, which shows that the interest in breeding and racing of trotting and pacing colts has not declined. Among the stallions to which these 68 mares were bred last year and whose prospective sons and daughters will compete for the divisions of the stake as three-year-olds, the trotter Peter McKlyo 2:06, owned by L. H. Todhunter of Sacramento, and the pacer Jim Logan 2:01¾, owned by J. Elmo Montgomery of Davis, are tied for first place with eight of the mares bred to them in 1916 nominated in the stake. Wilbur Lou (3) 2:10¼, owned by Hemet Stock Farm, is second with seven mares nominated, while Vernon McKinney 2:01½ is third with six. Thirty-five breeders have made the 68 nominations in the stake, Hemet Stock Farm leading with six, J. Elmo Montgomery and R. J. MacKenzie making five each, R. D. Mayes and W. G. Durfee four each, and I. L. Borden, L. H. Todhunter and M. L. Woy naming three each. But one mare that was mated to a stallion outside of California has been nominated in the stake and that is the mare Helen Stiles 2:06¼ that was bred to the great Kentucky sire Manrico 2:07¼ last year and is nominated by W. G. Durfee of Los Angeles. The list of nominations in the stake follows:

Owner.	Mare Nominated.	Stallion Bred To.
F. R. Bain	Vauria, ch m by Geo. W. McKinney	Wilbur Lou
I. L. Borden	Gold Lilly, b m by Copa de Oro	Guy Dillon
I. L. Borden	Cleopatra, ch m by Zolock	Guy Dillon
I. L. Borden	Cherry B., b m by Barney Barnato	Major's By Guy
J. L. Bullock	Cora Wickersham, b m by Junio	Black Hall
John Clark	Little Lucille, by Palo King	Jim Logan
John Clark	Ruby C., b m by Palo King	Jim Logan
John N. Colomb	Yolanda, b m by McKinney	Onward McGregor
S. H. Cowell	Dione II, b m by Cupid	Peter McKlyo
S. H. Cowell	Hulda C., ch m by Dexter Prince	Panama
W. E. Detels	Daphne McKinney, b m by McKinney	George Hammet
J. F. Dunne	Letter B. Jr., br m by Benton Boy	El Volante S.
W. Ferguson	Leta K., b m by Palite	Alton
L. L. Gilpin	Beautiful Morn, b m by Iran Alto	Expressive Mac

TRAINING AND TRACK TALK.

Items Picked Up by a Breeder and Sportsman Representative on Trip Through the State.

News from Woodland's New Half Mile Track.

No doubt there are many horsemen in California who do not like to race their horses over half mile tracks and in many instances they are right, on account of the way some of them have been built, with their long stretches and short, flat turns, but the new track at Woodland is all that can be asked for in the way of a two-lap ring. It has good saucer turns, an ample stretch, good and wide the whole way around, and last but not least, the soil to make it fast. Charley Silva knew that he was making no mistake when he decided to make this change and with Lon Daniels in charge there will be work done here in the way of cleaning and fixing up that has been neglected for some time. At present the track is soft and all jogging is done on the road, and that's one of Woodland's best points. You can take a horse out any time after a rain and give him as many miles as you wish over some of the best dirt roads in the state. Silva has decided to give a meeting just before or after the Dixon May Day races. There will be some races for colts and the other classes will be made to suit the horses that race at Dixon.

More than likely the Silva stable will be split this year, some going north over the northern and Canadian Circuits and the rest will stay here if there is the right kind of a circuit. If not, they will go East.

Teddy Bear 2:05 is looking fine and is sure to go north this year, and Daniels says any horse that will beat him will have to step some. Bondeline (3) 2:06¼ by The Bondsman, dam Katalina 2:11¼, is running in the paddock but will soon be taken up and commenced on.

Quite a number of Teddy Bears will be raced this year. Merril (3), dam by Zombro, showed last year an eighth in :14¾ and a half in 1:08. Raymond (3), dam by Whitestone, a quarter in :30¼, a half in 1:08½. Little Jack (3), trotter, dam by Stam B., last year showed a quarter in :32, a mile in 2:24. Lon looks for this fellow to be some horse this coming year.

Bypass, a five-year-old trotter by Lijero, dam by Stam B., and Columbia T. 2:13½ trotting, by Bon Guy, dam May T., are in good shape and should show good this year.

The following horses are still in pasture but will be taken up February 1st: Dixon Boy (p), time record at Fresno 2:08¼, stepped last year in 2:05¼ and 2:05½. Potrero Boy (p) 2:06¼, and John Malcolm (p) 2:11¼, driven a mile by Charley Silva in 2:04¼ last year; Stanley Quinn (3), pacing 2:19¼, by Dan Logan, last year a quarter in :30½, half in 1:01 and mile in 2:13, and San Felipe 2:09¼, trotter, who was beaten at Columbus last yearby an eyelash in 2:06¼. All will be put in shape and be ready when the time comes.

Charley Johnson has a lot of as fine looking colts by his good race horse Airlie Demonio 2:05¼ as you will find in your travels any place on the coast, and the following broodmares of which Johnson has a number of high class ones, are in foal to him: Trixie Diablo, by Diablo 2:09¼, May Logan by Diablo, Star Logan by Star Pointer, Mista Lockheart by Lockheart, Aleema by Nutwood Wilkes and Nutflower by Nutwood Wilkes. Airlie Demonio is looking in the best of shape and it would not take much to get him ready, but Johnson has decided to lay off this year and get him and some of his get ready for the following year. Trainer Ed Parker has four of the Johnson horses at the track and he thinks well of all of them. The best liked one is Airlie Pointer (3) by Airlie Demonio 2:05¼, dam by Star Pointer, second dam Effie Logan, dam of Jim and Dan Logan. Also a nice yearling by Airlie Demonio, dam May Logan, and May Demonio by Airlie Demonio, dam by Diablo.

Hi Hogoboom is jogging several two and three-year-olds and he thinks he will find a couple of good ones among them. He has a nice two-year-old pacer by Jim Logan, Lily of the Valley (3) 2:24¼, another three-year-old trotter by Palo King and Rose King 2:19 trotting, by Palo King.

J. Elmo Montgomery drops over from Davis about every ten days. The old stand-by Jim Logan 2:01¾, along with Lock Logan 2:07¼, will be raced again this year, but the best card will be the six-year-old pacer Hal Logan 2:09 by Jim Logan. This fellow was three times second to Zombrino at Phoenix last fall in 2:07, and the way he was stepping when the races closed, it looks like there will be a pretty fast addition to the Jim Logan family.

Sacramento Track News.

Walt Tryon has returned from his eastern trip and expects to close a deal later on for something good. The following record horses in his string and all the property of Mr. S. H. Cowell are looking good and being jogged daily: Rastus 2:04¾ pacing, and the trotters John Mac 2:12½ and Albaloma 2:08¾. Walt looks for the last named to be a real good horse this year. The green pacer Mountain Dee by Charley D. did a mile in 2:11 last year. The two three-year-olds by Peter the Great, filly and colt, and a green mare by Bingen all have the appearance of having "the goods" with them. Tryon also has Sam Gault's three-year-old colt by Peter McKlyo 2:06, and a green pacing mare by Demonio 2:11¼ owned by G. W. Davis of Vacaville. This Demonio mare has shown a mile in 2:11.

William Ivey will get his mare Sister Patrice by Lijero ready ths year. She showed well as a three-year-old, having been a mile that year in 2:18.

J. B. Stetson, who now has charge of the horses owned by the Midway Stock Farm of Kearney, Nebraska, is wintering here and has some very classy looking yearlings, four of them being by Robert Bingen, out of high class broodmares. The others in the stable are Hal Royal, a pacer by Hal B. 2:04¼, that acts like a very fast horse, the trotter Adiola Mack by McKinney, Joe Watkins, a trotter by Kentucky Todd, dam by Moko, and the three-year-old pacer Santa Clara by Demonio 2:11¼, all in good shape and condition. Stetson has the pacer Gray Hal, a full brother to Hal Gray 2:08 and Gray Ghost 2:11¼ by Hal B., owned by C. A. Harrison of Seattle, and the six-year-old pacer Palita by Palite owned by Dr. Haile of Sacramento. Mr. Stetson says that when Warren Dennis, of Farmington, Utah, bought Hal Regent by Hal B. out of a mare by Vice Regent, from C. A. Harrison, he got one of the best three-year-old Hal B.'s that he has seen in a long time.

Jim Thompson has but two of Mr. Todhunter's horses at the track, Peter McKlyo 2:06 by Peter the Great 2:07¼ and the three-year-old colt by Gen. Watts, dam Zom Bell. The rest of the horses are at the home farm at present and it has not yet been decided how many will be sent to the track. Thompson has two very fine looking fillies, one by The Northern Man 2:06¼ and the other by Tregantle 2:09¼. The Tregantle filly has been a mile in 2:25 as a two-year-old. Thompson's Gen. Watts colt Bon Watts, now a three-year-old, is a grand looking youngster and with his breeding will surely be heard from later on.

L.

NEW RULES FOR HARNESS RACING.

American and National Associations Agree on Rules for 1917 and Make Them Mandatory.

The joint rules committee of the American and National Trotting Associations met at Columbus, Ohio, January 3d and adopted a set of rules which will govern both associations during 1917 and until the next meeting of the congress of both associations. An official report of the details of the rule session shows that a large number of changes have been made, but as this report was received on Thursday of this week a full account of the same cannot be published in this week's Breeder and Sportsman.

Last year many horses raced under a rule of the American association which permitted horses requiring winrace records prior to July 8th to get no bar. This rule will not prevail henceforth. The old rule which gave a horse making a winrace record on a mile track, four seconds allowance in races on half mile tracks still stands, but there are no other allowances except the following:

"After a horse has a winrace record he shall be allowed, whether raced or not, one second for each calendar year until he equals or reduces his record."

This rule is expected to bring to the front many an old horse that was marked for life in his youth and has never been able to equal his record since. Thus any horse that took a mark of 2:10 five years ago and has not equaled that record since will be permitted to start in the 2:15 class this year.

In all purse races the number of entries required to fill must be stated in the advertised conditions and the definition of purses and stakes is clearly defined.

All races in the future will be to a finish. Instead of a varied system of conducting races there will be three styles, namely, the two in three, three-heat and three-in-five systems.

In the two in three heat plan a horse to get first money must win two heats. Horses not standing for money after the third heat are ruled out.

In the three in five heat plan the winner must win three heats. Horses not standing for money after four heats go to the barn. After the fifth heat only heat winners start, unless two horses have two heats apiece, in which event they only shall start.

The three-heat plan is an event to end with the three heats, the horses standing best in the summary being declared the winner and the recipient of 10 per cent of the purse in addition to first money. In case of an absolute tie a fourth heat will be required. Every horse hereafter must be entered in the name of his owner or owners. A syndicate may have its stable name registered and may use that in place of names of individuals.

In all races for two and three-year-olds the distance has been made 100 yards on half mile tracks and eighty yards on mile tracks.

All rules are mandatory and neither association shall recognize special allowances by any track associations.

Notes and News

Give your stallion more of an opportunity by advertising him. Keep his name before the public.

The meeting of secretaries and track managers for the purpose of forming a California harness racing circuit will be held next Tuesday in this city.

Peter Wilton, the son of Peter the Great that Havis James had at Pleasanton during the season of 1911, won the championship of all breeds at the horse show held at Guelph, Ontario, last month.

Harry S. Neally, racing secretary of the New York State Fair, has already drafted his program of early closers for the Grand Circuit meeting, subject to such changes as the action of the stewards at the Atlanta meeting may require.

The North Pacific Fair Association has abolished the early closing purse . Entries to its races will not close until August 1st. This will suit the horse owners, and there should be a much larger percentage of starters than under the old plan.

A payment of $10 will be due Thursday, February 1st, on all two-year-olds entered in Pacific Breeders' Futurity No. 15, which is for foals of 1915. This stake has a value of $5,150. Better not let February 1st go by without making this payment.

Lucille Spier 2:03¼ has been insured for $30,000 in The Two Hartfords. If you desire to know all about horse insurance in these companies write to Mr. Roland C. Drake, Assistant General Agent, 438 California street, San Francisco. All good horses should be insured.

Harry J. S. 2:07¼, the pony trotter that forced Richard Delafield's Al Mack out in 2:08¾ and 2:09½ over the half mile track at Goshen last summer, is now credited with thirty-two winning races and earnings of $17,130. He has started fifty-eight times in the last six years and has won a part of the purse in all but three of his races.

Baron Robin Hood 2:10¼, purchased by J. D. Callery of Pittsburg, after trotting a mile in 2:06 in his work as a three-year-old last season, is to be a member of Thomas W. Murphy's campaigning stable this year. The colt is a son of Baron Review, sire of Murphy's first Futurity winner, Baroness Virginia 2:08¼.

That Volga 2:04½ will yet prove to be the fastest trotter of her wonderful family, which includes Peter Volo 2:02, her full brother, is the belief of some astute Kentucky horsemen. Though trained as a two-year-old, she has always been carefully handled, and her physical condition is said to be as good as if she had never worn a harness. Ben White, who drove her to her record, is wintering her at Thomasville, Ga.

Allie Watts 2:07¼, by General Watts 2:06¼, has trotted forty-two races of more than one hundred and twenty-five heats in her last campaigns, winning twenty-two times and finishing behind the money only twice. Her three-year-old campaign, in which she trotted twenty-one races, winning nine of them, is said to be without a parallel for a trotter of this age. Fred Edman, of Jonesville, La., developed and drove her.

Walter R. Cox says that Mabel Trask 2:03¼ is the most intelligent animal of the genus equus that he has ever seen. "It isn't necessary to urge her when another horse comes to her," he said recently, "nor is it necessary to take her back when she has the race won. She seems to know by instinct just when to speed and when to conserve her energy. She drives herself with as much judgment as I or any other human being could drive her."

The Stanislaus county board of supervisors will probably purchase the land adjoining the city of Modesto on which the county fair was held last year, and the fair will be made a permanent institution. The land consists of 103 city blocks, and is offered to the county for $12,250. If the board purchases the land, permanent buildings and stock sheds will be constructed. The board will also appoint a fair commission, under whose direction future fairs will be held.

Geo. W Lowery has received word from "Tommy," who has been the caretaker of Spriggan 2:08¼ for several years past, that the $20,000 stake winner has not had a blanket on all winter, although he is passing through the season in the stables of Lon McDonald at Indianapolis, and has a coat of hair on him that would make a polar bear envious. The son of Baron McKinney is now in perfect health and McDonald will begin jogging him as soon as the weather permits. Spriggan will be an acclimated trotter when the Grand Circuit opens and Mr. Lowery hopes to see him trotting in his 1915 form again.

The American Horse Breeder of Boston says Boston had a Christmas tree for horses. A huge evergreen was placed in Postoffice Square, where carrots, apples, sugar and a lot of other "goodies" were distributed among hundreds of animals, while coffee was served to the drivers.

J. D. Calley of Pittsburg, who at the Chicago sale last month purchased Hermes 2:13¼, winner of three three-year-old stakes in California last year, will use the son of Carlokin as a matinee horse. And C. A. Durfee, who drove him in all his races last year, says Hermes is a good enough trotter to race anywhere in his class.

C. K. G. Billings, of New York, is spending a few months at Santa Barbara and has had expressed to him there eight automobiles and seven head of his favorite riding horses, among them the world's champion trotting gelding Uhlan 1:58, California B. 2:14½, world's champion under saddle on a half mile track, and several other fast horses. Mr. Billings has taken the beautiful Graham residence at Santa Barbara for the winter.

Many important sales of high class live stock have recently been made through the office of D. O. Lively of San Francisco. Mr. Lively has sent Poland-China hogs to South American points; two Holstein bulls to Nicaragua; two jennets, thirteen Polled Rambouillet sheep and a Shorthorn bull to the Hawaiian Islands. Local sales have included three cars of stock hogs to go to the rice fields and 106 head of grade Shorthorn cows to W. J. Hammon.

T. D. Sexton, the popular Oakland contractor, owner of Future Tramp 2:09¼, had a narrow escape from death a few days ago when a plank broke on which he was walking in the new Breuner building, now in course of construction in Oakland. Mr. Sexton fell about fifteen feet, striking on his head and shoulders, and when picked up was unconscious. He is out again attending to business as usual, but will feel the effects of the fall for some time.

E. D. Dudley, one of the progressive stockmen of the Sacramento Valley, whose fertile ranch is near Dixon, sold 26 Duroc-Jersey shoats to J. I. Thompson, of the State Farm at Davis, this week. Prof. Thompson bought the pigs for experimental feeding at the farm. They were from good sows and by a pure-bred boar. Mr. Dudley, who formerly engaged quite extensively in the breeding of trotters, has recently devoted his time to the breeding and feeding of high class live stock. His farm is well stocked with the best herds of sheep, cattle and swine.

Dick McMahon, when at Pleasanton recently, offered $1250 for Dunne & Lowery's mare Peter's Queen by Peter the Great, that Millard Sanders is training . This daughter of Peter the Great is wintering nicely and gives every prospect of being a good mare for the trotting classes this year. While her owners feel she is worth more money than McMahon offered for her, they were complimented that a trainer of his experience should offer that amount for the daughter of Peter the Great.

* * *

The Yolo County Fair, already advertised as "the Biggest Little Fair in California," has selected August 29th to September 1st, inclusive, as the tentative dates of its fair this year. This fair association proposes to hold the best live stock exhibit ever made at any district fair in California. Already applications for space have come in from Stanislaus, San Joaquin, Sacramento, Glenn and Yolo county farmers and from the Alameda and San Francisco chambers of commerce and the California Development Association. The fair will be held at the Woodland Fair Grounds, now owned by Charles Silva, and on which he is constructing a first-class half mile track.

Mr. H. E. Middleton, of Oakdale, Stanislaus county, is the owner of two fine mares, full sisters, ten and eleven years old, respectively—Miss Zom B. and Antie Oak, by Zombro 2:11, dam Lady Van Nuys by Stam B. 2:11¼, second dam Whisper, the dam of Zombro, by Almont Lightning. Both mares are registered, and he owns a three-year-old colt by Best Policy out of Lady Zom B. that trainer Frank is giving lessons to at Pleasanton. This colt is a trotter and shows a lot of speed. Mr. Middleton will have him registered this month and one glance at his pedigree shows that he is one of the best bred youngsters now in training in California .

A. Edstrom, of Oakland, who bred Vera Hal 2:05, Roan Hal 2:18¼, and several others that have fast records, will probably take his pacer Hallie's Star to the Stockton track to train him for the California circuit this year. Mr. Edstrom is only waiting for the announcement of such a circuit to move his horse to the Stockton track. Hallie's Star is a free going pacer and has worked a mile in 2:15 with the last quarter in 30½ seconds. He is by Star Pointer 1:59¼ out of Sweet Hallie by American Hal and has never been regularly raced, but took a time record of 2:24¾ when a three-year-old and has started in a few matinee races . He was foaled in 1910. Probably he is the most intensely bred pacing stallion on the Pacific Coast, as he is from a pacing ancestry on both sides of his pedigree.

Frank D. MacGregor, who has conducted a successful livery and sale stable in Santa Rosa for forty years or more, has sold out the business to his son, William W. MacGregor, who has been associated with him for the past three years. The son has added an automobile garage to the business, the property being ideally located and arranged for this addition. Driving and saddle horses will be kept on hand as usual for those who like to ride or drive and in addition an up-to-date automobile garage will be conducted. The many friends of Frank MacGregor will wish him long life and good health for the remainder of his days and will be glad to know that he retires with a fine home and a competency that will keep him comfortable during the rest of his life, which should be a long time as he is still in good health and has a "long expectancy," as the insurance men say. They will also wish the son much success.

William Stuart, the Humboldt county trainer who has been located at Santa Rosa for the past two years, is spending a few weeks in San Francisco while his horses are "just loafing," and is keen to have a California circuit this year as he wants to race here. He took in the Inter-Mountain circuit last year and says it was a big success all the way through. He also says that Joseph Waddell, who was the circuit managing secretary, is the right man to manage a circuit, and he hopes California can secure his services. Mr. Stuart had three horses in his string last year, started in 23 races and was never outside the money. He raced Emeline Dillon 2:10¼, Potreress 2:13½ and Bonnie Quinn 2:12, but the last named was off and did not win any races. Stuart thinks Emeline Dillon (breeder's record 2:07¼) is good enough to win in her class anywhere. She is eligible to the 2:11 pacing class on mile tracks, and is a well bred one, being by Guy Dillon, one of the best bred stallions in America, and out of a mare by John L., a son of Anteeo.

C. A. Harrison of Seattle, who seldom lets a month go by that he does not buy or sell a trotter or pacer, writes that he has shipped to Warren Dennis at Farmington, Utah, the bay four-year-old pacing gelding Hal Regent by Hal B. 2:04¼, dam Almota, a producing mare by Vice Regent, brother to Heir at Law, second dam Antonia, great brood mare by Electioneer, third dam Columbine, the dam of Anteeo, Antevolo, etc., by A. W. Richmond. Mr. Harrison adds: "Hal Regent is a most perfectly made horse, besides being a very choicely bred one, is a fast, free-legged pacer and has never been 'honed.' Mr. Dennis bought the horse without coming to look at him, and it will be a source of sincere pleasure to me for this young horse to make good for Mr. Dennis. If no accident happens him Vice Regent will make good as Warren Dennis is a successful trainer and race driver. He has about fourteen horses in his stable at Lagona Park, situated about midway between Ogden and Salt Lake. Lou Childs purchased Oregon Hal 2:09½ from Mr. Dennis for Tommy Murphy and it did not take Dennis long to fill Oregon Hal's stall with another Hal B. pacer, which goes to show that he thinks well of those money getting Hal B.'s. I also sold Joseph Ansel (3) 2:12½, a pacing gelding by Prince Ansel, dam Josie D. by Nutwood Wilkes, to R. H. Ball, of Mount Vernon, Washington. Mr. Ball's horses are being wintered at the Burlington, Washington, track.

Notable Performances in 1916.

Two performances of superlative merit made the harness racing campaign of 1916 a memorable one. The first and greatest of these was the mile in 1:58¼ trotted by the five-year-old stallion Lee Axworthy at Lexington, Ky., on October 7th. This is nearly three seconds faster than the record of any other stallion, and lacks only a quarter of a second of matching the world's record made by Uhlan (1:58) on the same track in 1912. Only one stallion in the history of the trotting turf has equaled the record held by the fastest mare or gelding of his day. Lee Axworthy's record is the fastest ever made by a five-year-old, and is likewise the only unstarred record of 2:00 or better yet made by any trotting horse except Uhlan.

On the same day and track on which Lee Axworthy lowered the stallion record and the five-year-old record The Real Lady won the final heat of a sweepstakes race for two-year-old trotters in 2:04¼, which is the fastest time ever made by a trotter of her age. The previous record was 2:04½, made by Peter Volo in 1913.

The fastest three-year-old trotter of 1916 was Volga 2:04½, full sister to Peter Volo, whose 2:03½ is the best on record at that age. The fastest four-year-old was Mary Putney 2:04¾, that ranked as the fastest three-year-old of 1915. The largest money winning trotter was Mabel Trask 2:03¼, whose earnings total $33,720. The six-year-old daughter of Peter the Great 2:07½, in fourteen weeks trotted sixteen races of fifty-two heats, the average time of which was 2:06½. Nine of these heats were faster than 2:05 and five were faster than 2:04.

The most notable performance of the season by a pacer was Poor Man's mile in 2:07¾, as a two-year-old. This equals the best record for pacers of this age. Hemet Queen 2:16¼, was the fastest yearling of 1916; Peter Look 2:03, the fastest three-year-old, and Miss Harris M. 2:01¼, the fastest four-year-old. The fastest record made by a mature pacer was Napoleon Direct's 1:59¾.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Duck Banded in Utah.—The leg-banded teal shot recently by Chris Krempel on the Chico Land and Water Club grounds in Orange county was tagged in Utah August 20, last, and goes to prove a contention that the Utah and Nevada birds come down this way.

In a letter to the Fish and Game Commission. E. W. Nelson ,Chief of the Biological Survey, writes regarding this teal:

"The bird is one that was captured near the mouth of Bear River, Utah, while suffering from the sickness prevalent among water fowl in that vicinity. The bird was brought in to our field laboratory, there cured by treatment with fresh water, and on August 20, 1916, it was banded and released. Its subsequent recovery not far from Los Angeles constitutes an interesting record. This duck sickness is similar to the trouble found during recent years at Tulare Lake in your State. A considerable number of wild ducks have been cured and banded before released in Utah. It is interesting to note that your record is the second that has come in from Orange county, California. Should any other banded birds come to your attention, I trust you will imform us immediately."

United States Field Trials.—The United States Field Trials opened on January 2nd. The Breeder and Sportsman will have a report of the big events next week. The winners, according to press reports, were as follows:

Grand Junction, Tenn., Jan. 3.—Mary Montrose, a pointer owned by Wm. Ziegler of New York and handled by Robert Armstrong of Barber, N. C., today won the derby of the United States Field Trials Club, run over the club's course here. The pointer Concho Dick, entered by C. E. Duffield of Tulsa, Okla., was a warded second place and Master Peg, a setter owned by Dr. Ward Akester of Marshall, Minn., third. Twenty-six dogs competed.

Grand Junction, Tenn., Jan. 6.—Joe Muncie, setter, owned by Benjamin Weil of Alexandria, La., and handled by J. M. Avent, Hickory Valley, Tenn., was declared the winner of the United States Field Trial Club's all-age stake yesterday.

Lewis C. Morris, pointer, owned by Louis Haggin, Lexington, Ky., was second ,and Square Edges, owned by J. R. McMillan, Lodi, Wis., third.

One-Buck Season.—Most deer hunters who really want to preserve the species for future sport are coming to favor a one-buck seasonal limit, forked-horns the minimum size, and argue that, while a one-buck limit is easy to enforce, permitting a man to shoot two adds great difficulties to the work of the game warden in which every deputy fish and game commissioner concurs. Owing to their slow reproduction and abundant natural enemies, even large reserved districts will fail to restore the sport except in specially-favorable sections, and the way bucks have held out against improved equipment, rapid transportation and an increase of hunting interest beyond precedent continues to amaze men whose hearts are attuned to the "call of the wild."

Judges For Westminster Show.—Nine additional judges have been selected, which completes the list for the Westminster Kennel Club's annual bench show at Madison Square Garden, February 20 to 23, inclusive. They include William Faversham, who will take the bull terriers; Frank Walker of London, England, for bulldogs, a breed in which he is pre-eminent and which was last judged by him at the Richmond, England, championship show, and Mrs. F. Y. Mathias for the Pekingese.

Mrs. William F. Stevens of New York will judge the pugs . The other appointments are: Great Danes, Paul C. Blass; Greyhounds, Henry D. Whitfield; French bulldogs, John E. Haslem; Sporting Spaniels, William R. Lowe, all well-known New Yorrk experts. and Charles D. Barney of New Bedford, Mass., who will take the American foxhounds.

At State Game Farm.—Little effort has been made to continue the introduction of foreign game birds at the State game farm, according to the Biennial report made by the Fish and Game Commission. Believing that sufficient attempts have been made to stock the state with ring-necked pheasants, and that the game farm has not proved its worth, the efforts at propagation on the farm have been curtailed. Consequently, but few ring-necked pheasants have been reared, and only a few hundred birds have been liberated. In order that breeders might be furnished information as to the possibilities in quail and duck breeding, the farm has been stocked with valley quail and wild ducks and experiments carried on to determine the success which can be obtained in artificially rearing them. The main justification for a game farm appears to lie in its value as a station for carrying on breeding experiments, the results of which will benefit game breeders, rather than in its value as a practical means of increasing game. Judging from the experience of other states it seems best that the greater amount of effort be placed on the conservation of native species rather than on the introduction of foreign ones which are apt to supplant valuable native species, or introduce some infectious disease. The breeding stock at the Game Farm on July 1, 1916, was as follows:

Valley quail ,including young stock	250
Mountain quail	15
Bobwhite quail	20
Golden pheasants, including young stock	17
Silver pheasants ,including young stock	14
Ring-necked pheasants, including young stock	140
Ducks (13 species, including fulvous tree-ducks)	575
Geese (4 species)	9
Coots	10
Great blue heron	1
Total birds	1,151
Black-tailed deer	2
Mexican white-tailed deer	1
Total mammals	3

FISHING TRIP TO HAWAIIAN ISLANDS.

J. W. Jump and Family Will Take Over Motor Boat to Enjoy Sport.

A motor boat trip with a kick to it is what J. W. Jump of Los Angeles has mapped out for himself and family during the next three or four months. Not content with hunting the festive tuna and albicore in local waters, Mr. Jump has decided to invade the game-abounding coasts of the Hawaiian Islands. And he will not tackle the deep sea fish in a hired motor boat. He is taking his own boat with him.

Fishing parties are not unusual objects around the Hawaiian Islands. But though most of the anglers take their own tackle, lines, hooks, etc., with them, very few have the nerve to include their favorite boat in the equipment. Mr. Jump has it on 'em all. His outfit will include everything from an 18-ton launch to the best two-ply gut leaders on the market. The whole works is to be shipped across on the steamship Moana and we'd hate to pay the freight bill.

Mr. Jump's launch, the Sea Scout, is a forty-foot boat and would have little trouble in making the trip across the ocean itself. But in order to save time and trouble it is to be placed aboard the Manoa and put into use after it reaches the islands.

"We will motor up to San Francisco and then put the Scout on board the Manoa," said Mr. Jump this week. "Capt. K. S. Walker will accompany us on the trip and will navigate the boat as far as San Francisco. When we reach Honolulu, we will simply travel around and will spend at least a couple of months giving the Hawaiian fishing the once over.

"It's hard to beat the fishing around the Hawaiian Islands. There are so many varieties of fish around those beaches that you can't keep track of them. All our local fish are represented and there are countless other specimens. In fact, they've got everything from the playful dolphin to pompano weighing 200 pounds.

"There are two particular species of fish that we hope to catch. These are the ono and ulua. And, believe me, they are some fish. The ono looks like the local surf fish, except for the fact that it weighs about 100 pounds. It is as game as any fish afloat and will put up a fight that will make your hair stand on end.

"The ulua is on the order of a pompano, except that it also is greatl yenlarged. Many of these weigh 200 pounds. There are several other kinds of these monsters and we expect to have plenty of sport."

Mr. and Mrs. Jump, their two children and Capt. K. S. Walker will start on their unique fishing expedition in a couple of weeks.

Champions of 1916—State Champions (Professional)—E. R. Galvin, Wilmington, Delaware.

National Amateur—Frank M. Troeh, Vancouver, Wash.

*Grand American Handicap—Captain John F. Wulf, Milwaukee, Wis.

*Southern Handicap—F. C. Koch, Phillipsburg, O.

*Western Handicap—E. F. Gibbs, Canker City, Kans.

*Eastern Handicap—Clarence B. Platt, Bridgeton, N. J.

*Pacific Coast Handicap — Frank B. Templeton, Portland, Ore.

National Doubles—Allen Heil, Allentown, Pa.

*Open Doubles—George Nicolai, Kansas City, Mo.

Open Amateur (200 Targets)—Ralph H. Spotts, New Yor kCity.

*U. S. S. Navy—F. P. Williams, U. S. S. Solace.

All-Round Open—Homer Clark, Alton, Ill.

All-Round Amateur — Fred Plum, Atlantic City. N. J.

*18 Yards— G. N. Fish, Lindenville, N. Y.

(*Amateur.)

REVIEW OF HUNTING AND FISHING.

Expert Points Out Prosperous Season That Was Enjoyed in California.

[By Harold C. Bryant, Research Expert of the State Fish and Game Commission.]

With enough fish planted from our hatcheries in 1915 to supply every man, woman and child in the State with sixteen fish apiece, it is little wonder that all those who have sought the gamey trout this year have been rewarded. From all parts of the State favorable reports have come, and in many instances trout of remarkable size have been taken. Of particular interest was the capture of a Loch Leven trout in the Owens river that weighed six and three-quarter pounds . Since this species was planted in the Owens river, but seven or eight years ago, this fish must have gained almost a pound in weight each year.

Anglers in the bay region found the streams in the immediate vicinity depleted because of overfishing ,and consequently they had to go farther away from home. Those who did go, however, reported excellent sport. Bear Valley lakes in the San Bernardino mountains furnished excellent sport to Southern California anglers.

The season for big game opened auspiciously and the kill for the year was well up to normal. All deer hunters who knew where to go succeeded in obtaining at least one buck, and most of the experienced hunters obtained the limit. The killing of several very large mule deer in the eastern part of the state has been reported.

All hunters agree that the new spiked buck law, passed at the 1915 Legislature, has done a great deal for the protection, not only of deer, but of the hunters themselves. Judging from reports, fewer hunting accidents occurred this last year than ever before. The protected species of big game, such as mountain sheep and elk, have about held their own, but the bands of antelope in Lassen and Modoc counties are reported to be decreasing rather than increasing. Small game, rabbits in particular, have been so abundant that much complaint of their depredations has been heard.

Due to a number of causes, the season on wild fowl was a marked improvement over that of last year. Ducks and geese have been abundant everywhere, and many hunters attribute the increased numbers to the Federal migratory bird law. The occurrence of large numbers of whistling swans, of such ducks as the bufflehead and golden-eye in the Sacramento valley, and of snowy owls throughout the northern sections of the State, would argue that weather conditions and food supply have also been factors in the increased numbers of wild fowl appearing during this last season. Limits have been the rule, and to the good fortune of the hunter these limits have been made up largely of the most desirable species. More mallards were taken in Southern California than for many years past.

Newspaper reports on quail hunting have uniformly proclaimed a rather poor season. The reasons advanced have been various, but every one must admit that quail are far less numerous than they were twenty years ago, and that this diminution in numbers has been one of the prominent reasons for the poor luck experienced by quail hunters. Mountain quail also have been scarce and hard to obtain.

The fact that fish and game is still abundant is proved by the large numbers of licenses. Nearly 158,000 licensed hunters and 89,.000 anglers have taken the field this last year. These hunters and anglers probably spend for equipment, traveling expenses, etc., about $20,000,000 annually. This does not take into account the value of the game and fish as food. The deer kill alone is worth not less than $200,000. It can be seen, therefore, that California's resources in fish and game form an asset worth many millions of dollars. The State can, therefore, be congratulated that, in spite of the waste of the past, sufficient fish and game still remain for sportsmen.

Fisherman Sleeps in Peace.—The dead sleep sweetest where they have been happiest. So thought August Raht, whom the Great Spirit called on Christmas day.

For many years Raht had fished and hunted in California, and the happiest days of his closing years were those days spent in an open boat off Santa Cruz, trolling for salmon. In the launch of Arthur Guggins, each morning at 4 a. m. during the salmon season, Raht would start for the fishing banks. There the whole day would be spent, and night time would find the craft loaded deep with fat, pink salmon.

Those days, out on the open sea and filled with recollections of flashing sides and whipping winds, were Raht's happiest days.

When his 74 years became heavy on his shoulders he would tell his friends that in death he wished to rest where he had been happiest—off the heads at Santa Cruz.

On Sunday his daughters, Mrs. Mary Elkins and Mrs. Ella Marsh of Denver, will get into Guggin's weather-beaten fishing boat and sail beyond the heads. Over the channels where the old fisherman took his biggest salmon the ashes will be scattered.

August Raht will sleep where he was happiest—off the heads at Santa Cruz.

TRAPSHOOTING HAD ITS GREATEST YEAR.

More Than 700 New Clubs Were Organized and Over 50,000 Joined the "Pull," "Bang," "Puff" Army.

Trapshooting is now enjoying the full flush of popularity. Nineteen hundred and sixteen was the greatest of all years for the "sport alluring."

During the year on which Father Time has closed his books, birth was given to 737 trapshooting clubs, an increase of 40 per cent over 1915—the best previous year; in the 501 registered tournaments reported 10,528 different shooters took part, an increase of 33 1-3 per cent over 1915; beginners' day events attracted 11,625 novices to the traps as against the 1915 high water mark of 7506, and registered tournaments numbered 546, an increase of 35 per cent.

Championships were shot and decided in 46 States, against 38 the previous year. Conservative figures show that more than 50,000 new members were added to the trapshooting fraternity before the ledgers were closed for the year.

Trapshooting has been gaining many friends and devotees for the past half dozen years, and during that period it has grown faster than any American sport. No sport is excepted in this declaration. Some half dozen years ago there were a few more than 100,000 trapshooters in the United States and Canada. Now there are nearly 600,000. In the same period trapshooting clubs have multiplied from 497 to 4,666, of which 4,108 are active in the promotion of the sport.

Gaining by leaps and bounds doesn't begin to express the marvelous growth of trapshooting. It is not the National Pastime, but it is a close second. More people each year are going in for the sport that they can play themselves, and as every American desires to own a gun and shoot, trapshooting is getting its quota. And every shooter is a booster for the sport that knows no season. It is played all the year.

Any sport that can come along like trapshooting must have a good foundation. No sport can succeed—no matter how much advertising or publicity it receives—if it hasn't the goods. The sport of trapshooting is supervised by the Interstate Association for the Encouragement of Trapshooting, ably assisted by the American Amateur Trapshooters' Association.

The Interstate Association frames the rules, manages the Grand American handicap tournament—and subsidiary tournaments, aids in the formation of State associations, and gives about $25,000 each year for trophies, which are awarded to the winning trapshooters in the registered tournaments. The Interstate Association is even more important to the welfare of trapshooting than the National Commission is to baseball.

The American Amateur Trapshooters' Association works along lines that do not conflict with the Interstate Association, yet aids greatly in the development of the sport. Thirty-eight State organizations, 1272 clubs and 60,000 individuals hold membership in the A. A. T. A. The idea is to have every trapshooter in the world on the membership list of the A. A. T. A.

This may be news to you, but it is a fact nevertheless: More money is invested in trapshooting in the United States and Canada than in baseball or any other outdoor sport—excepting golf. Trapshooting clubs do not require the same finely kept lawns that the golfers do—nor do they go in for such expensive club houses.

It may be a surprise to you, also, to know that it costs nearly as much in coin of the realm to stage the Grand American handicap tournament as it does to manage the World Series in baseball. And in passing it might be mentioned that trapshooters last year spent $4,000,000 for clay targets and shells, and $2,000,000 more in car fare, hotel bills, etc., so that they could participate in the various tournaments—and 96 per cent of the trapshooters pay all of their own expenses.

As trapshooting progresses the quality of the shooters improves. In the State championships in 1914 only two shooters broke 100 targets, in 1915 three had clean scores, while this past year seven broke 100 targets, eight broke 99 and eleven broke 98. In one State Championship tournament five men tied for the honor at 99. This, more than anything else, shows the quality now interested in pulverizing the clays.

Trapshooting schools and beginners' days have done a world of good for the King of Sports. The first trapshooting school was opened on the Million Dollar Pier, Atlantic City, N. J. This opened on March 27th and closed November 18th. During that time 5,122 persons fired 249,125 shells at the same number of targets. In the above attendance figures there are 2483 men and 290 women who never before shot over the traps.—[By Peter P. Carney, Phila., Pa.

4666 Trapshooting Clubs.—There are 4666 trapshooting clubs in the world: 4331 of them being in the good old U. S. A. This is about 4000 more clubs than there were a decade ago. The appended table, showing the number of clubs in the various States and countries, gives sportsmen a lot of food for thought and furnishes an idea of how popular a sport trapshooting is:

Alabama 24, Alaska 9, Arizona 14, Arkansas 30, California 130, Colorado 44, Connecticut 48, Cuba 7, Delaware 22, Denmark 1, District of Columbia 6, Florida 28, Georgia 32, Idaho 23, Illinois 306, Indiana 127, Iowa 258, Kansas 103, Kentucky 60, Louisiana 23, Maine 24, Maryland 64, Massachusetts 100, Mexico 1, Michigan 147, Minnesota 181, Mississippi 21, Missouri 138, Montana 55, Nebraska 123, Nevada 10, New Hampshire 23, New Jersey 196, New Mexico 8, New Zealand 2, New York 384, North Carolina 34, North Dakota 59, Ohio 211, Oklahoma 59, Oregon 55, Panama 2, Pennsylvania 552, Philippine Islands 2, Rhode Island 14, South America 3, South Carolina 19, South Dakota 51, Tennessee 25, Texas 80, Utah 14, Vermont 23, Virginia 65, Washington 69, West Virginia 36, Wisconsin 192, Wyoming 20, Australia 3, Bahamas 2, Canada 307, Hawaii 1, Honolulu 3, China 4. Total, 4666.

TRAPSHOOTING FIXTURES.

May 8, 9, 10, 1917—Roanoke, Va.—The Interstate Association's Twelfth Southern Trapshooting Tournament, under the auspices of the Roanoke Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

June 20, 21, 22, 1917—Hartford, Conn.—The Interstate Association's Eleventh Eastern Trapshooting Tournament, under the auspices of the Hartford Gun Club; $1000 added money. Winner of first place in the Eastern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July 17, 18, 19, 1917—St. Joseph, Mo.—The Interstate Association's Twelfth Western Trapshooting Tournament, under the auspices of the St. Joseph Gun Club; $1000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Gone Are Our Pigeons.—There is a mistaken idea that the government has offered a reward for a specimen of the now extinct passenger pigeon, and every once in a while some misguided individual claims the reward ,although in no instance has the pigeon proved to be a passenger. For fear of discouraging research, however, let us state that the man who can deliver a real passenger pigeon could collect a handsome sum for it. The last one, so far as is known, was killed near Detroit in 1908. The last living specimen died last year in the Cincinnati zoo.

Think of it! There are men now living who remember when they literally darkened the sky and when they killed them as they roosted in the trees. Alexander Wilson, the ornithologist, reports seeing a single flock in Michigan that he estimated to contain at least 2,230,272,000 pigeons! As late as 1880 they were plentiful.

Of course, the market hunters and dealers in game have an alibi (they always have), which is a story of millions of pigeons being killed in a storm at sea, but what is an alibi like this in face of the following: In 1869 three carloads of dead pigeons were shipped every day for forty days from Hartford, Mich.—a total of 12,000,000 birds. There were hundreds of Hartfords then where pigeons could be had in car lots at 12 cents a dozen!

No one in those days believed that the passenger pigeon would ever be decreased, much less exterminated—they had no example like we have. As we will point out in this column from time to time, other birds are going the way of the passenger pigeon—slower, but just as certain. Think it over.

"Ain't it a grand, glorious feeling" to think that the almost brainless polecat, who kills only what he can use, has more horse sense than some hunters?

A. G. Wilkes, President of Pacific Coast Field Trials Club, and Mrs. A. G. Wilkes are expected home after a two weeks' trip in New York.

ALL READY FOR BIG TRAP SEASON.

Golden Gate Gun Club Meets and Decides on Merchandise Shoot; Many Registered Events.

Get out the gun and start oiling up in preparation to cry "P-u-l-l!" The alluring sport of trapshooting will soon be on in its full glory again. It is true that clubs up and down the Coast have been continuing their events right on through the winter, but with the dawn of a new year it brings forth new schedules and new activities.

Around the bay the Golden Gate Gun Club has taken the lead in having a meeting of its officers and directors and steps have been taken to bring in the season with a loud report on Washington's Birthday. A merchandise shoot has been scheduled and it is expected that a big gathering will be on hand at the Alameda grounds. The officers also decided to apply to the Interstate Association for a registered tournament on Sunday, May 20th. The Coast boys will be allowed to have their registered events on Sundays this season and it will act as an inducement for the various clubs to get in line and pile up an average and at the same time enjoy their favorite pastime more. At the Golden Gate meeting, President T. D. Riley presided, with Clarence A. Haight, secretary.

Other clubs are busy getting in their applications to the Interstate Association. The applications must be in at February 15 and the secretaries are advised not to let the date slip by.

The selection of a place for the California-Nevada State tournament will be settled shortly. The association directors will have a meeting and act on the applications made. Del Monte is going to make a concentrated effort to land the big event. Traps have been installed on the beautiful grounds and the local shooters who were down there last summer for a tournament report that conditions are ideal with pleasant surroundings.

The Pacific Coast Handicap at San Jose in the last four days of May is attracting a deal of interest. The San Jose Club officers are working tooth and nail to attract a record number of entries. Certainly with so many recruits getting into the game and with San Jose so conveniently located there will be many of the boys making tracks for the Garden City.

To Shoot For All-Around Title.—Ten years ago this month Leonard Tufts inaugurated the midwinter trapshooting tournament at the Pinehurst Country Club, Pinehurst, N. C., and paved the way for the greatest trapshooting tournament of the winter season.

The first Pinehurst tournament wasn't a big one. No one expected it would be; but it has grown each year until now it attracts trapshooters from every State in the Union and Canada . There was at least one representative from every State and the Canadian provinces last year, some 130 shooters in all, and in the tournament which begins on January 15th, and concludes on the 20th, more than 200 trapshooters will participate.

The pinehurst tournament has earned an enviable name among trapshooters. Those who attend one tournament always return, and they bring others with them. During the past three years the tournament grew faster than the management anticipated and last year the club house wasn't large enough to accommodate the gathering. This year it will be different. A new club house has been erected. It is of brown stone and solid logs, 30 by 80 feet, divided into three rooms, each with an open fireplace. The club house is situated on the edge of an oak grove about 100 yards from the former quartres.

A total of 129,610 targets were thrown at Pinehurst last January, and the daily attendance averaged more than 1000 persons. There will be twice as many targets thrown this time and there will be many more spectators because there will be more class to the events. As an added attraction, Frank S. Wright, the former New York State Champion, and Fred Plum, of Atlantic City, N. J., will shoot for the All-round Amateur Championship trophy. Wright hails from Buffalo, N. Y., Plum is the present champion. He defeated E. L. Bartlett, of Baltimore, for the title at the Westy Hogans' shoot. Plum was originally challenged by Henry Powers, of Atlantic City, but as Powers could not shoot at Pinehurst, Wright asked to be allowed to take his place. This event will be shot on January 15th.

The events at Pinehurst will be identical with those of last year, the main events being the Preliminary and Mid-winter handicaps, $5000 in cash and trophies will be given in the various events. In the two handicap events the shooters will be divided into classes, based on the scores made in the first 500 targets. There will be an equal number of shooters in each class. The trophies for the classes will be the Presidents, Governors, Secretary, and Captains. By this system, every shooter has a chance to win a trophy. Those who win in the Preliminary handicap are not eligible for trophies in the Mid-winter handicap. The usual number of trophies will be given for high averages at 600 targets and for the entire week's shooting. Four traps will be used. Pinehurst is awaiting the event. It will be a great week.

The hunting season is rapidly drawing to a close. Then the boys will turn their attention to the traps.

Sportsmen's Row

Fred Engle's record of a 41½-pound bass was not surpassed by any member of the San Francisco Bass Club, and Engle is shortly to be the recipient of the Ripley medal, annually given to the "high hook" of the club. "Baldy" Cummings was "second hook" with a catch of a 37½-pound fish. Engle is to be presented with his medal at the yearly banquet of the club on the evening of February 8th.

* * *

With duck shooting closed to the hunters of Multnomah, Columbia, Clatsop and Tillamook counties, the boys are now awaiting April 1, when they can fish for trout over six inches long. Just now they are catching salmon trout and other large species. But with the coming of April angling in the Clackamas, Rogue, and in streams in Columbia, Tillamook and Clatsop counties will be excellent.

* * *

An Alaskan white owl, the wings of which measured 5 feet from tip to tip, was killed the other day by Claire Hicker, age 16, near Tacoma auto speedway. The bird was resting on a telegraph pole and the lad brought it to the earth with a swiftly thrown rock. The rock struck the bird in the back of the neck, breaking it, and Hicker was much surprised with the result of his throw. Several Alaska owls have been seen in the vicinity of Tacoma this winter.

* * *

A report from Livingston, Mont., is to the effect that hunting has been splendid near the Yellowstone Park this Fall. Grass has been plentiful the past season and the elk and other game are in fine flesh. The deep snow in the higher mountains has brought the elk down to the foothills and some fine specimens have been killed. Several herds of elk are soon to be rounded up and shipped to eastern parks, according to Deputy State Game Warden P. W. Nelson. State Game Warden J. L. DeHart was in Livingston recently arranging the details for the work.

* * *

It was announced by the officials of the Vernon Gun Club that a registered shooting tournament would be staged at the club on May 13, 14 and 15. The club is planning on making this shoot one of the biggest and best ever held in Southern California. The practice day for the shoot will be held on the 12th. Six hundred dollars added money will be added to the three days' registered program. This means that $20 will be up for each twenty-bird event.

* * *

H. Lorenson of Newman, one of the younger shooters who was the sensation last season, is oiling up his 12-gauge to be on hand for the opening festivities.

* * *

Manager Pete Ashcroft is figuring on putting the Alameda grounds into shape shortly.

Griffon Popular Dog.—During the past five or six years a dog made his appearance in this country known to American canine animal lovers as the wire-haired pointing Griffon. He is a native of France and Belgium and is built very much on the order of the old Spanish pointer, with the exception that he has a wire-haired coat that is practically impervious to any weather conditions or any kind of cover.

Among a certain class of sportsmen he soon became popular, for he is an all-round dog with an excellent disposition and a shoke-bore nose. As a retriever from land and water he has few equals, and on upland game he is equally at home. To the average man the Griffon might look like an ordinary dog with his great head, his almost yellow eyes, his shaggy coat and his stump tail, for fashion decrees that the Griffon must have his tail docked, but to the man who wants a faithful companion in the field and does not care particularly for range, speed or style, he proves up to the requirements. He can find birds if there are any in a given field, and while he may be slow in doing so, it is almost a certainty that none will be passed over.

To foster the breeding of this new dog—new to American sportsmen, at least—a club has been formed and the president of it is L. A. Thebaud, the man who is primarily responsible for introducing the breed to American sportsmen. The secretary is Dr. E. B. Ilyus of Lancaster, Pa., who, like Mr. Thebaud, also imported a number of Griffons from Belgium and France. For a specialty club this new organization has a very respectable following in the way of numbers and as for the quality of sportsmanship among the organizers, it is of the highest.

Salmon Club of Oregon—"Two years ago a number of ardent salmon anglers got together and formed an organization which became known as the Salmon Club of Oregon," said Walter F. Backus, secretary of the Multnomah Anglers' club. "The members of this club pledged themselves to use light tackle in fishing for chinook salmon at Oregon City. Previous to this time most of the fishermen had been using very heavy gear, and the charter members of this club felt that they were losing a great deal of sport by not using lighter tackle. At first most of the salmon fishermen hooted at the idea, but the club went through its first season and ended up by having over 40 members. At the present time Secretary Ray Winters reports that he has almost 200 members on the list, and from all indications the membership wil lbe doubled before the 1917 season is finished.

"Most of the members of the Salmon Club feel that this year will see the end of net fishing in the Willamette river, and a biulding committee has been appointed, which has practically completed plans for a club house to be located at Oregon City. This club house is to be modeled after the one owned by the Tuna club in Southern California, which is well known to all big fish anglers. The building will probably be a two-story affair, the upper floor to consist of a general clubroom, with large windows overlooking the trolling ground.

"Photos of fishing scenes will adorn the walls, and a record book will be in readiness to register all captures made on light tackle. The lower floor will be given over to lockers, each member having sufficient space to hold the one piece rods which are so much in favor, as well as enough water-proof clothing for the rainy days. There will also be plenty of folding cots for the anglers who like to get out early in the morning.

"Directly below the club house a large float will be anchored, with a fleet of perhaps 50 fishing boats—small, easy running skiffs for the trolling, and heavier models for the man who likes the rough water below the falls. An expert boatman will be in attendance during the trolling season, and there will be plenty of caddies to do the rowing for those who are not used to handling the oars.

"Something of this sort has long been desired by all the lovers of salmon angling, but as the season in the past has seldom run longer than 20 days, a move such as outlined above would hardly have been justified . With the nets removed from the Willamette river, there will be nearly two months of angling each spring, and as soon as the new law is in effect the Salmon Club will take up the proposed plan in earnest."

Du Pont Long Run Trophy Plan.—The Long Run Trophy Plan of E. I. duPont de Nemours & Company has proved so popular during the past two years that Mr. T. E. Doremus, Manager Sporting Powder Division of tha tcompany, advises it will be continued during 1917 with but few changes . It is announced that during the two years of its operation the following trophies were won with DuPont Powders:

Long Run Fobs, 1686; Long Run Bars, 4947; Long Run Watches, 116.

It is also of interest to know that 77 shooters each won 1 watch, 7 shooters each won 2 watches, 7 each won 3 watches, and one shooter won four watches. Eighty watches were won by amateur shooters, and thirty-six by professionals. Following is a list of winners of DuPont Long Run Trophy Watches:

*A .H. Amann, Pectone, Ills.; Dr. W. A. Anderson, Sleepy Eye, Minn.; *Neaf Apgar, Plainfield, N. J.; P. Baggerman, St. Louis, Mo.; E. L. Bartlett, Baltimore, Md.; W. S. Behm, Esterly, Pa.; J. W. Bell, St. Louis, Mo.; *F. G. Bills, Chicago, Ills.; John S. Boa, Montreal, Can.; Horace R. Bonser, Cincinnati, O.; R. H. Bruns, Brockville, Ind.; A. C. Buckles, Lake Fork, Ills.; Paul R. Burger, Catawissa, Pa.; J. Ed. Cain, Dayton, O.; J. I. Chipley, Greenwood, S. C.; C. D. Coburn, Mechanicsburg, O.; A. V. Cooke, Wellington, Tex.; W. E. Corfield, Utica, N. Y.; *J. E. Dickey, Minneapolis, Minn.; *J. H. Donnelly, Guthrie, Okla.; C. B. Eaton, Fayette, Mo.; Geo. N. Fish, Lyndonville, N. Y.; A. G. Flickinger, Vallejo, Cal.; *G H. Ford, Indianapolis, Ind.; O. N. Ford, San Jose, Cal.; Sam S. Foster, Mason City, Ia.; J. S. Fink, Worthington, Minn. (2); O. C. Funderburk, Detroit, Mich.; Ira Galbraith, West Frankfort, Ills; *L. S. German, Aberdeen, Md. (3); *Fred Gilbert, Spirit Lake, Ia. (3); *Mr. J. Mowell Hawkins, Baltimore, Md. (3); Allen L. Heil, Allentown, Pa.; Ed. Hellyer Jr., Alexandria, Pa.; Woolfolk Henderson, Lexington, Ky. (3); H. C. Hirschy, Minneapolis, Minn.; D. J. Holland, Springfield, Mo.; 6P. J. Holohan, Portland, Ore.; W. S. Hoon, Jewel, Iowa; M. S. Hootman, Hicksville ,Ohio; *Walter Huff, Macon, Ga.; Charles Hummel, LaPorte City, Ia. (2); S. A. Huntley, Chicago, Ill.; K. P. Johnson, Kenton, Ohio; Joe Kautzky Sr., Ft. Dodge, Ia.; *Arthur Killam, St. Louis, Mo. (4); A. C. King, Toms River, N. J.; R. A. King, Delta, Colo.; Max Kneussl, Ottawa, Ills; F. C. Koch, Phillipsburg, O.; A. Koyen, Fremont, Neb.; *C. O. LeCompte, Asheville, N .C.; *Barton Lewis, Auburn, Ills.; F. B. Lofland, Plymouth, Ohio; F. W. McNeir, Houston, Tex.; *T. A. Marshall, Evanston, Ill.; J. G. Martin, Harrisburg, Pa. (2); *Geo. Maxwell, Hastings, Neb.; Frank H. Mellus, Los Angeles, Cal.; Chas. H .Newcomb, Philadelphia, Pa. (3); John H. Noel, Nashville, Tenn; C. H. Peck, Remington, Ind.; H. J. Pendergast, Phoenix, N. Y.; H. Pfirrmann Jr., Los Angeles, Cal.; Fred Plum, Atlantic City, N. J. (2); R. E. Probert, Claypool, Ind.; A. B. Richardson, Dover. Del (3); *F. C. Riehl, Tacoma, Wash.; W. D. Runnels, Staunton, Va.; H. B. Shoop, Harrisburg, Pa.; G. R. Shuck, Kempton, Ind.; F. S. Sidebotham, Frankford, Phila., Pa.; H. E. Smith, Columbus, Ohio; *C. G. Spencer, St. Iouis Mo. (2); R. L. Spotts, New York, N. Y.; *W .D. Stannard, Chicago, Ills.; J. R. Tansil, Blytheville, Ark.; *J. R. Taylor, Newark, Ohio (2); Brian Teats, Northumberland, Pa.; W. H. Tolen, Ft. Dodge, Ia.; F. S. Tomlin, Glassboro, N. J.; F. M. Troeh, Vancouver, Wash. (3); S. G. Vance, Tillonsburg, Ont.; J. P. White, Watertown, S. Dak.; F. S. Wright, Buffalo, N. Y. (3); *C. A. Young, Springfield, O. ((*Denotes professionals.)

TRICKS IN SHOOTING ON STAGE.

Marvelous Feats Are Easily Explained When You Know the Facts.

Most of our readers have seen what appear to be marvelous shooting feats on the stage, and have marveled greatly thereat. Some years ago Capt. Fowler, who was a clever stage marksman, as well as a really excellent shot, explained some of the tricks to us, and exposed the deception. In Field and Stream we note that some of these dodges are described, and, as some of our readers might like to astonish their friends with their skill with rifle or revolver, we give a few instances. Say you desire to show off at targets apparently 1-in. in diameter. You require a black background and a few air-balloons. These are painted black and inflated to about 6-in. diameter. They are affixed to the background, and small white spots 1 inch in diameter are painted on them. From a short distance the outlines of the balloons are invisible, and you have a target of some 30 inches at which to fire. A repeating rifle is used, and it is an easy matter to make 10 targets in as many seconds. A shot anywhere within a considerable radius would be practically certain to hit one of the balloons, and with its instantaneous collapse the white target would vanish. Where lighted candles are extinguished with a rifle, candles are placed in compartments or open boxes on a background. The whole is painted black, the mask the partitions in the boxes, at the back of each box is placed a loosely hung plate of steel, suspended only by the top and free to swing slightly. Before this are placed the lighted candles, and the shooting begins. It should be remarked that these plates are six inches square ,and consequently give an area of large size to shoot at. When a bullet strikes a plate, the concussion of the air caused by the quick movement of the plate in response to the impact of the bullet blows out the candle, and the trick is accomplished.

In the feat of disrobing an assistant with rifle bullets, the garments are made in halves, front and back, fastened together with thin glass globes, about two and one-half inches in diameter and of dark material, and the usual white spots painted on them, while the assistant invariably stands against a black background . If you can shoot reasonably straight it is not at all difficult. The marvelous revolver shooting at moving targets is generally done with cartridges filled with bird shot. The man or woman who goes up into the top gallery and snuffs out the lighted candles or breaks a small balloon sometimes does it the same way as described above, although many use a steel funnel with a 12-inch opening which narrows down to about one inch where the object is placed. This opening, on account of the black background, does not show to the audience, and all the marksman has to do is to shoot into the opening, and the bullet will finally reach the small end. A few years ago a Frenchman came over and created quite a sensation while playing in theatres throughout the country. He made about half a dozen straight shots; the rest were clearly fakes, and he had no trouble in fooling the general public. But one night, while he was playing the piano, supposedly by using bullets to strike the keys, his rifle jammed and the piano kept on playing for a few seconds, but quite long enough to make the audience sit up and take notice.

Migratory Law Still in Force—Washington, D. C.—The Department of Agriculture has received inquiries from sportsmen in various parts of the United States as to the effect of the ratification of the treaty between the United States and Great Britain in reference to migratory birds upon the Migratory Bird Act of 1913 and the Regulations issued thereunder. In response the Department has made the following public announcement: In the opinion of the Department, the Migratory Bird Act and Regulations are still in force; also these will continue in operation, and the Department regards it as its duty to enforce them, pending the enactment by Congress of new legislation for the purpose of carrying out the provisions of the treaty.

Guard Against Fires.—Sportsmen in Texas are being asked to guard against forest fires by the Department of Forestry, in a folder issued to the people of the State. The folder is also addressed specifically to farmers, ranchmen, lumbermen, owners of cut-over lands, railroad men, boys and girls and citizens in general. Mr. J. H. Foster, State Forester, epitomizes the situation in these words:

"Mr. Hunter:—Burning destroys the breeding places of game, drives the birds fro mtheir nests and destroys the eggs and the young of countless thousands. Every fire that burns helps to rob hunting of its pleasure.

"Mr. Fisherman:—Fires destroy young growth and humus which tend to prevent drying up o fsprings and small streams during dry seasons, preserve the regularity of stream flow and secure clear, running water so essential to the best fishing."

The Alameda Elks Club will get busy and map out plans for the season. The members were new to the game last season but were very enthusiastic and active.

ARE STRIPED BASS BEING EXTERMINATED?

Anglers Meet and Argue Question; Decide On Law For a Closed Season.

When fishermen get together you can bank on there being many stories unfolded. Anyone holding opinions to the contrary should have been in attendance at the San Francisco office of the Fish and Game Commission when some seventy-five sportsmen, anglers and commercial fishermen answered the call to consider a bill proposed by Al G. Cummings.

The important question of the extermination of the gamy and fine food fish, the striped bass, was up for debate. Cummings contended, and he was borne out by members of the San Francisco Bass Club and Pacific Bass Club, that the striped bass is rapidly passing out of existence. The fish, according to Cummings, has been afforded practically no protection whatsoever, and naturally is suffering from the large catches that have been made season after season. The commercial fishermen and some anglers, among them Al Wilson, set forth that the fish were never more plentiful in San Francisco Bay and the reason that the anglers are not making the strikes up in Wingo ,San Antone Slough and nearby points is that the fish have departed for other waters.

E. L. Bosqur, the new fish and game commissioner, and Carl Westerfield ,the executive officer of the commission ,presided and made efforts to give all parties a fair hearing. For about two hours the hearing held full sway with arguments and counter arguments.

In the end a compromise was finally effected with both sides agreeing to support the bill to be introduced in the legislature by Cummings. It calls for a closed season to the net fishermen in the months of February, March and April, which with the period already shut out from September 25th to November 15th, will afford plenty of protection. The anglers will submit to having the limit during the closed periods cut down from five to two fish.

The main argument was to keep the net fishermen from the mouths of the sloughs and creeks. Angler after angler made reports of seeing the present law violated and the object is to make it a felony for net fishing inside of a line drawn from Mare Island Light to San Pablo Point, and from the First Beacon in San Pablo Bay to Black Point, taking a line from a point on the Marin shore to a point northwest of Midshipman Slough. The net fishermen present agreed that it would be a good thing for the fishing game.

Placing the limit of a bass taken back to three pounds was another argument that met with the approval of the assembled sportsmen. Commissioner Bosqur and secretary Westerfield pointed out, however, that the anglers at Sacramento were instrumental in having the limit taken off and they would doubtless oppose any measure tending to put on the limit again. It was conceded that the Sacramento boys have only the opportunity of catching the smaller fish and some way will be tried to redistrict the state so that the limit can be put on around San Francisco Bay.

While all these points were brought out, the stories just naturally popped out. When Al Cummings was questioned about how the fish are being exterminated, he made the bold statement that striped bass were so plentiful a matter of twenty years ago that a man could walk across San Francisco Bay on the backs of the fish. Furthermore, he declared that a man could not row his boat around Angel Island to the Racoon straits without having the fish jump into his boat.

One of the commercial fishermen up and declared that striped bass are at present so numerous in the bay that he can go out any old day and catch 5,000 pounds with his net. There were times when he could make it 50,000 pounds. This created a riot and pencil and pad were brought out to figure that the market fisherman would need only a week or so of work in a season to make thousands of dollars with the fish selling at 12 cents a pound.

The drastic arguments were finally stopped and all hands got together and agreed that the proposed new law would work to great advantage in protecting the striped bass.

Money for National Forests.—Washington, D. C.—Secretary Houston has announced the amount allotted to each State from the million dollars to be spent during the fiscal year 1918 in constructing roads and trails within or partly within the National Forests. This money is part of the ten million dollars appropriated by the Federal Aid Road Act to assist development of the National Forests, which becomes available at the rate of a million dollars a year for ten years.

The allotments as approved are as follows: Alaska $46,354, Arizona $58,604, Arkansas $9,803, California $140,988, Colorado $62,575, Idaho $108,730, Montana $70,042, Nevada $19,296, New Mexico $42,495, Oregon $128,111, South Dakota $8,092, Utah $41,167, Washington $91,944, Wyoming $40,684. A total of $9,995 has been allotted to Florida, Michigan, Minnesota, Nebraska, North Dakota, and Oklahoma. The group of Eastern States—Georgia, Maine, New Hampshire, North and South Carolina, Tennessee, Virginia, and West Virginia—in which the government is purchasing lands for National Forests, receive $21,120.

SAN FRANCISCO FLY CASTING CLUB.

The medal contests of the San Francisco Fly-Casting Club this year were a pronounced success; W. D. Mansfield made a new record in heavy tackledistance fly with a 150-foot cast, and in delicacy and accuracy fly with a score of 2½ demerits.

Following is a summary giving the general aver-age of our members in the different events for the season of 1916:

	Heavy Tackle Distance	Light Tackle Distance	Heavy Tackle Accuracy	Delicacy and Accuracy	Dry Fly Accuracy	Salmon Fly	½-oz. Lure Accuracy	¼-oz. Lure Accuracy	½-oz. Lure Distance	Light Tackle Accuracy
	Feet	Feet	De-merits	De-merits	De-merits	Feet	De-merits	De-merits	Feet	De-merits

P. W. SHATTUCK, Sec'y.

In making allotments, it is explained, ten per cent of the amount available for 1918 is withheld as a contingent fund. One-half of the remainder has been apportioned among the States in amounts based on the area of the National Forest lands in each State, while the other half has been allotted on a basis of the estimated value of the timber and forage resources which the Forests contain.

Los Angeles Club.—The Henry Pfirrmann Jr. silver trophy, contested for Sunday morning at the Los Angeles Gun Club, was won by Owen Council, with a score of 97 dead birds out of 100 shot at. Council shot from 18 yards.

His nearest competitor was L. J. Micha, with a total of 96 dead out of the century from 19 yards. Micha, Harry Cline, Bill Kennedy and Louis Mellus won take-home trophies for hanging up the best scores in each event of the 25 birds of the century contest. Yearly subscriptions to the Sportsmen's Review were won by P. G. Peterson, O. Evans, Seth Hart and W. A. Cornelius. The results:

O. Council, 18 yds., broke 97; L. J. Micha 19—96, H. Cline 18—95, G. Holohan 21—94, L. R. Mellus 19—93, E. Mitchell 21—93, C. W. Fish 21—89, H. Pfirrmann 21—89, V. A. Rossbach 18—85, S. H. Hall 17—89, W. A. Cornelius 20—89, O. Evans 21—88, Wm. Kennedy 16—87, P. G. Peterson 17—87, C. H. Betz 16—86, W. A. Hillis 21—85, W. A. Carnahan 16—85, Geo. Oliver 20—83, E. K. Mohler 21—82, P. O. Long 18—80, Mrs. H. Pfirrmann 16—79, H. Hickman 16—78, J. E. Betz 16—66, Mack Sennett 16—62, F. Free 18—84, E. W. Selbach 16—84, O. D. Ashton 16—78, N. W. Nelson 16—77, Seth Hart 16—86, O. F. Merlich 16—83, P. Lettick 16—15, H. E. Sargent 18—86, C .F. Nichols 18—67x75, F. H. Nichols 18—58x75,, V. Powley 16—44x50, C. J. Hurst 16—41x50, M. D. Towne 16—40x50, J. W. Griffith 16—40x50, G. C. Boynton 16—38x50, S. Steel 16—38x50, J. Carter 16—22x25, A. M. Van Ness 16—22x25, B. Lloyd 16—20x25, F. H. Teeple 20—19x25, H. Chamberlain 16—15x25, C. E. McStay 18—13x25, W. Jones 16—2x25, A. Baumgartner 16—14x25, Mrs. Wm. Kennedy 6x15.

Vernon Club.—A ninety-nine per cent perfect day made shooting conditions ideal at the Vernon Gun Club Sunday, when 21 shooters turned out to compete in a 50-bird handicap event for the Gold Bar Trophy. DeHate won the emblem with a score of 48x50. It was the winner's first appearance at the gun club in over a year. He shot from 16 yards. Stanton A. Bruner was runner-up with a score of 47x50 from 20 yards.

The results follow:

	Hdcp.	Trophy	Prac.
J. W. Meed	18	46	44
A. N. Vannest	16	39	..

Forest Rangers' Convention—San Francisco, Cal.—The Forest Ranger meeting, in session from January 3 to 12 at College Hall, Berkeley, California, is the first ever attended by Rangers from all the eighteen National Forests in this State, according to District Forester DuBois. More than seventy Forest officers, coming all the way from Alturas to San Diego, are making a study of administrative matters and the thousand and one questions pertaining to the business of the National Forests in California. In order that they may have every opportunity for informal as well as formal discussion, they are occupying the same quarters—College Hall, one of the largest dormitories in connection with the University of California.

The mornings are given up to discussions and papers, and the afternoons to inspection trips about the Bay for the purpose of obtaining object lessons of the matters discussed in the morning sessions. Visits will be made to a local automobile factory, the Presidio, an Alameda ship-building plant, a San Francisco telephone exchange, a newspaper office, and the University of California.

In the evenings the men gather about the fireplace for informal talks by prominent educators, business, and professional men. Among the speakers who have been asked to make addresses are Dean Hunt, of the University of California, Professor Crocheron, Chief Farm Advisor for the State, Dr. Ebright, President State Board of Health, William E. Colby, Secretary of the Sierra Club, A. B. Fletcher of the State Highway Commission, Capt. Parks and Capt. Poillen, U. S. A., E. H. Cox, President of the Weed Lumber Company, and R. L. Duffus, of the San Francisco Bulletin.

The keynote of the convention is public service, and the chief subjects under discussion are, first, the ways and means by which the Forest Service may co-operate with rural communities and organizations in the development of local resources and industries, and the ways and means by which the Forest Service may co-operate in the improvement of living conditions, particularly as regards rural sanitation and recreation. Second, the meetings are devoted to discussions of National Forest administration, protection, and development, with reference to the application of modern efficiency methods.

Seattle Association.—After an absence from the grounds for three weeks a small bunch of shooters turned out for the regular program shoot held on Jan. 7th. C. E. McKelvey showed up in great form, especially so in the fifty bird event, he going straight in the same and standing high score both in this and the hundred target race. Hi Follerich stood next to McKelvey through the program with scores of forty-eight and ninety-five. J. A. Fortier showed up at the traps for the first time and made a remarkable showing for his inexperience.

Considerable interest has been created among trapshooting circles of this locality by the announcement of a Northwest Trapshooting Association, taking in organized gun clubs of the northwest. Registered shoots will be held in the various cities as worked out in the schedule now being made, it being planned to hold an event in each city represented every two weeks. The scores, at 50 targets:

C. E. McKelvey 50, Hi Follerich 48, Ralph Kinzer 45, Ed. Jones 44, W. B .Taft 42, C. W. Bandy 41, J. A. Hopkins 40, J. A. Fortier 22.

At 100 targets—C. E. McKelvey 97, Hi Follerich 95, Ralph Kinzer 89, Ed. Jones 89, C. W. Bandy 88, J. A. Hopkins 86, W. B. Taft 78, J. A. Fortier 50, Dr. Hill 41.

Yours truly,

E. A. FRY.

Stock Breeders' Page

More than 20,000 dairy cows are now being tested in California, an increase of approximately 15,000 in two years.

◈ ◈ ◈

The high price of mutton and wool has made the breeders of pure bred sheep very enthusiastic and many California breeders reports big sales of pure bred breeding bucks and ewes.

◈ ◈ ◈

One of the best Shorthorn herds in California is owned by the Butte City Ranch, at Butte City, California. The herd bull is by a son of Whitehall Sultan.

◈ ◈ ◈

Western breeders of pure bred beef cattle are preparing their herd headers for the National Western Live Stock Show, which will be conducted at Denver, January 22 to 27. Fred P. Johnson is the secretary of the show.

◈ ◈ ◈

A convention of the California Swine Breeders' Association will be conducted in Los Angeles, January 18 and 19. Prominent breeders will discuss breeding, feeding and marketing, as well as every other part of the swine business.

◈ ◈ ◈

Winnie Korndyke Cornucopia de Kol, owned by the J. S. Gibson Company of Williams, California, has just completed a yearly record of 31034.2 milk and 1200.99 butter. This gives her second place in milk production; and she is the only cow to give over 31,000 pounds of milk and produce 1200 pounds of butter.

◈ ◈ ◈

H. E. Boudier, of Napa, recently sold Duroc boars to Albert Jeppas, of Ferndale; Hiram Briggs, of Healdsburg; D. W. Rodgers of Gazelle, and sows to A. Munk, of Napa, and I. W. Brown, of Placerville. Mr. Boudier's Durocs have been successful in swine shows and his breeding stock is proving equally as successful in the breeding pens.

◈ ◈ ◈

The J. O. D. Ranch Co., at Aroya, Colo., recently received two carloads of fine Missouri Herefords which will be prepared for the National Western Stock Show at Denver. At the 1916 show this ranch won several championships on both its Hereford cattle and Duroc-Jersey swine.

◈ ◈ ◈

Guy Miller, of Modesto, Cal., is one of the Jersey breeders of this State that is meeting with wonderful success. Mr. Miller has a number of Register of Merit cows in his herd and has several heifers on test now that he expects to make the Register without any difficulty.

◈ ◈ ◈

The development plans of the Stanislaus Dairy Farms Company on the old Gray Bros.' ranch, between Oakdale and Knights Ferry, are well under way, and the first shipment of registered stock for the proposed big dairy will arrive from New York some time in February.

◈ ◈ ◈

J. C. Bruss of Tulare has received twelve head of Tamworth hogs from Palmer, Illinois, and plans to raise this breed of hogs on a ranch near Tulare. These hogs are from registered stock and premium winning sires . English bacon is made from this kind of hog.

◈ ◈ ◈

Farmers' week in Missouri is one of the really important events in that State and attracts the farmers of the state in greater numbers than the fair and other agricultural meetings. The annual meeting was conducted at Columbia, Mo., last week, and the attendance was the best in the history of the show. Prominent speakers of the United States and foreign countries were secured for the entertainment of the farmers.

◈ ◈ ◈

R. L. Hill, proprietor of Adenhill Farms, Columbia, Mo., has been made field representative of the National Duroc-Jersey Breeders' Association. Mr. Hill is one of the most successful breeders in Missouri, having developed several State fair winners and a champion at the National Swine Show. The brilliant success he has attained with his own herd, it is said, had much to do with his appointment. The Duroc association is one of the livest in this country and is making rapid progress for the breed.

Dixon Men Buy Big Sheep Range.

A. J. Hillhouse, Roy D. Mayes and B. M. La Fontaine, three capitalists and prominent business men of Dixon, Solano county, Cal., have obtained control of 150,000 acres of land in Lassen county on which they intend to engage in sheep raising on a large scale. They bought 9,000 sheep with the land. The purchase price has not been given out, but it is understood to be well up in six figures.

The purchasers will take possession of the great range within thirty days. They have been working on the transaction for several weeks. All three will move to Lassen county as soon as they can put their business affairs in such shape as will permit of their attention to their new business.

First National Calf Club Sale.

Mr. Thos. F. Chamberlain, cashier of the First National Bank, Brighton, Ill., purchased in Wisconsin last March 84 head of heifers ranging in age from six to sixteen months. These calves were shipped to Brighton and sold to school children in that vicinity at actual cost, the bank taking the child's note bearing six per cent interest. They paid an average price of $43 per head for these calves, delivered at Brighton, with the understanding that in less than one year they were to be brought to Brighton and sold at public auction. The difference in what they paid, plus six per cent interest, and what the heifer brought at the sale, was the profit the child made on the transaction.

This sale was held Friday, December 8, and the 84 heifers were sold for cash at public auction to the highest bidder, and brought an average of $92.30 per head, a total of $7,749. The notes given by the children totaled $3,612, leaving a profit of $4,137. This sale was the first of its kind held in this country, and afforded convincing evidence of the practicability of the Bank Calf Club Movement in Illinois. Under the leadership of W. Scott Matthews, Illinois Dairy and Food Commissioner, this movement has resulted in the organization of nine Calf Clubs for the purpose of interesting children in the Dairy Industry. Plans are now under way for the formation of more of these clubs by bankers in different parts of the state. As the heifers had been on pasture the greater part of the time, the cost of keeping them was small.

The program for "Sale Day" was given under the auspices of the Business Men's Dairy Extension Movement of Illinois, Dairy and Food Commissioner W. Scott Matthews, the Agricultural Committee of the Illinois Bankers' Association, and the First National Bank of Brighton, Illinois. First on the program was a parade, followed by speeches from prominent dairy authorities, and the awarding of prizes for heifers making the best showing. Moving pictures were taken, and a dairy banquet, served in Dutch style, closed the festivities.

As a further means of encouraging dairy farming in this locality, S. P. Stevens, owner of the Oak Glenn Farm at Bartlett, Illinois, sent his show herd, including a $20,000 bull, and also put up 13 registered bulls with the understanding that they would be sold for what they would bring, to be kept and used for the improvement of the herds in this part of the state. These bulls were young stock, some of them being only six weeks old, and brought from $80 to $315 per head.

Carl Vrooman, Assistant Secretary of Agriculture, made a special trip from Washington, D. C., in order to address the boys and girls of the Brighton Club, to encourage them in their dairy work and congratulate them on the results accomplished.

Prof. F. W. Merrill, of the Dairy Development Department of the DeLaval Separator Company, explained briefly the points in selecting good dairy stock.

Ruth Deatherage's heifer brought her $145—and the pound of butter which Ruth made herself from her heifer's milk was sold at auction and was bought by the International Harvester Company for $5.00.

It was very interesting to watch this sale and see the interest manifested by the children who had cared for these heifers, but the part of the program that attracted most attention was to see these children gather at the bank and receive their money, and see them deposit the same, and in hearing what they had to say about what they were going to do with this money. And in nearly every instance it was this: "I am going to buy two heifers this spring and I am not going to sell them. I am going to keep them and start a dairy herd."

We believe that practical work of this kind will go much farther in encouraging children to stay on the farm than all the literature that could be distributed and speeches that could be made. Speeches and bulletins are good, but practical help and actually earning money on the farm are the best arguments to use. In other words, help people to help themselves. You can go to any town, especially in Southern Illinois, and find men working at very low wages, barely able to support their families. If they had been encouraged when they were children and received this practical help, they would not be living on the farms where they were born and would be prosperous dairymen and farmers, and their land would be worth from $100 to $200 an acre, whereas, in many instances now, the land they were living on 30 years ago has been practically abandoned and some of these farms have grown up in blackberry briars and sassafras bushes. If this practice of encouraging the children was universally adopted by the bankers of Illinois it would result in the production of much more meat, butter, cheese, leather, and other products which come from the cow. Do you know there are six million less cows in this country today than there were fifteen years ago, and twenty thousand more people? About 75 per cent of the citizens of the United States lived on farms 30 years ago. Today approximately 50 per cent live on farms and about 50 per cent in the towns.

At a sale of 40 Percheron mares and stallions held in Kansas December 14th at the White Water Falls Farms, the top price for a stallion was $1040 for the gray two-year-old Comet 125810, and the top price for a mare $800 for a two-year-old by Casino. No horse sold for less than $320.

Want to Help Reduce Living Cost.

Believing that one way to help reduce the cost of living is to reduce the cost of production on the farm, the University of California has invited the farmers of California and all others interested to attend a "Farmers' Week" to be held at the University Farm at Davis on Tuesday and Wednesday, May 29 and 30, and Thursday, June 1, 1917. This three days and a half will be devoted to intensive agricultural study and farm demonstrations.

"Farmers' Week" will be so arranged that those attending may devote their whole time to a single subject or special field of farming work, or may turn their attention to several different problems. There will be four or five parallel courses—in such subjects as livestock, field crops, deciduous fruits, dairying, and poultry. Practical demonstrations of methods will be emphasized . Visitors will be given a chance actually to try for themselves the new methods recommended and discussed in the conference. There will be no charge for enrollment in these courses.

Breeders of Berkshire Hogs to Gather.

An important gathering of breeders of swine will be held at the University of California Farm at Davis on February 13, 14 and 15, 1917, as the Western Berkshire Congress. Tuesday, February 13, there will be a judging of fine hogs, subsequently to be slaughtered in a carcass-judging competition, an inspection of the activities of the University Farm, and a business meeting in the evening. Wednesday, February 14, there will be a students' judging contest of sale stock and a show of breeding stock, a swine-judging contest in which only women may compete, a carcass demonstration, a banquet, and a "Berkshire Love Feast." On Thursday, February 15, there will be an exhibition of sale hogs, followed that afternoon by a public sale.

A Tribute to the Cow.

Little do we realize the debt we owe The Cow. During the dark ages of savagery and barbarism we find her early ancestors natives of the wild forests of the old world. As the bright rays of civilization penetrated the darkness of that early period, and man called upon The Cow, she came forth from her seclusion to share in the efforts that gave us a greater nation and more enlightened people!

For two thousand years she has shown her allegiance to man, sharing alike in his prosperity and adversity, responding nobly to all that was done for her, until through her development she became an idol of the people of her native country.

In 1493, when Columbus made his second voyage to America, The Cow came with him, and from that time to the present day she has been a most potent factor in making this, our country, the greatest nation, with the highest type of womanhood and manhood history has ever known!

Her sons helped till the soil of our ancestors and slowly moved the products of the farm to market. They went with man into the dense forests of the new world, helped clear them for homes and made cultivation possible for the coming generation, and when the tide of emigration turned westward they hauled the belongings of the pioneer across the sun-scorched plains and over the great mountain ranges to new homes beyond.

Truly, The Cow is man's greatest benefactor. Hail, wind, drouths and floods may come, destroy our crops and banish our hopes, but from what is left The Cow manufactures into the most nourishing and life-sustaining foods, and is she not foster mother and life itself to countless thousands of little children all over this world of ours? We love her for her docility, her beauty and her usefulness. Her loyalty has never weakened, and should misfortune overtake us as we become bowed down with the weight of years, we know that in The Cow we have a friend that was never known to falter. She pays the debt. She saves the home. God bless The Cow — little do we realize the debt we owe her!—[E. G. Bennett.

Miles City and Its Horse Mart.

More horses now change hands at Miles City, Montana, from their original owners, than even at the great horse markets at Chicago and St. Louis. The Miles City Horse Sale Company was established 15 years ago, when A. B. Clark conceived the idea of bringing the buyers and sellers of Montana horses together .

The first sale was held in the Northern Pacific stockyards and a train load of horses could be bought for a song . It was a discouraging fight, but Mr. Clarke persevered and gradually the horse breeders of Montana became convinced that they could raise big boned horses with quality and substance, as well as the bucking bronco. Scores of richly bred draft stallions have been put on the range, and the horses sold at Miles City now show the effect of the improvement.

New yards have been added in recent years, a large sale pavilion has been erected and today the sale yards cover over ten acres of ground. They have branches in Utah, Oregon and other western states . The present officers of the company are: Ed Love, president; Luther Milligan, secretary, and Guy Crandall, manager.

Contact, a Percheron stallion that won fourth prize at the Chicago International, changed hands during the show for $7,000. The buyer was T. B. Bowman, of Boone, Neb. For a two-year-old colt of the same breed a Canadian horseman paid $5,000.

THE FARM

PUTTING THE AUTO TO WORK.

Most farmers believe that "handsome is as handsome does,' 'so when they took to the automobile they speedily found other uses than joy riding for it. Joy riding is mighty fine but it doesn't pay interest on the mortgage. Manufacturers have worked with the farmer to make the auto profitable as well as pleasuable. The modern auto will stand country roads and climb country hills, carrying eggs, butter and like things, to market, and bringing many needed articles back, that otherwise would mean a slow trip with the team — perhaps when the team was badly needed on the farm; or work at a standstill till some repair or other arrived. And perhaps when the auto gets back from its trip it pumps water, grinds feed and does like work.

Anyhow, all these things are possible. There are trailers on the market to attach to the auto so that it can carry quite a load of light stuff. There are gears and shafting which transform the car into a power plant capable of running all sorts of light machinery. Regarding these, Professor Wirt of the Kansas Agricultural College says:

"The purchase of a trailer makes possible the transporting of milk, cream, garden truck, and chickens to market. The trailers, which are of various design, are manufactured by more than a dozen companies. The engine of the average automobile is seldom worked to capacity and consequently there is plenty of tractive power to take care of the light trailer.

"Attachments are now being manufactured, at a low price, which will transform several of the more popular makes of cars into power plants. A series of gears and shafting has been devised which operates a pulley on the front of the car, and makes it possible to turn farm machinery.

"One of the smaller cars most popular on the market will develop about 12 horse power on the brake, and is consequently more tha nstrong enough for the average work required of a farm engine. Most farmers use a gas engine of five or six horse power.

"It is not economical to use a 12-horse power engine for furnishing power to a washing machine or a pump. It is best to have a system of shafting which can be arranged to drive several pieces of machinery simultaneously. Corn shellers, feed grinders, fanning mills, and other small pieces of farm machinery can be connected with the system of shafting.

"If there is a small electric power plant with storage batteries on the farm the automobile engine can be made effective in charging the batteries at times when the car is not in other use, but it would not be economical to use the car's engine to store electrical energy in the battery, and then use the electricity to drive small individual motors attached to the smaller pieces of machinery, excepting the washing machine, sewing machine, and the like. The overhead charges are too heavy.

USE OF MILKING MACHINES.

In using a milking machine some facts of interest were brought out by an experiment at the North Dakota Station where seven machines of leading makes were tested.

Care must be taken that the machine does not frighten the cow or make her nervous. A little nervousness at first is only natural with some animals, but they should be gently handled to rid them of any fear, or they will hold up their milk.

The teat cups of the machine must fit to the cow's teats. In cold or wet weather when the teats are wrinkled o rshrunk this point needs especial attention.

The pulsations of the machine must also be adapted to the cow to get the best results. A quick pulsation is not good for a hard milker with long teats, nor a slow pulsation for a cow with short teats that milks easily.

The machine should not be attached too quickly to a cow that is slow in letting down her milk. Start the milk first. Most cows let down their milk more slowly as the milking period is advanced. For this reason it is better to begin the use of a machine when the cows are fresh.

The machine is not adapted for use with cows whose front teats give much more milk than their rear teats. The continued suction on the front teats after they are dry, while the rear ones are being finished, may injure the cow's udder. And the discomfort may cause the cow to hold up some of the milq in her rear teats.

The conclusion of the experiments is that for successful use of the milking machine, it must be a good one, the ecows must be normal with well developed udders, and the operator must thoroughly understand both the cows and the machine.

Shingles Required For a Roof.—To find the number o fshingles for a roof, multiply its area in square feet by nine i fshingles are laid four inches to the weather, by eight, if four and a hal finches to the weather, by seven and one-fifth if five inches to the weather. For hip roofs add one-twentieth to result. Example: Suppose each side of the roof is 30 feet long and 16 feet wide, shingles to be laid four inches to the weather: 30x16 equals 480 squaree feet in one side of the roof, or 960 square feet in both sides; 960x9 equals 8,640 shingles required. If it is a hip roof one-twentieth more will be required . One-twentieth of 8,640 is 432, added to 8,640 equals 9,072 shingles required.

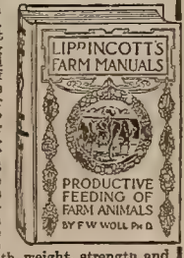
Of 16,700 cows tested through 47 Wisconsin cow testing associations last year, 3,375 were disposed of as unprofitable.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a **HUMAN REMEDY** for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.



Every bottle of **Caustic Balsam** sold is Warranted to give satisfaction. Price **$1.50** per bottle. Sold by druggists, or sent by express, charges paid, with full directions for its use. Send for descriptive circulars, testimonials, etc. Address

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

Duck Popularity is Increasing.—It costs no more to feed and shelter laying ducks than hens. The eggs are not only much larger but in greater number, and, in the opinion of many are better than hen eggs. Indian Runner ducks have made wonderful egg records.

A swimmin gspace is not a necessity. Many prefer to dispense with it and report good results. Indian Runners are particularly adapted to this form of dry farming. As a rule, however, the highest fertility of eggs is on the ranch with the water. If pools are provided, they must be frequently cleaned.

With the rapid vanishing of grazing land, it would seem that the price of beef is destined to continue rising. In my case there is a shifting of demand for meat. It is more fowl and less beef. This is due partly to price and particularly to the relative merits of the meats. He who enters the duck business can depend upon a growing market.—Homer Derr in Rural World.

One advantage of always keeping the pigs thrifty and growing is that they are always ready for market and the owner is enabled to take advantage of high prices is offered.

$10 Due on Two-Year-Olds

THURSDAY, FEBRUARY 1st, 1917

Pacific Breeders Futurity Stake No. 15.---$5,150

GIVEN BY THE PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

FOR FOALS OF MARES BRED IN 1914

FOR FOALS OF 1915 TO TROT OR PACE AT TWO AND THREE YEARS OLD

$2800 FOR TROTTING FOALS — $250 TO OWNERS OF STALLIONS

$1800 FOR PACING FOALS — $300 TO NOMINATORS OF DAMS OF WINNERS

MONEY DIVIDED AS FOLLOWS:

$2100 for Three-Year-Old Trotters.

100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.

800 for Two-Year-Old Trotters.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1200 for Three-Year-Old Pacers.

100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.

500 for Two-Year-Old Pacers.

50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.

50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings, May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace, $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

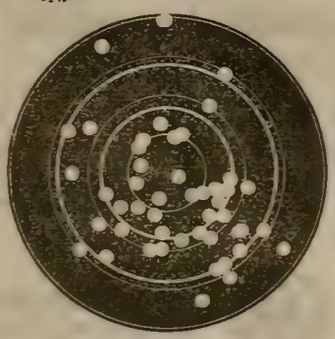
¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns, is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.



Use ***WINCHESTER*** "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

REMINGTON UMC

WIN NEW REVOLVER AND PISTOL SHOOTING HONORS WITH

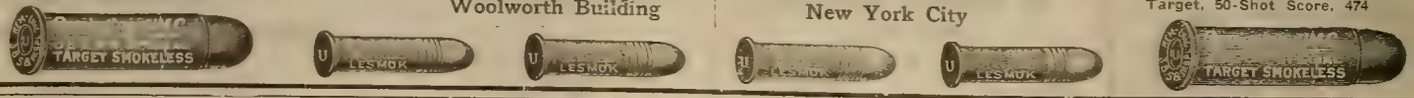
Remington UMC

REMINGTON UMC

Dr. Atkinson's Winning Revolver Target, 50-Shot Score, 469

A new revolver shooting record is the result of the Annual Outdoor Pistol and Revolver Championship Contests just completed by the United States Revolver Association.

Dr. A. B. Atkinson, West View, Pa., made a match record of 469, which gives him the Outdoor Revolver Championship of the United States. Dr. Atkinson shoots and prefers Remington UMC.



The pistol championship was won by that master marksman, George Armstrong of San Francisco, with a score of 474. Mr. Armstrong uses Remington UMC .22 Long Rifle Lesmok cartridges for all of his shooting.

For either practice or championship shooting you may rely upon Remington UMC metallics to give the maximum accuracy.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

PRETTY BABY

The sensational three-gaited saddle mare sold recently by Hugh C. Willoughby, of Lexington, Ky., to John P. Crozier, of Upland, Pa.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California and fifth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of her day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

$10 Due on Two-Year-Olds

THURSDAY, FEBRUARY 1st, 1917

Pacific Breeders Futurity Stake No. 15.---$5,150

GIVEN BY THE PACIFIC COAST TROTTING HORSE BREEDERS ASSOCIATION

FOR FOALS OF MARES BRED IN 1914

FOR FOALS OF 1915 TO TROT OR PACE AT TWO AND THREE YEARS OLD

$2800 FOR TROTTING FOALS — $250 TO OWNERS OF STALLIONS

$1800 FOR PACING FOALS — $300 TO NOMINATORS OF DAMS OF WINNERS

MONEY DIVIDED AS FOLLOWS:

$2100 for Three-Year-Old Trotters.
- 100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Trot.
- 800 for Two-Year-Old Trotters.
- 50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Trot.
- 50 to Owner of Stallion, Sire of Winner of Three-Year-Old Trot when mare was bred.

$1200 for Three-Year-Old Pacers.
- 100 to the Nominator of the Dam on whose Original Entry is named the Winner of the Three-Year-Old Pace.
- 500 for Two-Year-Old Pacers.
- 50 to the Nominator of the Dam on whose Original Entry is named the Winner of the Two-Year-Old Pace.
- 50 to Owner of Stallion, Sire of Winner of Three-Year-Old Pace when mare was bred.

$150 in Special Prizes was paid to Stallion Owners in December, 1914

ENTRANCE AND PAYMENTS—$2 to nominate mare on December 1, 1914, when name, color, description of mare and stallion bred to must be given; $5 March 1, 1915; $5 November 1, 1915; $10 on Yearlings, May 1, 1916; $10 on Two-Year-Olds February 1, 1917; $10 on Three-Year-Olds February 1, 1918.

STARTING PAYMENTS—$25 to start in the Two-Year-Old Pace, $35 to start in the Two-Year-Old Trot; $35 to start in the Three-Year-Old Pace; $50 to start in the Three-Year-Old Trot. All starting payments to be made ten days before the first day of the meeting at which the race is to take place.

Nominators must designate when making payments to start whether the horse entered is a Trotter or Pacer.

Colts that start as Two-Year-Olds are not barred from starting again in the Three-Year-Old divisions.

THE PRELIMINARY WORK toward the holding of a good circuit of harness race meetings in California this year has been accomplished. An organizaion has been effected, a circuit secretary engaged and over $600 raised toward a fund that will be used in assisting every fair and other organization that will give harness racing in securing a large list of entries and large fields of starters. Mr. J. S. Waddell, who has been selected as Secretary of this organization, has already started to work and he will have the help of every person who is interested in any way in seeing trotting and pacing racing restored to the prominent place it once occupied at our county and district fairs. Mr. Waddell has established his headquarters for the present at the office of the Breeder and Sportsman and will immediately get in touch with horsemen and fair associations throughout the State. Mr. Waddell is no raw recruit. He has had a great deal of experience in this line in Oregon and elsewhere and has built up successful circuits in sections where the population and the number of horses bred and trained are small in comparison with those in California. He is on the job now and proposes to stay on it until the California harness racing circuit of 1917 is brought to a successful conclusion. He will soon start on a tour of the State and will inform himself thoroughly on the local conditions, so that he may be able to show the directors of associations just what, in his opinion, can be done in each county. If he receives the assistance he should there will be a circuit this year that will be not only successful financially and otherwise, but will lead to an organization of fairs and race meetings that will be permanent and of great benefit to every breeder, owner and trainer of trotters and pacers on this coast.

A bill introduced in the California legislature by Senator Lyman King of San Bernardino county should pass, and if it becomes a law automobile racing on the roads of the State, which has gotten to be quite a nuisance, will end. In a short paragraph of 24 words, at the very beginning of his bill, King has provided for the end of automobile racing on public highways as follows: "No races or contests for speed, whether on a bet or wager or otherwise, shall be held on any public highway of the state." King's bill, if passed, may be construed as prohibiting racing against time, which has been a popular fad with big automobile concerns in years past. The auto concerns have on numerous occasions raced cars against time between San Francisco and Los Angeles for the purpose of making records and receiving advertising. King's bill also provides for careful driving by prohibiting autoists from driving faster than 30 miles an hour at any time, compelling them not to exceed 20 miles an hour in built up communities, limiting them to a speed of 15 miles an hour in business districts of cities and limiting them to a speed of not more than 10 miles an hour where their view of the highway is partially obstructed.

◈ ◈ ◈

Averhill Harriman, son of the late E. H. Harriman and famous light harness horse fancier, is banding together as strong a stable as money will buy to take down the Grand Circuit this year, it is reported. Mr. Harriman has purchased Baron Frisco, Dos Palos, and is searching for more material. He probably will have a few sons of John R. Gentry flying his colors. Will Dickerson, brother of John Dickerson, one of the well known Grand Circuit drivers, will have charge of the Harriman stable.

◈ ◈ ◈

A new monument is to be erected over the grave of Goldsmith Maid 2:14 at Fashion Stud Farm, Trenton, New Jersey, where the famous old mare is buried.

Fred Jamison, who is called King of the half mile track trainers, and who campaigned the great mare Wilkes Brewer by Nutwood Wilkes last season, won over $22,000 in purses on half mile rings during 1916.

◈ ◈ ◈

One of the oldest horses whose deaths have been reported in recent years was Fanny, owned by Mrs. Jennie Vanderheyden, of Troy, N. Y., who died a few days ago at the age of forty-three. She was in service up to a short time before.

◈ ◈ ◈

The flivver, standing at Sixth avenue and Thirty-sixth street, New York, was new, shiny and apparently quite sound. It had a fur lap robe over its radiator. Directly in front of it stood a Bering Sea victoria to which was attached an ex-horse, old, muddy and unquestionably unsound. He wore no blanket, opera cloak or muffler. There was but one thing for the whistling newsboy to do, which was to transfer the robe from the auto to the horse, and he did it without delay or apparent qualm of conscience. For a moment he stood surveying the fur clad charger. "Atta boy," he said contentedly, after which he went whistling down Sixth avenue.—Ex.

WHY FARMERS SHOULD BREED MORE DRAFT HORSES.

The danger of overproduction of horses is remote. It costs more to produce them than any other class of livestock. For that reason many farmers sit back and proclaim that it doesn't pay to raise horses; that there never was a time when the horse market was so dull as now; that the motor truck and tractor have killed the horse business and the horse is a thing of the past. Some people believe all of this, even though the truth of the matter is the opposite. Those who have allowed such thoughts to direct their operations for the past five to ten years will soon see the error of their ways. It takes time to make much headway in the horse business. Five years are needed to grow a horse. At best one should not expect more than two colts from three mares as an average per year. Moreover, not more than 16 per cent of our farmers are raising colts. Not long hence the American farmer will wake up only to learn that a great opportunity has passed. The next ten years is bound to see the greatest demand for horseflesh the world has ever known. It can't be met on short notice. The man who is breeding every mare old enough to the best stallion available and is taking proper care of the offspring is the man who is sure to be rewarded. There are plenty of men who have bought and paid for farms within the past ten years by their pure bred draft mares. In the same community there are farmers who are no better off financially than they were a decade ago because they failed to foresee the profits from using the right kind of horses in their farm work. The men who have made money and who are going to reap the fruits of their efforts in the future are those who early saw the undeniable need for heavy draft horses for farm work; who bred that kind and who will continue to do so without a halt.

Why is there a general tendency among farmers to buy their horses rather than to raise them? Farmers say, "I don't want to be bothered with a colt. When I get ready to plant corn or cut wheat I want horses ready to work, I don't want to have to pay $25 for a little scrub colt and then have all the bother to raise it, besides." Men with such ideas have to buy a horse or two nearly every spring at a cost of $150 to $250 a head. Instead of having a horse or two to buy, better have some to sell. There is no unusual training necessary. Any farmer can raise good horses if he will only use common sense. He can even succeed with pure bred drafters if he will select good parent stock, take reasonably good care of them and develop the offspring rightly. Therein lies the secret of success.

A careful consideration of the situation cannot fail to convince us that there is no danger of an overproduction of heavy draft horses for our farm and city uses. Almost a million horses and mules have been exported from this country in the last 27 months for use in war. These figures show almost one horse or mule taken for every twenty-five left. As surely as this war continues another two years, good farm horses will be at a premium; and even after the war is over, exports will not cease, for thousands of horses will be needed to start European agriculture anew.

It follows, as a necessary consequence, that the demand for purebred draft horses for breeding purposes will continue to be good. Importations have been, to all practical purposes, cut off. We are producing only twelve or thirteen thousand purebred draft horses eligible to registry. This means, in substance, that we are producing only five or six thousand stallions fit for service per year, when we need at least seven or eight thousand. An excess of demand over supply always makes good prices, and the present is no exception.

The farmer who uses heavy draft mares does better farm work, and raises bigger crops, than he who relies on small horses or tractors . Furthermore, he has horses to sell each spring, at a profit. If you don't believe it, go ask any country banker for the names of the most successful farmers in his neighborhood. You will find them to be livestock farmers, and men who keep and use heavy draft mares, either grade or purebred, in their farm work.

APPRECIATED EDITORIAL COMMENT.

[Mexico, Mo., Intelligencer.]

Curtis P. ("Jump") Cauthorn departed Tuesday afternoon for San Francisco, Cal., where he has become interested in the Breeder and Sportsman, a journal devoted to live stock and sports, as its name indicates.

Since he became associate editor of The Missouri Stockman three years ago, Cauthorn acquired the reputation of being one of the leading writers on live stock topics in the country. Having come of a family of pure-bred live stock and Saddle Horse breeders, and himself a breeder and dealer in Saddle Horses of considerable extent, "Jump" Cauthorn was able to write from first hand, technical knowledge of stock shows in a manner that attracted the attention of stockmen all over America.

As associate editor of The Stockman, his work was varied. His account of a sale of Shorthorn cattle conducted a year ago by S. P. Emmons & Son, was handled in a style that caused R. L. Harriman, the noted live stock auctioneer, to declare it a masterpiece from a standpoint of live stock reporting. The Missouri Stockman made for him the reputation that has grown nation-wide.

[Spirit of the West.]

Announcement is made in the Missouri Stockman's Christmas number, which, by the way, is the finest number that publication has ever gotten out, that Mr. Jackson, the owner, has sold out and that it will be taken over by the Breeder and Sportsman, of San Francisco. Jumps Cauthorn, who has been editor for the past two years, will go to the coast as managing editor of the two combined papers.

The Missouri Stockman was established in 1914. During its life it has overcome many obstacles and has continued to improve each year. Devoted largely to the interests of the great American Saddle Horse, it was one of the snappiest and newsiest publications which came to our exchange desk, and one which we looked forward to with pleasure. Mr. Cauthorn assumed his editorial duties about two years ago, and during that time has "made good" in every sense of the word.

The Breeder and Sportsman was established in 1882, and is one of the best publications in the country today. Mr. Cauthorn says that he intends to devote a department to the saddle horses of the Middle West, even though he is far away, so the readers of the Missouri Stockman may still feel that they have not lost him. While his many friends will regret to see him leave this part of the country, the Breeder and Sportsman is certainly to be congratulated upon getting such a capable man on their editorial staff.

[Farmers' Horse Journal.]

The holiday number of the Missouri Stockman came to me last week in a very attractive and profitable dress of many brilliant articles and handsome advertising cards. But I am sorry to note that the Stockman is to come to me no more, as its owner, Rufus Jackson, has sold out, field and equipment to the Breeder and Sportsman of San Francisco, Cal. Mr. Jump Cauthorn goes with it, as managing editor of Breeder and Sportsman, said papers to converge into a complete live stock periodical. While the Breeder and Sportsman is already one of the best and ablest papers of its class published in America, we dislike very much to give up the Missouri Stockman ,for Missouri's sake. We dislike very much, too, to lose Mr. Cauthorn from Missouri, as he is an enthusiastic horseman, a tireless worker, with a congeniality of spirit that makes him a drawing card wherever he goes. What we lose, the Pacific Coast will gain, and we believe he will do all in his power toward husbanding the promises of the live stock industry of the West.

[Columbia, Mo., Tribune.]

Missouri has lost another one of her best newspaper men. This time "Jump" Cauthorn has cast his future with the state that elected Woodrow Wilson President of the United States for a second term, for immediately after he completed a holiday edition of the Missouri Stockman, of which he has been the editor for several years, he left for San Francisco, where he will become associated with the Breeder and Sportsman.

There is no better known or better liked newspaper man in Missouri than "Jump" Cauthorn, and he is not only known in Missouri but all over the Central West and by reputation all over the United States.

"Jump" is a horse editor, a real horse editor, who knows pedigrees of horses and can repeat them from memory with the same efficient degree of accuracy that William Jennings Bryan speaks his "Prince of Peace." He has attended all the important horse shows in all sections of the country for several years and knows not only the horses and their breeding, but also their owners and trainers. He probably knows more stockmen than any one in Missouri.

The Tribune predicts success for Mr. Cauthorn and joins his many friends in wishing him success in his new field.

Guy Boy, by Frank Turner's horse Guy Dillon, won a race on the ice at Toronto, Canada, December 23d, and got two heats and won second money a few days later when the race was in faster time, Guy Boy winning the second heat in 2:22½.

Harness Horses and Horsemen

CIRCUIT OF FAIRS ASSURED.

One and Probably Two Will Be Organized in California This Year.

In response to a call issued by Secretary F. W. Kelley of the Pacific Coast Trotting Horse Breeders Association, representatives of nine associations that will give fairs in California this year met in the Pacific Building, San Francisco, on Tuesday afternoon, January 16th, and discussed the question of arranging dates for these fairs which would provide for a continuous circuit with the shortest possible shipments for the live stock and other exhibitors who desire to show their stock and race their horses at these fairs . The meeting was called to order by Secretary Kelley and Mr. I. L. Borden, director of the State Agricultural Society, was placed in nomination for chairman by Secretary C. W. Paine of the State Board of Agriculture. Mr. Borden was unanimously elected to preside and Mr. F. W. Kelley was then elected secretary of the conference.

The associations that were officially represented at the meeting were as follows:

Alameda Fair Association—E. E. Hall.
Salano County Fair Association—Harry McFadyen.
State Agricultural Society—C. W. Paine.
Fresno County Fair Association—J. H. Dickenson.
Kern County Fair Association—J. W. Jennings.
Riverside County Fair—C. H. Lewis.
Ventura County Fair—L. T. Hathaway.

The tracks that were represented were as follows:

Pleasanton—George Ryan.
Santa Rosa—C. Donovan.
Woodland—Chas. Silva.

After considerable discussion is was found that there were not enough weeks after the State Fair at Sacramento and before the opening of the usual rainy season to permit all the places south of Sacramento who desire to have a place on the circuit to secure dates. Finally a motion was made and carried that the following tentative dates be allotted to the different fairs:

Santa Rosa, August 20-27.
Dixon, August 27-September 2.
Woodland, September 3-6.
Sacramento, September 8-16.
Pleasanton, September 17-22.
Modesto, September 24-29.
Fresno, October 1-6.
Hanford, October 8-12.

The representatives from Bakersfield, Riverside and Ventura were very positive that their associations would not consent to hold their fairs on dates later than October 1-6, and they finally concluded they could not accept such dates. Consequently their dates will probably be about as follows:

Los Angeles, August 27-September 2.
Riverside, September 17-22.
Ventura, September 24-29.
Bakersfield, October 1-6.
Visalia, October 22-27.

Of these five fairs, but three (Riverside, Ventura and Bakersfield) are certain, but should Los Angeles and Visalia decide to hold fairs an excellent Southern California circuit would thus be provided.

As the State Agricultural Society has fixed its dates as given above and cannot change them the dates following it are necessarily limited. Thus, in a State which for several years has held but few fairs and had many vacant dates, the situation has changed so that during the fall season there are more places asking for dates than can be accommodated.

After the adjournment of the conference, a meeting of the horsemen and track owners was held and an organization of the California Fair and Racing Association was effected, which is reported elsewhere in this issue of the Breeder and Sportsman.

Lived Twenty-Six Years.

During the latter part of the year just passed Mr. Geo. L. Warlow, of Fresno, had his old favorite Athadon put to death by chloroform. Athadon was foaled in 1890 and was bred and owned during his entire lifetime by Mr. Warlow. His sire was the Onward stallion Matadon to which horse Mr. Warlow bred his mare Athalie by Harkaway before bringing her to California. In November, 1891 at Stockton, Athadon trotted a mile in 2:27 and became the world's champion yearling stallion, a record he held until Adbell put the mark at 2:23 at San Jose in 1894. Placed in the stud Athadon had a limited opportunity, yet he sired a number of fast performers, and up to the close of 1916 had sired 18 standard performers, had three producing sons and four producing daughters. His fastest performers were the trotters Athasham 2:09¼ and Donasham (4) 2:09¾, and the pacers Dick W. 2:06¼ and The Donna 2:07¾.

Jim Logan 2:01¾ Will Be at Woodland This Season.

The most popular race horse in California, hero of many a hard fought battle, winner of the fastest heat ever paced in this State, a tried sire and one of the best bred pacers that ever stood for public service, J. Elmo Montgomery's horse Jim Logan, will make the season of 1917 at the Woodland race track, where he made his record, and where he has a friend and admirer in every house where there is anyone who knows a pacing horse from a traction engine. Jim Logan's name is a household word in that section and on the day when it is known at the county fair that Jim Logan will start, the grand stand is always full and the "standing room only" sign is out. Mr. Montgomery has placed Jim Logan's service fee this year at $50, or $75 to insure a living foal. These are liberal terms for a horse of Jim Logan's breeding and speed and should bring him a number of the best bred mares in California, especially as he has shown his ability to sire race winners and speed of the highest order. His first foal to start, the filly Maxine, won the Pacific Breeders' Futurity as a three-year-old, taking a record in that race of 2:15, and the race went to five heats. Hal Logan 2:09 is another of Jim Logan's get that was in the limelight this year and after taking a time record of 2:09 at Santa Rosa, went to Phoenix and was a close second every heat of the race in which that sensational pacer Zombrino won in 2:07¼, 2:07 and 2:06¼. This son of Jim Logan is expected to pace very close to his sire's record during the coming season. Owners of mares should read Mr. Montgomery's advertisement in this issue of the Breeder and Sportsman and correspond with him. Excellent pasturage will be furnished all mares sent to Jim Logan's court and the charges will be reasonable.

At the Phoenix Track.

Phoenix, Arizona, where the training track is in good shape all winter, is quartering about fifty trotters and pacers at the present time. The California trainer Ted Bunch has charge of Dr. J. G. Belt's stable of horses, consisting of the big winner Zombrino, p. 2:06¼; Wynetta, p. 2:04¾; Evermore, p. 2:14¼; Kildare, green trotter by Zombro; Jewell Tolus, green trotter by Pactolus; Pactolus Chief, p. 2:22¼, by Pactolus, and a promising three-year-old trotter by Dr. Wayo 2:12¼. The topliners in this stable will be raced through the Great Western Circuit the coming season. Orin Carmen, son of Fred Carmen, of Kansas City, has the Pollock stable from Flagstaff, Ariz., mostly colts and fillies by The Northern Man, Dean Hall, Vernon McKinney, and other sires. Carmen has twelve head in his stable at present. He will be remembered as the young man that was with Arlie Frost so long, and had charge of Knight of Strathmore when that horse was such a great three-year-old. W. T. McNab, formerly of Hutchinson, Kans., has Santa Fe, an own brother to Sherlock Holmes p. 2:06¼, and several promising young trotters and pacers. Lesta Selman has a number of very likely youngsters by Prince Zombro, James Otis and Dr. Clark, and from the bunch expects to have several good enough to race next fall. Wm. Best is wintering Lillian Van 2:11½ and the fast green trotter The Shriner, by Colonel Green, by Zombro.

Fast Colt By Best Policy.

The boys at Pleasanton are talking a good deal these days about the three-year-old trotter mentioned in the Breeder and Sportsman last week which is by Best Policy and out of the mare Miss Zom B. by Zombro. He is owned by Mr. H. E. Middleton of Oakland and is being trained by Jay Frank. The latter says this colt is the fastest natural trotter he ever saw and Millard Sanders says he ought to trot in two minutes. The only trouble with the colt is that he doesn't like the bit and fights it. He can trot a two-minute lick right now and if Frank succeeds in getting him under control he will have a sensational trotter beyond a doubt. Frank is going easy with him, and is trying a bridle without a bit that Havis James used on some of his horses when at Pleasanton. George Ryan dug this contrivance up the other day and loaned it to Frank who is giving it a trial. This colt is a peculiarly bred fellow . His sire Best Policy is by Allerton out of Expedition. His dam is by Zombro, second dam by Stam B. and third dam the dam of Zombro. If he ever learns to race he will be one of the fastest trotters ever seen in California. Mr. Frank has four head in his string at Pleasanton ,two by Best Policy and two by Red Cloak Jr. out of mares by Prince Nutwood.

Mr. Rudolph Spreckels Owns Two Good Prospects.

Millard Sanders has found a mighty promising pacer in Mr. Rudolph Spreckels' chestnut mare by Washington McKinney out of Annie Rooney 2:17 by Strathway. Sanders took this mare out of pasture where she had been running out for two years last October and is not yet giving her anything like hard work, but she paced a quarter for him in 32¾ seconds the other day, and he says she is as promising a pacer as he has seen for a long time. Mr. Spreckels' trotting mare by Washington McKinney out of Hulda 2:08½ is also showing up well. She can show a 2:30 gait any time she is given her head, and being a good individual and a square trotter is considered a real prospect by the man who holds the record of having trained and driven the first trotter to reach the two-minute mark—Lou Dillon 1:58½.

WILL PROMOTE HARNESS RACING.

California Fair and Racing Association Organized and Officers Elected.

Active and energetic promotion of a season of harness racing in California is to be entered upon immediately by an organization of harness horse breeders and owners called the California Fair and Racing Association which has elected as its officials, Mr. L. L. Cannon, a prominent farmer and live stock breeder of Sonoma county, as president; J. Elmo Montgomery, an extensive Yolo county farmer and owner of the famous pacer Jim Logan 2:01¾, as vice-president; and the popular capitalist, farmer and horse breeder, I. L. Borden of San Francisco, as treasurer. Joseph S. Waddell, formerly of Baker, Oregon, but now of California, was elected secretary. Mr. Waddell is the man who so successfully promoted and managed the Inter-Mountain circuit last year, and who was induced to come to California to engage in promoting and organizing a California circuit. It will be Mr. Waddell's duty to start in immediately to get as many of the California associations that will give fairs and race meetings in 1917 into line, and to also make an effort to get towns where tracks are situated and that will not give fairs to hold harness race meetings, even though they may give only a program of a day or two. The idea is to try and boost and encourage the sport of clean harness racing, which as all know is one of the most popular of American sports.

After the meeting of representatives of a number of California fair associations called to organize a fair circuit and select dates for the various fairs to be held in the State had agreed upon a tentative schedule of dates, and adjourned, the horsemen and others present at the meeting were urged by J. Elmo Montgomery to organize, raise some money and employ an organizer and promoter of a harness racing circuit to hold meetings in conjunction with the fairs and otherwise. Mr. Montgomery's proposal was heartily entered into and within a few minutes over $600 was pledged to the association. The contributors were Messrs. M. L. Woy, C. F. Silva, L. L. Cannon, I. L. Borden, G. J. Giannini, L. H. Todhunter-Fresno Fair Association, Santa Rosa Association, State Fair Association, C. A. Durfee, J. E. Montgomery and others.

Mr. Waddell will establish an office and will visit the different towns where fairs and race meetings are to be or may be held and will be prepared to demonstrate by conservative and accurate figures just how much money is required to carry through to a financial success a program of harness racing. Mr .Waddell has had extensive and successful experience and his success has been due to the fact that while he is an energetic promoter he is also a conservative one and does not try to induce fair or racing organizations to give any larger programs than they can afford to and which conditions, location and other things will justify. Mr. Waddell is not working for the immediate present, but for the future and states that he fully realizes that if he succeeds in promoting a successful circuit this year, he will be asked to proceed with the work next year and years to follow. He believes that he can arrange a program of purses that will draw a big list of entries for every place on the circuit and he has already started to work with that idea in view, and the further idea of making every race program a profitable one for the organization backing it. It looks now very much as though a better California circuit than has been seen in many years will be the result of the organization of the California Fair and Racing Association.

A Grandly Bred Horse at Midway Farm, Nebraska.

The well known breeder E. D. Gould, of Kearney, Neb., whose horses are now being trained by J. B. Stetson at Sacramento, recently bought Lord Roberts 2:07¼ at the dispersal sale of the Riverside Farm, Weston, W. Va., and the son of Arion and Nancy Hanks will spend the balance of his days at Mr. Gould's Midway Farm where he will share the honors of the stud with Bingen Silk 2:07¼ and Robert Bingen 2:15½. It is needless to say that Lord Roberts will have exceptional opportunities in his new location for Mr. Gould has collected a band of brood mares unexcelled in the West. Lord Roberts, in spite of the handicap which was placed on him by the out-of-the-way location of Riverside Farm, has, during the past three years, justified the judgment which led to his purchase by his late owner and it may be confidently asserted now that his reputation as a sire will be greatly increased during the next few years. From present indications he will be to the Arion branch of the Electioneer family what Bingen is to the May King branch and Walnut Hall is to the Conductor branch and, to carry the comparison farther, what Peter the Great is to the Pilot Medium branch of Happy Medium's family.

Three Meetings at Charter Oak Track.

The Connecticut Fair Association at Hartford has certainly shown itself a friend of the trotting horse breeder as it has already advertised three good meetisgn for 1917. The first will be on May 30th, when four races at half mile heats will be given with purses from $200 to $400. The next will be on July 4th with $400 each for the 2:15 pace and 2:24 trot, $500 for a 2:15 trot and $1500 for a free-for-all

pace. These races will be held on the half mile track. The big fair will be held in September and a bunch of eight early closing purses is already announced. The $5000 Charter Oak is for the 2:12 class trotters, The Yankee is $3000 for 2:08 class trotters, the Acorn for three-year-old trotters of the 2:20 class is for $2000, the Nutmeg, 2000, is for two-year-old trotters, and the Double O is a $1500 purse for 2:20 class trotters on the half mile track. For the pacers there is the Connecticut, $3000, for the free-for-all class, the Hartford, $2500, for the 2:08 class, and the Capitol, $2500, for the 2:12 class. A new feature is The Battle Royal which will be a $3000 purse for trotters with win race records of 2:07 or faster. In this event the horses will race two heats of a mile and a half, trotting around the half mile track and then around the mile track. The money is to be divided $1300 for each heat and $400 to the horse standing best in the summary. In the event of a tie the horse standing best in the second heat will be awarded the $400. The $1300 for each heat will be divided as follows: $300 to the four leading horses when they pass the half mile, $150 to first, $75 to second, $45 to third and $30 to fourth. $1000 to the four leading horses at the finish of the mile and a half—$500 to first, $250 to second, $150 to third and $100 to fourth. This is an entirely new plan of racing and should make a most interesting race. The old saying that "they don't pay off at the half mile pole" will not apply to this race, and the sprinters should make the first half mile as interesting as the long distance trotters will make the last full mile.

The Horse vs. The Automobile.

Every little while some man bobs up with a long spiel about how the automobile is going to put the horse out of business, and that right soon. We have been hearing the same thing for the past five or six years. Recently some automobile salesman, writing in one of the Sunday papers, explained at some length just why the horse was doomed to go, and predicted that in ten years horses would be as much of a novelty on the average city street as the automobile was ten years ago.

The Department of Commerce at Washington, D. C., reports that during the month of October, 1916, 29,590 horses and 15,309 mules were exported to foreign countries, the value of which is given as $9,719,594. For the ten months ending with October 31, the exports are given as 239,894 horses and 106,334 mules, or a total of 345,288 head, with a value of $74,700,433. During the same period in 1915 the number of horses exported is given as 391,059 and 105,238 mules, or a total of 496,297 head, valued at $104,388,930.

In the last report, issued by the United States Department of Agriculture and received at this office this week, is a table showing the average prices of horses for the two years past in each state in the Union. The average price of the entire country in 1915 was $127.03 per head, while in 1916 it was $129.45, an increase of $2.42 per head. Not much, to be sure, when you look at it singly, but when we stop to think of the number of horses in the country, the figures show up pretty large.

The Year Book of the Department of Agriculture, published in 1915, gives the number of horses in the United States from 1867 to the time the book was published, with the average value per head and the total value, for each year. In 1867 there were 5,401,000 horses, worth on an average of $59.05 per head. This was, of course, long before automobiles were dreamed of, or auto salesmen heard of. It was about 1904 when the automobile men began to ring the death knell of the horse. At that time therewere 16,736,000 horses, worth on an average of $67.93 per head, and 2,758,000 mules, worth $78.93 per head. At the time the 1915 Year Book was published there were 21,195,000 horses, with an average value of $103.33 per head, and 4,479,000 mules, worth $112.36 per head, or a grand total of 25,674,000 horses and mules, with a total value of $2,693,373,000. Of course, the number of animals exported during the last three years are included in these figures, but the increase in the average value during the period from 1904, when it was $67.93 per head, to the present time, when it is $129.45 per head, would not seem to correspond very well with the claims of the automobile men that horses are a thing of the past.—[Spirit of the West.

To call a horse a mongrel that is sired by a standard and registered trotter, whose first and second dams were sired by registered trotters and whose third dam is by a thoroughbred stallion, is an absurd proposition, and yet this is what the California Stallion license law does unless the owner of such a stallion registers him as Non-Standard, which really means nothing. A horse whose pedigree is as above given had the word Mongrel written on his last year's license in this State, yet he is a better bred horse than many that are licensed as standard.

• • •

North Randall's third race track will soon be a reality. Work of unloading cinders to build the jogging course has started, and it is believed trainers will have a first-class place to work horses on wet days by spring. This cinder path is to encircle the mile ring at North Randall. On the east side the patch will widen into a 50-foot strip, where trainers may speed for an eighth of a mile.

Thousands Will Go to See This Match Race.

Ben Earl 2:00½ and Peter Stevens 2:01½ may come together in a match race next July. W. B. Eckert, Reading, Pa., recently stated that he would match Peter Stevens against any pacer in the world over a half mile track, and now comes Ed. Peterson, of Omaha, Nebraska, who says he is ready to race his horse Ben Earl against Peter Stevens on a half mile track for any amount from $1000 to $2500 a side and has already posted $500 with The Western Horseman for a forfeit to hold good until January 23d, or twenty days from the time he accepted the challenge. Mr. Peterson says any date tween July 1st and 18th, and any track will suit him, and wants the race play or pay, winner to take all. The Horseman says Ben Earl had but little racing over the half mile tracks during the season of 1916, most of his campaigning being over the mile rings, but in 1915, previous to becoming a member of the Peterson stable, the unsexed son of The Earl won eleven straight races over the Western two-lap courses and took a record of 2:11¼. Last season Ben Earl, raced by Harvin Childs, made a wonderful campaign and proved to be the leading money winning pacer of the year, with something like $12,000 to his credit. He met the best stake pacers in the land at Columbus and Lexington, and beat them, taking a record of 2:00½ when he beat an all-star cast in the $3,000 Arch City stake at Columbus.

Peter Stevens was the most consistent pacer that raced on the Grand Circuit in 1914, when he won ten out of eleven races in his campaign down the Big Ring . In 1915 the son of Peter the Great 2:07¼ was raced seven times on the half mile tracks and was defeated but once, this defeat coming in the match race with Directum I 1:56¾ at Allentown, Pa., when the chestnut stallion headed him in the summary in what proved to be a record-breaking three-heat race over a half mile track. Directum I won the first and third heats in 2:05½ and 2:06, while Peter Stevens won the second in 2:04. He won at Lebanon, Pa., when he paced the second heat in 2:04¾; at Kutztown, Pa., the second heat in 2:04 and third in 2:05¼; and in a battle against the watch at West Chester, Pa., paced in 2:04¼. At Lexington he was twice second to Napoleon Direct 1:59¾, forcing the son of Walter Direct 2:05¾ to pace in 2:00¾, and back in the same notch in their second race at the Blue Grass track. Last season, at Columbus, Peter Stevens forced Napoleon Direct to lower his record to 1:59¾, giving Mr. Geers, who piloted Napoleon Direct ,the opportunity of taking his first ride in two minutes or better, and was timed separately in two minutes. He took his record against time at North Randall, and later, at Lexington, equaled it in a race.

Should these two crack pacers come together next summer a great race can be looked for. Both have demonstrated that they are race horses of the highest type, and while Peter Stevens has had more experience over the two-lap tracks, Ben Earl has shown that he can get around the short turns pretty well himself.

A Harness Paper's View of an Interesting Subject.

There has been a great hue and cry within the past few years about the rapidly declining use of the horse-drawn vehicle and its consequent disaster to the harness industry. We all know that this has been more particularly referred to in connection with the light or buggy harness, and some of the harness men are really in earnest about the buggy and its harness being relegated to the dump heap or to some other spot that is equally as profitable.

To the man who gives up a fight without at least a struggle there can be no honors given. He dies sometimes within reach of victory, and still with a fainting heart that only cowards possess. Sometimes there is not even cause for the alarm that fills his mind, and he succumbs without even looking just a little ahead where still lies the land of promise. If it were true that the buggy industry was dead, then indeed might he shake his head and sigh that the good old days were no more. Maybe he thinks so, for he possibly has listened to the wail of his weak-kneed competitor, and to the awful clarion call of the man who is still trying to sell his automobiles.

While the latter has been drowning out the voice of the buggy and harness men, telling the world that both of these industries are dead, there have been some of these men willing to listen to this tale of woe, and to convince themselves that it was in very truth a fact. Hearsay evidence is never considered in any court of law. Must it be taken for cold-blooded facts with any manufacturer or dealer in the harness industry? Would it not be better if we made a little personal investigation for ourselves and then became convinced that all that we hear is not true?

These thoughts have been brought very forcibly to mind by an article that appeared in a recent issue of the Eastern Dealer, and we take a few excerpts from the same for the consideration of the harness men. They are just as applicable to the harness man, for every buggy made and sold means a like sale for harness and other equipment that the harness man sells.

Here is the story: Consider the enormous number of automobiles owned and operated by persons who never owned a horse and buggy and probably never will, regardless of what may or may not be the future state of the automobile.

Many people who now own automobiles never had any real love for the horse and still others had no way by which horses could be kept and cared for. Such persons would not be prospects for buggies even though business will not suffer because people of this class buy automobiles.

Again, lots of fellows who used to shiver when they figured on the expense of maintaining a horse and buggy in town, now spend three times that sum in a half-way attempt to finance an automobile, and they will continue to do so for a time.

There is an old saying, "The unceasing drop of water will wear a channel in the hardest stone," and there will come a time when the real figures of this automobile thing will have to be faced the same as we face other terms of business and household expense.

The farmer who deludes himself with the idea that he can buy a cheap automobile and operate it with practically no cost to himself, will have a rude wakening. He may shut his eyes to the expense for a while and say nothing—but he will keep up a terrible thinking. Sometimes he will figure it all out, and when he does there will be less mileage with the gas wagon. When he takes his stub of a pencil and the back of an envelope, and in the light of his experience does some figuring, the result will be startling.

For instance, here are some of the items on an investment of $500—and goodness knows $500 is a conservative sum to invest in an automobile:

Interest at 6 per cent	$ 30.00
Insurance and license	25.00
Deprecaition	100.00
Tires and tubes	50.00
5,000 miles at two cents	100.00
Repairs	25.00
Total	$330.00

Now, how many farmers stop to think that three hundred dollars is interest at 6 per cent on an investment of five thousand dollars? How many farmers, when they buy a little five-hundred-dollar car, figure that they will have to use up the interest on a five thousand dollar investment to maintain it? And it is the easiest thing in the world to double the figures. Any of the big automobiles will do it.

When the true facts get flashed on the screen of the human mind, by the projector of experience, the picture will be a revelation and an education. Now consider the sanity of the other side:

A good buggy represents a small investment, consequently the depreciation amounts to little or nothing. The operating expenses in most cases is not direct, because the horses have to be maintained on the farm and the use of them for the buggy does not add materially to the cost of their up-keep.

A buggy is a good, old, staid, reliable, every-day proposition. Winter and summer, whether the weather is hot or cold, wet or dry, it can be depended upon—always and everywhere.

The family buggy does not get out of adjustment. It has no carburetor to perplex, to hinder and excite you to profanity. It has no ignition to go on the bum, and no spark plug to refuse to spark. You don't have to "get out and get under." The only tools and equipment you ever need are a monkey-wrench and an oil can. The tires don't blow up. The wheels don't spin in the mud and burn up fifty dollars' worth of rubber in five minutes. And there isn't a day in the year you can't use the old, reliable buggy, regardless of weather or roads.

Then think of the young and romantic. The automobile has other handicaps. It requires the undivided, two-handed attention of the driver. The influence of the moonlight is destroyed at 30 miles an hour; but the little sorrel horse "has a heart"—he gets the spirit of the occasion and loafs along the shady woodland road Sunday afternoon without any attention from you at all.

Ponder over this also: If any fellow thinks the buggy business is now confined to the country trade he has got another think coming, dropping into the parlance of the small boy. In the big cities like St. Louis, for instance, where the traffic department has actual statistics, you will find some eye-opening figures. At a principal street intersection in St. Louis, 323,869 vehicles of all kinds passed, and 102,168 of them were horse-drawn, or about 32 per cent of the total. Only 52 per cent were passenger-automobiles, 16 per cent trucks and freight vehicles. This, mind you, in the heart of a great city where the buggy is supposed to be as extinct as the dodo.—[Harness World.

Advance of Mule Prices.

McCarty Bros. of Clarence, Mo., are famous as mule buyers . Twenty-one years ago this firm began their operations by purchasing 18 head of four-year-old mules, for $33.33 per head. On last Monday they sold to Maher Bros. & Edwards, St. Louis, 98 mules at $212.50. These mules were no better than the ones they purchased twenty-one years ago when they began their most successful career of mule dealers. In addition to buying and selling mules and horses they are owners of and manage one of the largest farms in Shelby county. They are well-known buyers over the state and many fine horses and mules are brought to their farm and barns near Clarence to feed and prepare for the market.

The fastest quarter ever made by a trotter was trotted by Lou Dillon when she pulled her owner, C. K. G. Billings, in a wagon an accurately measured and timed quarter on the New York Speedway in :25¾, which is a 1:43 gait.

SADDLE and SHOW HORSES

One of the features of the Denver horse show, January 22 to 27, will be the special high school exhibition of the celebrated mare, Belle Beach. This mare is conceded to be the peer of all present day high school animals and her appearance is always well received by a horse show audience. She is owned by Dinks L. Parrish of St. Louis and exhibited by Tom Bass, the veteran trainer of Mexico, Mo.

◈ ◈ ◈

The announcement of E. D. Moore selling his handsome saddle gelding, Greyhurst, to J. C. Hart, of Chicago, will not cause wonder to those who attended the recent International Horse Show. It was expected that a big sale of this clever gelding would be made before the termination of the show, as he was the most popular three-gaited horse exhibited. He won every class he was shown in and the championship. The Eastern judges declared with some other color he would bring $10,000 in New York. Greyhurst is by Rex McDonald, and while Moore has been criticised by horsemen for giving him so much attention, his recent success in the show ring and sale proves the owner's judgment was the best. Greyhurst was also exhibited at the P.-P. I. E. and was a winner here.

◈ ◈ ◈

The selection of Col. J. G. Lockridge, of Fayette, Mo., to serve as one of the judges at the coming Denver horse show, follows the long established custom of the Denver management to get good "timber." This association has the reputation of having always had the fairest of judges and their show, coming early in the year, usually causes other associations, who noting the satisfaction the judges give at Denver, select the same men. In other words, when a man judges at Denver, one can count on seeing him in the same capacity in the middle west all during the season. Col. Lockridge is one of the best informed horsemen in Missouri, having been a prominent dealer many years and served as judge at prominent fairs and shows and presiding over many race meetings.

◈ ◈ ◈

E. D. Moore, of Columbia, Mo., reports the sale of the good three-gaited gray gelding, Greyhurst, to J. C. Hart, and the gelding, The Captain, to W. N. Rasmussen, both of Chicago.

◈ ◈ ◈

A carload of horses, including the stables of Tom Bass, of Mexico, and Blades & Holeman, of Holliday, was shipped from Mexico this week to Denver, where the horses will be shown at the National Western Stock Show. Included in the shipment were a pair of polo ponies, owned by Mr. Walter Hill, of St. Paul, that will be re-consigned from Denver for Los Angeles, Cal., where Mr. Hill will spend the latter part of this winter and will take part in the polo games at Pasadena.

◈ ◈ ◈

T. P. Harrison and John Yates, the well known North Callaway county mule feeders, got $230 a head for 100 head of mules sold to Harry Gillen, of the Gillen-Heiman-Harper Mule Co. of National Stock Yards.

◈ ◈ ◈

Arrangements have been made by Hans Berg, acting for the owner, Mr. William Wallace, of Philadelphia, to place the stallion, Marshall Chief, in charge of Ed N. Hamilton, near Mexico, for the 1917 season. Mr. Hamilton now owns the good young stallion, All McDonald.

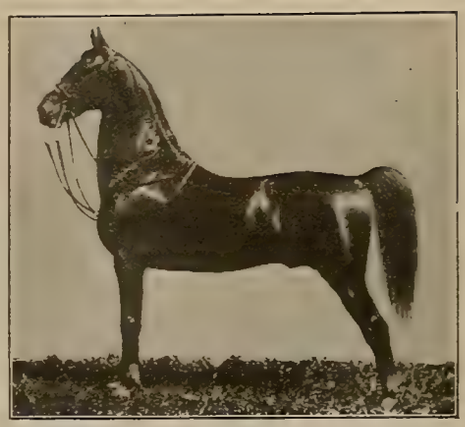
◈ ◈ ◈

Noted Show Mare to Matron Ranks.

The Breeder and Sportsman has been informed that H. C. Downing, of Des Moines, Iowa, owner of the celebrated show mare, Cigarette, contemplates sending her to the court of My Major Dare, Longview Farms, premier saddle stallion. Cigarette is by Bourbon King, and two years ago was one of the most successful saddle horses before the public. She was purchased by Mr. Downing at Mexico, Mo., last spring from the estate of the late George Barton, who was one of the best known sportsmen in the country.

E. G. Bylander Appointed Secretary, Mo. State Fair.

The most popular appointment the Missouri State Board of Agriculture ever made was at their recent meeting, when E. G. Bylander, for many years assistant secretary ,was made secretary of the state fair. Mr. Bylander is the best fitted man for this position available and his appointment will meet with the approval of live stock breeders all over the country. His appointment does not only mean success to the state fair and live stock interests generally, but that politics are to be excluded from that institution. It was a matter of getting the best man regardless of his political affiliations.



Mr. Bylander was appointed as a compromise between the supporters of the present incumbent, E. T. Major, brother of the Governor, and those who opposed him. Mr. Major has been secretary for two years. He probably will return to his home at Bowling Green, where he has real estate interests.

Mr. Bylander is recognized by fair managers and secretaries everywhere as one of the most capable men in the business. He is a tireless worker, conscientious in his dealings with the patrons and well informed on all subjects connected with the management of a big fair. The 1917 fair, which will be the biggest in the history of the association, will be conducted the second week in October. The purses for every department have been materially advanced and good entry lists in all events are expected. It is probable that the $2500 stake for gaited horses will be discontinued unless a concerted effort on the part of saddle horse men is made.

The association is willing to give the money and realizes this stake is the best drawing card of their fair; however, it has been hard to get a sufficient number of entries to fill the event, and saddle horse breeders must show some interest if it is to continue.

Advertising Brings Quick Results.

"My little want ad in your paper certainly brought results," writes Wm. Kuhlmann, of Winona, Minn. He adds: "So far, only a short time since it appeared I have had two inquiries from Kentucky; two from Missouri; one from Colorado and one from Virginia."

GOLDEN KING, recently sold to J. A. P. Ramsdell by George Ford Morris, of Fordacre Farm, Eatontown, N. J.

J. A. P. Ramsdell, of Powelton Farm, Newburg, N. Y., has lost by death the noted saddle stallion Korosco, sire of many blue ribbon winners at Eastern shows, and has replaced him with Golden King, a widely known sire that was formerly in the stud at Adirondack Farms, Glens Falls, N. Y. The new horse is a chestnut, about 15.2 hands high, and is regarded as one of the handsomest of living saddle stallions. His breeding shows the close relationship between the Kentucky saddle horse and the trotter, his sire, Wilson's King, having been a son of the registered trotter and saddle horse Harrison Chief, by Clark Chief ,son of Mambrino Chief, the sire of Lady Thorn 2:18¼. Golden King's dam, Indian Queen, was by Wyatt's Red Cloud, a registered saddle horse by the registered trotting horse and saddle horse Indian Chief, son of Blood's Black Hawk, by Hill's Vermont Black Hawk, the sire of Ethan Allen 2:25½. Both Wyatt's Red Cloud and Wilson's King were out of the same mare, a daughter of the trotting horse Parsons' Abdallah, by Alexander's Abdallah, the sire of Goldsmith Maid 2:14. The granddam of Golden King was by Governor Wilkes, son of George Wilkes 2:22, and Daisy Burns, by Indian Chief, sire of Wyatt's Red Cloud.

A "Bred-in-the-Bone" Record Breaker.

Irene's Cherry 285828 has earned the title of "World's Champion Senior Two-Year-Old Jersey." She went on test at two years and eleven months of age, and in the ensuing 365 days produced 12,567.7 pounds of milk, containing 749.87 pounds of fat. This means 882.2 pounds of 85 per cent butter and easily exceeds the record which was made by Lad's Lady Riotress Irene, the former champion.

The new champion is a direct descendant of Loretta D. and Ida Marigold. It will be remembered that Ida Marigold was the "best cow of any breed" in the cheese test at the World's Columbian Expositions at Chicago and St. Louis, and Loretta D. was pronounced "best cow of any breed" in the tests for "economic production of butter-fat and butter" and "economic production of milk for all purposes of dairying" at the St. Louis Exposition.

It is interesting to note that Irene's Cherry is the first cow to go on official test at Fewacres Farm, located at Wauwatosa, Wis., where is located one of the greatest county agricultural schools in America. She was bred by Clark & Emery of New York, and sold to Mr. F. D. Underwood, her present owner, before she was two years of age.

◈ ◈ ◈

Dillcara, one of the best bred of all the Sidney Dillons, will stand for service at Pleasanton Driving Park this year. His fee will be $50 to insure.

◈ ◈ ◈

That grandly bred stallion, Marse Abe, son of the great Yankee and the mare Halo by St. Blaise, will be in service at Pleasanton this season. Fee $50. Read the advertisement for further particulars.

Proposed Change in Thoroughbred Registration.

By an amendment to The Jockey Club's registration rules it is proposed to abolish the so-called "five cross" rule in the registration of thoroughbreds. The present rules provide that "only those horses are eligible for registry which have either five uncontaminated thoroughbred crosses or which authentically trace through or to animals recorded in the first six volumes of the American Stud Book, or in a recognized stud book of another country." The new rule says:—

"Only those horses are eligible for registry which authentically trace, in all of their lines, to animals recorded in the American Stud Book or in a recognized stud book of another country."

An explanatory note says: "It is deemed essential to omit the five cross rule, as it is misconstrued by the general public and leads them to believe that a thoroughbred can be made to order by five top crosses."

In the first seven volumes of the American Stud Book, compiled by its founder, Colonel Sanders D. Bruce, he accepted as thoroughbred any horse having five top crosses of registered blood, and as a matter of fact registered many that could not qualify under this rule. In the last volumes compiled by him the short bred horses were in an appendix, where he admitted anything having two crosses or more. When the Jockey Club came into possession of the Stud Book, in 1898, this appendix was abolished, and horses were thereafter registered in the body of the book only when they could show the requisite five crosses or traced in all lines to animals in previous volumes of the book. Now it is proposed to close the doors to any more "cold" blood, however remote, and follow the example of the English authorities by limiting registration strictly to the offspring of registered sires and dams. And since horses must be registered before they can start on Jockey Club tracks the races of the future may be for the first time in this country exclusively for thoroughbreds.

Two new rules have been proposed by the Kentucky State Racing Commission. The first is to the effect that at race meetings at Louisville and Latonia the average amount of money shall be $800 cash and there shall be no race given to which is added less than $600. At Lexington the average is fixed at $600 and the minimum at $500. No stake, except selling stakes, shall have less than $2,000 added at Louisville and Latonia and $1,000 at Lexington.

The other rule reads: "In any race that fails to fill and is declared off, the names of all horses that were entered shall be publicly posted in the secretary's office not later than 1 o'clock p. m. on the day of which it was to be run."

A resolution to give premiums at County fairs for weanlings, sired by thoroughbred stallions belonging to the Kentucky Breeding Bureau, which is fostered by the State Racing Commission by pro-rata subscriptions from race tracks of the state, was adopted, the resolution having been the outgrowth of a suggestion made by James P. Ross, superintendent of the Lexington track.

◈ ◈ ◈

John E. Madden has made an important sale of twenty-one yearlings to Hal Price Headley and Mr. Headley has taken over with the lot their engagements in the Futurity of 1918, for which they are eligible. Each is by Star Shoot and the colts are from Bold Girl, Busy Maid, Blue Grass, Courtplaster, Doria, Dorothy Hampton, Flora Pomona, Mamie Worth, Miss Granville, Miss Kearney and Raglan. The fillies are from Decoy, Dolly Higgins, Fair Louise, Janeta, Lady Tarantella, Little Buttercup, Lady Schorr, Pastorella, Pedigree and Sweet Majoram. The Courtplaster colt is a twin.

◈ ◈ ◈

Trampfast (2) 2:12¼ and The Exponent 2:11¾ gained credit with twenty-six new performers in 1916 and when official returns are announced the number will, in all probability, be increased.

◈ ◈ ◈

Anti-Cattle Rustling Bill.

An anti-cattle rustling bill will be introduced in the legislature next week by Senator E. S. Rigdon of San Luis Obispo as a means of limiting depredations and thefts committed by cattle thieves. Rigdon's measure provides for a system of inspection of hides and cattle which would establish ownership at the time of sale. The measure was drafted in the interest of the Central Stockmen's association of California. The cost of inspection will be borne by the cattlemen themselves.

◈ ◈ ◈

Tagus Ranch Sells Herd.

Tulare, Jan. 13.—The Tagus ranch, north of Tulare, today closed a deal for the sale of 900 head of black Polled Angus beef cattle for approximately $100,000 to a Los Angeles packing company. It is the largest cattle deal that has been made here in years. The cattle are to be fattened on cottonseed meal at the Tagus ranch until delivery to the packing company, which will be extended over the time between now and next May. The Tagus ranch was stocked with black Polled Angus cattle more than two years ago, when the stock was imported from Texas.

◈ ◈ ◈

Star Winter, that a few years ago won a lot of money in the Grand Circuit and took a third-heat record of 2:05, has been sold for a show horse.

◈ ◈ ◈

A $20,000 offer was refused for Emma Magowan.

Notes and News

Yes; there'll be a California circuit.

◈ ◈ ◈

There will be at least ten meetings between August 1st and October 6th.

◈ ◈ ◈

The old weight rule has been done away with by the new rules of the A. T. A. and N. T. A.

◈ ◈ ◈

The substitution of "shall" in the place of "may" is quite noticeable in the new rules of the N. T. A.

◈ ◈ ◈

Ted Bunch and the pacer Zombrino 2:06¼ made a good looking picture for the title page of the Horse Review last week.

◈ ◈ ◈

Harry Brusie, of Hartford, Conn., won $13,785 in purses racing on half mile tracks in 1916.

◈ ◈ ◈

There is to be two weeks' racing on the Youngstown, Ohio, half mile track from June 26th to July 6th this year, and the purses will range from $500 to $2500.

◈ ◈ ◈

It is stated on good authority that the pari mutuel bill prepared by the Golden Gate Thoroughbred Association will not be introduced at this session of the California legislature.

◈ ◈ ◈

If your horse that you value so highly dies and there is no insurance money to collect you will feel his loss a great deal more than if you had a policy on him in The Two Hartfords.

◈ ◈ ◈

The thoroughbred stallion Joe Carey, sire of many good winners, and himself a high class race horse, will stand for public service at Pleasanton this season, fee $50. See advertisement for tabulated pedigree.

◈ ◈ ◈

An ideal circuit of harness racing would start at Pleasanton and proceed in the following order: Petaluma, Santa Rosa, Dixon, Woodland, Marysville, State Fair, Fresno, Hanford, Bakersfield, Riverside, Ventura, Los Angeles, Phoenix.

◈ ◈ ◈

Mr. J. J. Kadderly of Portland, Oregon, recently sold his mare Tangerine by Bonnie Tangent and purchased a five-year-old Hal B. pacing gelding. Mr. Kadderly is much pleased with his Hal B. pacer and says this horse acts like an "Isser."

◈ ◈ ◈

John Kirkland is training a very fast pacer in the roan mare Helen Mistletoe by Hal B. This mare trialed an easy mile in 2:08 last fall for Kirkland and looked like an easy 2:05 pacer . Mr. Kirkland is wintering at Albany, Oregon.

◈ ◈ ◈

When the Blackhawk Stock Ranch gets its new quarters at the foot of Mount Diablo all fitted up, it will be the finest draft horse ranch in California. There are some excellent young sires for sale at the ranch now at Burlingame. See the advertisement.

◈ ◈ ◈

It is rumored that Thos. Murphy will campaign the pacer Zombrino 2:06¼ owned by Dr. Belt of Phoenix, Arizona, over the big ring next year. Murphy will have a hard time beating Ted Bunch's record of 18 wins out of 21 starts with this horse in 1916.

◈ ◈ ◈

Mr. J. S. Waddell, Secretary of the California Fair and Racing Association, has made the office of the Breeder and Sportsman his headquarters and asks that all communications be addressed him in San Francisco, care of this office, 366 Pacific Building, San Francisco.

◈ ◈ ◈

Harry J. S. 2:07¼, the pony trotter that forced Al Mack out in 2:08¾ and 2:09½ over the half mile track at Goshen last summer, is now credited with 32 winning races and earnings of $17,130. He has started 58 times in the last six years and has won a part of the purse in all but three of his races.

◈ ◈ ◈

The letter from Mr. M. L. Woy, of Fresno, to the convention called to arrange a circuit of harness racing, in which he suggested organization and pledged $50 to the cause, did much to start the ball rolling at the convention which resulted in the organization of the California Fair and Racing Association. And when C. A. Durfee heard the letter read he remarked, "Woy is all right and I'll subscribe to that cause myself." And he did.

L. L. Cannon of Penn Grove, Sonoma county, is breeding dual-purpose cattle on an extensive scale and finds them highly profitable. Mr. Cannon first started with Jerseys. He crossed them with Shorthorns and is mating that cross to pure bred Holstein bulls. He says his section of the country requires ruggedness and that these crosses produce this type as well as profitable dairy and beef cattle. Mr. Cannon says the fair at Santa Rosa will give a big stock show again this year and expects the herds of adjoining counties as well as their own. Mr. Cannon was elected president of the California Fair and Racing Association last Tuesday.

Charley Silva, owner of the Woodland Stock Farm, reports that the half mile track there is finished. It is 60 feet wide and is located inside the old mile track, with the exception of the home stretch which is the same for both tracks. The turns are well thrown up and as soon as the soil settles it will be as fast a two-lap ring as there is in the country.

◈ ◈ ◈

Report has it that Peter the Great 2:07¼, the greatest of all sires, is to remain in Kentucky for another season. The purchase of so many horses recently by Mr. Fletcher, principally brood mares, gave rise to the belief that the son of Pilot Medium and Santos would be removed to the splendid Indiana farm that has been fitted up by Mr. Fletcher.

◈ ◈ ◈

Following the fashion set by C. K. G. Billings about ten years ago, more and more men who ride for exercise in Central Park, New York, are using fast trotting horses under saddle. No one who has seen Mr. Billings mounted on the champion trotter Uhlan 1:58, can doubt the exhilaration the fast trotting saddle horse affords to a good rider when going a 2:20 clip on the bridle paths, while for exercise there is admittedly no other saddle gait like the trot.

◈ ◈ ◈

Lou Dillon 1:58½, the fastest of trotting mares, gave birth on Thursday, January 11th, to a filly by The Harvester 2:01, holder of the world's record for trotting stallions until last year. The royally bred youngster was foaled at C. K. G. Billings' Curles Neck Farm on the James river, near Richmond, Virginia. Lou Dillon was barren in 1915, after having produced Lou Billings 2:08¾, Expressive Lou 2:08¼, Ben Billings 2:07 and Mack Dillon 2:22¼.

◈ ◈ ◈

It behooves every harness horse owner, trainer and driver to get a copy of the new rules as soon as they are printed and read them over carefully before he enters or starts to race horses this year. The rules are now identical for both American and National tracks, and there are a number of important changes. Every horse must now be entered in the name of its owner or duly authorized agent, and every stable name must be registered. The new rules will be ready in pamphlet form very soon.

◈ ◈ ◈

My Irene S. (2) 2:28¾, great broodmare by Petigru 2:10½, and dam of Esperanza 2:07½, Zorene 2:10¼, Carl (3) 2:14¼ and two or three others, brought $775 and was bought for Mr. C. K. G. Billings, owner of Curles Neck Farm, Virginia, at the Chicago Sale last month. She was stinted to Carlokin in 1916 and W. G. Durfee, who consigned her to the sale, believes her to be in foal. However she did not look to be with foal on the day of the sale and was knocked down for the amount named. Palmer L. Clark, president of the Chicago Sales Company, says that My Irene S. would have brought $2500 had she shown to a certainty that she was carrying a foal.

◈ ◈ ◈

One of the prominent rancher-stockmen of California, who attended the meeting of fair managers and secretaries in San Francisco this week, was J. W. Jennings, of Tehachapi, Kern county. Mr. Jennings is one of the directors of the Kern county fair at Bakersfield and represented that association at the meeting. He says the association will offer liberal prizes for every class of pure bred stock this year. Their 1916 fair cleared $3,000 and it was their first meeting. Several hundred head of stock was exhibited and a big race meeting held. Mr. Jennings is the manager of the Ramina Ranch, and stock from his ranch won 21 prizes at last year's fair. They have a magnificent band of Percheron and Shire horses, which are proving profitable, and a herd of pure bred Jersey cattle comprising 105 head. He is preparing 30 head of stock for the 1917 fairs of that section of California.

◈ ◈ ◈

Rearing an orphan colt is a tedious task and requires patience, attention to details and cleanliness. Cow's milk is the logical substitution for mares' milk, but as it is lower in per cent of protein, fat and ash than mare's milk and higher in per cent of water and milk sugar, allowance must be made for this. Add enough warm water to a tablespoonful of sugar—preferably white sugar—to dissolve it and then add from three to five tablespoonfuls of lime water and enough milk to make a pint. Feed one-fourth of this mixture every hour for a few days, gradually lengthening the intervals between feeding and increasing the amount given at a feed as the colt grows older. It is important to warm the mixture to body temperature before feeding. At first, especially, a bottle and nipple probably will be found the cheapest and most satisfactory means of inducing the colt to take the milk. If the colt scours, cut down on the amount of milk and give two to four ounces of a mixture of two parts of castor oil to one part of sweet oil. At three or four weeks old the sugar in the milk may be discontinued and at three months the colt should be on a ration of all the sweet milk it will drink three times daily. As soon as possible teach the young colt to eat grain and alfalfa and allow it access to grass. Crushed oats and a little bran make the best grain feed, but if these are not available one may substitute crushed corn and bran in equal parts by bulk with a little linseed meal. A colt should be given opportunity to nibble alfalfa from the very beginning so as to make a lot of strong growth.

Writing from Vienna, Austria, on October 25th, Ira Ryerson has informed his friends in Goshen that he won eighty races in 1916, with two weeks more remaining before the close of the campaign.

◈ ◈ ◈

"All horses must be entered in the names of their bona fide owners, and must so appear in the published lists of entries," is the wording of a new provision in the turf code, but owners may still keep their names out of print by using a stable name, which must be duly registered.

◈ ◈ ◈

The racing string of Capt. David Shaw, of Cleveland, for the coming season will consist of Peter Mc 2:03¼, who will be raced through the Grand Circuit; Miss Rejected 2:05½; Prince Loree, matinee 2:13½; Miss Eleata (3) by Peter the Great 2:07¼, dam Eleata 2:08¼ by Dexter Prince, and her four-year-old sister, Eleata the Great.

◈ ◈ ◈

The New York Herald of last Sunday said that H. D. Beavers, who handles the highest class of Ohio drafters, was on the market for the third time this winter on January 8th. He had a grand lot of Percheron and Belgian geldings, some of which weighed close to a ton. Brewers, contractors and coal dealers got the most of them, at prices ranging up to $425 for singles and $825 for teams.

◈ ◈ ◈

The first important special sale of show, harness and saddle horses held this year is announced in New York by Miss Constance Vauclain, of Philadelphia, who will dispose of twelve noted prize winners from Broadlawn Farms. The horses will be shipped to New York and the sale will take place on the afternoon of Wednesday, January 31. In the consignment are Lady Dilham and Elegant Dilham, easily the most successful pair of bantam hackney high steppers ever seen at American horse shows. Miss Vauclain paid $4,800 for the pair at auction less than a year ago, and exhibited them with much success at the summer shows, winning twenty-nine first prizes in single and double harness.

BILLINGS MAY MOVE TO CALIFORNIA.

Owner of The Harvester 2:01, Lou Dillon 1:58½, Uhlan 1:58 and William 1:58½ Likes This State.

Surprising news came from New York last night, says Guy T. Rockwell of the Cleveland Plaindealer of Jan. 14th, that C. K. G. Billings, millionaire horse fancier, has no further use for Curles Neck Farm, his 5,250-acre stock farm on the James river, Richmond, Va., which he bought for years ago for $1,000,000.

He is willing to part with the historic property for $700,000 or even less. Ten days ago Mr. Billings sold for less than its value Tryon Hall, his country estate at the north end of Manhattan Island, to John D. Rockefeller Jr., as a site for a public park, and a few days later he gave a large plot of Chicago real estate as a site for a medical research laboratory such as Mr. Rockefeller has established in this city.

In the absence of definite information the significance of these real estate deals was said today to be that Mr. Billings is through with the east and that he plans to make his permanent home in California, and he is now at Santa Barbara where he has spent several winters.

Mr. Billings purchased the farm four years ago and immediately commenced to modernize it. He has spent thousands of dollars in razing old buildings, erecting new ones and improving the estate. In addition, he has invested heavily in brood mares, owning at present fifty or more carefully selected matrons who are bred in the deepest of purple.

The farm consists of 5,250 acres of useful land, a liberal share of which is marshy and is used as a game preserve. Quail, snipe, teal, grouse, wild turkeys, ducks, geese and various other birds are to be found in abundance, while it is a common sight to see deer grazing with the brood mares.

There is a mile training track on the place, over which William is being trained this winter, while all told there is fifty miles of road on the farm for horse and auto.

Buildings are numerous at Curles Neck. In addition to the mansion, which is a roomy brick house of Colonial design, each department head has his own house. Among these is the head farmer, assistant farmer, the dairyman, the game warden, the mechanician. Then there is the boarding house, the pump house, etc.

There are numerous buildings for horses, too. There is a training barn, 470 by 60, that has a double row of box stalls down the center and each stall is 12 by 14. Around the stalls is a track that is used for jogging horses on inclement days. This barn is larger than the mammoth structure at North Randall, in which ninety-six horses may be accommodated.

There is a new barn for colts, a new barn for brood mares, a saddle horse barn, a stallion barn, several barns for hay, as well as several old barns still used for housing mares and colts.

The entrance to the farm is over a stone bridge that cost $50,000.

Curles Neck is the home of Lou Dillon 1:58½; The Harvester 2:01; Uhlan 1:58, and William 1:58½, all champions. The brood mares purchased upon advice of Ed Tipton and Doc Tanner, graze in pastures of 150 acres each, and have water to drink from artesian wells, some of which are 700 feet deep.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

U. S. Field Trials.—January 1, 1917, marked the opening date of the annual trials of the United States Field Trial Club, at Grand Junction, Tenn., the historic old town where history has been written on the scrolls of the bird dog records during the past forty or more years.

In the present trials there were twenty-six starters in the Derby and thirty-one in the All-Age. It is not a record-breaking mark, it is true, but nevertheless it is a healthy average and about on a par with the other important clubs of the season.

Mary Montrose proved to be the winner of the Derby and in this stake she showed her superiority over the rest of the field in a decisive manner. Mary ran two brilliant heats. She proved in this stake that she can handle game as perfectly as an All-Age dog, that she is a good ground-worker and that she has the stamina. On the morning when she ran her one-hour heat, which is one of the stipulations in the United States Derby that winners of first and second must go this length of time, the ground was soggy from the heavy rains of the night before.

Mary Montrose is a very handsome white and liver pointer bitch, by Comanche Frank, out of Lorna Doone, and one of the famous William Ziegler string, which were picked up early in the season by Bob Armstrong for J. J. Graham of Syosset, Long Island, N. Y. Bob Armstrong handled the bitch in this stake, as he has been doing mose of the season, and he never did a better piece of work than he did at Grand Junction.

The second series and winners were:—Mary Montrose with Brightfields Freckles; Comanche Rap with Concho Dick; Miss Peg with Count Kinsman; Royal Flush with Master Peg.

Result:—1st, Mary Montrose. 2d, Concho Dick. 3d, Master Peg.

The winner of the All-Age Stake was Joe Muncie and second went to Lewis C. Morris. This is a case of history repeating itself, for a year ago these two dogs were placed the same way in the United States trials. Reams about Joe Muncie have been written during the three years he has been before the public and to say much more now would be merely a reiteration of his good qualities and an accentuation of his faults. Joe is a wide-going, indefatigable ground worker, and withal a dog with o nose, for there are few days which find more birds than does Joe. But he is not intense on his game. It is well known by this time that he is now the property of Benjamin Weil of Alexandria, La., and that he has been in Avent's string since last February.

Lewis C. Morris, grand pointer that he is, did not seem like the same Lewis of a year ago. Lewis was clearly not himself and under the conditions could not go higher in the stake. Gilchrist, however, has full confidence in the dog and feels assured that by the time the two championship stakes are run the dog will be himself again.

Square Edges, the pointer bitch which Herbert Fishel campaigned in the Derbys of two years ago so successfully, was placed third.

The second series and results were:—Lewis C. Morris with Joe Muncie; Candy Kid with Square Edges.

Result—1st, Joe Muncie. 2d, Lewis C. Morris. 3d, Square Edges.

Ducks vs. War Again.—Sacramento, Cal—The rice growers of the Sacramento valley have declared war on ducks and other feathered animals that virtually unmolested have lived well and luxuriantly on the growing rice crops. They will seek to have the legislature enact a law which will permit them to kill, in and out of season, all wild fowls in their territory.

Stories of depredations committed by ducks in the rice fields have been related to the legislators by representatives of the growers and they obtained a sympathetic hearing from Senator Herbert W. Slater of Santa Rosa, chairman of the Fish and Game Commission committee.

At present the farmers are liable to arrest and punishment under the laws of the Fish and Game Commission should they attempt to protect their property by shooting game birds out of season. Either the ducks and birds must go or a budding industry perish, so the growers have told the legislators. They will therefore ask that a protective measure be passed in their interest.

California Coursing Club.—Sacramento, Cal.—San Pablo Girl was the winner of the 16 dog San Francisco stake, and Irish Linnet was the winner of the 12 dog Oakland stake at the first coursing meet of the season of the California Coursing Club of San Francisco, held at Franklin on Sunday. The San Francisco stake carried a $50 first price and the Oakland stake carried a $40 prize for the first place.

Oakland was the runner-up in the San Francisco stake, while Jim Long ran second in the Oakland stake.

Many San Francisco, Oakland, Richmond and Sacramento sportsmen were on hand to witness the meet in spite of the cold weather . The officers of the California club are satisfied with the first meet, and are contemplating another meet at Franklin in the near future.

The following are the results in the first tie in the San Francisco stake: San Pablo Girl beat Oakland Beauty, Hellover Swell beat Sure Mike, Expensive Board beat Riley's Tralee, Napa Jack beat Sad Sam, Oakland Beau beat Gaudy, Oakland Dandy beat fashion Clothes, Isleton beat Majule, and Queenie beat Granaile.

In the second tie San Pablo Girl beat Hellover Swell, Expensive Board beat Napa Jack, Oakland Beau beat Oakland Dandy, and Isleton beat Queenie. In the third tie San Pablo Girl beat Expensive Board and Oakland Beau beat Isleton. Oakland Beau was winded at the end of the third tie, so San Pablo Girl was declared the winner.

In the first tie of the Oakland stake Steam Trawler beat Louie's Best, Oakland Girl beat the Fretter, Irish Linnet beat Los Molinos, Young Blade beat Alfred M., Jim Long beat Mark West, and Pride of Richmond beat White Sox.

In the second tie Steam Trawler beat Oakland Girl, Irish Linnet beat Young Blackie and Jim Long beat Pride of Richmond.

In the third tie Irish Linnet beat Steam Trawler, and Jim Long ran a baye. Irish Linnet had little difficulty in beating Jim Long in the final dash.

Portland Club.—Mrs. Ada Schilling, after a much-needed rest, went out to Everding Park January 7th and returned with the high average of the regular weekly shoot. Her score was 100 per cent, and the next in line was her husband, C. J. Schilling, and James E. Reid, both professionals, and each with a mark of 96 per cent. Twenty-two contestants were at the grounds and enjoyed themselves.

Frank M. Templeton, winner of the main event in the Pacific Coast handicap last year, has issued a challenge for the beautiful W. C. Bristol trophy for 20-gauge guns now held by Henry R. Everding, the secretary-treasurer of the club. Mr. Everding so far has been able to defend it against all comers, and he will have a chance to show his superiority over Mr. Templeton. The provision of the challenge is that all contestants must shoot a 20-gauge gun.

The cup must be defended and won five times before it becomes the permanent property of any shooted. The competition is open to other than members of the Portland Gun Club, and plenty of 20-gauge guns are kept at the clubhouse for the use of patrons. Fred E. Butler, said to be one of the best 20-gaugers of the Lewiston, Idaho, Gun Club, will make a special trip to Portland to contest for the cup. The event will be for 25 birds and will be shot following the Templeton match.

Following are the scores: E. H. Keller 80, Mrs. Ada Schilling 100, Carl J. Schilling (professional) 96, C. Meach 56, O. J. Clossett 64, A. W. Strowger 80, James K. Simpson 76, C. L. Diven 76, A. L. Zachrisson 88, A. Erickson 80, James P. Bull and E. B. Morris, both professionals and using 20-gauge guns, 68; E. E. Long 68, W. C. Bristol (20-gauge gun) 72, Jas. E. Reid (professional) 96, J. S. Crane 64, Miss Gladys Reid 84, Frank M. Templeton 88, Henry R. Everding 84, L. L. Mulit 76, E. L. Clark 72, and Al Seguin 68.

Starts Fox Ranch—About a mile south of Kettleby, Ont., a fox ranch has been started by Mr. Walls. He is associated with other men experienced in the raising of foxes for fur. They have at present 19 fine specimens ranging from black, silver and cross to the ordinary red species. The fancy animals were secured in the far north from Indians, and are of great value.

These animals are valued by the owners at ten thousand dollars. They are confined in double wire pens, the top and bottoms also being of wire netting. Around the pens containing the matched mates ars also two high wire screen fences to prevent escape or molestation. So far the Walls' have not lost a single fox and they are all healthy and very lively. With good luck there will be a big increase in April and May.

Seal Herds Increase.—The seal herds on the Pribilif Islands in Behring Sea have increased so rapidly since killing of the bur-bearing animals was prohibited that the Government will begin to kill them regularly next year, according to a statement made by H. J. Christoffer, assistant agent for the United States Bureau of Fisheries, on his return from an inspection trip to the islands. Mr. Christoffer made the trip on the steamer Elihu Thomson, which left September 5th with winter supplies for the islands. The Thomson brought back 7,000 skins which were taken from seals killed to supply food for the natives on the islands. The skins will be shipped to St. Louis, where the Government will sell them at auction.

GAME REFUGES FOR CALIFORNIA.

Expert Locates Chain of Sanctuaries From Mexican Border to Oregon.

Wild game will have a chance in California when the series of game refuges now being located by Harold C. Bryant for the State Fish and Game Commission, is approved by the Legislature. A fair chance, is the way sportsmen put it—a chance for big game to rear young unmolested by any gang of pot hunters who possess the price of an automatic rifle.

And just how much chance the men who are planning these sanctuaries intend to give wild game is here told for the first time. Forest rangers, State deputies and resident mountaineers have co-operated with the State officials and have furnished field data which is now being plotted by Bryant.

The scheme is to locate a series of the refuges extending in two chains, from the Mexican border to Oregon along the coast; the other through the Nevada Sierra mountain. These refuges are proposed:

San Diego county—A Laguna mountain refuge, 36 miles from San Diego, near the eastern boundary of the National Forest, 51,840 acres.

Sespee river, Santa Barbara county—The largest part of the watershed of the Upper Sespee, 125,440 acres.

Sisquoc river, near the headwaters—39,680 acres reserved. Sisquoc is a tributary to the Santa Maria.

In the Sierra Nevada mountains, the chain begins with a refuge near the head of the South Fork of the Kern river.

On the Kings river a preserve of 33,400 acres is to be set aside. The site is not yet fixed.

Northerly, two national parks, the Sequoia and Yosemite, form two links of the chain. The next refuge is in eastern Amador county, where 57,600 acres will be set aside on Panther creek.

American river, between the Rubicon and Middle Fork of the American, 64,000 acres will be reserved.

Feather river—That region north of Hartman bar to be reserved.

Tehama county—The headwaters of Mill creek and a part of the Deer creek watershed. Size is not determined.

Lassen county—Eagle lake, section on west shore, amounting to 47,580 acres, to be set aside.

Modoc county—Pine creek headwaters to be made a refuge, amounting to 57,000 acres in the lava beds.

McCloud river—Southeast of Castella, between the Sacramento and McCloud, 69,000 acres.

Klamath river, west of Gottville, about twelve miles, a tract of 8960 acres.

Mendocino county—Section in Eastern Mendocino and Western Lake, in vicinity of Hull mountain, of 37,00 0acres.

Monterey county—Headwaters of the Arroyo Seco.

Hunting only will be forbidden in these areas. Fishing and the bearing of arms will not be stopped, and is not stopped in the game refuges which now exist. At present permits are issued for the hunting of predatory animals. This custom will be continued if the new refuges are accepted, according to Bryant.

Sportsmen have one real objection to the establishment of these refuges, and it has been voiced by many of those who have studied the game conservation problem. That is, how to make it possible for a hunter to transport game, not killed in the refuge, through the refuge. In those protected areas now existing the law declares that "possession" of game is a violation of the law.

The hunter may ask, and with some force, how am I to get my game home when a trail runs through the refuge?

To which Bryant makes reply:

"We hope eventually to establish a tagging system. A deputy in each refuge would tag all game, killed outside and brought to him. This scheme would allow hunters to travel through the areas without delay.

"We have had little trouble of this kind in the reserves now established, although they are so situated as to discommode hunters much more than the new ones we propose."

New Angling Licenses—The new angling licenses of 1917, due January 1st, have been received by the Fish and Game Commission and are being distributed among its resale agents. The new licenses are both handsome and instructive, printed in blue, with a fine engraving of the Mt. Whitney hatchery, just completed, the most substantial improvement it has ever been possible to erect for fish and game in the south. The solid architecture and handsome appearance of this imposing pile which harmonizes so perfectly with the rugged grandeur of the Sierras is well shown.

All who fish from the surf, or troll for yellowtail, albacore, barracuda, bass, bonita, tuna or other game fishes as specified, require license and a lively demand has arisen from sea fishermen, although trout anglers will be quiet perforce until May.

On the back of the license appears "Your dollar is used to maintain sixteen hatcheries and egg-collecting stations; raise and distribute 18,000,000 trout annually; build the most modern hatchery in the world; patrol 157,000 miles of fishing streams, make California's hatcheries the best in the world and make California the Anglers' Paradise."

AUTO LIGHTS FOR NIGHT TRAP SHOTS.

Innovation Is Tried by Local Club and Sport Is Enjoyed by Twenty-five Gunners.

Dating back last September you may recall an account carried by the Breeder and Sportsman of a team match between the Crystal and Western Gun Clubs, both located near Newark, Cal. This is set forth because the Crystal Club just paid the bet last Saturday night of an elaborate turkey dinner at the club house and it led to something brand new in the alluring sport of trapshooting.

Some twenty-five gunners enjoyed the hospitality of the Crystal members and as a side entertainment a proposal was made to have a trap shoot. Ere the dinner was finished it was naturally nightfall and the proposition of a shoot in the darkness was never tackled before by shooters about the bay. There have been tales of the Portland Club gunners enjoying their favorite pastime in the evenings and in the East it is no uncommon thing.

So, where there's a will there is a way and the boys tackled the job. A trap was already installed in back of the clubhouse and the automobiles that were used to transport the members to the party were drawn up behind the traps. The headlights were then put to work and the rest was simple.

To show what success the arrangement was the boys made the following creditable scores out of twenty-five targets: Bray Thorning 21, Al Durney 20, Bill Ellis 20, Charles Linderman 18, Ned Williams 17, Walter Plummer 16, Otto Keifer 16, Heine Meinecke 15, Jack Trainor 15 and Jack Van Sycklin 15.

"It was the greatest kind of sport," reports Bill Ellis. "We had the lights trained on top of the trap house and a couple of the lights that worked freely followed the targets. It was no trick at all to see the rocks and the boys busted into them with great delight . Of course, we did not set the traps for any extreme angles as we were taking no chances of losing the targets in the darkness.

"I believe trap shooting at night can be made a great success," he continued. "The proper way would be to have the searchlights inside the trap house and play them on the targets. Just enough light so that the sights could be seen would be needed behind the shooters. Even with the automobile headlights everything worked nicely and I know we all enjoyed the novelty of it."

That was not the only feature of the outing. Charley Linderman of the Western Club and Bray Thorning of the Crystal Club were matched for a "chicken fight." Rivalry was keen and a spirited contest ensued. To give an idea of the struggle, Linderman weighs in the neighborhood of 265 pounds. Thorning, although outweighed fully a century by "Citronella," proved a gamester and through the decision of Senator Simms, who officiated as referee, he was declared the winner. He secured three out of four falls over Linderman.

Not satisfied with the large evening, the shooters tackled the traps again on Sunday and this time tried their skill in daylight. The scores on fifty targets were as follows: Bray Thorning 46, Al Durney 45, John Cavanaugh 43, Bill Ellis 43, Heine Meinecke (20-gauge) 39, W. A. Plummer 37, Ben Boyd 37, Otto Keifer 34, Nat Little 34, Herman Hertzer 34, Lance Baird 32, Senator Simms 32, Leon Winans 32, George Wagner 31, Frank Sarroll 31, Truman Weaver 29, Herman Wilke 28, Mike Stahl 28.

Los Angeles Club.—Henry Pfirrmann, Jr., champion trapshooter of California and Nevada, and who is known in the West for his deadly aim at the clay bird pastime, triumphantly blasted his way through twenty-five pairs of double targets Sunday at the Los Angeles Gun Club and won the H. E. Sargent trophy. His score was 43 out of 50. The results in all events follow:

Sargent event, 25 pairs of doubles from 16 yards—Henry Pfirrmann 43, C. W. Fish 39, H. D. Blanchard 38, V. A. Rossbach 38, E. K. Mohler 37, O. Council 36, W. A. Hillis 36, V. Powley 35, Wm. Kennedy 34, H. E. Sargent 33, H. Cline 32, Al Pachmayr 29, A. L. Rowe 27.

Take Home Competition:—At 75 targets: O. Council, 20 yards, broke 66; H. E. Sargent 16—63, V. Powley 16—66, W. H. Hillis 21—64, R. P. Riggs 16—64, J. Cline 16—64, E. K. Mohler 21—63, F. H. Teeple 20—63, V. A. Rossbach 18—63, H. Hickman 16—63, Mrs. H. Pfirrmann 16—63, C. W. Fish 20—62, H. Cline 19—62, S. Hart 16—61, H. D. Blanchard 20—60, A. Pachmayr 21—59, Wm. Kennedy 16—59, T. B. Sloan 16—57, A. L. Rowe 16—57, B. H. Carnahan 16—55, L. Mann 16—52, J. G. Griffith 16—38x50, J. H. Wearne 16—38x50, N. Israelson 16—29x50, S. E. Cole 16—28x50, W. A. Cornelius 16—86x100, J. H. Bishop Jr. 16—67x75.

Young America and Trapshooting.—It is positively unfair—in fact, unsportsmanlike, to place a boy or girl before a trap with "any old gun" in the thought that because it is only a child it makes no particular difference.

A poorly fitting stock will tend more to discourage a new shooter than anything else, not alone from the possible punishment which it delivers in the recoil, but the fact that the load will not land where the shooter looks.

The recoil of a correctly fitting stock is not punitive. The novice soon instinctively sets his muscles against it and is forever after immune from a lame shoulder.

Habit is strong in trapshooting and, once formed, is hard to break; therefore, start right.

See that your pupil assumes a natural position, with the right foot slightly to the rear of the left and body only a little inclined forward. You may have some very excellent shots in your club who shoot in poor position. Some squat, some bend way forward, while others place the right foot a half yard to the rear of the left and bend both knees.

Primarily this was all unnecessary, but they have formed the habit and it cannot be broken off. If your own form is poor, have your boy or girl copy that of some shooter who began right.—[By George Pesk.

TRAPSHOOTING FIXTURES.

May 8, 9, 10, 1917—Roanoke, Va.—The Interstate Association's Twelfth Southern Trapshooting Tournament, under the auspices of the Roanoke Gun Club; $1,000 added money. Winner of first place in the Southern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

June 20, 21, 22, 1917—Hartford, Conn.—The Interstate Association's Eleventh Eastern Trapshooting Tournament, under the auspices of the Hartford Gun Club; $1000 added money. Winner of first place in the Eastern Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

July 17, 18, 19, 1917—St. Joseph, Mo.—The Interstate Association's Twelfth Western Trapshooting Tournament, under the auspices of the St. Joseph Gun Club; $1000 added money. Winner of first place in the Western Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Vernon Club.—Owen Evans smashed 48x50 targets at the Vernon Gun Club Sunday and by doing so won the gold bar offered for the high run. Charles White was the runner up with a score of 47x50. In the practice event better scores resulted than in the prize event. Stanton Bruner made a 49x50 mark in practice, while Evans made 47x50.

A very large crowd attended the Vernon shoot and but for the stiff cold wind which blew across the traps even better scores would have resulted. There were twenty-one shooters present. Following were the results:

	Gold Hdcp.	Bar.	Practice.
C. W. Clement	16	43	44
Fred Grewell	18	44	22
Charles White	17	47	46
A. W. Bruner	18	45	44
Pete Dekeare	16	43	41
William Pugh	18	45	44
George Oliver	12	45	43
Fred Kimble	16	41	..
William Browner	18	46	..
O. Evans	18	48	47
K. Menzbubeh	16	40	..
S. A. Bruner	20	46	..
J. D. Dierdoff	18	46	42
Yocum	16	41	20
Bob Bole	17	45	44
Bruce	16	33	..
Schufer	16	35	..
Wilt	16	28	..
C. E. Groat	18	35	..
Mrs. Groat	18	41	..
George Mulford	16	45	44

A few ducks can still be found at Alvarado and scullboat men are getting fairly good bags at Alviso, At the latter place, however, men in the shore blinds are lucky to get a bead on a few strays.

LEADING SHOTS OF THE SEASON.

Fred Harlow Tops the Amateurs and Homer Clark Is Best of "Pros."

The amateur who can bust pretty close to 98 per cent for a season's shooting at registered targets is a mighty fine trapshot. And that is just what Fred Harlow, of Newark, Ohio, is. Harlow averaged 97.71 for 2010 targets, or, in other words, he broke 1968. This average is the highest ever compiled by an amateur trapshot. And it has only been bettered twice by the professionals, by Heer in 1910, and by Clark in 1916.

Only on two other occasions, previous to 1916, has the leader of the amateurs in average gone over 97 per cent. Day did it in 1910, and Henderson last year . Henderson was over the 97 mark in 1916, too, being next to Harlow with an average of 97.14 on more than 2500 targets. But for Harlow Henderson would have led the high average shooters for three years in succession.

Once before Harlow checked the Kentucky shot. That was in 1908. At that time Harlow was shooting off 16 yards, and Henderson from 19. They tied in the Grand American Handicap in Columbus, Ohio, and on the shoot-off Harlow won; 1916 was Harlow's big year. He was high average shooter in the Indians and Westy Hogans—the biggest tournaments outside of the Grand American. In the Hogans he broke 490 out of 500 targets, and the weather was far from being ideal for the pastime.

Following Harlow and Henderson in the amateur averages, come Mark Arie, of Thomasboro ,Ill.; H. B. Bonsar, Cincinnati, O.; C. H. Peck, Remington, Ind.; F. A. Graper, Custer Park, Ill.; R. A. King, Delta, Col.; J. R. Jahn, Davenport, Ia., and A. C. Skutt, of Morton, N. Y. The Middle West seems to have a monopoly on the average honors. The East only broke in with the late A. B. Richardson and Skutt, of New York.

The appended list shows how the leaders hit the targets for the past nine years:

Year.	Shooter.	Shot.	Bke.	Av'ge
1908	C. M. Powers	5690	5383	.9460
1909	J. S. Young	4730	4498	.9509
1910	J. S. Day	4280	4164	.9728
1911	W. S. Spencer	2100	2022	.9623
1912	Wm. Riley	800	767	.9587
1913	Bart Lewis	6080	5811	.9557
1914	W. Henderson	2050	1981	.9663
1915	W. Henderson	2800	2731	.9753
1916	Fred Harlow	2010	1968	.9771

That size and weight are not important factors in trapshooting was proven in 1916 by Homer Clark, of Alton, Ill., when he broke 2055 of 2100 targets shot at in tournaments registered by the Interstate Association. This gives Clark an average of 98 per cent, the highest ever compiled by a trapshooter, amateur or professional. The best previous average was 97.75 made by William H. Heer on 2000 targets in 1910.

Clark is the smallest in point of stature of the present da yprofessional trapshots. What he lacks in inches he makes up in ability. He is considered the best professional trapshot in America—even though he failed to win the professional championship held at St. Louis last August in connection with the Grand American handicap tournament. The championship was the only professional event held during the week that Clark did not win.

Clark is the proverbial iceberg when it comes to trapshooting. He never becomes flustered, never hurries, and his misses are rare. He showed his nerve and ability in the final championship match for the "E. C." trophy the Sunday preceding the G. A. H. The youngest of the array of great shots who had won the trophy Clark kept smashing his clays—as did all the others—for a few misses would eliminate one from consideration.

The doubles was the last order of business. With three pairs to shoot at Bill Crosby had a lead of five on Clark. There didn't appear to be a chance in a million of Clark winning—but he did. The heat got Crosby and he missed all six targets. Clark broke every one of his and won by a target. After Crosby missed his last pair it was up to Clark to break both of his—and all eyes were centred on him. He knew what he had to do—and did it.

Here is the list of the professional high average winners since 1908, which is the best evidence of the ability of the midget:

Year.	Shooter.	Shot.	Bke.	Av'ge
1908	J. M. Hawkins	5945	5745	.9663
1909	C. G. Spencer	8325	8092	.9720
1910	W. H. Heer	2000	1955	.9775
1911	Jno. R. Taylor	2100	2038	.9704
1912	W. R. Crosby	2000	1952	.9760
1913	W. H. Heer	5350	5205	.9730
1914	L. H. Reid	2225	2146	.9644
1915	C. G. Spencer	5620	5480	.9750
1916	Homer Clark	2100	2055	.9800

Annual Run Is On.—The salmon and striped bass which have been taking a siesta in the salt water while waiting for the first heavy rains of the season are now making their run to the spawning grounds, and from now on hook-and-line fishing, as well as seining, will be good. Both bass and salmon fishing will be good this season if for no other reason than that the state fish and game commission, through its seventeen hatcheries, has planted all the streams of the state with large quantities of fry. The run should be exceptionally heavy. R. B. B.

Sacramento, Cal.

Sportsmen's Row

From conditions existing at the present time, sportsmen are coming to the conclusion that, as far as good duck shooting is concerned, the season may as well close the first year instead of the last of January. Birds are scattered far and wide by the storms of the last few weeks and i tis doubtful now if, even with continued good weather, the sport will get back to normal before the season closes at the end of the month.

* * *

Not only are the ducks scattered, but, their natural grounds flooded, it is difficult to find snipe. Few of these small birds can be picked up in their regular haunts in the Suisun marsh, though in some localities they can be found.

* * *

Suisun marsh shooting for canvasbacks and bluebills continues fair, and valley shooting, both north and south, is not as bad as in the bay localities. Colonel Sharpe and Colonel Dorsey picked up a limit at the Greenhead Club at Live Oak.

* * *

From a resident of the Duncans Mills country comes word that the last storm has not greatly disturbed the river and that fishing is fairly good in Austin Creek and in Austin Pool, where the creek flows into the Russian river.

* * *

Recently J. Quincy Ward, executive agent of the Kentucky Fish and Game Commission, sold 350 confiscated quail at auction. The attendance at the sale was large and the bidding lively. The birds had been seized from a party who was handling them illegally. The ywere sold in dozen and half-dozen lots, each quail being tagged and the purchaser's name taken by Mr. Ward. The birds brought about $3 per dozen, one-half the money received for them being placed in the state treasury to the credit of the Fish and Game Commission, while the other half was divided equally between the officers who made the arrest of the illegal dealer.

* * *

Joseph A. Addleman, ex-secretary-treasurer of the Portland Gun Club and one of the best-known boosters of amateur sports in Portland for several years, is visiting friends and relatives. He is now located at Pacific Coast representative of a large sporting goods concern with headquarters in San Francisco, but he still finds time to take a run to the Northwest to renew acquaintances. He will remain in Portland for several days.

* * *

C. Meach, O. J. Clossett and L. L. Mulit broke their first bluerocks last week in Portland, and all are firm in their statement that they will be regular at the traps from now on. Mulit managed to finish with the highest score of the trio, and all the scores were good.

* * *

James K. Simpson, president of the Stevenson (Wash.) Gun Club, is figuring on holding several shoots at his club during the 1917 season, and he has placed a standing invitation to the members of the Portland Gun Club to take in the events.

* * *

T. E. Doremus, president of the Interstate Association and well known along the Pacific Coast, is figuring on being present at the Pacific Coast handicap contests at San Jose, and later take in the Northwest shoot during the Rose Festival in Portland two weeks later. He makes his annual visit to Portland during the trapshooting season, and is a welcome visitor from Wilmington, Del.

* * *

Billy Price finally got out after ducks last Saturday afternoon. Accompanied by George Thomas, he ducked over to Alvarado. We understand that Bill got several birds but he kept the extent of his bag a secret.

E. B. Van Arnam Dead.

E. B. Van Arnam, one of the best known professional trapshots in the northwest and a former baseball star on the Pacific coast, died at his home in Portland last week after an illness of several months. For the past several years Van Arnam was a familiar figure in the tournaments of the Portland Gun club. Eighteen years ago Van Arnam played baseball with the Minneapolis team of the American association under the name of Billy Lavan. Later "Van," as he was known known to his friends, played ball in San Diego and Los Angeles.

* * *

Fandom lost a real friend and booster in the death of E. B. Van Arnam. Mr. Van Arnam had been a representative of the Winchester Repeating Arms Co. for the last three or four years with headquarters at Portland, Oregon. He was a good trapshooter and was capable of turning in scores of better than 90%. He became ill at the big shoot at Portland last September. He was a member of the Portland Gun Club.

He is survived by a widow and San, Wilbert; a brother, W. J. Van Arnam of Omaha, Neb., and two sisters, Mrs. Edith Rubdioux of Omaha and Mrs. A. R. Sauer of San Diego.

AVERAGES OF CALIFORNIA SHOOTERS.

Heine Pfirrmann Stands Out With the Best Record With O. N. Ford Close Up.

Unofficial averages of California's trap shots, as compiled by Sporting Life ,show that Heine Pfirrmann of Los Angeles, the California-Nevada State champion, stands high among the regulars with a mark of .9604. He shot at 2100 targets, which entitles him to an official ranking ,and busted 2017 of them. O. N. Ford of San Jose comes next with .9446 out of 6580 targets.

In the professional ranks, E. L. Mitchell just did nose out Dick Reed in a close contest, only a fraction separating them above the .96 mark. The averages follow:—

Amateurs—Adams,G. A., Fresno, shot 1650, broke 1555, percentage .9424; Appling, Fred, Fresno, 150—115, .7666; Anderson, G. A., San Jose, 1410—1292, .9163; Arneill, J. M., Camarillo, 620—565, .9112; Arnold, R. M., Oxnard, 400—383, .9575; Arques, C. R., Madrone, 550—465, .8456; Avery, R. S., San Francisco, 340—268, .7882.

Babcock, F. D., Los Angeles, 150—103, .6866; Balkwill, H. G., Stockton, 600—536, .8933; Bair, F. S., Maple Creek, 1150—1037, .9010; Barber, E. M., San Diego, 300—246, .9200; Barieu, C. O., Lindsay, 500—441, .8820; Barker, A. M., San Jose, 750—638, .9506; Barto, J. B., Alhambra, 450—409, .9088; Baumgartner, A. F., San Jose, 400—322, .8050; Bechtell, San Francisco, 200—165, .8250; Beckwith, W. W., Coronado, 450—386, .8577; Betz, C. H., Upland, 300—271, .9033; Blackstock, C. F., Oxnard, 150—137, .9144; Blanchard, H. D., Los Angeles, 1600—1441, .9006; Bole, R. E., Los Angeles, 1100—1002, .9100; Boyson, D. C., Waddington, 70—41, .5857; Breschini, P., Salinas, 160—107, .6687; Brewington, F., Watsonville, 200—154, .7700; Brickell, San Francisco, 200—170, .8500; Bruner, S. A., Los Angeles, 800—764, .9550; Bungay, R. H., Ocean Park, 300—265, .8833; Burke, E., Fresno, 50—29, .5800; Burnham, F. K., Martinez, 1110—947, .7800.

Coleman, G. K., Eureka, 750—629, .8386; Considine, John, San Francisco, 1200—1010, .8416; Cook, W. E., Eureka, 40—29, .7250; Cornelius, W. A., Los Angeles, 850—795, .9352; Cornelius, W. J., Los Angeles, 410—383, .9341; Council, Owen, Los Angeles, 800—713, .8912; Cowan, D. A., Fresno, 150—98, .9533; Crossman, Mrs. E. C., Los Angeles, 300—226, .7533; Crossman, E. J., San Diego, 200—157, .7850; Wheeler, Miss Alene, Los Angeles, 210—168, .8000; Wickland, N., Bakersfield, 400—355, .8875; Wilkes, Thos., San Francisco, 1350—1188, .8800; Wilkes, A. G., San Francisco, 1760—1608, .9136; Wilkes, Mrs. A. G., San Francisco, 1445—1098, .7598; Williams, H. M., San Diego, 900—799. .8877; Wilshire, W. H., Los Angeles, 350—320, .9142; Witman, R. B., Oxnard, 200—190, .9500; Worswick, Wm. H., Los Banos, 100—51, .5100; Worthen, B. H., San Francisco, 600—556, .9266.

Professionals—Willett, W. F., San Francisco, 1100—998, .9027; Shreves, W. O., Mayfield, 150—128, .8533; Ricklefson, H., San Francisco, 900—703, .7811; Reed, Richard, San Francisco, 2200—2177, .9632; Poston, H. E., San Francisco, 5020—4751, .9464; Oliver, G. E., Los Angeles, 1600—1383, .8644; Moore, J. W. F., San Francisco, 200—121, .6050; Mitchell, E. L., Los Angeles, 2200—2124, .9654; Knight, C. H., San Francisco, 1950—1733, .8876; Jones, O. N., San Francisco, 800—615, .7687; Hoyt, H. A., Los Angeles, 2320—2040, .8793; Holohan, Guy E., Los Angeles, 3260—3070, .9417; Higgins, W. J., San Francisco, 600—476, .7933; Heath, J. G., San Francisco, 400—341, .8525; Hawxhurst, L. S., Oakland, 3380—3170, .9378; Haight, C. A., San Francisco, 2880—2409, .9364; French, J. S., Berkeley, 210—130, .6190; Feudner, M. O., San Francisco, 950—857, .9011; Ellis, W. R., San Francisco, 1310—1107, .8450; Clement, C. W., South Pasadena, 300—253, .8433; Cook, L. J., Oakland, 2160—1959, .9069; Breanen, J. R., Sacramento, 300—225, .7500; Bruner, A. W., Los Angeles, 1120—869, .7758.

Trade Notes.—At the opening shoot of the Portland Gun Club on January 7th, Mrs. C. J. Schilling started the new year with the phenomenal score by breaking 100 targets without a miss. As the Portland paper reports: "Target after target fell before the splendid shooting Portland Diana, who was performing in machine-like style, never flinching at the hard left and right angle birds."

In competition with twenty-two other club members the next amateur score was 88x100. The nearest professional was that of Mr. C. J. Schilling, with 96x100.

Mrs. Schilling made this phenomenal score with a Remington U. M. C. Pump gun and Nitro Club shells, the winning combination that has made her many records possible.

C. F. Shaw and A. J. Dands, both shooting the perfect combination of a Remington pump gun and the "Speed Shells," won the first and second places respectively at a recent shoot of the Westmont (N. J.) Field Club.

The Manor Gun Club of Clarkson, Ont., Can., held an interesting shoot recently at which 33 followers of the clay saucer faced the traps. W. H. Gooderham of Toronto, shooting Nitro Club "Speed Shells" was high amateur with a score of 90x100. Norman Gooderham and H. Simpson, both shooting the same brand of shells as the winner, won second and third places respectively.

GREAT YEAR FOR FIELD TRIALS.

Record of Winners in Events on Pacific Coast.

The year just closed indubitably has been the banner year in the history of field trials, taking into consideration all the facts connected therewith. The remarkable increase in the number of clubs holding trials is mainly due to the fact that owners of pointers and setters all over the country are taking an active interest in trials through the medium of amateur organizations, and to this fact alone is mainly due the greatly increased interest and the successful year.

On what is usually denominated the main circuit, starting with the United States trials last January, the only notable additions to the list are the National Field Trial Club's new Free-For-All Championship Stake, the inaugural trials of the Southwestern Field Trial Club at Vinita, Okla., and the Continental Field Trial Club's successful essay at holding prairie chicken trials at Towner, N. D. In the amateur ranks, or of clubs holding trials where the owners of the dogs participated as handlers may be noted the return to the ranks of the Oregon Field Trial Club, the start of a new club in Maryland under the appellation of the Bird Dog Club of Maryland, and the grouse trials at Pittsfield, Pa.

Among the notable events of the year must not be overlooked the winding up of the career of the great pointer, John Proctor, in a real blaze of glory, wherein he accomplished the wonderful task of winning both the National Championship and the Free-for-All Championship Stake in a space of a little over a week, a feat unsurpassed in the annals of field trials. It is also worthy of note that the pointers generally have continued in their victorious career, and the close of the year undoubtedly found the preponderance of honors, in proportion to the number of starters, with the short-haired representatives.

The National trials and events on the Coast follow:

NATIONAL FIELD TRIAL CLUB.

Calhoun, Ala., January 9.

Judges: W. W. Titus and L. W. Blankenbaker.

ALL-AGE STAKE—Twenty-four Starters, Thirteen English Setters and Eleven Pointers—

1st—Lewis C. Morris, 27046 (Fishel's Frank—Bessatina); white and liver pointer dog. E. J. Rowe, owner; W. D. Gilchrist, handler.

3d—Shotover (Tod Sloan—Wilson's Point); white and liver pointer dog. C. Godson, owner; C. Herman, handler.

NEW CLASSES FOR WESTMINSTER SHOW.

Innovations Are Started and Are Attracting Widespread Interest.

Premium lists for the forty-first annual dog show of the Westminster Kennel Club, to be held at Madison Square Garden, from February 20 to 23, inclusive, have been mailed. New classes will at once attract attention, for the oldest and premier club in American dogdom has started several innovations in bench show classifications. The aggregate of the money prizes to be given by the Westminster Kennel Club is about $15,000. Special prizes, which include plate as well as cash, will aggregate as much more.

The Board of Governors has been increased by the election of Henry Payne Whitney to succeed the late Hermanus B. Duryea. One of the new special classes is for the best team of four pointers. English setters, or Irish setters, shown by members of the Pointer Club of America, English Setter Club of America or the Irish Setter Club of America. The prize is the Hermanus B. Duryea Memorial Cup, the gift of his widow, which becomes the property of the club showing the winning team.

Twenty-seven of the members offer cups to be won outright, the list including the president's cup, given by R. H. Williams, for the best team entered in the regular classes, and the vice-president's cup, given by Francis R. Hitchcock, for the best brace under the same conditions. The Westminster Kennel Club offers $150 for the best pack of American fox hounds, and $100 for the best pack of beagles. They will be judged on Friday, February 23, which will be known as Hound Day, and members and masters of hunt clubs will wear the club uniforms to celebrate the occasion. All the classes for foxhounds will be judged on that morning, which is another innovation and will specialize the interest on the day for foxhounds and increase the interest of the riders to hounds.

The new classification, which has the approval of the American Kennel Club, begins as usual with the classes for puppies, novices, junior, limit, open and American bred, with separate classes for each sex. Then follow the innovations, details of which are given in full:

Graduate Classes.—For dogs that have not won a first prize of the value of $10 or over in the regular classes under A. K. C. rules; wins in puppy, novice, maiden, bred by exhibitor and selling classes excepted.

Maiden Classes.—For dogs that have not won a prize in any class at any show under A. K. C. rules.

Debutante Classes.—For dogs that have never been exhibited at any show prior to the closing of entries at this show.

Selling Classes.—For dogs which are entered to be sold at a price not exceeding the limit named.

* * *

"Scotty" Allan, three times winner of the Alaskan sweepstakes with a team of dogs, has established a new record for making the round trip from Nome to Valdez in little more than ten days by means of an "aero sled." By dog teams the trip usually is made in about eighty days.

Allan took the dogs to France for use in the battle front in the Vosges Mountains, and on his way back to Nome he purchased an engine and propeller, which he installed on a sled. After several trials he undertook the Nome-Valdez journey, about eleven hundred miles, in the face of much scepticism. He started from Nome and seventy-two hours later he arrived in Valdez, and returning reached Nome on November 11th. His machine is described as a combination hydroplane, aeroplane and sled, with gasoline as the motive power.

* * *

Over at Somerville, N. J., some years ago a terrific thunder storm broke, and there was a family in which there was an Airedale terrier and a little child about three years old. The child was playing out in the kitchen, which adjoined a bedroom, and when the first fierce clap of thunder came the dog rushed out, seized the child by the clothes and dragged him in under the bed. The mother came looking for her offspring, and when she tried to get him out the terrier snarled at her and would not let her budge the baby. The mother, thinking the dog had suddenly gone mad because of the excitement caused by the storm, decided to shoot her pet. She went to a bureau drawer and obtained a revolver, but she was afraid to shoot fearing she would miss and kill her baby. Just as she drew back a bolt of lightning struck the kitchen where the child had been playing, and in a moment it was a mass of flames. After the crack the Airedale came out, wagged his tail and allowed the mother to release the baby. This may sound like a fish story, but it is vouched for by a very reputable fancier, who says he would be willing to make affidavit t othe facts.

The annual meeting of the United States Field Trials club was held with President Stephenson in the chair. The present officers were re-elected and a motion was passed to lease more ground which is contiguous to the old preserve . Not that there is insufficient land to run the trials satisfactorily, but the opportunity was at hand to secure this ground and the club had no idea of allowing it to slip away. The next annual trials will be held the first week in January, 1918.

Stock Breeders' Page

The California Breeders Sales and Pedigree Company held an auction sale of nineteen registered Holstein bulls at Gonzales, Monterey county, on Saturday, January 6th, that attracted a large attendance of dairymen who reside in that section. There was not a poor bull in the lot, and while prices were not as large as might have been made in other localities, the California Breeders Sales and Pedigree Company officials are well satisfied, as the sale of every bull contributed to the improvement of the dairy stock in that section of the State. The nineteen bulls sold for a total of $3,875, an average of $204. The top price of the sale was made by the nine-months-old calf Manteca Tilly Alcartra, from the Henderson Co. herd of Sacramento county, which was sold to Pura Bros. for an even $500.

◈ ◈ ◈

Thirty thousand cows of Northern California are controlled by the newly-formed Northern California Milk Producers' Association. Thirteen counties are represented in the organization which was formed for the purpose of securing protective measures looking to the advancement of the dairying business, which is one of the most rapidly growing of the Northern California industries. The dairymen believe that they can through organization, have some power in fixing the price of the product to the consumer.

◈ ◈ ◈

An appropriation of $250,000 will be asked of the Legislature for the University Farm at Davis. A committee appointed by the Sacramento Valley Development Association has been appointed to work for the same and this committee is composed of Senator Rush, Marshall Diggs, Morris Brooks, J. W. Kearth, Judge P. J. Shields and Assemblyman Louis Tarke.

◈ ◈ ◈

A Holstein cow owned by Oliver Capbna of Elma Center, New York, recently broke the world's record for butter fat production, producing in seven days 722 pounds of milk out of which 40.544 pounds of butter fat was received. This is equal to a little over 60 pounds of commercial butter.

◈ ◈ ◈

At the meeting of the Missouri State Board of Agriculture recently, J. Kelly Wright and Samuel Jordan were re-elected to the position of institute lecturers for a period of three years at salaries of $3,000 a year. This is the first time that the institute lecturers were elected for a certain term of years and the sterling worth of the two men re-elected was recognized by the board, who voted unanimously for their retention. The report of the secretary of the board, Jewell Meys, sets forth just what has been accomplished by the board and what progress has been made to improve agricultural conditions of the state. According to Mr. Mayes' report the year 1916 was one of the most successful years of the board.

◈ ◈ ◈

Nolan Huddleston, an extensive buyer and shipper of horses and mules in Callaway county, Mo., shipped a load of horses and mules to Wynne, Ark., last week. These were purchased in North Callaway and Southern Audrain counties at good prices.

◈ ◈ ◈

At the annual meeting of the Standard Poland China Record Association, held at the head office of the association in Maryville, Mo., Jan 3, Walter W. Head of St. Joseph, Mo.; O. E. Wade of Rising City, Neb., and S. McKelvie of Fairfield, Neb., were elected directors for a term of three years, succeeding H. C. Lookabaugh of Watonga, Okla.; W. A. Baker of Butler, Mo.; and S. McKelvie, whose terms expired. John B. Lawson of Clarinda, Ia., was elected president of the association, vice H. B. Walter of Effingham, Kan., whose term had expired. C. D. Bellows of Maryville was elected to succeed himself as treasurer. F. L. Garrett, formerly assistant secretary, was elected secretary, succeeding Ray Davis, whose term of office expired. The office of assistant secretary was abolished, and the salary of the secretary was fixed at $1,800 a year.

◈ ◈ ◈

Demand for war horses at the National Stock Yards market, St. Louis, continues brisk. Daily inspections are being made by the French, Italian and Belgian representatives; while the British representatives are holding inspections Monday and Tuesday of each week. During the first week of the year, the French government bought 262 head of horses and 468 head of mules, the Italian government bought 206 head of horses and 77 head of mules, while the Belgian government bought 80 head of horses. The war horse demand, combined with the brisk Southern demand, had made the market the best in its history.

◈ ◈ ◈

Alex Keith, of Sturgeon, Mo., left this week for Havana, Cuba, where he has a stable of race horses for the meeting that now is in progress there.

◈ ◈ ◈

Irvin Maddox, of McCredie, Mo., recently sold 26 head of mules for $227.50 around. J. Ed. Moore, representing the Maxwell-Crouch Company, National Stock Yards, being the buyer. Mr. Maddox also sold another load on the National market at $200 around, and has yet one load on feed.

PURE BRED SIRES ON THE FARM.

By R. L. HILL, Columbia, Mo.

[Written for the Breeder and Sportsman.]

Country buyers, commission men and shippers tell me they have noticed more good cattle, hogs and sheep going to market the last twelve months than ever before in their recollections, and when asked the reason for this most of these men were unanimous in the opinion that it was the result of the educational campaigns conducted by agricultural colleges and experiment stations, the agricultural press and the breeding associations.

R. L. HILL

For years from various sources pressure has been brought to bear on the thinking breeders and feeders to remind them that it pays to use pure-bred sires of any kind, that there is always an increased price to accompany well bred stock, and that the demand is always better for the better grades of any kind of live stock. While there are no separate classifications for pure-bred or for high-grade stock on the market, there is a cash value difference.

The market toppers are the easy-feeding, quick-maturing kind, uniform in size and conformation, and usually well-bred, or at least the get of a pure-bred sire.

I mention the above to impress upon those who are not using pure-bred sires to give the matter consideration this coming year. The winter months furnish an excellent opportunity to plan for another twelve months, and in that planning, get the available literature bearing on the subjects of pure-bred sires for raising market stock and study carefully the figures and facts there given. Begin the new year as it should be started, with a balancing of books so far as possible, and with a little retrospection, not for the purpose of finding errors to mourn over, but for the sake of drawing lessons from past experience for future guidance. Consider well the class of stock handled in the past, and what could have been done in the way of improvement with the small outlay of expense attached to a pure-bred sire.

There is a man in every community who has a reputation as a good feeder—not only of cattle, but of hogs as well, and he usually tops the market with the stuff he feeds. Sometimes this man breeds the animals he feeds, and in other cases he buys them. This man is making money and is looked upon as a good farmer and feeder. Somehow or other, his neighbors say, he can put more pounds of meat on his fattening stock with less grain than they can, and they wonder at this. They also say that he can get his stuff ready for market quicker than anybody they ever saw, and they cannot account for this.

This good feeder himself tells you the reason in a few words. He won't feed anything but well-bred stock, the easy-feeding kind, the kind that put on a gain with the least amount of grain, the kind that mature rapidly and get ready for the market in the shortest possible time. If this feeder buys on the market you will find him giving instructions to his commission man to buy for him nothing but the best to feed, and if he buys his feeders locally, he buys stock from the neighbors who are using pure-bred boars or bulls on pure-bred or high-grade sows or cows. He has found that it is unprofitable to try to feed common stock of any kind and expect to make money. But his neighbors can't realize it. This is not due to ignorance, but just to lack of study and thought.

There are just too many farmers who don't care what kind of a boar serves their sow, or what kind of a bull serves their cow, just so the animal gets settled. It is not necessary, for market purposes, to have everything on the place pure-bred, but it is important to have very high grades, because it has been conclusively shown that high grades will make a profit when common stock will not. When common stock will make a profit, plenty of good blood will make a better one.

There has been remarkable improvement in the stock that is being fed for market. Many farmers have for years been improving their herds and flocks. There is a vast number of men who won't use anything else but a pure-bred sire, and a good one. These men introduce new blood into their herds from time to time, and by that means seek to grade up. These men know the kind of a sire they want to mate with their females, having studied the matter. When these men find out the profitable kind they know what they want, hunt up the man who has that kind to sell and then they buy him—not buying something else just as good but a good deal cheaper, but the kind they want and need, and they don't dicker too much about the price. It is necessary to buy a new male often enough to avoid in-breeding and consequent weakness and lack of vigor, and to buy a male of the same breeding as the females, and keep the herd improving. Once a good sire is secured, it is good business to keep him as long as he can be used without in-breeding. A good, tried sire, one that can be depended upon, should be kept in the herd as long as possible. It is not necessary to spend a whole lot of money to improve a grade herd. Males can be purchased very reasonably. Most breeders are willing to sell males so that they can make a profit on the individual and still let the buyer get a profitable investment.

Don't make the mistake of going into any pure-bred business on an extensive scale right on the jump. There are a large number of men who are constantly on the lookout for easy ways to make a living, and a good many of them who read so much bunk about how the old sow or the old cow makes men fortunes turn to the live stock business, and in most cases do themselves and the breed they handle an injustice. The vague impression which seems to prevail among those who know little about it, that the sow or the cow does all the work and the owner doesn't have much of anything to do but gather in the dollars, is unwarranted. To an industrious, enterprising man, content to begin in a small way, we believe the pure-bred business affords as good opportunities for making money in proportion to the capital invested as any other in sight, but it is after all a question of man and management, and the pure-bred business is especially one in which one must creep before he attempts to walk. He must learn to be faithful over a few things before he trusts himself with the control of many. Given enough capital, the right kind of animals, enough feed and a good feeder, it is not difficult to produce good animals and mature them to good individuals, but there is another end to the pure-bred business ,and that is the selling end. Many men can produce, but they can't sell.

But to discuss the pure-bred business would take many books. I started out to say that it is essential to use pure-bred sires on the farms of the corn belt, or anywhere else. A farmer should not be content with just getting a living from his farm, he should be making money on it, and if he expects to make money on the live-stock he feeds he must have good stock, and one of the quickest ways to get the good kind is to use a pure-bred sire on the grade female stuff which he now owns. In your plans for 1917, set aside a sufficient amount of time and money and invest in a pure-bred sire for the kind of stock you are intending to breed and feed.

R. L. Hill's Herd Boar, Winner of Duroc-Jersey Championship Missouri State Fair 1913

At a sale of big drafters held in New York last week prices for individual horses ranged from $165 to $385, and for teams from $460 to $850. Trucks and harness also brought good prices, some of the trucks making $350 and the harness selling as high as $115 per set. The outfits were consigned by a trucking firm going out of business.

◈ ◈ ◈

Atlanta, Georgia, which had its first harness race meeting last fall, reports a total attendance of 166,000 for the six days, an average of 27,600 for each day.

THE BEST LINIMENT

OR PAIN KILLER FOR THE HUMAN BODY

Gombault's

Caustic Balsam

IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, or Wounds, Felons Exterior Cancers, Boils Corns and Bunions. CAUSTIC BALSAM has no equal as a Liniment.

BEAUTIFUL BELVEDERE

LOTS FOR SALE

CORINTHIAN ISLAND Subdivision to Belvedere is the most beautiful spot on the shores of San Francisco Bay for a suburban home. It commands an extensive view of the City of San Francisco, Alcatraz and Angel Islands, Raccoon Straits, San Francisco Bay, Richardson's Bay, the Berkeley shore, beautiful Belvedere and Mt. Tamalpais. It is in Marin County, directly opposite San Francisco, and forms the eastern shore of Belvedere cove. It has a naturally terraced, sunny, western slope that is well adapted for many choice residence sites, every one affording most picturesque views of the bay and mountain. It is protected from the prevailing western trade winds in summer by Belvedere Island, and from the southerly storms in winter by Angel Island. The soil is fertile and part of the island is well wooded.

It is less subject to fog than any other place near San Francisco. The summer fog, as it rolls in from the ocean, splits on the western slope of Sausalito, part of it flowing in a line with Angel Island towards the Berkeley shore, and part of it along the southern slope of Mt. Tamalpais, leaving Belvedere, Corinthian Island and Raccoon Straits in the bright sunlight, while the fog banks can be seen as a white wall both to the north and the south.

There is very little available land about the shores of San Francisco Bay that is desirable for homes, especially for those who love boating and kindred sports. The Alameda and Contra Costa shores of the bay are the lee shores and receive the full brunt of the boisterous trade winds which lash the shoal waters near the land into muddy waves, making boating both unpleasant and dangerous. To the north of the city and in Marin County the land from Sausalito to the entrance of the bay is a Government reservation and will never be placed on the market. The shores of Richardson's Bay are not at present convenient to boat service and, aside from Belvedere and Corinthian Island, there is little or no land near any ferry landing that possesses the natural advantages, improvements and possibilities that are offered on Corinthian Island. Concrete roads, pure water, telephone service and electric light wires are already installed. It is only ten minutes' walk from any point on the property to Tiburon boats, and but forty-three minutes' ride to the foot of Market Street.

On the point of Corinthian Island the Corinthian Yacht Club has had its home for many years, and on any summer day the white sails of its numerous fleet add to the charming scene, as the trim yachts glide about the cove. Excellent fishing of all kinds for bay fish, including salmon, the gamey striped bass, rock fish and the toothsome silver smelt, is to be had in the cove. There is probably no spot so accessible and in such close proximity to any large city in the world that offers the attractions of climate, magnificent scenery, fishing and boating as will here be found.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

WINCHESTER

NICKEL STEEL REPEATERS, EXTRA LIGHT

Nickel Steel, which has about twice the tensile strength of the steel commonly used in guns, is utilized entirely in the construction of the Winchester Model 1912 repeating shotgun; and, consequently, it is the lightest and strongest repeater on the market. It is also considered the handsomest. It is made in 12, 16 and 20 gauges, and although on the market but a short time, is now the biggest selling repeater. Get one.

Use ***WINCHESTER*** "Leader" or "Repeater" shells in Winchester guns, and in guns of any make, as on account of their patented construction and uniform loading they always give the best results. Winchester shells were used by the winner of the Grand American Handicap.

REMINGTON UMC

WIN NEW REVOLVER AND PISTOL SHOOTING HONORS WITH

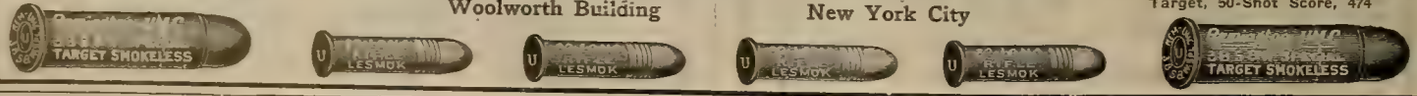
Remington UMC

REMINGTON UMC

Dr. Atkinson's Winning Revolver Target, 50-Shot Score, 469

A new revolver shooting record is the result of the Annual Outdoor Pistol and Revolver Championship Contests just completed by the United States Revolver Association.

Dr. A. B. Atkinson, West View, Pa., made a match record of 469, which gives him the Outdoor Revolver Championship of the United States. Dr. Atkinson shoots and prefers Remington UMC.



The pistol championship was won by that master marksman, George Armstrong of San Francisco, with a score of 474. Mr. Armstrong uses Remington UMC .22 Long Rifle Lesmok cartridges for all of his shooting.

For either practice or championship shooting you may rely upon Remington UMC metallics to give the maximum accuracy.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

FERNAND

The Magnificent Percheron stallion heading the stud at the State Farm at Davis, California. He is of ton proportions, possesses ideal Percheron character and is considered one of the best sires in the West.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California and fifth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¾, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 27625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

THE SEASON OF 1917 promises to be one of the best ever enjoyed by the lovers of and participants in harness racing. The Grand Circuit has been arranged and contains a greater number of meetings than for many years, and the purses to be offered are large and numerous enough to attract a larger number of horses and owners than have been seen in a long time. Here in California we are to have a circuit that will attract horses from all over the coast, as the circuit now being arranged will provide at least fifteen meetings with three to seven-day programs and purses ranging from $400 to $1,000. We expect to see the largest list of entries that have been made for many years and these will assure a large attendance and consequently profitable meetings all along the line. The only question now bothering those who are engaged in organizing a circuit on practical lines is to provide for all the places that desire to come in. With all the places north of Fresno arranged into a circuit that will start in July it will not be difficult to make an amicable adjustment of dates for the fairs and race meetings to be held in towns south of the raisin center. Mr. Waddell, secretary of the newly organized Fair and Racing Association, is meeting with such an enthusiastic reception in every town he has thus far visited that he is most optimistic over the organization of a circuit that will be the best seen on the Pacific Coast for years, and he is already in receipt of letters from horse owners and exhibitors in the northwest and elsewhere who are anxious to come to California this summer and are only awaiting for the official announcement of programs and dates to make their decision. It will take Mr. Waddell a few weeks to get the preliminaries arranged but a very early announcement of all particulars may be looked for. We advise every owner who has a horse that is worth exhibiting or racing to begin to get him ready as there will be plenty of classes for all. The new rule which allows every trotter and pacer a second off for every year that has passed since he failed to equal or lower his record will bring out many a contestant that has been considered outclassed heretofore. Mr. Waddell will visit San Jose, Hollister and Salinas during the next few days, and then he will go north to Dixon, Woodland, Marysville and other places.

THE SPRING SALE of the Chicago Horse Sales Company, which is advertised in this issue of the Breeder and Sportsman, offers a splendid chance for California owners who want to sell, as Chicago is the best horse market in the United States today. Among those who have already consigned horses to this sale are C. A. Spencer of Santa Rosa and Geo. A. Lowery of San Francisco. This is an opportunity for those who want to sell to take advantage of. Owners should correspond with the Chicago Horse Sales Company immediately so as to get the full value of the extensive advertising this company will do for this sale.

◈ ◈ ◈

Mr. G. J. Giannini, president of the San Francisco-California Driving Club, and one of the directors of the Pacific Coast Trotting Horse Breeders' Association, left for New York this week on business matters connected with the commission house of which he is manager. It is not beyond a possibility that he may see a trotter or pacer while on the trip that he will add to his racing stable this year.

THE CALIFORNIA CIRCUIT.

Several Towns Desire a Place That Were Not Represented at the Conference.

Since Joseph Waddell was elected Secretary of the California Fair and Racing Association, he has visited Pleasanton, Santa Rosa and Petaluma in the interests of the proposed circuit and has received letters from a number of persons residing in towns that were not represented, but desire to be, when the circuit is fully organized.

At Pleasanton it was learned that citizens there, in conjunction with Mr. R. J. MacKenzie, owner of the track, desired to open the circuit as early as July 4th, and that a day's racing for that date has already been financed. Mr. Waddell showed them the advantage of holding a meeting of four days beginning Wednesday, July 4th, and the probability is that such a program will be arranged.

On his visit to Santa Rosa in company with President L. L. Cannon of the association, they found that the citizens of that city were ready to subscribe to a financial guarantee against loss for a properly conducted fair and race meeting and that August 15th to 18th would suit them very well for dates, but they were willing to shift a week forward or backward to accommodate others.

Mr. Cannon and Mr. Waddell then visited Petaluma and met with a cordial reception from the horsemen and others who would like to see that town on the circuit.

There are five weeks between the proposed opening at Pleasanton and the Santa Rosa fair, so Messrs. Cannon and Waddell set to work to devise a plan by which other towns could be brought into the circuit . From all that can be learned Eureka, Humboldt county, and Ukiah, Mendocino county, would like to join the circuit and their citizens are willing to aid materially in a financial way if the regular circuit horses can be brought there.

Salinas and Hollister will also do much to aid a good race meeting and Mr. Waddell says he believes a circuit of the towns that would join and give meetings before the State Fair can be arranged as follows:

Pleasanton	July 4- 7
Salinas	July 11-14
Hollister	July 18-21
Petaluma	July 25-28
Eureka	Aug. 1- 4
Ukiah	Aug. 8-11
Santa Rosa	Aug. 15-18
Dixon	Aug. 22-25
Woodland	Aug. 29-Sept. 1
Marysville	Sept. 41 7
State Fair, Sacramento	Sept. 8-15

Such a circuit would provide ten weeks of racing before the State Fair opened, and would give all the towns that desire to hold fairs and race meetings after that date opportunity to fall in line for a circuit of fall meetings. The Alameda, Stanislaus, Kings and Kern county fairs might then agree on dates that would be consecutive and give a California circuit that would start the first week in July and end during the month of October.

Mr Waddell is energetically at work and proposes to visit every town where there is a chance of holding a meeting and arranging them into a real and convenient circuit.

Glenn County to Hold Fair.

Orland (Glenn Co.), Jan. 24.—The agricultural and live stock fair of Glenn county is to be located at Orland. It is incorporated for $10,000, already in part paid up. Its first beginning was last fall, and the present year will see one of the best and biggest fairs ever held in Northern California.

James Mills, the largest farmer the Sacramento valley has seen since the days of Dr. Hugh Glenn, will be president. This alone assures its being carried on on a scale that will assure it state-wide prominence. Chris Myhre will be vice-president. H. M. Kingwill will be treasurer. These officers have all been duly elected and will form a corps of leaders, efficient and enthusiastic.

A board of fifteen directors also has been elected, as follows: President, James Mills, Hamilton City; vice-president, Chris Myhre, Orland; secretary, E. A. Kirk, Orland; treasurer, H. M. Kingwill, Orland.

A three day show will be held in Orland next fall. Ample grounds will be provided, and ample exhibit space. It is the intention of the officers and directors to make the exhibition county-wide in its scope, and to cover every line of agricultural activity. The movement has started with a vim, and is being carried out with a broad conception of its possibilities that assure its abundant success.

The Orland center of the farm bureau was the father of the idea. The entire farm bureau of the county took the matter up and furthered its advance. The farming interests outside of the farm bureau influence have joined in the movement.

Al. Sanders, who gave some very successful one-day harness race meetings at Philadelphia last year, is the person who has succeeded in getting a place on the Grand Circuit for that track. He raised a $10,000 guarantee in a few hours.

CALIFORNIA TO THE FRONT.

[By Stockton Fountain, in The Farmers' Home Journal, Louisville, Ky.]

Someone has said "all things come to those who wait, but they get their share who go after them." The year 1916 will go down in the annals of history as one of truly great achievement for the State of California.

The Golden Gate State has proved that the Far West is really a factor in this great country of ours.

The great International Live Stock Show proclaimed the Hereford-Shorthorn yearling California Favorite to be the Grand Champion steer. He sold at auction for the record price of $1.75 a pound. Oats, barley and bran constituted his ration chiefly. Cattle men of the corn belt states readily admitted that the impossible could happen and that in the beef world California could play her cards as ably as she had in the Presidential election.

California now steps forward, and commands the services of Missouri's noted live stock authority—"Jump" Cauthorn—past editor of the Missouri Stockman—now with The Breeder and Sportsman of San Francisco, California.

"Jump," as he is familiarly known and admired by thousands of friends, is a self-made saddle horse journalist. He was born in the "saddle" and was a real "rail bird" the first time he saw his father lead out Rex Edmonston, Thornton's Star, and others. His ambition was to render service to his majesty—the saddle horse—rather than to take a college degree.

As an exhibitor and owner of "The Intelligencer," "Jump" soon won a home with every exhibitor and fair association of Missouri. He can write of the saddle horse as no other could possibly do without his experience—and his way is so original that you are visiting with the horse alone.

"Jump" will be missed by scores of admirers. When the "rail birds" assemble the coming year, there will be a chair turned down for our old friend "Jump."

California, our loss is your gain. Missouri trusts that you will appreciate the opportunity of having "Jump" become a citizen of your State, that you will afford him a field for greater development, and honor and fame will come to your saddle horses and to your hogs and cattle.

In conclusion, I am sure that I voice the sentiment of all Missouri horsemen, in trusting that success shall crown the efforts of our old friend "Jump" Cauthorn in the future as it has in the past. May you continue to forge ahead, California, and prove to the world that along with the scenery and climate, you have beef cattle, horses, etc., and above all else, men—men like "Jump," with courage and love for work.

To breed a "Khaki" Horse.

At the Havana Horse Show which will be held next month a special cup is to be offered for a horse suitable for cavalry that will be of a dun color. In this connection Col. Spencer Borden of Fall River, Mass., who gives the cup and who for several years has been a breeder of Arabian horses ,and whose book "What Horse For the Cavalry" is one of the best on this subject ever written, writes as follows to the New York Rider and Driver:

"I have for a number of years made a study of horses for the cavalry service, and visited many countries to see them. I am impressed with the idea that the Cuban Colon Horse, dun in color (biccocho, they are called in the Philippines, almost Amarillo), with black legs, mane, and tail, many of them with a black stripe on the back, would be an ideal foundation for a cavalry horse, if bred to a good chestnut colored Arab of pure blood.

"When the Hungarian Government started to develop their wonderful breed of chestnut cavalry horses that they call Gidrans, they selected 80 chestnut mares, bred them to chestnut Arab horses and kept all the chestnut female offspring as foundation. These have again been bred to chestnut Arab stallions, till now the Chestnut Gidran is an established breed, that breeds true.

"In these days all soldiers are being clad in khaki colored uniforms. They would also like khaki colored horses if they could get them; and to my mind the Cubans have a chance to be the first to establish such a breed. A gallant American cavalry officer just back from the border, whom I met in Washington last week, told me that the men under his command always knew when a certain commander got secret orders that he might be ordered over the border, for at that time he always gave his old white horse a coat of brown paint. Why not breed them, so they would not have to be painted!

"Therefore, I offer a cup for Colon mares, suitable for breeding cavalry horses, shown at the Havana horse show."

Stoughton A. Fletcher, of Indianapolis, Ind., has added another high class brood mare for his stud which Peter the Great 2:07¼ heads. This one is Clara Cantrill, the dam of the sensational stake trotter, St. Frisco 2:03¼, purchased a few days ago from F. D. McConnell of Tulsa, Okla. Clara Cantrill is a ten-year-old mare, sired by Clarence S. 2:19½, a speed-siring son of Wilkes Boy 2:24½, and her dam was Cantrill (dam of Miss Penrile 2:17½), by Nutwood 2:18¾, second dam Miss Redmon 2:29½, a producing daughter of Bourbon Wilkes, third dam Becky Bird II., a producer, by Westwood, a son of Blackwood 74.

Harness Horses and Horsemen

Berta Mac's Daughter, Bertha Maguire.

Worthington Parsons, formerly of Salinas but now retired from farming and the breeding of horses, and a resident of San Francisco, dropped into the Breeder and Sportsman office one day this week to sign a transfer of some of the horses he had sold, and in the course of the usual horse talk remarked that he visited the famous Curles Neck Farm of Mr. C. K. G. Billings near Richmond, Virginia, last year and there saw his old mare Berta Mac 2:08 by McKinney, that he had bred and raced here on the coast and raced to her record. With Henry Helman as her trainer Berta Mac won $15,000 for Mr. Parsons and she was then sold to Mr. Billings for $7000. Consequently it was with a lot of pleasure that Mr. Parsons visited Berta Mac in Virginia ,and the fact that Virginia is Mr. Parsons' native State did not detract any from the renewal of Berta Mac's acquaintance. She had a weanling at foot by The Harvester and Parsons says the youngster was full of fire and so wary that he could not get near him. This colt was named Harvest Lord and brought $600 at the Old Glory last November. After visiting Curles Neck Mr. Parsons attended the great meeting at Lexington and there saw Berta Mac's first foal, Bertha Maguire, start in the Kentucky Futurity for two-year-old trotters, which was won by that wonderful filly The Real Lady 2:04¼ in two heats in 2:07½ and 2:07, with Mary Coburn second and Berta Mac's filly third. Mr. Parsons says that Bertha Maguire looked exactly as Berta Mac did at her age and trotted just like her. The following week Bertha Maguire was started in a two-year-old race, that went to three heats and proved to be the fastest three heats ever trotted by two-year-olds. It was won by Worthy Volo, who took the first heat in 2:11½, after which Harvest Gale won a heat in 2:07¾, and Worthy Volo captured the third heat and the race in 2:10½. Bertha Maguire was third in every heat and was separately timed in 2:08¾ in the second. Mr. Parsons says that Townsend Ackerman, who trained and drove Bertha Maguire in all her races last year, expects her to trot very close to 2:00 before she quits racing as she is sound and all right in every way and as game as any trotter he ever drove as well as having a wonderful amount of endurance. She is by The Harvester 2:01.

Death of Advertiser 2:15¼.

Advertiser 2:15¼, one of the very few remaining sons of Electioneer, died recently at Springfield, Ohio, aged 29 years. He was bred by the late Senator Leland Stanford at the famous Palo Alto Farm and $125,000 was offered and refused for him during the Senator's lifetime, the Senator absolutely refusing to set a price on him. When Advertiser was six years old his son Adbell, whose dam was the famous Beautiful Bells, trotted to the world's yearling record of 2:23, which record remained for 19 years. This added to the fame of his young sire but in the years following nothing like Adbell appeared at the farm and when the farm's dispersal sales began after the Senator's death Adbell was one of a consignment that went to the eastern auction sales in 1899 and he was knocked down to the bid of Gen. B. F. Tracy for $2600, or about one hundred and twenty thousand dollars less than could have been taken for him a few years previous. He was a very handsome horse and won the blue ribbon at the National Horse Show when shown there. He was not a great success as a sire of fast performers as but 25 trotters and 5 pacers with standard records were sired by him, and none of them are in the 2:10 list. His sons and daughters are doing better, however. Adbell, that died at nine years old, was the sire of three and the dams of three in the 2:10 list. Eleven of Advertiser's sons are producing sires, and 15 of his daughters have produced standard speed. Advertiser was by Electioneer out of Lulu Wilkes by George Wilkes. It is said that Arion 2:07¾ and Hummer 6112 are now the only living sons of Electioneer, that great horse that founded at Palo Alto Stock Farm one of the greatest of all trotting families.

Keep Your Colts and Fillies in This Stake.

How about your two-year-old that is entered in Pacific Breeders Futurity No. 15? This stake is worth $5,150 and the two-year-old divisions are to be trotted and paced this year. The amount given for the two-year-old trot is $800, and for the two-year-old pace $500. The payment necessary to keep your colt or filly in the stake is $10, and it must be made on or before next Thursday, February 1st. The two-year-olds will make an interesting race this year as they generally do, as they are all unknown quantities until they get the word in a real race. There will probably be several races for two-year-olds given on the circuit this year, but the Pacific Breeders Futurity will be the main race for the colts and fillies of this age. Don't miss a chance of getting some of this stake money by failing to make this payment. Next Thursday is the date, February 1st. Also remember that this payment is necessary to keep your colt eligible to the three-year-old divisions which are to be trotted or paced next year.

Curles Neck Horses to be Dispersed.

Right on top of the announcement that C. K. G. Billings had sold his New York residence, had offered the famous Curles Neck Farm in Virginia for sale and would move to California, came the news this week that he would sell his entire trotting stud at auction this spring, reserving only the two great champions Uhlan 1:58 and Lou Dillon 1:58½. This means the dispersal of one of the greatest collections of brood mares in the country, together with the ex-champion stallion trotter The Harvester 2:01. It is stated that Mr. Billings expended over a million dollars in buying and improving Curles Neck Farm, which comprises 5,000 acres of land and is probably one of the best appointed horse breeding farms in the world. Among the brood mares on the farm are Lou Dillon 1:58½, Berta Mac 2:08, Baroness Virginia (3) 2:08¼, Baroness Evelyn (3) 2:12¾, Bernice R. 2:07¼, Kingston Bell 2:10¾, Louise Wilson 2:10¾, Zarrine 2:07¼, Adioo Dillon (2) 2:24¼, Nancy Royce 2:06¼, Margaret Preston 2:10¼, Santos Maid 2:08¾, Ethel Toddington (2) 2:13¾, Lucille Marlow 2:09¼, Lucille Bingen (3) 2:08½, and many others. The weanlings by The Harvester from the Curles Neck Farm mares brought an average of over $700 at the Old Glory sale last November, one of the largest averages ever received for weanlings, so it is not probable that Mr. Billings is selling out on account of any depression in the prices of trotting bred stock. Mr. Billings will make Santa Barbara his home, and has already shipped seven or eight trotters there to use under the saddle, an exercise to which he is greatly devoted.

Grand Circuit Dates For 1917.

The Grand Circuit for 1917 will open at Cleveland, Ohio (North Randall track) on July 16th and close at Atlanta, Georgia, October 20th. The circuit stewards met at Atlanta this week, re-elected W. K. Devereux as president and allotted the following dates, according to press dispatch. It will be noticed that Philadelphia will be a member of the circuit this year:

Cleveland (North Randall)	July 16-21
Detroit	July 23-Aug. 4
Kalamazoo	Aug. 6-11
Columbus	Aug. 13-18
Cleveland	Aug. 20-25
Philadelphia	Aug. 27-Sept. 1
Hartford	Sept. 3- 8
Syracuse	Sept. 10-15
Columbus	Sept. 17-29
Lexington	Oct. 1-13
Atlanta	Oct. 15-20

It will be noticed that Columbus and Cleveland will each hold two meetings ,and that Lexington is given its usual two weeks.

To Stallion Owners.

Other things being equal, owners of good mares prefer to breed them to stallions that are well advertised. The advertised stallion not only does more business but gets a better class of mares and thereby sires more winners and high-class colts that will add to his fame and value. If you own a stallion that is worth his keep as a stallion, printer's ink is as necessary as any other item of his keep, in fact, it is the one expense that will bring cash returns. Now is the season to let the public know about your horse. Owners of mares are choosing the horses to patronize. Get your announcement in early when it will produce the strongest impression. State terms for service, give breeding and other particulars, or let us know and we will fix up the copy for you.

An advertisement in the Breeder and Sportsman for three months will cost according to space used; for instance, you can put in an announcement the size of that of the Blackhawk Stock Ranch on page two, for $5 a month. Also don't forget that the Breeder and Sportsman issues a modern Stallion Service Book, the price of which is $1, and tabulates pedigrees and prints stallion posters and folders, doing expert work at the lowest prices.

Bill to Provide Fifteen Agricultural Districts.

Senator Slater of Sonoma county, always a friend of the live stock breeders and agriculturists of California, has introduced in the California Senate a bill dividing the State into fifteen agricultural districts and giving the counties power to co-operate in holding district fairs. This is a bill that should pass, for nothing has been more clearly demonstrated than the fact that district or county fairs are a wonderful aid in developing the resources of the sections in which they are held. Any person who attended the State or any of the county fairs held in California last year could not help but notice the great interest manifested in the displays of live stock, while the sales of pure-bred cattle, sheep and hogs for breeding purposes ran into thousands of dollars. Fifteen fairs could be arranged in a circuit that would attract entries from the leading live stock breeders of the United States and prove of immense value to the industry in California. There should be a concerted movement among the farmers and live stock breeders of this State toward inducing the Legislature to pass and the Governor to sign Senator Slater's measure.

McKenzie Youngsters Shipped to Dick McMahon.

On Monday last four youngsters owned by Mr. R. J. MacKenzie were shipped from Pleasanton Stock Farm to Dick McMahon at Macon, Georgia. They were the two-year-old colt Terry Patchen by Joe Pathen 2d, dam Zombro Belle by Zombro, Carl Vernon by Vernon McKinney, dam by Carlokin, a filly b Vernon McKinney, dam Merry Widow 2:03¾, an another two-year-old by Vernon McKinney out of mare by Searchlight. All will be put in training b McMahon and all are fine prospects. George Rya had them led out for inspection by a number of vis iting horsemen at Pleasanton last Saturday and al pronounced them a fine quartette of youngsters Terry Patchen and Carl Vernon both took the ex perienced eye of C. A. Durfee, who said he woul like to have both of them in his own stable. Terr Patchen is one of the best developed two-year-old we have seen this year and has natural trotting spee of a high order, having already stepped an eighth i 16 seconds.

Experimenting with Starting Machines.

Down in New Zealand where they are trying t handicap trotters and pacers by yards instead o seconds, a number of new devices are being tried The latest invention, according to the New Zealan Referee, is that of Mr. D. M. Robertson, of Christ church, and it is really an ingenious piece of work The object of the invention is to provide a reliabl construction which will operate silently. Two post are provided, one on either side of the course a each end of the points where the barriers are re quired, and upon each of these posts is provided a arm pivotted at one of its ends so as to be capabl of swinging in a vertical plane parallel with th course. The barrier consists of a card which is at tached to the ends of the arms and extending acros the course to a corresponding arm, the arrangemen being that when the arms are down the barrier wil be closed and so retain the horses behind it, an when the starter presses a lever all the barriers which are placed at intervals of 12 yards, will simul taneously be released. The idea is really after the style of the barrier now in use for the starting o gallopers, only instead of one barrier being used, a many barriers as there are handicapped horses may be utilized, the whole number being linked up so tha when the lever is released all will fly up in a hori zontal position, thus effecting the start. The bar riers can be readily altered to sut the various dis tances of handicaps.

Promising Youngsters at Los Angeles.

Mr. Charles Ramsey, of Los Angeles, who is an enthusiastic lover of horses, has a very promising bunch of youngsters at Exposition Park in that city Among them is a handsome black gelding three years old, by Six Bells, dam Kinneywood by Zolock 2:05½ that has been an eighth in 17½ seconds on the pace Another nice one is a two-year-old filly by Zomrect 2:03¾, dam a full sister to the gelding just mentioned. A three-year-old stallion by a full brother to Auto Zombro 2:02½, out of a mare by Zolock 2:05½, can trot a 2:20 gait taken right off the road and looks like a high class trotter. Mr. Ramsey also has the mare Donna Lee 2:19½ by Donnasham, dam Bay Leaf by Telephone 2:16, that is in foal to Carlokin 2:07¼, and that had two-minute speed when in training as a two-year-old. Another member of the string is a very handsome yearling by Carlokin out of Donna Lee that should make a trotter. Donna Lee and this yearling are owned by Mr. Ramsey's son George.

Trying to Close the Pool Rooms.

A bill has been introduced in the California Legislature which has for its object the closing of the pool rooms which infest nearly every town of any size in the state. The bill makes it illegal for a newspaper to print any form chart or other news by which the bookmakers are enabled to make odds and the public to get information on which to back their "systems" of betting. It will be a hard job to devise a bill which will close the so-called pool rooms, and they probably will continue to be open for business so long as there is anything on which people wish to make wagers. There was probably more business done by these pool rooms on the result of the recent Presidential election than were wagered on horses during that time. Of course every one knows that all pool rooms can be closed in any town where the police do their duty, and we doubt if any law that will keep the daily newspapers from printing the form charts, selections, and other news will ever be enforced in the large cities.

The Hay Market.

Wholesale prices of hay in carload lots are quoted as follows this week: Fancy wheat hay, light 5-wire bales $20 to $21; No. 1 wheat or wheat and oat $17 to $19; No. 2 wheat or wheat and oat $15 to $17; choice tame oat $18 to $19; other tame oat $14 to $16; wild oat $14 to $16; barley $14 to $16; alfalfa $14 to $17; stock hay $13 to $14; No. 1 barley straw 70c to 90c.

Arlie Frost, the Monroe, Wis., trainer, has purchased the fast pacing mare Colleen 2:05¼, for one of his patrons. Colleen was in the stable of Henry Thomas, who raced the daughter of Charley D. 2:06¼ for her former owner, E. L. Leach, of Cincinnati, the past season. This mare raced very consistently over both the mile and half-mile tracks and took her record in the first heat of the 2:07 pace at Lexington. She worked in 2:04¼ very handily over the Blue Grass track and ought to be a good mare for Frost the coming season. She was bred in California and is a daughter of the old mare Cricket 2:10, who was the first pacing mare to pace that fast.

Thoroughbred Matters

THE RACING COMMISSION BILL, which it has been decided will not be introduced in the California legislature this year, and which it has been stated was endorsed by the Golden Gate Thoroughbred Breeders' Association, never came before that organization for endorsement and had it so come it would have been materially altered in all probability before being submitted to the Legislature. A member of the aforesaid association informed the writer this week that at a meeting of the association held before the Legislature met, it was ordered that a bill providing for a racing commission be drafted on the plan of the Kentucky law. A firm of legal gentlemen was instructed to prepare such a measure. When this draft was finished, copies of it reached the press and were published in the San Francisco Chronicle and the Breeder and Sportsman. When the meeting of the Golden Gate association was called to hear the bill read and to pass on it before submitting it to the State's lawmakers, but five members showed up and the meeting adjourned with the understanding that it would not be good policy to have the bill introduced at this session. Our informant stated that in his opinion the bill did not meet the approval of a majority of the Golden Gate's members and that had it ever come before that body it would have been materially amended before receiving their endorsement. The section which fixed the length of meetings at 30 days with two meetings a year was objectionable, as many thought the Kentucky law, which put the allotment of dates entirely with a commission to be appointed by the Governor, much more preferable . No association is permitted to hold a meeting lasting 30 days in Kentucky. There were several other features of the bill which were objectionable to the breeders of thoroughbreds and it was a mistake to say that it was endorsed by the Golden Gate Thoroughbred Breeders' Association.

The thirty head of thoroughbred youngsters which Geo. Ryan, superintendent of the Pleasanton Training Track, recently purchased from Lawrence & Comstock of the Oakwood Stock Ranch, Lincoln, Placer county, are now at Pleasanton and being broken to saddle. There has seldom been as nice a lot of young thoroughbreds in one collection. The two-year-old colt by Salvation out of Zorita, half sister to Emperor of Norfolk by Cerito 2d, is a grand looker and Ryan intends keeping him for a stallion. He is a chestnut with white hind ankles and strip in his face. The sire of Zorita is by imp. The Hook out of the famous Miss Ford by Enquirer, and every dam of this colt back to the seventh is a producer of winners. Salvation is proving an excellent sire, no less than nine of his get being returned winners as two-year-olds last year. Nearly all the youngsters in this string are out of the dams of winners and as they are by Salvation, Rey Hindoo and Tim Payne they lack nothing in breeding. It is Mr. Ryan's intention to race several of them this year. The colts and fillies were sent down from the Oakwood ranch in excellent condition and all look big and strong and ready to commence galloping as soon as they are broke to the saddle.

◆ ◆ ◆

A. J. Gorey, of Covington, Ky., this week sold his good stallion Transvaal to R. J. Walden, for $10,000. Transvaal is a bay horse ,twelve years old, son of Commando and imp. Royal Rose, by Royal Hampton. He is the sire of thirty-eight winners which have won in the neighborhood of 200 races and $100,000. King Gorin, Blackie Daw, Little Bit, Resign and Balko are some of the best of his get. In speaking of the sale Mr. Gorey said: "While $10,000 may seem to some people as a large price to pay for a horse I think it is but about half what the horse is worth, as I predict within the next year or two Transvaal will be the leading sire of North America, and the only excuse I can offer for selling him is he has become too valuable an animal for a person in my circumstances to retain. Mr. Walden, the purchaser, has a splendid stock farm at Middleburg, Md., stocked with a band of brood mares, the blood lines of which have no superior in America, and I feel sure what is Kentucky's loss will be Maryland's gain in the transfer of Transvaal."

◆ ◆ ◆

A bill to legalize the totalizator or pari mutuel machine is before the Australian parliament and will probably become a law. Under the terms of the bill 10 per cent commission is to be taken out of the amount wagered on every race of which the Australian government will take 7 per cent, allowing the association but 3 per cent. The government expects to realize about two million dollars per year from this source.

◆ ◆ ◆

John E. Madden sold this week to Messrs. Pinkerton and Arnold of New York, Duke of Ormonde, bay horse, 7, by Orsini out of Santa Bella by St. Serf; and Lord Rock Vale, brown horse, 4, by Rock Sand out of Lady Violet by The Ill-Used. These horses will be used to sire hunters.

THOROUGHBREDS BETTER TODAY THAN EVER

Racing Authority Compiles Tables to Prove This Assertion.

Walter S. Vosburgh, handicapper for The Jockey Club tracks, and one of the authorities in America on racing, has compiled some interesting statistics and brought forth some interesting discussions during the off season. Most recently Mr. Vosburgh has turned his attention to records made and improved upon from time to time. His latest discussion is as follows:

"When I began attending races, Legal Tender's time, 1:44, was the fastest mile on record. I have often thought it might prove somewhat interesting, as demonstrating the improvement in the speed of the racehorse, if a table were presented, showing how the time for one mile and other distances, had been gradually reduced during the years following Legal Tender's race. Never having seen one in print, and for want of a more perfect one, I present my own, which I have kept for many years ,and beg indulgence for any omissions in it:

REDUCTION OF THE RECORD—ONE MILE.

1:44 —Legal Tender, 5, 104 (third heat), Cincinnati, June 23, 1865.
1:43¾ —Herzog, 3, Cincinnati, September 21, 1869.
1:43½ —Herzog, 3, Cincinnati, May 25, 1869.
1:43¼ —Judge Curtis, 5, 114, Saratoga, July 18, 1878.
1:43 —Fadladeen, 4, 104, Lexington, May 22, 1871.
1:43 —Salina, 3, 87, Lexington, May 23, 1871.
1:42¾ —Alarm, 3, 90, Saratoga, July 17, 1872.
1:42½ —Grey Planet, 5, 110 (against time), Saratoga, 1874.
1:41¾ —Searcher, 3, 90, Lexington, May 13, 1875.
1:41¼ —Kadi, 6, catch weight, Hartford, 1875.
1:41 —Warfield, aged, 87, Saratoga, July 26, 1882.
1:40½ —Boardman, 4. 91, Sheepshead Bay, September 22, 1880.
1:40 —Stuyvesant, 3, 111, Sheepshead Bay, September 7, 1887.
1:39¾ —Ten Broeck, 5, 110 (against time), Louisville, 1877.
1:39½ —Racine, 3, 107, Chicago, June 28, 1890.
1:39½ —La Tosca, 3, 105, Morris Park, October 10, 1891.
1:39¼ —Raveloe, 3, 107 (straightaway), Monmouth, July 31, 1890.
1:38¾ —Libertine, 3, 80, Chicago, 1894.
1:37 4-5—Brigadier, 4, 112, Sheepshead Bay, June 22, 1901.
1:37 2-5—Dick Welles, 3, 109, Harlem, Chicago, 1903.
1:37 2-5—Kiamesha, 3, 104, Belmont Park, October 9, 1905.
1:37¼ —Kildeer, 4, 91 (straightaway), Monmouth, August 13, 1892.
1:36 4-5—Sam Jackson, 7, 117, Aqueduct, July 31, 1915.
1:36¼ —Amalfi, 6, 107 (trotting track), Syracuse, September 3, 1914.
1:35½ —Salvator, 4, 110 (against time, straightaway), Monmouth, August 28, 1890.

"Legal Tender's 1:44 was made in the third heat of a race of mile heats, and was the occasion of considerable dispute. The horse was a son of imported Sovereign ,and was bred by Col. W. S. Buford, who happened to be one of the judges at the meeting. Feeling that he was an interested party, Colonel Buford withdrew in favor of Mr. B. G. Bruce, who had a curious prejudice against the get of Sovereign.

"The late Dr. J. W. Weldon, who trained Legal Tender, made a bet of $5 to $100 with a friend that Legal Tender would beat the record (Mammona's 1:44¼). He won it, as Legal Tender won the third heat in 1:44. Colonel Buford walked over to the timer's stand and remarked to the late Mr. R. A. Alexander, who was one of the timers: 'Well, what do you think of the Sovereigns now? Don't you think 1:44 a little better than the Lexingtons?' Mr. Alexander replied that it was remarkable, as the heat was really run in 1:43. Buford exclaimed, 'Why in hell didn't you report the heat as run?' Mr. Alexander answered that it was 'fast enough,' and that if the real time had been given a host of doubters would rise up and dispute it. Thus it stood, but Mr. John Smith, secretary of the Buckeye Jockey Club at the time, said his watch made Legal Tender's heat 1:41½.

REDUCTION OF THE RECORD—SIX FURLONGS.

1:16 —Alarm, 4, 108, Saratoga, July 17, 1872.
1:15¾ —Chinaman, 3, 111, San Francisco, January 9, 1875.
1:14 —Barrett, 2, 110, Monmouth Park, August 14, 1880.
1:13 —Force, 5, 121, Louisville, September 24, 1883.
1:11 —El Rio Rey, 2, 126 (straight), Morris Park, August 31, 1889.
1:10¼ —Fides, 4, 116 (straight), Morris Park. May 31, 1890.
1:09¾ —Yemen, 3, 105½ (straight), Morris Park, October 1, 1892.
1:09 3-5—Iron Mask, 6, 115, Juarez, January 4, 1914.
1:08 —Artful, 2, 130 (straight), Morris Park, October 15, 1904.

REDUCTION OF THE RECORD—NINE FURLONGS.

1:56½ —Fannie Ludlow, 4, 105, Saratoga, August 10, 1869.
1:56 —Fadladeen, aged, 111, Saratoga, August 19, 1874.
1:54 —Bob Woolley, 3, 90, Lexington, September 6, 1875.
1:53 —Rosalie, 4 (catch weight), Brighton, August 13, 1881.
1:52¾ —Teuton, 4, 113, Chicago, June 28, 1890.
1:51½ —Tristan, 6, 114, Morris Park, June 2, 1891.
1:51 —Bonnibert, 4, 120, Brighton, July 20, 1902.
1:50 3-5—Charles Edward, 3, 126, Brighton, July 16, 1907.
1:49 3-5—Roamer, 3, 124, Laurel, October 10, 1914.

REDUCTION OF RECORD—1¼ MILES.

2:10 —Narragansett, 3, 90, Saratoga, August 4, 1869.
2:09½ —Frogtown, 4, 104, Lexington, May 4, 1872.
2:08¾—Grinstead, 4, 108, Saratoga, July 24, 1875.
2:08½—Charlie Gorham, 3, 87, Lexington, May 18, 1877.
2:08 —Mendelssohn, 3, 95, Lexington, May 10, 1880.
2:07¾ —Getaway, 3, 100, Saratoga, August 4, 1881.
2:07½ —Binette, 5, 101, Chicago, July 12, 1886.
2:07 —Dry Monopole, 4, 106, Gravesend, May 14, 1887.
2:06½ —Kingston, $, 122, Gravesend, September 24, 1889.
2:05 —Salvator, 4, 122, Sheepshead Bay, June 25, 1890.
2:03¾ —Banquet, 3, 109 (straight), Monmouth, July 17, 1890.
2:02 4-5—Broomstick, 3, 104, Brighton, July 9, 1904.
2:02 —Roamer, 3, 114 (trotting track), Syracuse, September 5, 1914.
2:00 —Whisk Broom, 6, 139, Belmont Park, June 28, 1913.

"Whatever may be said of the value of time as a test, it is certain that it is influenced greatly by conditions. The state of the weather, the temperature, the condition of the ground, and the formation of the track—not to speak of the manner in which the race is run. Several of the records were made over straightaway courses, which, particularly in races over moderate distances, are greatly to the advantage of fast time when compared to a circular course. Over long courses, it is not so much so, as a straightaway gives no change in the use of the muscles, and a horse would tire much sooner. Some of the races, Ten Broeck's and Salvator's miles, for example, were not made in actual contests, but "against time," they having the course to themselves except for stable companions to help them regulate their speed. Accordingly, Sam Jackson's mile made in an actual race seems the most creditable performance.

"Taking all things into consideration, it would appear from the records that the horses of today are faster than those of forty or fifty years ago. But it is doubtful if they are so much faster as many people believe. Assuredly, there is a great improvement in the tracks which in those days were kept deeper than in later years, when they have been kept so hard as often to show the blue metallic mark of the horses' footprints. Besides, in the old days the tracks were often neglected until a short time before a meeting.

"Little was done with them, while nowadays, some of them are kept in condition for galloping during the entire season. Naturally then a horse could gallop faster over the tracks of today than over those of forty years ago. So much, then, in favor of the horses of the earlier period.

But on the other hand, if any one will compare the results in the records given above, it will be noticed that the early records generally were made by horses carrying very light weights as compared with those of today. For example, when Alarm in 1872 made his mile in 1:42¾, he carried only 90 pounds, while Dick Welles, the same age (three years) in 1903 made his mile in 1:37 2-5 with 109 pounds.

When Legal Tender ran his mile in 1:44 in 1865, he was five years old and carried only 104 pounds. Herzog, Salina, Searcher and Warfield all carried very light weights. And the same is true in respect of other distances. Narragansett's record in 1869 of 2:10 at a mile and a quarter, was made with 90 pounds up, while Broomstick's 2:02 4-5 in 1904 was made with 104 pounds. At nine furlongs Fannie Ludlow, four years old, in 1869 made a record of 1:56½ with 105 pounds, while Roamer, three years old, in 1914 ran it in 1:49 3-5 with 124 pounds.

"It is the habit of old racing men to admit that, while the horses of today may be speedier than those of the 'sixties' and seventies,' it is for short distances only; that they cannot carry their speed—they are not so stout and cannot stay over a distance of ground like the older generation. But the records of time do not bear this out. When I began attending races Kentucky's 4:01½ was the 2¼-mile record, made at Saratoga in 1965, as a four-year-old, with 104 pounds . Ethelbert, the same age, with 124 pounds, covered the distance at Brighton Beach in 1900 in 3:49 1-5—over twelve seconds difference and with 20 pounds more weight. Again, take the record for four miles: We have practically ceased to run four mile races, therefore there is less opportunity for comparison; but in 1874 Fellowcraft, four years old, at Saratoga ran the distance in 7:19½, with 108 pounds up, while in 1912 Sotemia, a five-year-old mare, ran it at Louisville in 7:10 4-5, with 119 pounds.

"Accordingly, the 'predonderance of evidence,' as they say in the courts, is rather in favor of the horse of today. Personally, I believe we have horses now in training that could gallop four miles in close to seven minutes. But they would need to be specially trained to do it. The system of training today is opposed to the system of training for four-mile races. Horses are trained to break fast and run at a high rate of speed from the start. Such horses would find it difficult to maintain that rate of speed very far. Indeed, the limit of extreme speed in a racehorse is only about three furlongs—perhaps 600 yards is nearer the mark.

"Some horses can carry a very high rate of speed for a mile or nine furlongs, but to cover four miles they would need to be trained to rate along, the heart action regulated, and the muscular system developed to sustain the prolonged effort. That would diminish their speed for the kind of races now in vogue; hence trainers are naturally averse to distance races, and rightfully so, as distance races are so few that the game isn't worth the candle."

All ten of the outside subscriptions to Headley & Miller's popular sire Uncle have been subscribed for 1917. A. K. Macomber got four, R. J. MacKenzie two, F. R. Hitchcock, S. L. Parsons, Otto Stifel and A. L. Rogers one each.

◆ ◆ ◆

Walter S. Heather, of Rugby, England, has made eleven nominations in the Futurity for 1919 to be run in New York. This is certainly an innovation and may lead to English breeders being well represented in the leading American stakes.

◈ ◈ ◈

O. A. Bianchi sold this week the chestnut mare Irish Queen, by Bearcatcher, dam Maid of Fermoy, by Trentola, by Trenton, and a half interest in the yearling colt, by Jim Gaffney, out of Irish Queen, to W. H. Luesing, for $1,800.

SADDLE and SHOW HORSES

The horse is given to man to use, but not to abuse.

◈ ◈ ◈

Geo. E Stocking, of Rochelle, Ill., last week purchased a good pleasure-using gelding from Blades & Holeman of Holliday, Mo., for $275.

◆ ◆ ◆

Col. Paul Brown, the St. Louis horse lover, reports the sale of his stallion, Foss McDonald, to George M. Taylor, of Trenton, Tenn . Foss McDonald was purchased by Col. Brown at the Greenvell dispersion sale at Lakenan, Mo., last fall, and was considered one of the best bred stallions in Missouri.

◆ ◆ ◆

Jas Buford, of Paris, Mo., is working nine saddle horses, among them the much-talked-of Katherine Farmer, owned by W. W. Crosswhite, of Clark, Mo., that is said to be going at her work in the proper manner, entirely settled and racking like a wild horse. He recently received four new ones from Jake Sikes, of Sikeston, Mo., for training.

◆ ◆ ◆

Jas. Houchin, of Jefferson City, Mo., owner of the world famous saddle stallion Astral King, reports the demand for the progeny of that celebrity greater than he can supply. While there are many noted matrons at the Astral King farm, and a large number of colts produced every season, Mr. Houchin has been forced to buy the colts of others breeders and this has brought the public service of this stallion in great demand.

◆ ◆ ◆

In this issue J. R. Hodge, of Laddonia, Mo., offers his magnificent stallion, Scottie Moore McDonald, for immediate sale. Ill health prevents this well known breeder giving this horse proper attention and the sale must be made at once . This unfortunate condition will be the cause of some one getting a beautiful saddle stallion, a proven sire and show horse, at a very low figure. Scottie Moore is sired by Rex McDonald, and is one of the handsomest horses in existence with the blood of the old champion.

◈ ◈ ◈

There has been more fox hunting in Missouri this year than in a decade, clubs being formed in every section of the north-of-the-river country, and many new recruits going in for the sport. Dell Holeman, of Monroe county, has recently purchased a pack of hounds and has organized a club in that section. Fox hunting in Missouri is not a society stunt, it's a regular whiz of a sport, and the foxes are regular, "wild and woolly" and are scouted from their original dens. The baying of the hounds has the same effect on the old-timers as of a band playing Dixie.

◈ ◈ ◈

It is understood that E. A. Trowbridge, of the College of Agriculture, Columbia, Mo., has been invited to serve as judge at the Cuban-American horse show at Havana, next month. He has not definitely decided, however, whether he will accept or not. Mr. Trowbridge is one of the best judges in the country and his conscientious work has made him a universal favorites with exhibitors. He has served in many states and was the judge at the California State Fair last year. His election is a splendid compliment of the association to the Missouri College, as well as to the saddle horse interest of that state.

◈ ◈ ◈

Blades & Holeman, of Holliday, Mo., are represented at the Denver horse show, this week, with the beautiful roan mare, Lady of the Decoration; the junior stallion, Beauchamp; the three-gaited Catherine Countiss, Theda Bara, and Dan Matthews. They are also showing the senior stallion, Noble Rex. In a letter to the Breeder and Sportsman, a recent visitor to Holliday declares Blades & Holeman will be well up in every award at the show. The Judy mare, referred to above as Lady of the Decoration, will make her first real show for these horsemen at Denver, under the name Adelaine Jeane, and Holeman declares there never was "no such hoss." This mare's show at the Missouri State Fair last year was sensational. She was green, thin and pulling, but nevertheless at the same time wonderful. Beauchamp was the sensation of the saddle horses at the International, and is fifty per cent better now than at that time. Mr. Holeman probably will only show one of these in the $1,000 saddle stake and will reserve the other for the other class.

The great demand for colts of champion Astral King is a splendid recognition, on the part of horse lovers, as to the popularity of that celebrated stallion. Astral King is siring a magnificent lot of colts which are selling as rapidly as they come on. The prospects for a "full house" in the stud this year are also bright for the champion.

◈ ◈ ◈

Lee Bros., of Mexico, Missouri's largest operators in the buying of horses and mules, during the last year averaged four carloads a week in shipments to the National market. In addition the firm's sales of high-class horses sold to Eastern users and dealers increases the number appreciably and value very materially. It is doubtful if there has been a concern in the Middle West that has gotten more out of the "war-horse" business than the Lee Bros. They are keen business men, and upon this business opening up their foresight and good judgment indicated to them the great possibilities of the business and they got busy and have continued busy. In this connection the firm has paid to the farmers of Central Missouri many thousands of dollars that would not have been theirs had it not been for the enterprise and resourcefulness of this popular firm. While the bulk of the buying during the last year has been done by Col. Will Lee, yet the junior member of the firm, Ed L. Lee, has been a big factor in this end of the business. George Lee has devoted the greater part of his time to the selling end and has been present at the inspections at which the representatives of the foreign governments pass upon the quality and suitability for service of horses and mules furnished them by his firm. In this connection and as a testimonial of the good judgment used by the buying end of the firm Lee Bros. have had "branded" more horses and mules than any other firm of shippers on the National market, with fewer "rejects" in proportion to the number inspected.

JOHN T. HOOK, America's premier saddle horse exhibitor. Mr. Hook is the manager of the saddle horse department of Longview Farm, which is the show place of Missouri and the leading saddle horse nursery of America. The Longview stable, headed by the magnificent stallion, My Major Dare, is being exhibited by Mr. Hook at the Denver Horse Show this week. Reports from Denver are to the effect that this is most spectacular exhibition of show horses ever given in the West and that the attendance is the best in history, fully 10,000 persons attending every performance.

Mrs. J. Quinn, one of the prominent patrons of the San Francisco Riding Academy, has not missed a day on her favorite mount in many weeks. Mrs. Quinn is one of the most accomplished devotees of this popular sport in the city.

◆ ◆ ◆

Langhorne Tabb Anderson, of Point-au-View Farms, Maysville, Ky., has purchased of Jump Cauthorn, of the Breeder and Sportsman, the undeveloped saddle mare, Lillian Terry. Mr. Anderson has been "dickering" for the mare for several weeks and when Cauthorn came to California the Kentucky horseman took advantage of the opportunity and purchased her. While the price was an exceptionally good one for a green mare, Mr. Anderson was well aware of the possibilities in this sensational doing mare. She is a full sister to The Intelligencer, one of the best horses produced in Missouri in recent years and for which an offer of $4,000 was refused. Like her illustrious brother she is a bay with stripe in face and hind feet white, with excessive style and action.

Two of the most attractive horses in San Francisco are the chestnuts, Money and Tango, owned and ridden daily by Mrs. Winfield Scott Davis, a charming saddle horse devotee.

◆ ◆ ◆

Mr. and Mrs. St. Clair Boyd, who are spending the winter in the city, brought their favorite saddle horses up from their ranch and are taking advantage of San Francisco's splendid equitation paths and byways.

◆ ◆ ◆

A. J. Donzel, a well known San Franciscan, who is along in the sixties and rides a registered trotter every day, has not missed a day in the saddle for years and attributes his splendid health to this form of recreation.

◈ ◈ ◈

John T. Hook, manager of the Saddle Horse department of Longview Farm, Kansas City, Mo., writes the Breeder and Sportsman, from Denver, where he is showing the champion, My Major Dare, Joan Sawyer, Prince of Melbourne and a new "King Bee" as he expressed it, called Silver Zizz, that they are having a fine show this week. The writer fully appreciates where the name Zizz comes from, as every horse lover in the Middle West and South knows what that popular sportsman, D. Schilling, said when he mounted the sensational High Ball, at the International several years ago. While the owner, Miss Loula Long, declared at the close of the 1916 International that My Major Dare would be retired from the show ring, having won all honors possible for a saddle horse to win, she has, however, decided to make one more performance with him at Denver, where both owner and horse are so popular. Mr. Hook in his letter declares he has the most sensational saddle horse he has brought out in many years in Silver Zizz, and expects to feature him in stake and championship classes the coming season. He was bought at Columbia, Mo., from Joe Howell, a well known horseman, who was using him as a farm horse, and when the writer first saw him he thought that was what Hook was going to do with him. The popular manager declared to the critics present ,however, that he would make them all sit up and take notice before another year. He paid less than $200 for him and it is doubtful if he could be bought for $2,000 now. Deals of this kind are the cause of John Hook's being the highest salaried saddle horse man in the United States. Watch next week's Breeder and Sportsman for a full report of the Denver show.

Payments Due Feb.1 in $5,000 Saddle Horse Futurity.

Owners of saddle horses eligible in the California State Fair saddle horse futurities are reminded of the payment due in stakes number one and two, February 1, 1917. Stake number one is for three-year-olds, to be shown under saddle, and a payment of $25 is due and must be paid on every horse that is to be kept eligible and to show. Stake number two is for two-year-olds, to be shown to halter, and a payment of $15 must be made if the entries are to be shown in 1917 and kept eligible for the three-year-old division of 1918.

Few stakes have ever been offered of such magnitude and with such liberal conditions for saddle horses and this year's show will undoubtedly prove of more interest than any saddle horse exhibitions ever given in California. The three-year-olds have been rivals since weanlings, and this will be a test between the winners of former shows, where individuality played such a prominent part and their ability to perform five gaits correctly. Individuality, manners and soundness to count as before. It will bring about more than any one thing the qualities of the sire and matrons of California, and the winners will be worth double their present value. The breeders of saddle horses and horse lovers of California have been watching these entries show since their weanling form, and they are keen to see them compete in a performance class. The three-year-old stake, or futurity number one, is for $1,200, and will be divided between the three and five-gaited varieties; $800 going to the five-gaited entries and $500 to thethree-gaited class. Every owner of colts in these futurities will make a serious mistake if they fail to make this payment. Should the two-year-olds not be in condition and ready for this show, they should be kept eligible for the final show in 1918, for after the sensation the three-year-olds will make in futurity number one, there will be a demand for two-year-olds eligible for next year's show. Every owner who expects to continue in the business and to encourage the breeding of saddle horses in California should make these payments.

◈ ◈ ◈

James Hayes, on the W. M. Afflick place in Saling Township, now has forty head of mules to feed. He recently purchased a pair of extra good cotton mules from Walter Bryson.

◆ ◆ ◆

Robt. Ferris, of Laddona, recently sold twelve head of medium classed mules to O. E. Underwood, of Wellsville.

◈ ◈ ◈

For nine years the grey gelding, "Billy Milo," has been pulling a mail wagon and a man that weighs over 200 pounds. In that time Billy has been off duty only four days, aside from legal holidays, traveling a distance of 52,560 miles, equal to two times around the world.

Notes and News

October 1st to 14th are the dates selected for the Kentucky Trotting Horse Breeders meeting in 1917.

◆ ◆ ◆

E. J. Tranter now owns Zephyr 2:07¼, the dam of Virginia Barnette 2:07¾.

◆ ◆ ◆

W. H. Kinnan of Cleveland has been elected secretary of the Grand Circuit.

◆ ◆ ◆

Seven thousand dollars will be given for harness racing at the meeting at Vancouver, B. C., August 21-25.

◆ ◆ ◆

Dick McMahon is back at Macon, Georgia, where his horses will winter and get their early spring training.

◆ ◆ ◆

Tenants of Madison Square Garden have been notified to move by March 1st, and the Fasig-Tipton Company will soon announce its new headquarters.

◆ ◆ ◆

Ed Geers, who will soon celebrate his 66th birthday, is reported to be in fine health this winter and to have fully recovered from the effects of the two smashups he suffered last summer.

◆ ◆ ◆

Of the ten head of horses owned by Mr. I. L. Borden that were at the Pleasanton track four head have been turned over to Sutherland & Chadbourne and the others sent back to the farm.

◆ ◆ ◆

The time allowance will permit many a trotter or pacer that has not equaled his record for a few years to get back into the game again in classes where he belongs.

◆ ◆ ◆

There are several horses being worked at Red Bluff and it is thought a good meeting could be pulled off there this year if action were taken in that direction.

◆ ◆ ◆

Sutherland & Chadbourne are only jogging the horses in their stable at Pleasanton these days, but they are as busy as bees as their stalls back of the Rose Hotel are about all full.

◆ ◆ ◆

John H. Wilson, of Springfield, Ohio, who owned Nutwood Wilkes 2:16½, writes to renew his subscription to the Breeder and Sportsman and states that they were enjoying good sleighing in Ohio last week.

◆ ◆ ◆

W. H. Smollinger, for several years prominent in the affairs of the Great Western Circuit, has sold his Iron Mountain Stock Farm, Iron Mountain, Mo., and will dispose of all his trotting stock except Angiola 2:06, and her son, St. Roch, by Bingen 2:06¼.

◆ ◆ ◆

William Frye, an aged horseman who has worked at Pleasanton for several years past, suffered a paralytic stroke one day last week and is now at the Alameda county hospital. Owing to his age, his condition is serious.

◆ ◆ ◆

C. E. Berry, who trained Mr. I. L. Borden's horses last year, has left that gentleman's employ and desires to engage as trainer of trotters and pacers. Mr. Berry has been a successful trainer in the east and can furnish the very best of references.

◆ ◆ ◆

Jos. Twohig was at Pleasanton last Sunday, arranging to send a couple of mares to George Ryan to be bred to The Anvil and Vernon McKinney. Mr. Twohig is engaged in farming at Mission San Jose, but he may find time this summer to take a horse or two through the California circuit.

◆ ◆ ◆

The many friends of Mr. W. P. McNair of Phoenix, Arizona, who has acted as starter for the harness races on the California Circuit on several occasions, will regret to learn of the death of his estimable wife, which occurred at Phoenix on Saturday, January 13th. The cause of death was heart disease.

◆ ◆ ◆

The latest report concerning the future of Madison Square Garden, New York, is that that part of the property containing the arena, where horse shows and sales have been held, will be preserved, but that on the Madison and Fourth Avenue frontages will in all probability be erected modern business buildings.

◆ ◆ ◆

Several changes will be made in the next Kentucky Futurity, soon to be announced. The money set aside as prizes to the original nominators of the dams of winners has been increased from $800 to $3000, of which $2000 goes to the three-year-old division and $1000 to the two-year-old. Prizes are to go to nominators of dams of the first, second, third, fourth, fifth and sixth horses in each race. The pacing division of the stake is entirely eliminated. It has also been decided that the prize money will go entirely to the original nominators and none to those who get substitutes. In the case of any of the latter winning, the prize money will revert to the association.

Harry Boyle, of Livermore, intends breeding a number of his big mares to a fine jack this year. He received the jack from Stockton last week and the horse and mule experts of Livermore who were present to look him over when he was taken off the cars predict that there will be some extra fine mules sired by this jack.

◆ ◆ ◆

Tests recently made with the object of ascertaining the quantity of water drunk by horses went to show that medium-sized animals, engaged in farm work, consumed on an average from five to six gallons per day, and in hot weather, or under severe work, from eight to ten gallons. On dry rations of grain and hay they will naturally require more water than if soft, succulent foods of any kind are included to any extent in the rations.

◆ ◆ ◆

The Bureau of Estimates of the United States Department of Agriculture estimates that on January 1st, 1917, there were 21,126,000 horses on farms and ranges in this country, having an average value of $102.94 per head and a total value of $2,174,629,000. This is a slight decrease in the total number of horses over last year and a slight increase in value, as they averaged $101.60 last year. There were nearly five million mules in the United States January 1st, with an average value of $118.32 per head.

◆ ◆ ◆

A. R. Miller, of Vancouver, B. C., the man who formerly owned Bon Voyage 2:08 and Bonaday 2:11¼, has purchased the bay stallion Hal Scott 2:19½ by Hal B. 2:04½, dam Maud Hunter by Captain Hunter, grandam by Geneva. Hal Scott made his record in 1911 and under the allowance made by the new rules will get a second off his record for every year since, which will make him eligible to the 2:26 classes. He is a sound and fast pacer, a good looking stallion and resembles his famous sire.

◆ ◆ ◆

Hemet, Riverside county, desires to hold a race meeting during September this year. The half mile track at the famous Hemet Stock Farm is one of the best on this coast and has all the appointments for a first class race meeting. The plan as announced in the Hemet News is to give a two days meeting during the second week in September, with two harness and one running race each day. Purse, $400 for the harness events and $100 for the running races. The meeting would be just prior to the one at Riverside.

◆ ◆ ◆

At Pleasanton Bert Webster is getting five head ready to attend speed school this spring. He has a couple owned by Thomas Coulter of Sacramento, both out of that fast mare Queen Derby 2:06¾, one a four-year-old sired by The Bondsman and the other a two-year-old by Joe Patchen 2d. Others in the string are a gelding by Cole Pointer out of a mare by a son of Piedmont, another is a yearling by Rapallo out of a mare by Washington McKinney, and Rodney Patchen by Joe Patchen 2d, dam Miss Harris by Sidney Dillon.

◆ ◆ ◆

Last year the American Trotting Register Association had a rule that records made prior to and during the week of which July 4th was a part were not winrace records and therefore no bars. There seems to be an impression among horsemen that the new rules for 1917 vacate the conditions of the old rule. This is not the case. While no such conditions will be made this year the records made in races held during the week of July 4th or prior thereto in 1916 will not keep them out of races in 1917 to which they are otherwise eligible.

◆ ◆ ◆

Another of the old-time Califronia horsemen has crossed the great divide. Suel Harris, a native of Maine, who came to California when quite a young man and engaged in farming and live stock raising in Sutter county, died at his home near Yuba City on Thursday of last week, aged eighty years. Six sons and daughters and seven grandchildren mourn his loss . His wife died about fourteen years ago. Mr. Harris was a man of high character, an enterprising farmer, and at one time greatly interested in the breeding of trotters.

◆ ◆ ◆

That the Kentucky Trotting Horse Breeders' Association should abolish the pacing division of the Kentucky Futurity after more than fifteen years' trial is no surprise to the trotting horse fraternity in general. So few pacers were started in these futurities as to make interest in them almost nil, is the reason for this action. The reason for the scarcity of pacing colts is hard to understand. There are as many pacers in the class races as trotters, but so few three-year-old wigglers have been raced in the futurities that these events have been little more than jokes.

◆ ◆ ◆

Sam Norris, of Santa Rosa, reached home last week with a car load of Arabian horses—two stallions and seven mares—which were purchased recently at Hingham, Massachusetts. They were shipped from Hingham by express and were only about six days on the road. These horses were purchased by a wealthy Japanese gentleman who is establishing a breeding farm in Korea for the purpose of raising horses suitable for the Japanese army. Quite a number of thoroughbred mares have already been purchased and shipped to Korea.

Horsemen will sympathize with George A Bain, the widely known live stock auctioneer who cries the Old Glory and other big sales, in the loss of his mother, who died suddenly last week at Lexington, Ky. Mrs. Bain was seventy-six years old, and is survived by her husband, George W. Bain, and his two sons, George A. and John W.

◆ ◆ ◆

Frank Loomis is handling a very elegant three-year-old chestnut colt by Prince Ansel, dam Princess Bessum, dam of Prince Del Monte 2:22¼, second dam Carrie Malone, dam of Ray o' Light 2:08¼ and several others by Steinway, third dam Katie G., dam of Klatawah (3) 2:05½. etc. by Electioneer. This colt is owned by W. C. Brown, a Vancouver, B. C., barrister. Mr. Loomis is wintering several head of race horses at Vancouver, B. C.

◆ ◆ ◆

Two important deals were put through at Lexington week before last. James Snell sold to the Pastime stable for a snug sum the promising youngster Harvest Song by The Harvester. This youngster was one of the juvenile sensations at the Lexington track last summer. The other sale was made by John Splan to Roy Miller, and was of the four-year-old Miss Gaiety that took a breeder's record of 2:20 as a three-year-old last year. She is by Peter the Great.

◆ ◆ ◆

Richard W. Russell, a pioneer of California and for many years engaged in the stage and livery business at San Andreas, Calaveras county, died at Stockton this week, aged 86 years. Arriving in California from New York by way of Cape Horn in September, 1849, Mr. Russell engaged in mining in the Mother Lode country. In 1852 he settled at San Andreas as a miner and sluiced out gold with three partners in the gulch that runs through the town today. Each man usually cleaned up about $30 per day. In 1854, with a few head of horses and two open buggies, he went into the livery business. Later he owned some of the finest livery horses to be found in the mountains . In the '70's Mr. Russell went into the stage business with a line running to Mokelumne hill. Later he operated a line from San Andreas to Milton. He had lived in Stockton for many years.

◆ ◆ ◆

Mr. C. A. Durfee hitched up his new Dodge machine last Saturday morning and invited Secretary Jos. Waddell of the California Fair and Racing Association, Mr. Nick Sweeney of Oakland, and the editor of the Breeder and Sportsman for a ride to Pleasanton. This is to certify that "Pop" is a careful driver, never exceeds the speed limit, and is as good a chauffeur as we ever rode with. Only once on the entire trip was there an incident that caused any worry . The engine stopped near Dublin and as anyone by the name of Durfee is certain to be well known in a town of that name, our chauffeur sat still and waited for someone to come along that was an expert with gas engines. A handsome young man driving a big car soon hove in sight and the question was put up to him. He raised the lid, looked at the engine and said there was nothing the matter. He thought perhaps Durfee had shut the gas off and forgotten to turn it on again. So the electric button was pushed and the engine turned over and worked as smooth as butter. Apologizing to the young man for delaying him, and thanking him for his advice, "Pop" started up and brought his guests safely into port. He insisted, however, that the engine stopped of its own accord and that in his opinion either the magneto crossfired or the carburetor was hitting its knees. He said the car acted the same way once before but that time he started it by putting a few gallons of gasoline in the tank. Thanks to Mr. Durfee we all had a fine ride and Geo. Ryan, superintendent of the Pleasanton track, treated us to the finest dinner we ever sat down to on a race track.

Horse Famine After the War.

That the next ten years will see the greatest demand for horses the world has ever known is the opinion of Wayne Dinsmore, secretary of the Percheron Society of America. His belief is based on the unprecedented destruction of horses in the great war in Europe, which some authorities estimate as high as 10,000,000. This country alone has lost one million horses and mules since the outbreak of hostilities. France, England, Germany and Austria as well as all the other countries in Europe, must have been stripped of available animals for military purposes. Russia alone has a supply sufficient to meet her own needs.

When the war is over and the men under arms return to agriculture and industry every country in Europe will be short of horses unless the market experts are much mistaken. They expect to see hundreds of thousands exported from the United States after peace is restored. Breeders who have ceased to raise horses in expectation that motor vehicles are going to supplant them in nearly all lines of work will soon see the mistake they have made, Mr. Dinsmore declares. "It takes time to make headway in the horse business," he says. "Five years are required to grow a horse of marketable age. At best one should not expect more than two foals from three mares, on an average, per year. Moreover, not more than sixteen per cent of our farmers are raising any colts. Two or three years hence the others are going to wake up only to learn that a great opportunity has passed."

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

No Arms for Aliens.—A bill is to be introduced by the Fish and Game Commission prohibiting the carrying of firearms by aliens. This measure is the most far-reaching and most important of any that the Commission is contemplating.

A meeting of the committee on game and fish regulation last week disclosed that many of the members were in favor of such a law. Carl Westerfeld, executive officer of the commission, is of the opinion that the bill will be carried.

Following the enactment of a similar statute in Pennsylvania, the Italian Minister contested the law on the ground that it was unconstitutional. A year ago the United States Supreme Court held that such a law was constitutional. Since that time other states have enacted the same measure.

Eighty per cent of the violations of fish and game laws are made by aliens, according to Assistant Executive Officer Hunter, who also points out that in the past few years alien hunters have killed or wounded at least six state deputies.

Angling Club Elections.—Annual elections in the two leading anglers' clubs of San Francisco have taken place recently. The California Anglers' Association has elected practically the same set of executives who held office last year. They are: Floyd Spence, president; Charles Bredenstein, vice-president; George Wentworth, secretary; H. Cohn, treasurer; and W. Ogle, Charles Gibbs and Joseph Stringer, directors.

William von Dohlen now heads the San Francisco Bass Club, for two years presided over by A. W. Thornton. E. F. Davis is the new vice-president, while James S. Turner and Charles H. Kewell were re-elected secretary and treasurer respectively.

The Bass Club announces that it is prepared to line up behind the Fish and Game Commission and support any reasonable measure intended for the protection of fish. However, the sentiment of the club ,as voiced by Thornton, is against any radical measure ,which would have little or no chance of success at Sacramento.

Hogs Eat Fish.—That hogs are fattening themselves on bass, shad and salmon—the fish that the State Fish and Game Commission each year spends thousands to protect and hatch—and that millions of these fish die each year in the irrigating ditches of Sacramento valley, are some of the pertinent facts disclosed in a communication from H. G. French of Jacinto ranch, in Glenn county.

Hatch charges that the Fish and Game Commission is derelict in its duties in not stopping the tremendous loss of valuable fish, which are sucked up by the powerful pumps which draw water for irrigation from the valley rivers. He says:

"All that come within reach of the suction of the large pumps are doomed, not to immediate death, but to an eventual death in the canals, which have no outlet to any stream, and are allowed to run dry each winter, when irrigating ceases and the pumps are shut down.

Striped bass exceeding a pound in weight have been sucked through even the small 24-inch pumps, and bass up to 10 pounds in weight frequently come through them.

"To see the hogs wading through these shallow pools, that are nearly solid with fish, feasting on three-inch bass, perch and all varieties of fish that spawn in the Sacramento river, is enough to make a sportsman's heart bleed. These canals destroy more fish than all the fishermen on the upper Sacramento.

"Since, according to the highest authority, more than 80 per cent of all salmon hatched in the natural way fail to reach maturity, whereas over 90 per cent of those released by hatcheries do, would it not be better to propagate more salmon and protect them while on their journey to the sea, rather than to curb a rapidly growing industry and add to the cost af salmon to the consumer by putting further restrictions on the fishermen?"

Indoor Rifle Match.—Philadelphia, Jan. 20.— Dr. W. G. Hudson of Wilmington, Del., won the national indoor 22-calibre rifle championship here tonight, defeating Arthur Hubalek of Brooklyn, the title holder, by a single point. Dr. Hudson scored a total of 2,468 points.

Alfred P. Rains of New York, world's champion pistol shot, won the 25-shot pistol championship of the United States with a score of 236 points. Captain W. H. Richard of New Haven, of the United States army, won the 20-shot prone rifle match with the score of 199 points and the 10-shot prone match with a score of 300.

Tough on Rabbits.—Beware, you hunters who chase the naughty bunny! Beware, rabbits are "wors'n" we thought. "Meadowlark" Stuckenbruck, the blacksmith Senator from Lodi, has introduced an amendment to section 637½ of the penal code, which maligns and injures the character of our native jackrabbits.

Not content with calling the long-eared jumpers "predatory" animals, he puts them in the family Feladae, the cougars, bobcats and other wicked varmints. Perhaps the Senator has found a new species in the wilds of the San Joaquin valley, a curious animal with cats' claws and a long tail, which bristles when dogs approach.

Many times we have been startled when a huge, mule-eared bunny jumped right out of the brush in front of our gun, but never did we feel the need of a low-branched tree.

With the rabbits of the ferocious family Felidae at large, it's trees for us.

Big Game Farm.—G. W. Bene, a Visalia resident, is preparing to start a wild animal farm, and he proposes to procure the nucleus for his farm from Golden Gate park in San Francisco. Register H. P. Andrews of the Sacramento land office has received a modest request from Bene that he be sold three deer and two buffalo from the Golden Gate park herd

Bene's letter follows: "Dear Sir: I was informed by a friend about deer. There are some deer at Golden Gate Park and I would like two does, one buck and two buffalo heifer calves.

"I would like to get a start of them. If you can grant me a favor to get them, I wish that you would be so kind enough to help me, so I can get a start. Write soon."

Andrews is a bit fearful that the city of San Francisco will not allow him to sell a part of its wild animal herd, so he has referred Bene's letter to the San Francisco park commissioners.

Bill for Preserve.—Santa Barbara.—State Senator R. Thompson proposes to make a strong effort to secure two wild-game preserves for this section. One, it is explained by the Senator, he expects to have located near Lompoc and the other in Ventura county, both on the National Forest Reserve.

"The slaughter of deer is bringing this game close to extinction," said Senator Thompson last week, "and we are facing a really serious problem. Either we must close the deer season for at least three years or establish game refuges where wild game will always be immune from the huntsman.

"I favor two preserves as the most feasible solution. We have the forest reserve officials with us in this plan. By wise conservation we will be able to add materially to the wild life of the county and increase the reputation of Santa Barbara and Ventura counties as a hunter's paradise."

Forest Rangers Visit Park.—A hundred Forest officers from the National Forests in California, delegates to the Forest Ranger Convention held in Berkeley from January 3 to 12, visited Golden Gate Park Sunday afternoon, guests of Superintendent John McLaren. The object of the trip was primarily to afford the Forest Rangers a lesson in the intensive development of the recreation features of Golden Gate Park and the methods of handling the traffic problems in this popular playground.

The trip was made in three "rubber-neck" coaches provided by the Park Commission. Visits were made to the California Academy of Science, Stow Lake, and the Beach. On their return to Berkeley in the evening, the Rangers, whose work is so largely the recreational development of the National Forests and the handling of mountain travelers and campers, were given a fireplace talk by William E. Colby, Secretary of the Sierra Club.

The morning session included an address by Supervisor Bigelow, Nevada City, on "Service to Recreationists," a paper by Supervisor Kotok of Placerville, California, on "Improvement Work,'," with particular reference to National Forest roads and trails, and a paper by L. A. Barrett of the District Forester's office, on the application of modern efficiency methods to the recreation development of the National Forests.

It is believed by many expert hunters in California that the growing of so many thousands of acres of rice in the Sacramento and San Joaquin valleys is having a peculiar effect on some of the wild ducks. Many thousands of birds have been killed, it is said, so devoid of flesh as to be little more than skin and bone . Close examination of the birds shows that the gizzard of each is in an unhealthy condition, the craw without sand or grit and the passage from the craw to the gizzard so attenuated as to apparently prevent the passage of food. There is a theory that the birds feed greedily on rice without sand or grit to help grind the food and thus fail to secure the mixture that is needful to proper nourishment.

CALIFORNIA DOGS GOING EAST.

Miss Anita Baldwin and Martin I. Smith to Show at Westminster.

There will be a good representative entry of California dogs at Westminster show this year. Anoakia Kennels are showing six dogs of each of their three principal breeds. Airedales, Bulldogs and Russian Wolfhounds, says H. M. Robertson in the Kennel Review. The dogs go through from the Coast in a special train under charge of Chris Shuttleworth. It is unlikely that they will take in any of the other Eastern fixtures but they have not definitely decided. The probability is that they will leave immediately after the New York show and take in pasadena show, the middle of March, if all is well.

Mrs. Baldwin's dogs are in great shape meantime and ought to do well. It takes a lot of ambition and enterprise to enter eighteen dogs and travel them three thousand miles, and no matter what honors they gain they will be well deserved.

Martin I. Smith, Jr., is sending through a corking good Wire puppy under charge of Billy Coats of Vancouver, who judged him at Long Beach. This puppy should make a good showing in any sort of fast company. He was bred by Mr. Smith at Del Rey Kennels, near Venice, and called Del Rey Wycollar Boy, after his illustrious dad. He is out of Venus of Paignton, imported from Stephen Plumpton last year. This bitch whelped a marvelous litter and is being bred back to Wycollar Boy next time in.

I have no word of any other Airedales that are to brave the journey except those of the Anoakia Kennels. but if these are taken as representative of California Airedales, and this Wire puppy as an example of the home-bred stuff, it will look like another boost for the Golden State. From Lamonda Park there will sojourn a lonesome Whippet bitch, Rossmoyne Dancing Girl.

* * *

The regular quarterly meeting of the Pacific Coast Collie Club was held at 1275 Stanyan street, San Francisco, on the evening of October 6th, with the president, Thomas J. Murray, in the chair. After the calling of the roll, the minutes of the previous meeting and the treasurer's report were read and approved.

The resolution regarding the reinstatement of the Valverde dogs, and the letter which the secretary was instructed to prepare, was then discussed at length, and the following letter and resolution submitted:

"American Kennel Club, New York, N. Y.—Gentlemen: At a recent meeting of the Pacific Coast Collie Club, held in this city, the following resolution was presented and unanimously carried, with instructions that the same be presented to your body:

" 'Resolved, That we petition the American Kennel Club for reinstatement of dogs purchased from or bred from the Valverde Kennels of California.

"In presenting this resolution and asking your consideration of the same, we wish to make clear our position in the matter, and the reasons which impel us to make such a request. We have no desire that the painful and unpleasant memories of the past be revived; no one who truly loves a Collie can but regret that the master mind which directed operations at Valverde has been lost to us. There still remains, however, a splendid kennel, with the blood and breeding so much needed in Colliedom.

"The risk in importing dogs in these days is, as you know, a great one. Even the long journey across our own continent has seriously to be considered. But greater than any financial risk or loss, is the tragedy to the Collie lovers here on the coast, that right at our doors the greatest Collies of all time are unavailable by purchase or for breeding purposes. The immortal Anfield Model and his progeny still live at Valverde. May we not perpetuate them?

"This resolution was presented, considered and carried with but one thought of better Collies, and saving to the world this royal blood and breeding. We most earnestly beg that you, as the parent body of the dog fancy, will consider it in the same spirit.

"Respectfully submitted,

"CALIFORNIA COAST COLLIE CLUB."

Signed: Thomas J. Murray, president; Mary R. Rand, vice-president; Charles Cleveland, director; Watler Duncan, director; E. C. Rand, director; Mrs. Walter Duncan, secretary.

The secretary was also instructed to send a copy of this letter to all Collie clubs in the United States and Canada ,and as far as possible to every known breeder of show stock.

S. F. Fly-Casting Club.—San Francisco fly casters are planning a big spring tournament at Stow lake on February 22. The contests will mark the first activities of the sport for the new year.

Interest in this sport is increasing, partly due to the move of the San Francisco organization to bring about a coast-wide association. The plan originated with Paul W. Shattuck and has met the approval of the secretaries of other coast clubs.

A "ladies' night," an annual affair with the local club, will provide opportunity for the presentation of the trophies which are to be awarded to winners in the spring tourney . The date of this dinner is not settled, but probably will be on the evening of February 22.

INTERSTATE ASSOCIATION AVERAGES.

Coast Shooters Rank High For the Season of 1916.

Breeder and Sportsman:—Following herewith is the official Interstate Association list of trapshooting averages of Amateurs and Professionals who qualified in 1916, with names of contestants, total number of targets shot at in Registered Tournaments, total number of targets scored, and percentages.

The averages for single targets for both Amateurs and Professionals are based on a minimum of 2,000 targets, as per The Interstate Association ruling to that effect.

The averages for double targets are computed on The Interstate Association Tournaments only, and they are based on taking part in two tournaments as a minimum, as per The Interstate Association ruling to that effect.

THE INTERSTATE ASSOCIATION,
E. REED SHANER,
Pittsburgh, Pa. Secretary.

The leading twenty shots of the country with the official averages of the shooters on the Pacific Slope are as follows:

Du Pont 18-Yard Shoot.—Trapshooters throughout the United States will no doubt be interested in some information relative to the Du Pont 18-yard mark Championship Trophy since the last Accumulation Purse of $200 was shot for at the Westy Hogan Westy Hogan Tournament in Atlantic City, N. J., during the month of September, 1914. The winner of the trophy at that shoot was William Foord of Wilmington, Del., with the remarkable score of 97x100. The historic cup was again placed in competition at the Westy Hogan shoot in September, 1915, when it was won by Allen Heil of Allentown, Pa. Mr. Heil duplicated Mr. Foord's excellent score in winning this trophy.

With the consent of the Interstate Association the cup was next placed in competition during the month of July, 1916 at Philadelphia, Pa., on Practice Day of the Eastern Handicap. The late A. B. Richardson of Dover, Del., led the field with 97x100. It is interesting to note that the winner of the last three competitions was compelled to break 97 in order to capture this attractive trophy.

The cup was shot for last at Atlantic City in September, 1916, during the annual tournament of the Westy Hogans. Seventy shooters entered the contest which was finally won by Geo. N. Fish of Lyndonville, N. Y. Mr. Fish broke 96x100, beating out E. L. Bartlett of Baltimore, Md., by two targets.

These shoots have naturally contributed largely to the Accumulation Purse and at the present time there is $174.65 in the bank to the credit of the 18-Yard Championship Trophy.

Trapshooters should understand that under the conditions governing competitions for the trophy they are privileged to challenge Mr. Fish at any time. Challenges should be sent to the Du Pont Powder Company, Wilmington, Del., who will in turn notify the holder of the trophy that he has been challenged. The holder of the cup when so advised must notify the Du Pont Company within ten days of his acceptance of the challenge, naming the place and date for the contest that shall not be later than forty-five days from the date of challenge notice.

When a contest for this historic cup is arranged, by reason of challenge or otherwise, the event becomes an open competition and all amateurs are eligible to compete for the trophy and purse. All contests are at 100 single targets, 18 yards rise, and targets are thrown full 60 yards.

The championship cup is the old Du Pont Smokeless Powder Championship Trophy. It was first won in 1895 by Fred Gilbert of Spirit Lake, Iowa, at Baltimore, Md. If no challenge is received within a reasonable time, it should be understood that the Du Pont Powder Company reserves the right to call in the trophy upon the payment of $10 to the holder and to place it in open competition. It is hoped that another shoot for this attractive cup may be staged shortly in order that the Accumulation Purse may be increased from $174.65 to the necessary $200.

Averages of Arizona Shooters.—The averages of the Arizona shooters during the past season are as follows:

	Shot.	Bke.	Pct.
Barham, W. B., Ray	920	785	.8532
Bertram, W. R., Phoenix	100	36	.3600
Boyd, W. S., Ray	40	29	.7250

Wade, C. F., Williams	40	34	.8500

Trade Notes.—The Portland (Me.) Gun Club ushered in the New Year with an interesting shoot. E. A. Randall, the State Champion, was high gun. Shooting Nitro Club "Speed Shells" he scored 120x125.

Thirty-six shooters faced the traps of the Thornburg (Pa.) Gun Club recently. W. A. Smith, shooting Nitros, was high over all with a score of 48x50.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first $75 and a trophy, and the winner of third place place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Bids for State Shoot.—Clarence A. Haight announces that bids for the California-Nevada shoot will remain open until February 15. Any club desiring to hold the attractive event is invited to get in line before it is too late. The directors of the association will meet at that time and formally make the award.

So far Del Monte and Los Angeles have declared their desire to hold the event. Del Monte ,where traps have been installed, has been anxious to attract the scatter gun artists and Los Angeles papers carry the information that the Los Angeles club will make a bid for the state title shoot.

If Los Angeles gets the shoot it will be pulled off early in May, according to the reports, while Del Monte will likely wait until June or July when the Pacific Coast handicap will be finished at San Jose.

Interest is running high over the selection of the place to be named. Last year at San Jose a large gathering of shooters was attracted and the events were very interesting. Heine Pfirrmann performed the feat of breaking 100 straight to carry off the honors and the competition was close and exciting all the way.

Seattle Association.—With a frosty, snappy day that added considerable zest to the sport, a good-sized bunch of gun bugs turned out for one of the most enjoyable shoots of the season on January 17. New shooters were much in evidence as well as several old-time shooters who turned out for the first time in several months.

D. Rhodes, professional, surprised the bunch by shooting high score in the fifty target event after an absence from the firing line of several months. Tom Wilkes and J. H. Hopkins stacked up the high amateur score, both hitting forty-seven out of the bunch. Hopkins stood high man in the hundred event with a ninety-four. Tom Wilkes and D. Rhodes were in second position in this race with ninety-three each.

Some of the new shooters who have started in the fascinating sport are, J. H. Davis, J. A. Fortier, A. F. Hale, C. F. Reinhard, O. F. Weaver and J. H. McDiarmid. R. J .Ovington of Lake Crescent, Wash., turned out for the first time at the traps since the early eighties.

Portland was well represented by the genial professional known as Pete Holohan. The scores:—

At 50 targets—D. Rhodes* 48, Tom Wilkes 47, J. H. Hopkins 47, Pete Holohan* 46, C. E. McKelvey 45, Ed Jones 45, Ralph Kinzer 44, C. W. Bandy 43, Hi Follerich 42, Jno. Ruppe 40, W. B. Taft 36, E. J. Ovington 35, J. A. Fortier 31, J. H. Davis 29, Geo. Scripture 27, C. F. Reinhard 20, A. F. Hale 16.

At 100 targets—J. H. Hopkins 94, Tom Wilkes 93, D. Rhodes* 93, C. E. McKelvey 92, Ed Jones 92, Pete Holohan* 88, Hi Follerich 79, W. B. Taft 71, J. A. Fortier 65, J. H. Davis 65, J. H. McDiarmid 45, F. O. Weaver 29.

Alameda Elks' Club.—At an enthusiastic meeting of the Alameda Elks' Gun Club on Monday night officers were elected for the ensuing year and plans outlined for a busy season at the traps. The club, which was organized last year with a membership of fifty-nine, will hold monthly tournaments throughout the year. The members also decided to apply to the Interstate Association for a registered shoot on the Alameda grounds on Sunday, April 29. The club will use the first Sunday in each month for its events, starting the season on March 4.

Former officers who handled the gun affairs so well the first year, were re-elected, with Tom Hastings as president, Henry Meinecke vice-president, Fred Hillyer secretary, Tay Croll assistant secretary and treasurer; Bray Thorning, field captain; Charles Linderman, Al Durney, Pedro Martine, Bill Ellis, Lou Schroeder and Bob Vallow, board of directors.

The annual meeting of the Portland Rifle Club was held at the armory January 14, and the following officers were elected: President, Dr. G. Earle Henton; vice-president, Norman Schmitt; secretary, J. S. Hyatt; treasurer, H. F. McDonald; range officer, E. D. Ritter.

Sportsmen's Row

Al Durney, the enthusiastic member of the Alameda Elks' Gun Club, left Wednesday for Honolulu on the steamer Matsonia. Before departing Durney made an effort to have the steamship officials install a trap aboard the ship so that the alluring trapshooting sport could be enjoyed on the ocean. Al argued that the sport would arouse interest aboard ship and at the same time give the shots a chance to try their eye. Shooting targets from steamers is nothing new but it has not been taken up very extensively out here and there is a big field.

* * *

Iit is not often in these days of keen competition that we see an 11-year-old dog winning at bench shows and field trials, but such was the unique record of the Llewellyn setter Count Gladstone's Glad, owned by R. L. Keesler of Harrisburg, Pa. Count Gladstone's Glad won first in the bench show held in connection with the Pennsylvania grouse trials in November in a class that brought forth some twenty-odd dogs, and then came to the field the next day and won second in the All-Age Stake and was runner-up in the Grouse Championship. Count Gladstone's Glad is one of the few surviving sons of Champion Lady's Count Gladstone, and he represents a line of blood that breeders of Llewellyn setters are cherishing with jealous care, for they realize that this blood is absolutely necessary to preserve the "fountain-head" of the strain. The dog, despite his years, is as young looking as a three-year-old.

* * *

The Ontario Government has this season reduced the fee for hunting licenses, granted to non-residents of the province, from $50 to $25. With the magnificent sporting opportunities in the "Highlands of Ontario," and throughout the newly opened territory along the line of the Transcontinental, the season of 1916 should see a large increase in the number of visiting hunters.

* * *

A rabbit with six legs, all perfectly formed, and all "in working order" was born on the beautiful estate of W. Marrigan, Polard Plains Park, Port Arthur, in August last. The rabbit is pure white, of the Dutch breed, both its parents being white also. If it lives it should prove a very valuable pet.

Hugh Poston has been having a time of it getting on his feet, but he is up and about and is looking forward to setting another high mark for 1917.

* * *

Members of the California Fish and Game Commission are mourning the death of Paul Smith, a deputy connected with the commission for five years, who died late last week of appendicitis. Smith was well known in Del Norte and Sonoma counties and in Los Banos, where he had served as game warden. He was known as a hard and faithful worker. Smith, who leaves a widow and child, was the sixth member of the commission to die inside of six months.

* * *

Dr. E. W. Morse of Portland, Ore., is being congratulated on the recovery of his promising poung English setter, "Rowdy," from an attack of distemper. "Rowdy" was runner-up in the Oregon Derby, and might have been the winner had his handler not been taken ill. He gives promise of training on, and, should he develop as his owner expects, he will be a hard dog to beat next year. "Rowdy" is by Chicken Chops—Trixie II. He is coming back strong after his recent illness, and will be given light work by his trainer during the winter.

* * *

If a good breeding season is experienced this season in Utah the sportsmen of Ogden will enjoy some grand quail shooting next autumn, as there are now more birds in the east foothills than for many years. A. H. Moyes of Ogden, deputy game warden, has recenily made trips to the foothills to feed the birds and says he finds them very numerous.

* * *

Every gun club should become a member of a local league if possible. If this cannot be done, arrange team shoots with neighboring clubs in which every member will be permitted to participate and the scores of the five or ten high men to count as the club's team score. If this is out of the question, each week appoint two of your members team captains, divide the members of your club equally as possible in shooting strength and shoot a team race. Such action will create new interest in the club and bring out the members regularly.

* * *

The annual report of state game warden Hedrick of South Dakota shows that over 200 tons of rough fish were seined out of the waters of the state the past year, the work being done under the supervision of the fish and game department.

* * *

The annual banquet of the San Francisco Striped Bass Club was held in a Mission banquet hall on Jan. 25th. Jack Wallace was in charge of the committee arranging for the event and drew up a menue on which individually baked striped bass was a feature.

H. Wheeler Perce of Chicago, for many years prominently identified with the casting game, died suddenly Saturday, January 6, at 1 a. m., from heart trouble. Mr. and Mrs. Perce were returning home from a social gathering when Mr. Perce was suddenly taken violently ill. He was removed from the elevated train and taken to the Palmer House, where he died a few minutes later.

The Del Monte Trapshooters' Association, J. F. Neville, secretary, has affiliated with the American Amateur Trapshooters' Association. There were thirty-four new clubs taken in during the month of December. The Cedar Lake shooting club of Cedar Falls, Washington, R. S. Whaley secretary, was among those that joined.

* * *

Manager Pete Ashcroft is getting the Alameda grounds into shape to open up the local trapshooting season around February 10th.

* * *

At a meeting of a handful of Ventura sportsmen to discuss the proposal of an all-the-year-round open season for steelheads in tide water the oipnion was expressed by Assemblyman Joseph Aagabrite that any such changes would have to be approved by the Fish and Game Commission before the legislature would feel justified in enacting them.

Los Angeles Club.—The cool, brisk weather Sunday seemed to be to trapshooters' liking, and as a result close to forty shooters were in attendance and contested for the Owen Council trophy. The handsome prize was captured by Lew Mellus, who smashed 90x100 targets from the nineteen-yard mark.

Six professionals finished with better scores than Mellus, but their shooting, as usual, went for naught. Frank Riehl and Al Cook, two visiting pros from San Francisco, had the high scores of the day. Both smashed 93x100 targets.

Heine Pfirrmann tried hard to win the Council cup, but failed. The best the Dutchman could do was to smash 88x100. Pfirrmann was anxious to win the Council cup because, a few weeks ago, Council captured the Pfirrmann trophy. Both being sporting goods salesmen, it was a peculiar incident that Council should capture his fellow salesman's cup. Pfirrmann tried to return the compliment, but failed.

William Kennedy won the solid golf take home trophy in the first string of twenty-five. He had a straight score. In the second event at twenty-five targets for a take home trophy Heine Pfirrmann and Owen Evans tied ,each having a score of 24x25. In the shoot-off for the prize Pfirrmann was the victor. He smashed twenty straight, while Evans missed one target.

Fish won the take home trophy with a straight run of twenty-five. In the fourth event at twenty-five targets, Micka and Dunn tied with 23x25. In the shoot-off for the prize Dunn won by breaking twenty straight.

Following are the scores:

—Frank Riehl, 16 yards, broke 93; F. H. Teeple 18—93, J. A .Cook 16—92, Ed Mitchell 16—91, G. Holohan 16—91, L. R. Mellus 19—90, H. Pfirrmann 20—88, L. J. Micka 20—88, J. N. Dunn 19—88, Roy Witman 19—87, O. Evans 20—84, F. M. Gibson 18—84, R. O. Pool 16—84, C. W. Fish 21—83, W. H. Carnahan 16—83, E. C. Crossman 16—83, W. A. Cornelius 20—82, C. W. Clement 18—82, A. Pachmayr 16—81, O. Council 20—79, E. K. Mohler 21—78, W. A. Hillis 21—78, H. E. Sargent 18—78, F. H. Hall 17—78, C. Blackstock 18—77, H. Cline 18—76, Mrs. Pfirrmann 16—74, V. A. Rossbach 18—73, E. Golter 16—48, D. R. Dickey 16—55, O. F. Meilicki 18—53x75, O. D. Ashton 16—52x75, F. Free 18—50x75, E. W. Selbach 16—50x75, William Kennedy 16—58x75, J. G. Griffith 16—32x50, M. Steel 16—31x50, F. C. Patton 16—29x50, G. L. Pulley 16—23x25, Mrs. Crossman 16—22x25, J. H. Bishop Jr. 21—18x25, "Wally Robb 16—12x25.

Vernon Club—A large crowd of trapshooters attended the weekly shoot of the Vernon Gun Club Sunday, and despite the cool wind some very excellent scores were made. Dr. Packard, after a lay-off fro mtrapshooting for a short time, did a come-back Sunday and won the gold bar for the high run. He smashed 48x50.

Stanton Bruner was a very close runner-up with 46x50 smashes. The real high gun for the day was A. W. Bruner. He made a score of 49x50, but as he is a professional his score did not count. In the practice event Bob Bole and Stanton Bruner were high. Each contestant broke 47x50 targets.

Following are the complete scores:

	Hdcp.	Trophy	Practice
S. A. Bruner	20	46	47
C. E. Groat	18	43	20
Mrs. Groat	18	41	20
J. D. Dierdoff	18	43	23
George Keeny	16	36	21
J .W. Meek	17	42	42
Dr. Packard	20	48	44
Bob Bole	17	43	47
William Pugh	18	45	46
A. W. Bruner	16	49	24
George Pefert	16	32	..
Fred Kimble	16	..	36
Polly McLarry	16	..	20
Roperson	16	..	21
Grondyke	16	..	19
E. Bohring	18	43	23
William Brawner	16	..	..

HERE IS SOMETHING TO THINK ABOUT.

Where Are the 10,000 Elk That Were Once in this Country?

Consider the elk, my son.

When the first white man settled in what is now the United States there were, according to calculations made by Ernest T. Seton, based on twenty years' research, 10,000,000 elk in this country. In the days of Daniel Boone they were more than plentiful in Kentucky and neighboring states. Naturally these elk, as well as the buffalo, being of good size and fair flavor, made up the principal meat supply of the people. It is fit and proper that native wild animals be used for food under such circumstances, so the decrease in elk cannot be blamed entirely on the early settlers—people long dead, and for this reason on whom we like to shift the blame for our own near-sightedness in game protection.

Dr. Hornaday ,director of the New York Zoo, who has done much good work in the cause of conservation, says: "There is no reason, except man's shortsighted greed and his foolishness, why there are not today 100,00 0elk living in the Allegheny mountains, furnishing each year 50,000 three-year-old males as free food (and noble quarry) for the people. By sensible management the Rocky mountains, the Sierra Nevadas, and the coast range would support enough wild elk to feed a million people." Emerson Hough says that elk were killed as late as 1865 at Spirit Lake, Iowa, but now look what we have: less than 60,000 on the whole North American continent, according to Hornaday.

It is true that the early settlers and "civilization" are partly to blame, but not nearly as much as our American happy-go-lucky, not to say boob, proclivities. The hundreds killed by sportsmen and tusk hunters in recent years cuts a bigger figure in our supply than did the hundreds of thousands killed by our granddads.

It was only a few years ago that bands of elk were driven from Yellowstone Park by snow and lack of feed only to be slaughtered, does and youngsters along with the older males, by so-called "sportsmen."

It seems to be the general impression that in order to be a conservationist one must necessarily be a "muck raker," a "gloomster," and a rabid "long hair," but such is not the case with us—we like to show the good with the bad. Consequently, we take pleasure in telling those who do not know that the grand lodge of the B. P. O. E. has passed a resolution discouraging the wearing of elks teeth as emblems.

The Elks we know personally are kindly, intelligent men—just about the last folks in the world who would knowingly injure anybody or anything—and for this reason we have often wondered at their thoughtlessness in encouraging tusk hunters, the most ignoble beasts that stalk about the earth today. Possibly they are not aware of the fact that thousands of elk have been killed for their tusks alone and the carcasses left to rot.

So let's not weep over the past, sad as it may be, but be thankful for the elk that are thus saved by the action of the grand lodge.

Portland Club.—Henry R. Everding successfully defended the W. C. Bristol 20-gauge gun trophy against a field of twenty contestants, including the donor himself, on January 14th. Mr. Bristol, however, is not a contender for the trophy.

Everding pulverized 20 out of 25 targets thrown for him. C. C. Kelley came within one bird of tying Everding's score, while Frank Templeton, who issued the challenge, broke but 16 targets.

A 25-bird memorial event in honor of E. B. Van Arnam, the local professional who passed away a week ago, brought out a field of 36 nimrods. Dennis Holohan of Burley, Idaho, was high man in the event with a perfect score. J. W. Seavey was second, dropping but one bird, and Frank Troeh, the national champion, was third.

A. L. Tippett, a prominent sportsman of Deer Lodge, Mont., participated in the event and broke 20 out of 25 targets.

The scores of the E. B. Van Arnam Msmorial event of 25 targets:—Dennis Holohan 25, J. W. Seavey 24, Frank Templeton 23, F. M. Troeh 23, R. P. Knight 22, Abner Blair 22, P. P. Bull 22, A. Woelm 21, S. E. Bird 21, C. C. Follett 21, H. R. Everding 21, A. L. Tippett 20, H. A. Pollock 20, Dr. L. L. DuBois 20, E. L. Youmans 19, J. C. Morris 19, E. E. Redfield 19, E. H. Keller 19, A. L. Zachrisson 19, W. B. Honeyman 18, O .J. Clossett 18, C. C. Kelley 18, L. L. Mulit 17, Al Sequin 17, J. S. Crane 17, B. J. Boone 17, Ed Long 16, A. W. Strowger 16, A. R. Parrott 16, Dr. L. S. Besson 15, R. E. Martell 14,-Dr. A. J. Brock 14, J. K. Simpson 14, W. C. Bristol (20-gauge) 13, C. Meach 11, A. Erickson 10.

Following are the scores registered in the 20-gauge event:—Everding 20, Kelley 19, Holohan 18, Zachrisson 17, Bristol 17, Follett 16, Templeton 16, Youmans 16, Seavey 15, Blair 15, Bull* 15, Clossett 14, Boone 14, Pollock 14, Knight 12, Honeyman 11, Parrott 10, Simpson 10, Bird 10, Strowger 10, Keller 8.

The hunting season is rapidly drawing to a close. Most of the boys got in their sport before the first of the year, but some of them have been getting good bags of late.

NEW FIGHTING SWORDFISH OF PACIFIC.

Sportsmen at Catalina Are Worried by Appearance of New Species

By W. T. PAYNE.

(Author of "Game Birds and Game Fishes of the Pacific Coast.")

The appearance in large numbers in the waters of Catalina of a swordfish new to the California coast has created a lively interest among the expert anglers who are always looking for the most determined fighters of the sea with which to match their skill.

This new and powerful fighter has, very naturally, created no end of discussion as to what it really is, what is its relationship to the Atlantic swordfish and to the resident fish of a similar character, long known as the California swordfish.

The common resident of the Catalina waters, and very appropriately given the English name, California swordfish, by Jordan and Evermann, has been classed as a member of the genus Tetrapturus, found on the Atlantic coasts and in the waters of Japan. I have illustrated and described this fish in "Game Birds and Game Fishes of the Pacific Coast," under the name used by Jordan and Evermann, Tetrapturus mitsukurii, as it is supposed to be one of the species inhabiting the Japanese waters. But there is at least some question whether or not this fish is the mitsukurii of Japan. I am led to the entertainment of this doubt by the fact that none of the illustrations or descriptions of the mitsukurii that I have yet seen, either show or describe the two long "feelers" which are, in fact, ventral fins, so prominent in the Catalina fish; nor do the descriptions of it correspond in many other respects. I may here state, however, that but little is known of any of the species of the families Istiophoridae or Xiphiidae, which include the sword, spear and sailfishes. It is therefore possible that a better study of the California swordfish (Tetrapturus mitsukurii) may show it to be as distinct a species as is the new visitor to our coast, and possibly separate it from the Tetrapturus to which the spearfishes belong. I am led to this opinion also by the behavior of the fish when impaled. It is the most determined and spectacular fighter known to the anglers in any part of the world. In its struggles for freedom it fights constantly on the surface, and in its mad rushes to free itself from the impaling hook leaps clear into the air thirty, forty and even sixty times before its strength and courage are exhausted, a fighting courage never even approached by any other fish. The tuna, while a hard fighter, wearies the angler by its strong, steady work below the surface. The trout and salmon, after one to three angry leaps, settle down to erratic underwater runs. The tarpon, once considered the king of fighting fishes, rarely, if ever, shows itself half a dozen times above the surface. But the California swordfish enters the contest with the spirit of the Roman gladiator, with its heart in the battle, and with a determination to fight to the very finish.

An examination of the illustrations of the two swordfishes, the Xiphias gladias of the Atlantic and the new Catalina visitor, to which I have given the name Pacific swordfish, will show a very marked difference in the length of the sword, the length of the under jaw, the shape and size of the dorcal fin, the location of the pectoral fins, the size of the eye, and the presence of a large anterior anal fin in the Pacific fish which is entirely absent in the Xiphias.

The swordfish of the Atlantic is fairly well known to our scientific men, and described alike by them all. Its habitat is given as both sides of the Atlantic Ocean, and its supposed spawning grounds as the Mediterranean. None of our writers on the subject, so far as I am able to learn, seem to have any knowledge of a species of swordfish distinguished from the Xiphias of the Atlantic, except Gunther, who writes of a type inhabiting the warm waters of the Pacific and Indian oceans. In writing of these he says: "Many of the young fishes are caught in the nets of the native islanders, but the mature fishes are too strong for any net." An assertion easily believed after an examination of its powerful fins. He describes these fishes as "distinguished from the Atlantic Xiphias by the presence of ventral fins which, however, are reduced to long styloform appendages," but he does not mention their location. He classes them under the generic name Histiophorus, but it seems he has not been sufficiently conversant with them to give them specific names. Nor does he describe the species herein discussed. For it, unlike his histiaphorus, has no ventral fins, and unlike the Atlantic Xiphias it has a very large, fleshy anterior anal fin.

Jordan and Evermann, speaking of the Atlantic swordfish, the Xiphias gladias, say: "It is rare on the Pacific coast, only five records being known." And in mentioning their value as food fishes, they say: "Its dark flesh, though a little coarse, makes excellent steaks." These well known authorities also indorse the statement made by others that but little is known of this family of fishes because of its inconvenient size for laboratory work. In view of these statements it is quite possible that the five records mentioned were reports furnished them by fishermen, and not actual examinations made by themselves, for they are too careful observers not to have noticed the marked difference between the dorsal fin of the California swordfish, or the new visitor, and those of the Xiphias of the Atlantic. Also the presence of the large, fleshy anterior anal fin in both of these Pacifis species, which they well knew was entirely absent from the Atlantic species. If, then, as I have assumed, the five records were furnished by fishermen who mistook the California swordfish for the Atlantic Xiphias, it will account for the statement that the fish is "dark and a little coarse," which is the case with the California swordfish. Whereas the flesh of the Atlantic species is quite light colored, while that of the new visitor is absolutely white and almost devoid of grain, and so delicate that in the language of one angler, "It melts in the mouth like a caramel."

This new Pacific swordfish, which has caused so much discussion, is, as will be seen by a glance at its large, heavy fins, a powerful swimmer. The largest one yet landed weighed 404 pounds, but specimens have been hooked though, not landed, that when brought to the surface, were estimated to weigh fully 600 pounds or more.

Avoiding the technical style of the naturalist, this fish may be described as a large, powerful fish, reaching a weight of 600 pounds or more. Color, dark green above, with a metallic luster ,shading to silvery below; upper jaw extending into a hard, bony sword, four or five inches wide at the base and tapering to about one inch wide by a quarter of an inch thick at its point, and in length about three-fourths of the length of the body, measured from the eye to the base of the tail; under jaw sharp and pointed and about one-fifth the length of the sword; dorsal fin three to four inches thick at the base, a little higher than the depth of the body, fleshy like that of the shark, rising aburptly from the head a little in front of the gills and about one-half the width of its length; second dorsal unconnected with the first and reduced to a mere adipose teat close to the tail; pectoral fins longer than the depth of the body and located on the throat just under the gills; ventral fins absent; anterior anal fin thick and fleshy, located about half way between the pectorals and the base of the tail and nearly as wide as it is long; posterior anal fin very small and about half way between the anterior and the base of the tail and without the two spiny points of the Atlantic species; flukes of the tail very ling, thick and powerful; eye brilliant light blue and very large with a hard crystal encased in a movable bone cup ;skin smooth, oily and without scales.

This species quite likely belongs to Gunther's Ocean type to which he has given the generic name, Histiophorus, although he has failed to describe this species . Nor can I find any mention of it in any of the authorities at my command. I can, therefore, draw but one conclusion, and that is, that it is a type heretofore unknown.

Arguing Over Quail.—Some sportsmen with best intentions are advocating a return to the old short-season plan of protecting quail, based upon an apparent scarcity in their immediate neighborhood.

The state game authorities say the extension of the season from one to two and a half months was a vindication of the promise made several years ago to restore the shooters their longer open period whenever a sufficient stock had been built up by the drastic legislation to permit maintaining the supply. Therefore the legislature of 1915 was advised to extend the season in the South. Rather than reduce it generally because of a limited local condition, the argument has been advanced that an extension of the powers of the fish and game authorities by giving them right to arbitrarily curtail the open seasons would better meet the possible emergencies of dry seasons developing in between legislatures and allowing breeding stock to be shot off before the lawmakers could act.

Many sportsmen shot their limits the last two days of the season of 1916 and general opinion among experts is that the year ended with plenty of quail left for breeding.

Quail shooting is so particularly a California sporting asset, typical of the country, that all the exercise of the privilege possible is thought wise, but the breeding stock must be maintained. Given that and good seasons there will always be plenty of quail.

Even sportsmen are at times inclined to place all blame for scarcity of game upon the gun, forgetting that the gun never drained marshes or plowed up the brushy uplands that made the best hunting grounds. Posting has been a great factor also; quail shooting upon many of the present ranches has not improved at all, and very little shooting is done upon most of them. It seems the nature of quail not to increase beyond a certain point, whether shot or not.

* * *

Bill Against Spears.—Sacramento, Cal.—Abolition of the use of the spear in catching steelhead salmon is the intent of a bill which was introduced in the Senate by Senator Herbert W. Slater of Sonoma county this week.

That the bill will be fought stoutly by fishermen in Slater's own district was admitted by him. Interest in this bill is augmented by the fact that Slater is chairman of the Fish and Game Committe of the Senate.

Senator Slater says he was moved to an attempt to abolish the use of the spear for the reason that the steelhead salmon is decreasing to an alarming extent. As hundreds of fishermen who use the spear live in Slater's district, the fight against the bill probably will be spirited.

Representatives of the Truckee Fihermen's Union appeared before the Senate Fish and Game Committee this week to protest against the introduction of a bill prohibiting the sale of Tahoe trout. The fishermen's committee was assured that if the bill appeared it probably would be killed. Chairman Slater said that no bill for the prevention of the use of salmon eggs as bait would be introduced in the 1917 legislature.

Casters Going East.—The fly and bait casters of the Southern California Rod and Reel club will hold their regular monthly casting tournament at the Eastlake park grounds a week from Sunday. This tournament next month is expected to prove one of the best held this season, for the casters are just getting warmed up.

In the tourney last month some very good marks resulted in the varoius events. The casters now have something to try for good marks, for the present indications are that at least three of the local fly and bait casters will be sent east this year to take part in the national tournament.

Sherman Baker, Oscar Lane and E. J. Kennedy are the three men who are expected to make the trip. All are experienced casters and have equaled some of the national records in the tourneys at Eastlake park.

Both fly and bait events will be down on the program for the tournament, and with good weather nothing but good marks are expected.

Seattle After Game Warden.—Seattle, Wash.—The sportsmen of King county, and have been for the last few weeks, taking a very keen and active interest in the administration of the county game warden's office, which includes the propagation of game birds and fish, as well as the enforcement of game laws.

Sportsmen cite the fact that King is the richest county in the state, but that it is the poorest in the amount of game birds and fish at the present time. They contend that they should have as many game birds and fish as any other county in the state, especially in view of the fact that there is spent annually about $17,000 . This amount is secured through the sale of hunting and fishing licenses and not by taxing the general public. This is a great deal more than is spent by any other county in the state. The sportsmen believe that they are entitled to consideration in the selection of the game warden and his deputies and in the administration of that office.

At a recent meeting held jointly by the Seattle Trapshooters' Association, the Green Lake Gun Club and the Seattle Fly and Bait Casting Club, many matters of interest were discussed pertaining to the conduct o fthe game warden's office and to the deplorable conditions of fields and streams. It was unanimously agreed by those present to advocate an entire change of administration in that office and the appointment of E. J. Beach as game warden and E. E. Bonn as second choice, or chief deputy. Since that meeting the Seattle Rifle and Revolver Association has joined the movement. Each of these organizations has respectively petitioned the King county game commissioners to grant its requests.

The commissioners also were presented with a petition containing the signature of approximately 1200 sportsmen, urging the appointment of Beach and Bonn, as indorsed by the clubs.

The ppirit of the movement on the part of the clubs and sportsmen is for the purpose of assisting the commissioners in the selection of highly competent officials and they believe that their request has been kindly received and will be granted.

Handicap Committee.—Editor Breeder and Sportsman:—Please announce in the Trap Department of "Breeder and Sportsman" that the committee which will allot handicaps to entrants in the coming Grand American Handicap is constituted as follows: Guy V. Dering, Chairman, Columbus, Wis.; Geo. K. Mackie, Lawrence, Kans.; Ben S. Donnelley, Chicago, Ills.; W. H. Cochrane, Bristol, Tenn.; Fred Plum, Atlantic City, N. J.

Yours very truly,
THE INTERSTATE ASS'N,
Pittsburgh, Pa. E. REED SHANER, Sec'y.

The first registered shoot to be held by Denver Trap club under the auspices of the Interstate Association will be Sunday, May 6, in which there are expected about seventy-five participants . The Interstate Association will contribute $150 in merchandise and cash prizes, to which will be added a sum of $50 by the Denver Trap club, so now is the time for all to get out and commence to practice for this event.

* * *

Santa Barbara county has discontinued the office of game and fish warden, owing to the efficient work done in that vicinity by Deputy Fish and Game Commissioner Henry J. Abels of Santa Maria. Several other counties co-operate with the Fish and Game Commission in sharing theexpenses of patrol work which in the past has made itpossible in several instances to maintain deputies in counties.

* * *

Fish and Game Commission field patrol deputies have been instructed to take nothing but the exhibition of a license as evidence of the issuance of one, hunters and fishermen be ing required by the law not only to have procured their license but to exhibit them to any warden or duly qualified peace officer upon demand; and one cannot exhibit anything without having it with him.

Stock and Farm Department

The two-day sale of Holstein-Friesians recently held at the Liverpool, N. Y., pavilion netted an average of $456. The highest price was $3,500, which was paid for Woodcrest Ina DeKol 4th, a four-year-old with a record of 34½ pounds of butter in seven days. Edward H. Witte, Kansas City, Mo., bought her for his stock farm at Independence, Mo.

◈ ◈ ◈

The second annual public sale of the Ohio Shorthorn Breeders' Association, conducted at Columbus, Ohio, January 10, resulted in the sale of 127 head for $30.040.

◈ ◈ ◈

Nothing better has ever happened to the dairy interest than the great advertising campaign now being carried on in all national magazines, in which milk as a food is being brought to the attention of the consumer. Wise will be the breeder of good dairy cattle who will see and grasp his opportunity, when he realizes that this great wave of education on the value of milk as a food will sweep the country. California and the coast states are prepared. Her dairy interests are now the most important of all live stock affairs.

◈ ◈ ◈

Exercise for Hogs in Winter.

In cold weather a colt or a calf will hustle around on its own account and get plenty of exercise just for the fun there is in it, if given room. But a pig is lazy, and if the weather is a little chilly will not come out of its warm nest except to eat. It is more difficult to make young fall pigs exercise than it is those born in warmer weather. They shun the cold and avoid any unnecessary exertion. Accordingly their blood runs more sluggishly, which makes them feel the cold more and also prohibits the body from assimilating the food most efficiently. Probably no one thing is responsible for so much trouble with pigs at this time of year as the direct and indirect effects of too little exercise. One way to remedy this condition is to make them march the length of their pasture lot or enclosure for their feed. House them at one end and feed them at the other. Colony houses make this arrangement easy. They want to eat and they want to sleep. The involuntary walk between does the trick.

Keep the Tried Brood Sows.

While the practice of selling young sows before one really knows their value is not followed as often by the breeder as by the market producer, nevertheless this is sometimes the case.

There have been many times when a breeder would give several times the market value could he only get back a sow that had proved her value in a litter developed after she had gone to market.

Aside from the fact that the old, well-selected sow generally does better for one, some figures recently gotten together at this station show that the old sow produces more pigs per litter in later litters than in her earlier ones

Of the 34 sows which have raised five or more litters in the station herd, the following is the average number of pigs farrowed:

First litter, number of pigs, 7.09; second, 8.64; third, 8.87; fourth, 9.83; fifth, 9.62.

While it is generally recognized that the young sow will raise a greater percentage of the pigs farrowed than the old sow, the number will not be so large nor the vitality and ability as when the sows of known value are used.—[J. B. Rice, Illinois Eperiment Station.

Choosing a Stallion.

As spring approaches, the progressive farmer is confronted with the problem of choosing a stallion to which to breed. In many cases it is merely a question of eliminating the worst, as there are some communities that are not supplied with a good stallion. In other cases, however, the saving of $5 on a service fee plays a too-important part. An effort to save $5 on a service fee often means a loss of $100 or more when the colt is two years old. The day of the mediocre horse is over, and the farmer is only wasting time and effort by bringing the scrub into the world. No one wants him, there is no place for him and he will not bring his cost at four years old. However, the best of every breed are growing in demand and price. If farmers generally would pay more attention to selecting animals of the right kind of breeding, progress would be made more rapidly. It should be remembered that good feet and legs are the first essential of a marketable horse. If a stallion does not have them he cannot be expected to produce them in his progeny.

◈ ◈ ◈

G. T. Florida & Son, of Sweetwater, Tenn., who is the King of Tennessee jack men, advises the Breeder and Sportsman of the sale of his three-year-old champion jack to Jenkins & Shook, of Tarboro, N. C., for $1,200. Mr. Florida breeds the best jacks in that section of the South and has made some remarkable sales. He recently sold 18 head to R. A. N. Walker, of Jonesboro, Tenn., for $27,000, at private sale.

◈ ◈ ◈

Hughes Maupin, the well known North Callaway operator, last week bought 11 mules and a horse from O. E. Underwood, of Wellsville.

Finderne Mutual Fayne Valdessa, the $21,500 junior Holstein bull.—A recent acquisition of the West.

Holstein Interest Improved by Sensational Purchase.

While the dairy interest of the Pacific Coast has been making phenomenal strides for several years, and many famous herds of dairy cattle brought into this section, which have proven profitable, the purchase at the recent Pacific International Livestock Show, at Portland, of the junior yearling bull, Finderne Mutual Fayne Valdessa, by Mr. John von Herberg, well known theatrical man and ranchman of Portland and Seattle, for $21,500, is the most valuable acquisition to the interest yet attained. The consignor of this magnificent young bull was Bernhard Meyer, of Finderne, N. J., who is one of the foremost breeders of America.

Finderne Mutual Fayne Valdessa is considered the greatest Holstein of all time and in addition to his wonderful type and Holstein character, carries the blood of more champions than any bull in this country. He is sired by a son of the first 40-pound cow of the breed and his grandsire was champion Pontiac Cornucopia that sold for $15,000 several years ago, and which was the record price for many years. His dam, Finderne Mutual Fayne, was the world's record junior two-year-old.

Mr. von Herberg owns one of the most magnificent country places in the country near Kent, Wash., where Valdessa will head the heard of 100 magnificently bred Holsteins.

Ayrshire Breeders' Association Annual Meeting.

The forty-second annual meeting of the Ayrshire Breeders' Association was held at Hotel McAlpin, New York, January 11th, with about one hundred and twenty-five members and friends present. The report of the secretary showed an increase in the number of members over any year since the organization of the association, one hundred and eight new members having been added, coming from all parts of the United States and Canada, but particularly from the West and Southwest, the result largely of the increased advertising done by the association during the year.

The Hillcrest Stock Farm, near Davis, California, has long maintained the reputation of being one of the prominent factors in the growth of better stock in California. It is one of the pioneer establishments of the West which has stood always for the advancement of pure-bred stock and only the best available blood has ever been considered when it came to purchasing new foundation stock. Perhaps one of the most important secrets of the success of T. S. Glide, the owner, has been in the constant improvement of his herd. Never satisfied with letting well enough alone, Mr. Glide has gone out and year after year added some famously bred bull or cow to be used in the foundation.

The famous King Edward has, however, added much to the success of this magnificent herd, and the blood of that grandly bred bull can now be found in many of the leading herds in the state. He was three times grand champion at the state fair and his offspring has repeatedly won in important shows over the state. His most noted son, King Lancaster, now one of the herd bulls at Hillcrest, is proving a remarkable sire, as are also Hillcrest Knight and Knights' Perfection. Mr. Glide has much faith in two recent purchases, one a Canadian bred bull and the other a calf of Cumberland blood.

There are more than 70 head in his stables at the present time being fitted for forthcoming sales and shows. While the Shorthorn herd at Hillcrest has been the leading breed, they also have several magnificent flocks of pure bred sheep. They market thousands of sheep and cattle annually, and the big prices their market stock commands is on account of the uniformity of type and quality found in their beef herds, which are from pure bred bulls and very high grade cows.

◈ ◈ ◈

There are 80 cows in the magnificent herd of Holstein-Friesians owned by A. W. Morris & Sons, of Woodland, Cal., including 28 heifers, which average 16,932 pounds of milk and 722.29 pounds of butter in one year.

California swine breeders seem to appreciate the merits of the Berkshire, and that profitable breed can be found in great numbers on the good ranches of the state. There are also a number of splendid herds of pure-bred Berkshires in this state which are far in advance of any in the Cornbelt.

◈ ◈ ◈

All previous Colusa county wool sales were broken last week when F. J. Mendonsa sold 60,000 pounds at 33 cents per pound. This is ten cents in advance of any price heretofore received by this well known sheepman. The wool sold by Mr. Mendonsa is contracted for May delivery. He refused to sell his lambs for June delivery at $6.50 per head. This is indicative of what he expects sheep prices to come to during the coming season.

◈ ◈ ◈

J. M. Roberts, California field agent for the American Jersey Cattle Club, with headquarters in Davis, has returned from an extended business visit through Missouri and Kansas, where he purchased 21 head of Jersey cattle. The selections were made from the leading herds of those states and are from some of the largest producing herds in the country. Mr. Roberts personally accompanied the shipment from Kansas City.

◈ ◈ ◈

I. F. Davis, agent of Animal Husbandry of the U. S. Department of Agriculture, who is looking after pig club work in California, has recently organized clubs in many public schools in the state. Last week he organized a club at Live Oak which promises to accomplish much.

◈ ◈ ◈

E. O. Lamb, a leading sheepman of Paisley, Oregon, has sold his wool, numbering 2,800 fleeces, to Chas. Umbach, a Lake View dealer, for more than 30 cents per pound.

◈ ◈ ◈

The wool, cattle and horse market around Lake View, Oregon, has been rather active during the last week. The majority of the cattle and horses were sold to California buyers. Jas. Dodson, a prominent shipper, brought 300 head of good cattle to California. One hundred head were purchased from M. C. Currier, 128 from W. B. Parker, 62 from C. E. Campbell and others from various breeders. He also made purchases from Brattain Bros., and Elder & McDonald, of Paiseley, Ore. Six hundred head were purchased in that community. Mr. Horton intends to buy 1,000 head for shipment to California.

◈ ◈ ◈

The value of the combined products of the farms of Missouri in 1916 was approximately $232,000,000, according to the state board of agriculture.

◈ ◈ ◈

D. O. Lively, San Francisco's well known live stock broker, is attending the National Western Live Stock and Horse Show at Denver, Colorado, this week. Before his return to the coast Mr. Lively will attend several important live stock sales in Illinois, Iowa and Missouri.

◈ ◈ ◈

Wilmer L. McElroy, of near Louisiana, recently purchased at Palmyra, Mo., a two-year-old Percheron stallion that is a half-brother to the great two-time International Grand Champion, The Dragon. This youngster is said to be one of the best of his age. Mr. McElroy also reports the sale of a pure bred Percheron mare to C. H. Randall, of Whitmore, Kansas. In an interview recently, Mr. McElroy expressed himself as feeling most optimistic regarding the immediate future of the live stock industry. Particularly does Mr. McElroy view with favor the situation as it applies to the breeding of draft horses, jacks and mules. "Europe will never again be looked upon as the nursery of the draft horse and American breeders will henceforth lead in their production," was his comment on the subject.

◈ ◈ ◈

J. T. Johnson just put on feed what is said to be one of the finest bunches of cattle ever brought to the county. They are equally Whitefaces, Blacks and Shorthorns. They were sent to Mr. Johnson's Fish Branch and Laddonia farms.

The University Farm

By JUMP CAUTHORN.

The farm, no matter how far off the beaten track of civilization; how old-fashioned are the ideas of the owner or how run down the improvements may be, to all good blueblooded people, is more alluring than are the great white ways of our best cities, with all their thrillers, romance and glamour. It does one good and is of far more value, however, to visit one of the country places of the new-idea farmer and stock grower.

Only a visit to one of these modern ranches will give one any conception of what progress is being made in an agricultural way, and every man who proposes the establishment of a herd of pure bred stock or to go into extensive agriculture, should visit the leading establishments of the vicinity in which he expects to operate, before going on with his venture. However much one learns on these inspections, it is only the preliminary to what he will get by visiting the University Farm, at Davis.

Having only left the corn belt, with its long established agricultural colleges and advanced herds of breeding stock, I fully expected to spend most of my time, when I visited Davis, in advising those with whom I came in contact, of the achievements being made there; of the results of their experiments and of the value of those institutions to the interest of which they are devoted; of the great land of plenty, where the farmer's son is born with the silver spoon in his mouth; where "milk and honey land" first got its name. However, there was not a chance for me to bring up a subject or to make a statement, that the instructors at Davis did not show me one better, and I was amazed to see an institution so young, and only since the achievements of their efforts made at the International Stock Show known to the Cornbelt and East, achieving so much.

There are no agricultural and experimental stations in the United States today that are more interesting than the University Farm, with its varied lines of endeavor and instruction, its experiments and live stock, and growing crops. The farm consists of 780 acres in the fertile Sacramento valley, where facilities for agricultural investigation are unequaled. It was established about ten years ago and at present has an enrollment of several hundred students; more than 150 head of pure bred cattle of all leading breeds, and the same number of pure bred sheep in which the following breeds are represented: Hampshire, Shropshire, Southdown, Cotswold and Romney Marsh. The advancement of California as a sheep state in recent years has attracted the attention of live stock breeders everywhere, and the state farm is responsible in a large measure for this progress and prevailing activity among the breeders of the state.

More than 400 hogs are handled every year, and in no department has the school proven more valuable to students and breeders. The most successful experiments have been carried on, and California, a few years ago not mentioned when prominent swine breeders met, is now regarded as one of the leading swine states. The popular breeds are handled and they have owned some of the most noted boars and brood sows in the country. The farm is now furnishing breeders all over California with foundation stock.

The certainty that good draft horses will always be in demand and profitable for the breeder, has caused the school to establish a splendid band of pure bred draft horses. Practicing what they preach, they procured a splendid foundation, and the Percheron stallion, Fernand, with several filly foals, is the beginning of what is expected to be one of the leading draft horse breeding establishments in the country.

Percheron stallion Fernand and five of his get.

The young mares sired by Fernand and owned at the farm show that he is a sire of splendid type, with necessary size, bone and conformation. One of the most attractive horses, however, on the farm is the two-year-old Shire mare, by Newadd Hillside, the Jack London stallion. This filly won her class at the P.-P. I. E. and I believe could win in any company today, were it not for a slight blemish. She is breaking nicely and is doing her share of the work on the farm. The evident interest shown by the students in these horses is splendid assurance that there are to be a lot of valuable herds established in California in the future.

Every California farmer, rancher and stock grower should arrange to visit this wonderful institution, which is doing much to make this the leading agricultural state. The rapidity with which the science of agriculture has developed and the many ways in which ranch profits may be increased or losses reduced, make it very necessary that every present day ranchers visit the farm. The farmers' short courses are now being well attended, and many successful rancher-stockmen have found that a few weeks' instruction at the University Farm have been the most profitable seed they have ever sown. The value of the short course is best attested by the steadily increasing enrollment.

The student is taught both by lectures and practical work. He is required to do the things which will make him more expert in his stock raising and agricultural endeavors.

Some have told me the fertility of the farm has been the cause of California's agricultural college making such remarkable progress; others, however, declare they could do more on their own farms if they had the money to operate on; while others believe it's just because it's California. I should say, however, from what I have seen of conditions and the advancement of this great institution, that the faculty and instructors of the College of Agriculture are responsible for more of its success than all these splendid affiliations. California has been fortunate in selecting men of the type found in this school. They have excluded politics and prejudice entirely; have gone to the four corners of the earth to get the best timber for every department. The instructors work to one end, every one desirous of having his department outdo the other, and the result is wonderful. The whole school is a fascinating, co-operative organization with every department dovetailing into the others.

MISSOURI NOTES.

[By RUFUS JACKSON.]

In a communication to this paper J. F. Morrow, of Adairville, Ky., asks to be put in touch with a responsible mule-feeder as he desires to buy a carload of mare mules of good quality, two- to four-year-olds, preferably twos and threes. Any reader that can supply Mr. Morrow's wants will confer a favor by writing him and mentioning the Breeder and Sportsman.

Last week's sales just about cleaned up the Missouri cotton mules of Audrain, Callaway and Boone counties. A prominent mule-feeder informs us that there remain in the feed lots of the three counties not to exceed 200 head of cotton mules. This number includes a load belonging to John Glenn, of east of Columbia, two loads belonging to Henry Brown of Hallsville, and one load belonging to Sam Brown of Centralia. Never before in the memory of present day mule-feeders has there been so active a demand or better prices obtainable for well conditioned cotton mules.

R. B. Glenn, of near Stephens, cleaned up his mule pens last week with two shipments to the National market. The first load sold Thursday at $207.50 and the other load sold Saturday at $200.

Zena W. Green, of the well known firm of W. L. Green & Sons, of Centralia, was on the National Saturday with a load of cotton mules that sold at satisfactory prices. The last year has been the most successful in the career of W. L. Green & Sons. The firm has handled 3,387 head of mules, of which all but 484 head were sold as "warriors" to the foreign governments. While December was the banner month for the firm yet the largest individual sale was made in July, when the firm sold to Hudson & Sons of New Orleans, 154 head for over $30,000. The sales by months follow: January, 270; February, 33; March, 20; April, 98; May, 111; June, 232; July, 247; August, 321; September, 377; October, 512; November, 339; December, 827. However, this does not include about 1,200 head of mules purchased by Charles W. Green, of the firm, and shipped to market from other points.

Owen Layson, of near Hereford, last week sold 27 head of cotton mules to J. Ed Moore, representing the Maxwell-Crouch Mule Co., of the National market, at $227.50 a head. These mules were shipped from McCredie Saturday.

Stockmen throughout this section of the State are commenting upon the absence of Howard Bailey of the Maxwell-Crouch Co. Mr. Bailey in previous seasons has been represented in the extensive purchases made in this territory, and the activities at the National market have heretofore been forecasted by the visits of the popular dealer to the mule pens of this section. It may be explained that Mr. Bailey is yet in the mule business but is on the selling rather than the buying end. His firm has had extensive contracts with the Allied Governments and for the last year has been located in New York, where he receives the mules shipped from his firm for export and collects for same from the fiscal agents of the governments purchasing the mules. In this connection it is of interest to know that all the mules now being sold by Mr. Bailey's firm to the Allies are being shipped to New York and other eastern seaports by express. The additional cost, it is said, is overcome by the lessened loss by death and injuries suffered through the slower means of freight transportation. J. Ed Moore, of Callaway county, has represented the Maxwell-Crouch concern in this territory in Mr. Bailey's absence and his purchases have been in keeping with his high-class judgment of mules and their values.

There is a good story being told at the expense of Col. Harry Gillen, of the Gillen-Heiman Mule Co., of the National market. The story goes that Col. Gillen, in anticipation of the visit of one of the firm's good buyers, came up to Mexico in advance of the patron's arrival at the market. With his characteristic promptness for details, Col. Gillen ordered three cars set out at McCredie to be loaded for that afternoon's north-bound train and departed for that point on the morning passenger. Upon his arrival there he immediately proceeded to Tyke Harrison's mule pens and almost before he had looked over the Harrison & Yates mules he had negotiated their purchase. Upon his return to McCredie a telegram was handed him. This read in effect that the firm's expected buyer had arrived at the National and that he had stated firmly that he expected to acquire the mules needed by him at a price not to exceed $200 a head. One may imagine the Colonel's state of mind when it is stated that the mules that he had bought and arranged to ship so hurriedly for this particular patron had cost the munificent sum of $225 around.

J. B. Rutter, of east of Mexico, recently purchased a mare mule from R. A. and J. R. Fountain, of Centralia, for $240.

Grade shire, mare and foal. Both bred at the University Farm. The filly was first in her class at the Sacramento State Fair.

GOMBAULT'S
CAUSTIC BALSAM

A safe, speedy and positive cure for

Curb, Splint, Sweeny, Capped Hock, Strained Tendons, Founder, Wind Puffs, and all lameness from Spavin, Ringbone and other bony tumors. Cures all skin diseases or Parasites, Thrush, Diphtheria. Removes all Bunches from Horses or Cattle.

As a HUMAN REMEDY for Rheumatism, Sprains, Sore Throat, etc., it is invaluable.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

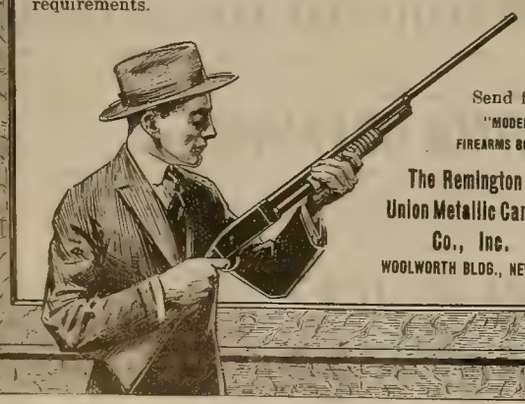
OFFICIAL HIGH AVERAGES FOR 1916

WON BY USERS OF

WINCHESTER

Guns and Ammunition

Mr. Fred Harlow of Newark, Ohio, broke 1964 out of 2010 Single Targets averaging 97.71% and thereby winning The Interstate Association's Official High Amateur Average for 1916 at Singles.



Mr. Chas. G. Spencer of St. Louis, Mo., broke 54 out of 60 Doubles averaging 90%, thus making Mr. Spencer the winner of The Interstate Association's Official High Professional Average for 1916 at Doubles.

Mr. F. M. Troeh of Vancouver, Washington, shot at 120 Doubles and broke 105, an average of 87.5%, giving Mr. Troeh the Interstate Association's Official High Amateur Average at Doubles.

ALL THREE GENTLEMEN USED WINCHESTER SHOTGUNS AND MR. HARLOW AND MR. SPENCER WINCHESTER REPEATER SHELLS

NO MATTER what branch of the shooting sport a man follows, he can go to any one of eighty thousand retailers and get exactly the arm for it in Remington UMC.

More sportsmen every year are turning to Remington UMC firearms and ammunition to find the products adapted in greater measure to their exacting requirements.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

KILDARE

Combined saddle and harness gelding owned by Miss Ethel B. Davie, of San Francisco. Winner of heavy weight saddle horse and harness class at California State Fair.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Fastest trotting stallion ever offered for service in California and fifth fastest entire trotter in the world

Son of St. Valiant Vincent 2:11¼ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¾); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

THE CALIFORNIA CIRCUIT is forming and there is every reason to believe that it will be comprised of more tracks than for many years past. Secretary Jos. Waddell is permitting no grass to grow under his feet but is visiting every town where a harness meeting is possible and getting data that will enable him to arrange a circuit in which the meetings will come in consecutive order and be profitable to each member as well as to the horsemen. He has now visited Pleasanton, Salinas, Hollister, San Jose, Petaluma, Santa Rosa, Dixon, Woodland and Marysville, and feels greatly encouraged over the outlook for a meeting at every one of those towns and believes each and every one will become a member of the circuit and hold meetings in the order named. Ukiah and Eureka have not yet been visited but Mr. Waddell intends making a trip to those towns and bringing them into membership if possible. In regard to the towns that will hold fairs and race meetings after the State Fair, Mr. Waddell is pretty certain that the difference of opinion in regard to dates can be amicably arranged so that a continuous circuit will be held as far as Bakersfield. There will be no conflict of dates in the circuit from Pleasanton to Sacramento and Secretary Waddell is optimistic enough to believe that a get-together meeting of the representatives of fairs that desire to hold meetings after the State Fair will result in harmony and an arrangement of dates that will not conflict. Therefore the outlook for at least 15 consecutive weeks of harness racing is now a most promising one. As Mr. Waddell remarked the other day, there are two main factors in guaranteeing a race meeting against loss—gate receipts and entrance money. He is certain from what he has thus far seen of California that the gate receipts will be sufficient in any town where a good meeting is held, and he knows to an absolute certainty that if a circuit of ten or more meetings is advertised the entries will be more than sufficient to meet that end of the expense. In fact, he looks for the largest list of entries ever received in California.

ALTHOUGH the market for draft horses has not been good in San Francisco during the past year, nothing but the very best bringing a fair price, there seems to be a demand in New York and Chicago that is hard to supply. At a sale held in New York last week the Herald says that not only were the offerings unusually numerous and attractive for this season of the year but the buyers were present in large numbers, eager to bid on anything useful that came under the hammer. F. S. Francis, of Kewanee, Ill., obtained the best prices of the year on Monday for a car lot of western wagon horses, chunks and drafters. Scarcely a horse in this consignment brought less than $200. The bulk of them went off at prices ranging from $250 to $300, and one pair of big fellows went to $750, the highest price of the day.

THE Horse Review's Harness Racing Guide and Breeders' Directory for 1916 is at hand and, like all its predecessors, is the one annual that is of most use to trotting and pacing horse owners and breeders, and to turf writers and compilers of any harness turf statistics. It has a complete summary of nearly every race trotted or paced in the United States last year, and in addition tables of statistics on almost every subject in which a horseman is interested. We don't see how any breeder can get along without it and be happy. Its price is the same as previous volumes—$2.50 per copy.

Volume 32 of Wallace's Year Book is out and shows many improvements over the lost volume. It has the full summaries of all trotting and pacing performances of the year 1916 in which any heat was trotted in 2:30 or better or paced in 2:25 or better, compiled from the official reports of the National and American trotting associations and other reliable sources. Each meeting reported is numbered, showing that there were 1162 harness meetings reported in the United States last year, and about 13,000 trotters and pacers were raced. A new feature of the book is the Winrace and Eligibility List which has been compiled by the National Trotting Association. Unfortunately, the American Trotting Association has not contributed a similar list of records made over its tracks and to obtain them application must be made to the latter organization. The book is well printed and bound in conformity with the preceding 31 volumes. The price is $3.25 sent prepaid from this office on receipt of cash.

Death of Daphne McKinney

Daphne McKinney, the well known brood mare owned by W. E. Detels, was found dead last Sunday morning in the infield at Pleasanton Training Track, where she was at pasture. She was discovered lying down as if asleep, with no marks of a struggle, and must have died suddenly. She was a bay mare, foaled 1900, sired by McKinney, dam La Muscovita by Guy Wilkes, second dam Muscova by Belmont 64, third dam by Woodford Mambrino. She was bred by Dr. C. Masoero, the well known veterinarian of San Francisco, and was sold by him to Frank Nugent, Superintendent of the Dutard Farm, who sold her to Mr. Detels. Her first foal was the pacer Frank N. that is now owned by the Dutard Estate. She was then bred to Bon Voyage 2:08 and foaled a colt named Bon McKinney, that took a record of 2:24¼ and is the sire of Bon Courage 2:08¼ and several others in the standard list. Her next foal was by Alconda Jay and we believe is still owned by the Dutard Estate. Daphne McKinney was sold in 1911 to Mr. Detels who bred her to Palite 45062, and in 1912 she foaled another colt, that was named Palado, but he never took a record. She was mated in 1912 with The Proof 2:09¼ and the result was a filly that lived but 24 hours. In 1913 she was mated with Graham Bellini 2:11¼ and a filly resulted. This filly was named Elloretta D. and last summer she won second money in the Pacific Breeders' Futurity at Santa Rosa, driven by Fred Chadbourne. While Elloretta D. has no record she worked miles around 2:20 last year as a two-year-old and is entered in several of the three-year-old stakes for this year. In 1914 Mr. Detels bred her to Homer Rutherford's colt Geo. N. Patterson that now has a record of 2:12¼, but she missed. In 1915 she was mated with Mahomet Watts 2:08¼, foaling a handsome colt last spring that has just been broken to harness and is a very promising yearling. Mr. Detels does not think she was in foal at the time of her death, although she was bred to Geo. Hammett (3) 2:15¼ last year. Mr. Detels is lucky to have a filly from this mare in Elloretta D. and she is the only filly from Daphne McKinney that is living. La Moscovita, the dam of Daphne McKinney, is the dam of Bon Guy 2:09¼, Triva 2:20¼, Lou Crellin 2:23 and Winnie Bond 2:27.

A Letter From Mr. Knight.

We are in receipt of a letter from Secretary Knight of the American Trotting Association, under date of January 20th, regarding the no-record rule prior to July 4th, which reads as follows: "There seems to be an impression among horsemen that the new rules vacate the conditions of the old rule 49, as to records made prior to and during the week of which July 4, 1916, was a part on tracks of The American Trotting Association. This is not the case. Their eligibility is not affected by the new rules.

(Signed) W. H. KNIGHT."

The rule referred to reads as follows:

"Only race winners, if they be heat winners according to the system raced, shall obtain a record. In races conducted under either the Combination Plan or Every-Heat-a-Race system, the horse taking the record shall be the heat winner standing best in the final summary of the race under the Old Placing System. Should two or more horses be tied for first place in said summary, each horse so tied shall acquire a record.

"In determining the eligibility of horses to compete in public races, only records that have been or may hereafter be made by the winners of races shall be considered. Records that have been, or which may hereafter be, made in performances against time (not for money premiums) or in public races by non-winners of races or records that may hereafter be made on the track of the American Trotting Association prior to or during the week of which July 4th is a part in each year, shall not be considered a bar to eligibility in public races, but shall be considered a breeder's record."

Discussing the Kentucky Derby.

New York, Jan. 22.—That a real American Derby to be run at Belmont Park's spring meeting is one of the things needful to the turf is not disputed by anyone having the interest of racing at heart. An evidence of the interest taken in the first and biggest stake of the year for three-year-olds was had at the Waldorf yesterday, when a number of horsemen and trainers had gotten together. The main topic of conversation was the Ketucky Derby to be run at Churchill Downs in May.

The Kentucky Derby has $15,000 added as a purse this year, making it not only the richest three-year old stake of the year, but the most important because of its early running and the chance to prove which of the two-year-olds of the past season has developed into a star in his three-year-old form.

Trainer Rowe was the center of attraction during the discussion of the Derby, for the reason that he was the only one present to have entries for the Kentucky classic. He made it known that he will have four entered in the rich event.

"Of course, Joyner hasn't anything to enter in the Derby," was the kidding remark of Trainer Rowe. "He's just a selling-plate trainer, but that doesn't go if Mr. Widener hears it. I am entering four for the Derby, and Walter Jennings, who is training the big Macomber string down at Charleston, S. C., would be worried if he knew what great weather we've been having here and how well my youngsters are doing.

The Derby candidates that Mr. Rowe has to enter for the Harry Payne Whitney stable are Tumbler, Hwfa, Rickety and Bellringer. The trainer declined to say which one of the lot he considered the best. When it was suggested that Tumbler might be the pick of the pack, he called attention to the fact that this youngster has been gelded and might not run so well, although he admitted that, on the other hand, he might show a big improvement in his three-year-old form, as he has been showing well recently. In Rickety he has a good one that gave Campfire a great race in the Futurity last season, having the R. T. Wilson champion headed at one stage of the journey.

At any rate, Mr. Rowe is the first to make public announcement of what horses he will enter for the big spring event.

"You can go right along entering the best you've got, but you are certain to finish behind one horse, and that one will be North Star," was the retort of A. J. Joyner to Mr. Rowe's kidding remark about Mr. Joyner having no fit candidates for the classic event. "If North Star keeps well and starts in the Derby, they can start paying off on him when they go to the post."

Mr. Joyner is an enthusiast on the subject of North Star and the other horses that have been imported from abroad by A. K. Macomber. He does not contend that the other youngsters purchased abroad are going to come to the races as world-beaters, but he is firm in his belief that North Star is the greatest horse that has been imported for racing purposes.

The surprising note sounded in the discussion was that of Emil Herz, long supposed to be a strong believer in the potency of the imported racer. The opinion advanced by Mr. Herz was that there were far more poor ones than horses worth while among the recent buys of Americans in England.

"In another year North Star may be the greatest four-year-old in the world, but I can't see him as a winner of this year's Derby," was the assertion made by Mr. Herz. "In fact, I'll lay 4 to 1 against him to show." And right there the owner of Short Grass, the imported thoroughbred just retired to the stud, made a "winter book," and found takers of his odds. He laid 4 to 1 that North Star would not finish one-two-three, but he was backing his contention that the newest of Mr. Macomber's imported prizes would not even be a starter.

Mr. Herz is strongly of the opinion that Cudgel, one of the Whitney cast-offs of last season, purchased by John W. Schorr, would be heard from in the Derby.

To bring the horse back to his old-time glory the State Racing Commission will recommend to the New York Legislature, in its annual report, the adoption in the state of the pari-mutuel system of betting. The introduction of bills to carry out this recommendation, it is expected, will again cause one of the bitterest fights ever known in the Legislature, and open again the race track betting controversy, which under Governor Hughes resulted in laws prohibiting all betting on New York race tracks. Before any pari-mutuel system could be established in New York there would have to be an amendment to the present Constitution of the State, adopted in 1894, which, in Section 9 of Article 1 says, in part: "Nor shall any lottery or the sale of lottery tickets; pool-selling, bookmaking, or any other kind of gambling hereafter be authorized or allowed within this State, and the Legislature shall pass appropriate laws to prevent offenses against any of the provisions of this section."

✦ ✦ ✦

The Futurity for 1919 has received the largest entry list in ten years, no less than 919 nominations having been received. It is believed the value of the stake when run will be over $65,000.

✦ ✦ ✦

The King of Spain, who races under the nom de plume of the Duke of Toledo, has entered a number of horses for the coming English flat racing season.

Harness Horses and Horsemen

Death of William F. Whittier.

William F. Whittier, one of California's leading business men and land owners, proprietor of the largest and most perfectly appointed trotting horse breeding farm in this State, died at his home in San Francisco on Friday of last week after a brief illness, aged 86 years.

Mr. Whittier was a pioneer and one of the few remaining members of the famous Vigilance Committee of 1856. He was born in Maine January 17th, 1832, came to California in 1854, entering the paint and oil business in 1857 by forming the Cameron-Whittier Company. This firm was succeeded by Whtitier, Fuller & Co., in 1867. William P. Fuller Sr. died in 1892, and the Whittier, Fuller Company dissolved in 1894, after which Mr. Whittier formed the Whittier-Coburn Company. He successfully manufactured the first white lead and the first mirrors produced on the Pacific coast.

In company with his friend, the late Col. E. L. Mayberry, Mr. Whittier in 1887 went on a quail hunt in the Hemet Valley, Riverside county. The two friends saw the possibilities of an irrigation system that would bring water to that valley and organized a company that built the Hemet dam and made of the valley one of the most prosperous fruit growing sections of the State. He founded the town of Hemet and about fifteen years ago Mr. Whittier took over all the holdings of his associates in that section. At the time of his death he was the sole owner of Lake Hemet Water Company and its subsidiaries, Hotel Hemet, the Hemet Stock Farm, the First National Bank and the Bank of Hemet. He also owned a large amount of real estate in Hemet and the surrounding country.

Most of the Breeder and Sportsmen's readers are more or less familiar with Mr. Whittier's history as a breeder of trotting stock. He was always a lover of horses but it was not until the death of his friend and partner Col. Mayberry that he became an extensive horse breeder. At the Colonel's death Mr. Whittier took over some of that gentleman's horses, among them the stallion Geo. W. McKinney 2:14¼. He had in his employ at the time that thorough horseman, the late John R. Holloway, and placed him in charge of the new venture. Mr. Holloway attended several trotting horse sales during 1908 and 1909, buying carefully and selecting some highly bred mares. Among others he secured at the dispersal of the late Martin Carter's Nutwood Stock Farm, the young mare Louise Carter (3) 2:24, in foal to Budd Doble's great stallion Kinney Lou 2:07¾. After being taken to Hemet, Louise Carter gave birth to a chestnut colt that was trained by Mr. Holloway the next year as a yearling, and driven by him at the Phoenix Fair a mile in 2:19½, the world's record for a yearling colt at that time. Hemet Stock Farm immediately jumped into the limelight as the home of a world's champion, and since then it has been visited by hundreds of horsemen who have, without exception, pronounced it the model stock farm of the West.

When Wilbur Lou was a two-year-old, Mr. Holloway began training him again for his stake engagements, but soon had to give up personal attention to the matter owing to severe illness. He took Wilbur Lou and a few others of the Hemet Stock Farm horses to San Jose, however, intending to race them on the circuit, but his illness suddenly terminated fatally and the horses were put in charge of Budd Doble, who then resided at San Jose . Under Mr. Doble's driving Wilbur Lou won all his stake engagements that year and as a three-year-old trotted to a record of 2:10¼. Mr. Whittier then organized the Hemet Stock Farm as a corporation with himselt as President and Mr. Doble as Vice-President and Manager. Last year Mr. Doble retired, and Fred Ward was engaged as trainer and manager.

During the racing season of 1916 another world's record came to Hemet Stock Farm when Hemet Queen, a daughter of Wilbur Lou, paced a mile in 2:16¼ at Phoenix, which is the fastest mile ever paced by a yearling filly. At the same meeting Edith Carter, a yearling filly trotter, took a record of 2:18¼, which is within a half second of the world's record for her age and sex. This filly is out of the dam of Wilbur Lou and is by Kinney de Lopez, the stallion owned by Budd Doble.

Hemet Stock Farm is one of the show places of California and is as well appointed as any breeding farm west of the Mississippi. It is always kept in perfect order and its neat buildings, clover fields, half mile tract, etc., are a delight to the eye of every horseman who visits Hemet.

Mr. Whittier made of this farm a success the same as he did of every other business in which he engaged, but his death will probably mean its dispersal, which will be a great loss to the horse breeding interests of California.

In the death of Mr. Whittier California has lost one of the actual builders of her commonwealth, and an energetic man of strict integrity and strong character, whose work has always been for the upbuilding of the State of his adoption. He married Charlotte A .Robinson in Maine in 1858. She died in 1885. He leaves three children, Mrs. Jane W. Sypher, Mrs. Mattie W. Weir and William R. Whittier. Up to the time he contracted pneumonia, a few days before his death, Mr. Whittier was a very active man both mentally and physically, personally directed all his extensive business affairs and did not look to be within twenty years of his age.

District Fairs Would Aid State Fair.

Denying insinuations made by some Northern California legislators that his bill, which provides that the state be split into fifteen districts where district fairs could be held, is a measure designed to cripple, if not bring about the eventual abolition of the State Fair, Senator Herbert W. Slater of Santa Rosa declares the passage of his bill would insure a bigger and more representative State Fair than ever.

Senator Slater states that primarily his bill is designed to encourage district fairs, which could be participated in by counties far removed from Sacramento. Secondly, the bill intends to make the State Fair a much larger institution than it is now, says Slater.

Slater believes that some provision should be made to allow counties to group together, as provided for in his bill, and hold fairs of their own. He argues that too little attention is being paid to bettering the quality and quantity of crops and that the breeding of stock is receiving too little attention. Carrying the argument further, he says these district fairs would create a pride in local products in all sections of the state.

"It is a certainty that no fruits, vegetables, materials or stock would be exhibited at these fairs that would not be the very best," said Senator Slater. "When people compete to exhibit the best they naturally improve the grade of their product."

Slater states that the advantages of the State Fair are now enjoyed only by the people residing in the Sacramento valley and nearby foothill counties. He believes that the prize winners at the district fairs would naturally want to display their wares at the State Fair. As a result he thinks that a score or more of counties never having exhibits at the State Fair would enter the open competitive field the fair offers. If these exhibitors were interested enough to place their wares before the public at the State Fair, they would be interested enough to attend the fair themselves.

"Two years ago a big Sonoma county fair was held at Santa Rosa. Jack London and other breeders of good stock in Sonoma county entered their stock in our fair. After winning prizes there it was but natural they would want to invade a wider field. Many of them, London among them, brought their prize winning animals to the last State Fair.

"They won prizes at the State Fair, I may add. It is a well known fact that the cattle shown at the last State Fair were the best in history. If one fair would result in procuring a number of exhibitors for the State Fair, what would fifteen district fairs do for the big yearly exposition? The smaller fairs would simply be feeders for the big one.

"I can't see how there can be any opposition to the bill. I know that similar measures have been defeated when brought up in the legislature before, but I am very sanguine of the success of this bill, because I know it will do no harm and more good than can be estimated."

Slater has also introduced a bill providing for the holding of an annual poultry show in some city of the State. He claims the annual poultry show would be another big feeder of the State Fair, and would result in renewed interest in poultry raising in this State.

Leata J.'s Sire Has New Owner.

A. T. Jackson, who now resides at Stockton, has become the owner by purchase of the stallion Royal McKinney 2:29½, sire of Leata J. 2:03, and will stand him for public service in San Joaquin county. This horse has a very remarkable record as a sire as he never stood for public service until 1913, and up to this time has but a half dozen foals old enough to have been trained. Besides being the sire of Leata J. 2:03, winner of $23,000 in purses and stakes, he is the sire of The Orphan, that had harness on for the first time March 9th, 1916, and was second both heats of the two-year-old pace at Sacramento in September in 2:17¾ and 2:18½, and that paced a trial mile the following month in 2:14¼ with a halt in 1:04. Lloyd A., a full brother to The Orphan, trotted a mile in 2:11¾ as a five-year-old, and Blanche, another of his get, paced to a matinee record of 2:14 and trialed in 2:12, while Laura J. at 22 months old trotted a quarter in 35 seconds and a mile in 2:36. Another of Royal McKinney's get is used as a work horse and never trained, and these are the only ones that Mr. Jackson knows of that were sired by Royal McKinney that were broken to harness up to last year.

American Horse Breeders Stakes Fill Well.

According to official reports from Secretary Devereux's office, a total of fifty-one stallions, including all the noted speed producing sires and young prospects for same distinction, are named in the Champion Stallion Stake for foals of 1916 to be raced in 1919. This is six more than last year, which in turn was the largest since the Futurity was first announced. Without giving the names of all the stallions named in this stake, the record shows that no less than sixteen of the leading sires of 1916 are in the list, the notable absentees being J. Malcolm Forbes and Guy Axworthy, the former so far noted through the early speed of his get over the tincup route, mostly named because of the plan already made for his sale, but who will be in the list this year as all the five stallions of Walnut Hall Farm already are.

The showing in the Matron Stake is more brilliant and indicates that prominent breeding farms, like Walnut Hall, Patchen Wilkes ,Hamburg Place, Coldstream, L. E. Brown, Curles Neck, Castleton Farm, Midway Farm ,and others, are well represented. The official list shows a total of 750 in this branch of the Breeders' Futurity, with a total of 124 individual nominators of mares, or an average of six for each, and of whom just forty-five have named only one more each. It is needless to say that practically all of the noted speed producing mares now in the breeding ranks are in this list, although it is not as large as those for others, like the Kentucky Futurity, and is due to the fact that only mares owned by members are eligible. The stakes are for three-year-olds alone, with a total entrance fee of $155, of which $135 are due on March 1st the year of the race and at time of closing of entries at the meeting where the stake will be raced. At the rate of $35 and $100, the cost of carrying a colt or a filly to the year of the race, therefore, is $20 as yearling and two-year-old, respectively, $5 and $15.

Hemet Stock Farm Horses

The death of W. F. Whittier will doubtless make many changes in the arrangements that were made in regard to the Hemet Stock Farm horses that are in charge of Fred Ward. It had been decided not to race last year's great yearlings Hemet Queen 2:16¼ and Edith Carter 2:18¼ as two-year-olds. According to the Hemet News, however, the two-year-olds of last year were to be raced as three-year-olds, and payments had been made on them for their engagements. Zeta Lucile (2) 2:12½ holds the Pacific coast record for two-year-old trotters and Louise de Lopez (2) 2:12½ made a whirlwind campaign through the Middle West last year.

Don de Lopez 2:16¼ is another trotter that was expected to be a big money-winner the coming year. Don de Lopez started fifteen times in the East last year and finished first twelve times, second twice and was out of the money once when he made a bad break. He was beaten only by a head in 2:11 last season and is eligible to the 2:17 class.

Allie Lou (3) 2:12½ won every stake in California in 1915 as a three-year-old and took more than $9,000 in purses that year. Allie Lou was beaten by a fraction of a second in 2:07 time at Phoenix last fall and trotted three heats in better than 2:09.

Harry R. 2:11½ (half mile track) won four straight races on the Midway circuit in Kansas and Nebraska last season and is expected to be an excellent pacer this year.

Sterling Lou 2:19¼ (half mile track) won three races in Iowa and Nebraska last year and is expected to be a good trotter the coming season. Many other horses at the farm were to be trained this spring.

L. B. Brown of Denver Buys Direct Pointer.

Mr. L. B. Brown, a wealthy Denver man, recently purchased a number of high class trotting bred mares and horses at the Chicago and other sales and turned them over to Joe Maguire. One of these horses is Direct Pointer, a very fine looking and wonderfully fast horse. He is by Baron Direct, dam Hallie Direct by Directly 2:03¼, second dam by Sky Pointer, full brother to Star Pointer 1:59¼. Maguire says this is the fastest horse he has ever seen, and when eleven months old the twentieth time the harness was put on him he paced an eighth in 15 1-5 seconds. He was then sent back to the farm and has not been trained since. He is now seven years old, and it is believed will make a great sire. He now stands 15.3, weighs 1100 pounds and is a dark bay.

Perhaps It Is Badger Boy 2:27¾.

Among the horses in training at the Phoenix, Arizona, track is a trawberry roan gelding by Vassar out of a mare by Badger Boy. This gelding is owned by Frank W. Efner and John Howard, the last named being the trainer. Mr. Efner writes that the man from whom they bought the gelding could not tell much about Badger Boy. Perhaps this is the stallion Badger Boy, register number 12,429, trotting record 2:27¾, that died in Wisconsin in 1892. This horse was by Swigert 650, dam Badger Girl 2:22½ by Black Flying Cloud 378. Mr. Efner's father, the late Geo. B. Efner, bred and raised Byron 2:25½ that trotted the first mile better than 2:30 ever trotted in Erie county, New York. Byron was by Royal George.

North Yakima Announces Purses.

The Washington State Fair at North Yakima has decided to take the dates September 17th to 22d, and will hang up $6000 in purses for harness races. There will be five trotting and five pacing events. The free-for-all and 2:12 classes will be the fastest for the trotters and the free-for-all and 2:08 classes for the pacers. For these races purses of $700 will be offered ,and for the other class $500 and $600. No money will be offered the runners except what will be hung up for the Indians, and it is proposed to bring a large number of the aborigines and their horses to the fair.

HORSE NEWS FROM OREGON.

Fred T. Merrill, of Portland, Oregon, is the breeder of the good pacer Oregon Hal 2:09½ recently sold by Warren Dennis to Thos. W. Murphy of New York. Mr. Merrill, in a quiet way, is a substantial breeder at his own farm and half mile track only a few miles from the center of Portland. He keeps a few choice broodmares and breeds them to the best stallions available. He has raised colts by Hal B., McKinney, The Bondsman, Cruzados and others of note. He bred the fast pacer Red Hal 2:09¼ and while a busy man with his real estate, his promotion of boxing events and other sports, yet finds time to visit and enjoy his horses, and to spend his money for the good of the harness horse game. He is a live wire.

Messrs. Cox & Miller are now owners of the half mile track at Forest Grove, Oregon, having secured the plant from Capt. McCann of The Bondsman fame. In the deal they took over Capt. McCann's stallion, now five years old—Cavalier Gale. He is by Barongale 2:11¼ and his dam is Nella Jay (3) 2:14¼, winner of the $14,000 Kentucky Futurity in 1902, by Jayhawker. So Cavalier Gale needs no apology when it comes to a question of his breeding, for he is bred in the purple. As to his gameness, it is as good as his breeding. Last season was his first year out. Mr. Cox, who trained the colt, could not locate a lameness that came on early in spring and stayed with the roan colt all season. At times it was severe yet Cavalier Gale never at any time in any of his races quit trying to trot. He was on nearly every occasion outclassed and short of work on account of his lameness, yet he made the spectators cheer at his exhibition of gameness. It is to be hoped he will be trained this year and be ready and sound to race, also that Cox & Miller will advertise him and give him the opportunity that such a royally bred stallion is entitled to. The owners of good mares around Portland and points close to Forest Grove need not make the excuse that there is no good stallion in the district for Cavalier Gale is as well bred as any and a fast and game trotter besides.

Cox & Miller own the great little race mare Lady Hal 2:05¼ by Hal B. 2:04¼. She was a sick and sore mare all last season . When she met Zombrino at Vancouver she should have been in the hospital instead of out racing against such horses as Zombrino and Sir Wilfred, but she put up a good race. At Centralia she was in a bad way but another Hal B. in Hal Paxton was there to entertain Zombrino, and while Hal Paxton was very lame yet he beat Zombrino at every station and put in three heats below 2:10. While I am at it I will say that Hal Paxton is to me the gamest race horse I ever saw, because he was a very lame horse at Yakima and Spokane yet he dared battle with the great Zombrino without flinching. At Salem Dr. Patterson cocained his bad ankle and he got busy, and it took all Zombrino had that day to stave him off. I just make this statement out of respect for the game race horse Hal Paxton and his owner-trainer, Fred Woodcock, and I know Zombrino is a great pacer and his trainer, Ted Bunch, as fine a man as I know in America.

But back to Cox & Miller. Mr. Cox is one of America's oldest trainers for he was a trainer years and years ago on the famous Jewett Farm in New York State, and he trained many famous horses—Jerome Eddy and many others. Now he has a real race track of his own and several grandly bred young horses, and everybody who knows him and his partner, Mr. Miller, will extend to them their most hearty good wishes.

Every once in a while we read in the horse journals an item to the effect that a horseman of advanced age is training a light harness horse. Usually these items are about men who live in rock-ribbed Maine, the Old Granite or the Nutmeg State. So I think it but right and proper to make an item about a man who trains a horse and lives in Oregon. His name is Peter Cook. He lives at Balston, Oregon, is a real live merchant and a successful one, and his age the last time I saw him, during the Oregon State Fair, was 74. Peter Cook trains and drives his own horses, and does it in addition to managing a large and prosperous general merchandise store. Every year Mr. Cook manages to have one or two horses ready to race, and whether the races begin July 4th or August 24th, Peter Cook is ready. Last season he went through the Oregon circuit with his good game and fast trotter Mark H., and every time he started this horse the other teamsters had to hustle and the spectators saw a real horse race. At Salem he started Mark H. against a good-sized field and won, giving the son of Como a mark of 2:17½ and bringing the crowd to its feet in a wild burst of applause as he made a Peter Cook finish. He can sure high line a trotter, is not afraid of the cars, does not take the overland route nor tear around the first turn as though the Old Nick were after him, and can time a finish to a nicety. During one of the heats of this race last fall, when his driving was being cheered to the echo by the great crowd in the grand stand, Mr. Cook's hat blew off and his very bald head was exposed . Some one began to shout, "See the old bald-headed scout; why don't he wear hair?" To which comment a bright lady sitting near me made reply: "Peter Cook don't need hair on his head because he has real brains inside." This quick retort closed all further remarks about Peter's head.

Besides owning Mark H., which horse by the way is a game, fast, reliable and good gaited trotter. Mr. Cook owns a very good-looking four-year-old horse named Kinney Wave by Tidal Wave 2:06¼, dam by McKinney. Mr. Cook traded Lottie Ansel 2:14¾, a mare that the writer sold him a year ago, for this horse, that is young and sound and a fast pacer. Mr. Cook will have his pacer and trotter both ready when the 1917 races begin. Besides haivng his sport in summer Peter Cook winters his own horses, jogs them on the roads around Balston and in addition attends all the meetings of his Grand Army post, goes to every dance and social gathering and dances a minuet, a fox trot or turkey in the straw as accurately and gracefully as any man in Oregon. This is a long story, but it is about a good American. I wish I knew many more such horsemen as Peter Cook. He is my interpretation of a real sportsman.

C. A. HARRISON.

DEATH OF A ONCE PROMINENT HORSEMAN.

[Communicated]

Those lovers of the trotting horse whose recollections extend back two-score years, will hear with regret of the recent death, in Chicago, of Mr. James Stinson. Mr. Stinson came of a Canadian family of prominence, wealth and fondness for sport. He was a man of large means, who came to Chicago before the civil war period, and was always known for his intense fondness for fine horses. In 1871 he took four of his horses, Volunteer, David, Tom and Satinette, and at the old Dexter Park Race Track, driving himself, he broke the world's four-in-hand record.

For a period of some years after this he confined his attention to driving and riding horses, and he was a very familiar figure on the Chicago boulevards, at the Washington Park Club, and in the neighborhood of his beautiful mansion which stood in the midst of ten acres of park-like grounds on Drexel Boulevard.

About 1885 he conceived the idea of producing, by careful breeding and changes of handling methods, a more natural trotter, from whom speed could be had without the use of such artificial aids as special shoes, tips, boots, check reins, etc. He attempted to carry this idea out, and for the purpose he purchased two stock farms, one at Thornton, Ill., and the other at Gary, Ind., which he equipped with special stables, tracks, and every facility for the training of his colts and horses. He purchased for his chief stallion Nutmeg 2:16, and quantities of brood mares and colts from various stock farms. Among his trainers were V. L. Shuler and Wm. McDonald. Budd Doble also at times drove his horses. Mr. Stinson's ideas of handling horses were so revolutionary that he never obtained a trainer who could really comprehend and carry them into execution. From boyhood they had all been used to the orthodox methods, from which they often got quick results, and they never really sympathized with his peculiar ideas. Another point on which they were not in sympathy was in the matter of racing the horses. The trainers were anxious for the glory and excitement of following the circuits; to Mr. Stinson this was repugnant—his sole interest was in improving an individual horse by handling, and improving them generally by breeding—for any glory, or to make money from his horses,, was a thing which was farthest from his desires. He was a disciple of the late Joseph Cairn Simpson and drove his horses shod only in tips; he used no boots, toeweights, check reins or any device to change their gait or stride; and he insisted that they be driven on a loose rein. Notwithstanding these methods he produced many fast trotters, and perhaps his crowning achievement came in 1892. It was from Mr. Simpson's book "Tips and Toeweights" that he obtained his ideas on shoeing.

His four-in-hand record, made in 1871, stood as the world's best for seventeen years, when Mr. Gordon, of Cleveland, took Clingstone and three of his other best horses and, with a professional driver, broke it. In 1892 Mr. Stinson took four of his colts, all sired by Nutmeg and bred by himself, then at the age of sixty-five, and without any artificial aids to their gaits, shod in tips, drove them at the Washington Park track, knocking eight seconds off of Mr. Gordon's record, and making a world's record again, which probably still stands.

The panic of 1893 swept away Mr. Stinson's great fortune, with all his breeding farms and horses. It came so soon after the period of their conception that enough time had not elapsed to test Mr. Stinson's theories.

Mr. Stinson loved all animals, but he was particularly devoted to the horse. His patience in training them was almost inexhaustible, and the results he obtained were astonishing to his fellow horsemen. By kindness, firmness and infinite perseverance he would take a nervous, rattle-headed horse and eventually drive him on a loose rein. His method reveals his great patience. He could not stand a horse that pulled on the reins. As soon as his horse would start to pull Mr. Stinson would stop him and back a few steps, then start again, and the moment the horse took hold he would stop and back again. He would keep this up for hours, sometimes backing the horse over a mile at a time, but he was invariably successful in dominating the animal and obtaining his desired result. "White Hat" McCarthy of California once sold Mr. Stinson a very speedy but nervous, rattle-headed mare. A year later Mr. McCarthy was passing through Chicago ,and went to see Mr. Stinson, who asked him to take a drive behind the mare. McCarthy, who knew her well, was by no means anxious to go, but did not like to refuse. He took a seat in the buggy ready to spring out any moment. To McCarthy's amazement the mare went along quietly on the loose rein and after driving a couple of miles they stopped, and the mare began to browse on the grass along the roadside. McCarthy turned to Mr. Stinson and said that no one could have made him believe such a change in that animal was possible, if he had not himself seen it. This is merely one of many similar incidents where horsemen were astonished at his results.

Mr. Stinson never sold a horse—he kept them until they died. Sometimes this trait seemed very strange, as the following incident will illustrate: He bought a colt that as a two-year-old showed great speed for that age . The following year he trained it, but no improvement developed, and this was repeated as a four and five-year-old, when it was manifest that he never would improve on the original speed he had shown at first . As he was a fine looking, showy horse, a neighbor made Mr. Stinson a very good offer to buy him. Mr. Stinson refused the offer, and on the same day gave orders for the horse to be taken out and killed. He felt that he was not good enough to keep, that he was useless on the farm, but he would not unload him on anyone else.

Mr. Stinson's patience and philosophy, which were revealed in handling his horses, stood him in good stead in his latter years of reduced circumstances. He never complained of his reverses in fortune, or made the slightest references to his former opulence. Once, when the writer made an allusion to it, he smiled benignly and said that, like Socrates, he looked around and thanked Jove that there were so many things in this world that he did not want.

He attained the ripe age of eighty-eight years, and in his death the turf loses a follower who was imbued with the finest ideals. G. P. W.

San Francisco, Jan. 26, 1916.

The Revolution in Racing.

How racing has been revolutionized in the last forty years is shown by the records of 1876 compared with those of 1916. In the Centennial year 476 races were run in the United States, and of these 103 were heat races. Four were at four mile heats, four at three mile heats, eighteen at two mile heats and seventy-two at mile heats. Only one race reported was at a distance less than half a mile and only nineteen were run at that distance, most of these being at fairs.

There were ten dashes at five furlongs, forty-five at six furlongs and sixty-five at one mile. Forty-three were at a mile and a quarter, fifty at a mile and a half, twenty-eight at a mile and three-quarters, forty-four at two miles, seventeen at two miles and a half, seven at three miles and three at four miles.

Statistics of last season are not yet available, but it is safe to say there was not a running race at any recognized meeting under the jurisdiction of the Jockey Club in which the horses had to repeat, even at the shortest of distances. Four mile races, once deemed to be the true test of an American thoroughbred, were unknown ,and substantially the same thing was true of races at three miles and at two miles, while the number of dashes at distances greater than a mile and a half was negligible.

At some of the purely commercial meetings the program day after day showed no race at a distance so great as a mile. Even at Saratoga there was only one contest at a greater distance than a mile and a quarter in a month of racing, and at Belmont Park the Municipal Handicap and the Realization were the only exceptions on the program of the autumn meeting.

Will Again Sell Thoroughbreds.

The Fasig-Tipton Company has fitted up a pavilion at Saratoga and will return to the business of auctioning thoroughbreds. George Bain, who has been auctioneer for the trotting horse sales of the company, and who succeeded the late William Easton as a thoroughbred auctioneer, will fill that office, and the contracts that have already been made suggest that he will have a very busy season. Some of the breeders who have booked their consignments for the Saratoga selling season are: Hal Prince Headley, with 28 yearlings, the get of Star Shoot; the Beaumont Stud yearlings of Headley and Miller; Clarence H. Mackay's Hara de Fresnay lot from Normandy, France; Williams and Radford's Adelbert Stud yearlings; J. S. Barbee's output from the Glen Helen Stud; O. H. Chenault's Spendthrift Stud lot; J. O. and G. H. Keene's Keeneland Stud and a number of recently imported yearlings; Phil T. Chinn's imported thoroughbreds and the yearlings of White and Garnett and Edgar Renshaw. All of the other breeders of importance will probably send consignments, and the Fasig-Tipton Company bids fair to at once come back to the important position the company enjoyed in the thoroughbred field back in the days when they had commodious paddocks on Ocean avenue, opposite the old Sheepshead Bay racecourse, and when William Easton officiated so entertainingly on the block.

✦ ✦ ✦

A dispatch from New York states that a butcher shop, in which horse meat is sold exclusively, has been opened in Harlem with the sanction of the board of health. A sign over the shop reads: "Horse flesh for sale here." Round and sirloin steaks are quoted at 12 cents a pound, while inferior cuts sell as low as six cents a pound. Horse meat frankfurters retail at 10 cents a dozen.

SADDLE and SHOW HORSES

James W. Cromwell, one of the pioneer breeders of saddle horses in the country, died at his home near Cynthiana, Ky., January 14. Mr. Cromwell, who was 76 years of age at the time of his death, never lost interest in the saddle horse and the shows. He was the breeder of Harrison Chief, the founder of the Chief family of saddle horses. He also owned Gaines' Denmark, to which all Denmarks trace.

✤ ✤ ✤

The four-year-old saddle mare, Willie McDonald, by McDonald Chief, which was recently sold by McCray Bros. of North Middletown, Ky., to Tom Cross of Chicago, was sold to Walter Hill of St. Paul during the Chicago show, and turned over to Tom Bass of Mexico, Mo., who exhibited her at the Denver show last week. From Denver she was shipped to Mr. Hill at Los Angeles, where he is spending the winter. The imported Hackney pony, Piccadilly, and two ponies were also shipped by Bass to Mr. Hill.

✤ ✤ ✤

W. J. Gooch, secretary of the Kentucky State Fair, died recently at his home in Louisville. Mr. Gooch was formerly a member of the State Legislature and has been prominently identified with the live stock interest of the South. He was a very efficient secretary, but has only served one year. An effort is being made by friends of L. B. Shropshire, assistant secretary for many years ,to have him succeed Mr. Gooch. Mr. Shropshire is thoroughly familiar with the duties and his appointment would be a popular one.

✤ ✤ ✤

Future Bids Fair For Saddle Horse.

That the American saddle horse has the most promising future since the establishment of the breed and that the breeders who produce the right kind will find a stronger demand than they can supply, practically at their own price, is the opinion of W. W. Pollock, banker-miller and planter-stockman, of Mexico, Mo., who was in San Francisco this week. Mr. Pollock was at one time part owner of the greatest saddle stallion the world has ever known, Rex McDonald 833 ,and at the present time his country estate, Pollock Place, near Mexico, is well stocked with a magnificently bred herd of matrons. They represent such sires as Rex Denmark, Rex McDonald, Black Squirrel, Montrost Rex Chief A, and other famous stallions of the past and present. He bred Rex McD, the stallion that went to Kentucky a few seasons ago as the most promising son Rex McDon old ever sired. This horse was injured or the predictions would have been fulfilled. Mr. Pollock declares the present great demand for the saddle horses produced in Missouri and Kentucky will grow with leaps and bounds and that the outlook for them is brighter than for any breed, despite the growing demand for weight in the collar. "Many prominent breeders have been mating their mares with jacks, and well bred, well educated, good looking saddle horses, such as are wanted for riding in the parks of our cities, are as scarce as 'hen's teeth. Thost breeders who have the good judgment to raise good horses are going to be well paid for their efforts. Every one wants to ride and it is up to the producers to breed the kind that the business man can ride with a certain amount of pleasure; the idea of believing they are ready when only a professional trainer can ride them must be abandoned and they must be absolutely mannered before they will find a buyer," said Mr. Pollock.

In addition to being the leading miller of Missouri Mr. Pollock has one of the best bred herds of Shorthorn cattle and Poland-China hogs in Missouri.

—o—

The "rail birds" of Missouri and Kentucky, and wherever horse shows are conducted in the Middle West, will have something to talk about when the bell is tapped at the opening of the summer shows. There are more fresh horses of sensational quality about to be uncovered than in several years. Some of them have already been seen on rare occasions but their performances at that time were not up to what is expected of them since the season's development. Prominent among these that will open the eyes of the critics and cause applause in the grand stand, is Easter Girl, owned by Jas. Buford of Paris, Mo. This filly was shown by Buford in 1915 as a two-year-old, and won many prizes; however, she had a growing streak and in 1916 was not handled. She was left entirely alone, and the results have proven that it was good judgment on Buford's part, as she has developed into a beautiful mare of the big three-gaited type. She has broadened out to magnificent proportions, has a long fine turned neck, beautiful head with large expressive eyes, and a snappy, well balanced trot. She is another saddle bred one that is destined to become a three-gaited crack, having the qualifications of Pretty Baby, Greyhurst and others that have proven winners.

Buford also have a two-year-old stallion called Ima Dare, by My Major Dare ,that is, as he expresses it, a "doing fool"; a three-year-old stallion that is going to be a real contender this year; a junior mare which will have to be reckoned with, and something for every class and stake. In fact, Buford will have the best stable of horses he has ever exhibited and he has them "tuned and trimmed"—and when the bell taps they will all know that "Jimmy" has been in the ring.

—o—

Horse Shows For California.

The season of 1917 promises much in the way of county, district and state fairs for California. These associations which have been in progress in former years are expanding and the revival of a county and district fair is the "town talk" in many of the progressive counties of California. The fairs are being organized into circuits so that the exhibitors of live stock—horses, cattle, sheep and swine—will find several weeks in which they can exploit their products before the interested public of the coast. Many herds of pure bred stock in California are being prepared for the show rings this season, which have never been exhibited before. The cause is that the people of the West are demanding stock that has won in competition with other herds; herd headers of real achievements, not idle boasts and claims of superiority; and, the opportunity now afforded, it will be profitable in an immediate cash return for exhibitors this year and in years to come, as it is profitable from an advertising standpoint, for there will be several weeks of continuous showing.

An effort should be made by breeders and exhibitors of saddle and show horses in California, of which there are a large number, to arrange with every one of these associations to conduct a horse show in connection with their fairs. If the proper attention is given this matter, there is no doubt but that every fair in California will arrange for a horse show along with a racing program and live stock exhibition. Once the associations are made to understand the great drawing card a horse show is ,they will not hesitate to promote one.

However, the mistake of "just shoving it in" must not be made, as it has been thoroughly demonstrated that a horse show conducted early in the forenoon, before the races, or on the back track out of the way, does not pay. The exhibitions for show horses must be arranged on a good day, between races or—to be a real show—in the evening. The management of all leading fairs and stock shows of the country will attest to the popularity and profit of a horse show conducted along proper lines. At the International, the National Western ,and the American Royal shows the night horse show attracts greater crowds at better prices than any other attraction. At the Missouri, Illinois, Kentucky, Ohio and other state fairs the night horse shows make the fairs more interesting, and that result always pays the management. While the average county and district fair does not consider any other department until the horse show program is assured.

"Yes, that is all well and good in that part of the country," some of the wiseacres have informed me. "But you can't do it in California." The writer knows that it can be done in California. There are scores of good show horses in this state and there are scores of others who, if they had an opportunity to make more than one or two shows a season, would "show you" whether it could be done in California or not. There is more of an opportunity for successful horse shows here than in any other state, and with the undisputed revival of the saddle horse it would be only a matter of a few years until there would be many breeders in California producing foals every year, and it would be here, as elsewhere, one of the leading branches of the great diversification of live stock production.

The writer has attended county fairs which were conducted in towns of two thousand population where a night horse show was conducted and where standing room only was available in the grand stand and around the track. More than 2,000 automobiles were parked in the center field during a night show at Shelbina, Mo., two years ago. Despite the fact that the show was rained out the association cleared $2,000 on their horse show. Again, California has the advantage, in that there would not be the always expected rains which are so frequent in the Middle West at that season of the year.

In addition to the California owned horses, many stables of the Middle West could be secured providing there were as many as six shows. These exhibitors are not particularly interested in the prizes; they are not looking for immediate returns in cash, but realize that a few successful shows will bring about the desired enthusiasm among the people, the horse lovers and the associations, and horse shows will be firmly established, that many sales will be brought about and the great American Saddle horse will have been successfully established in California and recognized as a profitable animal to breed. California's climatic conditions and winter resorts make it the ripest of all fields for the saddle horse in the future. The East has given way and admitted the horse with weight in the collar, and the saddle horse, are here to stay and the demand is growing. There is no "craze" or "boom" which will flourish only a few seasons, but a gradually increasing demand. The call of the horse is not of an insecure tenure. Its roots go down deep into the very heart of our natural instincts and its operations are in accordance with laws as old as eternity and as immutable as truth. It will always be so. The horse is the greatest leveler of rank. The poorest, humblest being and the man of millions rub shoulders when King Horse is the attraction.

RUTH ST. DENIS
A Frequent Winner in the Gaited Saddle Horse Shows of 1916.

✤ ✤ ✤

Thirty-two exhibitors won $1000 or more at last season's shows, according to the Saddle and Show Horse Chronicle. Miss Loula Long, of Kansas City, heads the list with $9,001 to her credit. Next in order is O. J. Mooers, another Western exhibitor, who hails from Columbia, Mo. His horses won $6,742. Others who won more than $5,000 were: James Cox Brady, of Gladstone, N. J., $5,770; Walter H. Hanley, of Providence, $5,300, and Miss Constance Vauclain, of Philadelphia, $5,195. William H. Moore, who topped the list at the National, was only twelfth in the list of winning owners for the season, with $3,150 to his credit.

Notes and News

Porterville, Tulare county, has decided to hold a live stock show and agricultural fair in October.

✤ ✤ ✤

The State Fair track at Sacramento is reported to be in fine shape for working horses over this winter.

✤ ✤ ✤

More money to the breeder of the winners is the rule that many associations offering stakes are adopting.

✤ ✤ ✤

Programs in which there are $1000 purses are getting to be quite common on the eastern and middle west half mile tracks.

✤ ✤ ✤

The California Circuit is forming. It begins to look as if fifteen weeks will not provide for all the tracks that want to get in.

✤ ✤ ✤

It is said that Trainer Earl Pitman refused an offer of $3000 for the pacer Billy Sunday, by Justo, during the Toronto ice races.

✤ ✤ ✤

The Madera County Fair Association is to be given a tract of 100 acres of land for fair purposes adjacent to the town of Chowchilla.

✤ ✤ ✤

A. Edstrom of Oakland, now owns the old mare Fanadma 2:19½ by Eros, dam Elma 2:24 by Elmo 891, that was bred by the late John McCord of San Francisco.

✤ ✤ ✤

Tracks can no longer keep a distanced horse's money, as the rules do not permit of the former purse-saving condition: "Only one money to the winner."

✤ ✤ ✤

Helen Stiles 2:06¼ that took her record in 1912 may be raced in California again this year. She is now eligible under the new allowance rule to the 2:12 class.

✤ ✤ ✤

The price paid for the California bred pacing mare Colleen 2:05¼ was $2500, and her new owner is Frank Luchsinger, of Monroe, Wisconsin. Airlie Frost will train and drive her.

✤ ✤ ✤

It is stated that thirty-nine out of forty of the mares that were bred to Robert Bingen 2:11¼ on the farm of his owner, Mr. E. D. Gould, of Kearney, Nebraska, are in foal.

✤ ✤ ✤

The free-for-all pace offered by the Connecticut Fair Association for its meeting next fall at Charter Oak Park has been made a purse of $2000 instead of $1500 as first announced.

✤ ✤ ✤

The four-year-old gelding by Kentucky Todd 2:08¾, dam by Moko, that J. B. Stetson has in his string at Sacramento, is a well bred trotter that may be heard from this year.

✤ ✤ ✤

The Anvil 2:02¾ looks good enough to race again this year although he is not expected to be put in training. He is now eligible to the 2:07 class, his winrace record of 2:03¼ having been made in 1913.

✤ ✤ ✤

The Grand Circuit will furnish fourteen consecutive weeks of harness racing this season. Detroit asked for an extra week this year and it will be the first time a two weeks' meeting was ever held in the "blue ribbon" city.

✤ ✤ ✤

And this in staid old Massachusetts: Four hundred thousand dollars is to be raised to construct a handsome grandstand and other buildings on the grounds of the Eastern States Fair and Exposition at Springfield, Mass.

✤ ✤ ✤

Joe Maguire of Denver has been very busy lately selling off the horses belonging to the Gumaer Estate. Two sales were held in Denver and 80 head were sold in Chicago. There were 204 head sold altogether and they brought fair prices.

✤ ✤ ✤

French Devereux, son of H. K. Devereux, the well known Cleveland horseman, a member of Troop A., the noted Cleveland cavalry organization, has been appointed on the staff of General Bell and in consequence becomes a member of the regular army.

✤ ✤ ✤

The setter dog owned by Mr. H. K. Devereux, the Cleveland patron of harness racing sports, was declared the winner of the Derby of the National Field Trials Club, concluded recently at Calhoun, Ala. There were 24 starters in the derby and the competion was unusually keen.

✤ ✤ ✤

Henry Smith of Pleasanton lost by death this week his mare Della H. 2:10 by Hal B. 2:04¼, dam Jessie M. (dam of Hal J. 2:09¼) by Del Norte. Della H. was bred by H. E. Armstrong, former owner of the Pleasanton track and made her record at Fresno in 1913. We did not learn the cause of this mare's death.

The late Admiral Dewey was a great lover of the trotting horse and owned a very handsome pair of matched trotters that drew his carriage in Washington. He never was induced to part with them in favor of an automobile.

✤ ✤ ✤

Guacho 56147, the seven-year-old stallion bred by L. Todhunter of Sacramento, took a record of 2:27¼ in a race at Grand Island, Nebraska, last summer. He is by the young stallion Nobage 48390 and his dam is by Zombell by Zombro, second dam The Silver Bell, dam of seven in the list.

✤ ✤ ✤

Dick McMahon has shipped all his horses to Macon, Georgia. Besides the four youngsters sent from Pleasanton those in the string belonging to R. J. MacKenzie are Miss Perfection 2:07¼, Pointer Queen p. 2:12¼, and Anvilite (2) 2:22¼, now a four-year-old.

✤ ✤ ✤

There is a two-year-old trotting colt in training at Youngstown, Ohio, that is very highly thought of and whose breeding would interest any Californian who should happen to visit the track, as he is by San Francisco 2:07¾, dam Miss Georgia 2:08¾ by McKinney 2:11¼.

✤ ✤ ✤

Joseph Waddell, secretary of the California Fair and Racing Association, who visited Salinas last Saturday, says the track there is in good shape. Henry Helman, who is the lessee of the track, told him a coating of clay was put on the track in the fall of 1915, and it is now a fast and safe track.

✤ ✤ ✤

Louise Carter and Lady Zombro, two of Hemet Stock Farm's best mares, have been booked to Budd Doble's stallion Kinney de Lopez 2:23 this season. The first named mare is the dam of Wilbur Lou (1) 2::19¾ (3) 2:10¼, Mamie Alwin 2:12 and Edith Carter (1) 2:18¼, the last named being by Kinney de Lopez. Lady Zombro is the dam of three in the list.

✤ ✤ ✤

It is reported that an offer of $30,000 was recently made and refused for Wilkes Brewer 2:08¼, the Nutwood Wilkes mare that was unbeaten on the half mile tracks last year. Whenever a trotter is fast and sound enough to be a good prospect in the fast classes there is no trouble about getting a good price for him.

✤ ✤ ✤

W. E. D. Stokes, owner of Patchen Wilkes Stock Farm, Lexington, Ky., has just issued a book which horsemen will be interested in. The title is "The Right to be Well Born," or "Horse Breeding in Its Relations to Eugenics." The work is furnished by all American News Company's stands and book stores.

✤ ✤ ✤

After the death of Guy Cressey, a milkman of Westbrook, Me., no one knew his milk route, and it was not until Mr. Cressey's horse, which had traveled the route for five years, was hitched up and permitted to have a free rein, that the course was discovered. The horse made the trip and stopped at the door of every customer except one.

✤ ✤ ✤

A Mr. Hafner, of Agram, Austria, is the owner of 160 head of trotting bred stallions, mares and colts and engages extensively in breeding trotters. He owns Baron McKinney 2:10¼, the sire of Spriggan 2:08¼ and Al Stanley 2:08¼, sire of Etawah 2:03. Geo. Bodimer, well known American trainer, is the superintendent and trains the youngsters.

✤ ✤ ✤

The announcement has been officially made that Mr. C. K. G. Billings, of Santa Barbara, will sell Curles Neck Farm in Virginia and all the horses thereon except Lou Dillon and Uhlan, but no statement has come from Mr. Billings that he will establish a trotting horse breeding farm in California, as some of the newspapers have reported.

✤ ✤ ✤

At a meeting of the Riverside Fair Association held last week C. H. Lewis, of Riverside, was elected president, J. F. Backstrand vice-president, A. H. Brouse of the National Bank of Riverside, treasurer. President Lewis was empowered to appoint a committee of five directors to act with himself in selecting a secretary. The person selected will be paid a salary and be required to devote his entire time to the work of the annual fair in September.

✤ ✤ ✤

Here is something for the theorists to study over. About 66,000 trotting and pacing stallions have been registered as standard. The official number of 2:30 or better trotters up to the close of 1916 is 32,938. The official number of pacers, up to the same date, is 24,738, or a grand total of 56,676 standard performers. Thus the official records show that the registered standard stallions have not sired an average of one standard performer each.

✤ ✤ ✤

The new plan of awarding the prizes in the $21,000 Kentucky Futurity which is for foals of 1917 and will close April 1st, is as follows: Three-year-old division, $14,000, divided: Winner $8000, second $2500, third $1000, fourth $500; nominators of dams, winner $1000, second $500, third $300, fourth $100, ,fth $75, sixth $25. Two-year-old division, $7000, divided: Winner $4000, second $1250, third $500, fourth $250; nominators of dams, winner $500, second $250, third $100, fourth $75, fifth $50, sixth $25.

At the Forbury Park, New Zealand, trotting meeting last month, the get of Harold Dillon won six races. Harold Dillon is an own brother to Dillcara, the trotting stallion owned by the late Dr. C. E. Farnum, and that is now in the stud at Pleasanton Race Track.

✤ ✤ ✤

Friend C. A. Harrison of Seattle, who is always doing something to arouse and increase interest in the breeding and racing of trotters and pacers, writes that he hopes Sunkist California will arrange this year for racing to begin earlier and last longer, and that the old custom of 10½ months of training and 6 weeks' racing will be changed.

✤ ✤ ✤

The unusually cold winter we have been having in California has prevented the California trainers from doing much with their horses at any of the tracks, as it goes against a California trainer's grain to do much riding when the mercury is down as low as 40 degrees above zero in the morning. Warm days are coming, however, and the training tracks will be busy places by the first of March.

✤ ✤ ✤

When figuring that your trotter or pacer will be given an allowance of one second for each year that he has not equaled or lowered his record since it was made, don't figure in 1917. If your horse made his record of 2:10 in 1912, he will be allowed one second for each of the years 1913, 1914, 1915 and 1916, or four seconds in all. The season of 1917 has not been raced yet.

✤ ✤ ✤

W. E. Detels has turned his two-year-old filly by Onward McGregor 2:23, dam Bonnie Melba by Bon Guy 2:09¼, over to Dan Hoffman who will have her trained by Millard Sanders at Pleasanton. She is entered in the Pacific Breeders' Futurity. Her second dam is Melba T. (dam of May Twohig 2:15 and Charley 2d 2:25), by Nutwood Wilkes 2:16½, third dam Myra by California Nutwood.

✤ ✤ ✤

Hon. David Tod, the widely known Youngstown, Ohio, horseman and owner of the Southern Park track, has decided to send his racing string to Billings Park track, Memphis, Tenn., for winter training. The string is in charge of Trainer Cecil Traynor and contains several high class racing prospects, including some high-priced youngsters which Mr. Tod bought at the last Old Glory sale.

✤ ✤ ✤

Winnipeg, Manitoba, is one of the towns of the Northwest that the European war has changed, so far as fairs are concerned. The former annual exhibitions of the Winnipeg Fair Association are not being held, the fair association having gone out of existence two years ago, since which time the grounds and buildings have been used for military purposes. Some years ago the city acquired land which was generally understood would, sooner or later, be utilized for fair purposes, but at present the plot has been advanced to a very attractive park. The prospect for the fair feature in connection is said to be unlikely to be realized, at least until after the war.

The Vancouver, B. C., Program.

Following is the program of harness and running races announced for the meeting at Vancouver, B. C., which opens August 21st:

Tuesday, August 21—2:15 pace, $1000; free-for-all trot, early closing, three in five, $800; running, half mile dash, no entry fee, $100; local 2:15 pace, early closing, no entry fee, $100.

Wednesday, August 22.—2:15 trot, early closing, $700; three-year-old pace, early closing, $300; running, one mile dash, no entry fee, $125; local 2:20 trot, early closing, no entry fee, $100.

Thursday, August 23.—2:20 pace, $500; three-year-old trot, early closing, $300; running, half mile dash, no entry fee, $100; local 2:25 pace, early closing, no entry fee, $100.

Friday, August 24.—2:20 trot, early closing, $500; free-for-all pace, early closing, three in five, $800; running, six furlongs, no entry fee, $100; local 2:30 trot, early closing, no entry fee, $100.

Saturday, August 25.—2:25 trot, $1,000; 2:25 pace, $500; running, one mile, no entry fee, $100; local race, early closing, Fields & Boyd trophy.

In local races drivers must be amateurs and horses must start three times in British Columbia matinees during the season.

ANSWERS TO CORRESPONDENTS.

Henry E. Bean, Los Angeles, Cal.: The "Weekly News Letter" is issued every week by the United States Department of Agriculture and can be obtained by writing to that department at Washington, D. C.

* * *

L. C. D., Sacramento: The stallion Don Marvin 2:28 was sired by Fallis, son of Electioneer. Don Marvin's dam was Cora by Don Victor, a son of Williamson's Belmont. While the index of the Index Digest gives Don Marvin as by Phallas it is an error in spelling as the correct register number of Fallis (4781) is given. Phallas 2:13¾, one time champion trotting stallion, was by Dictator, but was not the sire of Don Marvin.

Ed Geers had his 66th birthday on January 25th.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Coursing at Sacramento.—Some of the fastest hounds in the state are entered in the next coursing meet of the Capital City Coursing club, to be held at Franklin on Sunday, February 11. Although the entries for the meet do not close until February 5, Eugene Panario, secretary of the club, has already received entries from a number of dog owners at the bay. The drawings will be made on February 8.

Two stakes will be run off during the day. One of them, termed the Championship stake, for 16 dogs, is the biggest event of the season. Such dogs as Los Molinos, San Pablo Girl, Irish Linnet, Hellover Swell, Mayhews Boy, Wild Night, Expensive Board, Steam Trawler, Blue Bells, Young Blackie and Oakland Girl, have already been entered in this stake, which carries a $60 first prize, a $40 second prize, $20 prizes for fourth and fifth places, and $5 prizes for sixth, seventh and eighth places.

The other event of the day is a 16-dog membership stake. Entries for this stake are already coming in.

Live Fish, 3,800 Feet Down.—A correspondent, writing to the current issue of the Fishing Gazette, describes the taking of live fish from the bottom of a Transvaal gold mine. "The fish," he states, "were found in the catchment at the 900 ft. level, and also at the bottom of the shaft. The particular shaft from which they came is vertical and 3800 feet deep. The fact that they were found alive at the bottom as well shows, I think, that they must have been merely spawn when they fell. The fish I have seen were barbel, very light in color, and from 6 in. to 12 in. long, and up to ¾-lb. in weight. They were not nearly as black as the river barbel we get here. What on earth they find at the bottom of a shaft in the way of food I can't think. However, they apparently thrive. Frogs and water-snakes are much more common than fish. In exceptionally dry weather small bull-frogs have been seen to distend themselves and deliberately jump down the shaft ,apparently in search of water."

Anglers at Legislature.—Portland, Ore.—Over 50 strong, Multnomah county sportsmen and anglers invaded the state capital on January 25th in a special train and presented their views on the closing of the Willamette river to commercial fishing to the joint fisheries committee of the legislature.

After the hearing, which lasted for nearly three hours and during which both sides had equal opportunities to express themselves, a number of Multnomah sportsmen stated they were of the opinion that the bill would be passed by both houses.

Master Fish Warden Clanton was among those present at the hearing, and he gave the committee some very interesting data on the conditions at the Oregon City falls, recommending that another fish ladder be constructed.

Among the prominent speakers for the anglers were Arthur I. Moulton and Walter Backus, District Attorney Hedges of Oregon City, carried on the fight against closing the river to net fishermen.

Raising Wild Game.—The raising of "wild game" is a comparatively new industry in this country, but has been making remarkable strides in the past twelve months, according to the report of the Game Conservation Society. The society's membership includes many breeders who have established game farms for the purpose of renewing the country's supply of game fowl. This supply, according to members of the society, was rapidly diminishing until a year or so ago, and many of the most delectable forms of wild fowl that had formerly been plentiful in this country had become rare dishes even for epicures. Wild ducks and pheasants are among the varieties of fowl that are being raised by the breeders at the present time, and according to the society's report the former have become so plentiful through this method in some States that they have appeared on the market at prices which place wild ducks within the range of the public generally instead of the rich alone. In Minnesota, the report states, wild ducks sold at $1 each this year. It is suggested in this report that at the present rate wild ducks and other formerly rare fowl may actually tend to lower the cost of the more commonplace heats of daily consumption. "Thirty-five States now have laws permitting the breeding and sale of all or certain species of game ,and many game farms have been started in other States in anticipation of laws encouraging the industry," the annual report says. "Reports coming to the society indicate that all of the States and some of the Provinces of Canada soon will permit and encourage game breeding. Reports coming to our game census indicate that our members have over a million game birds—there were fewer than 100,000 reported last year—and that they have several times as many deer and elk as they had last year. The membership of the society has doubled during the year, and our list shows a very rapid increase. The breeding of quail and grouse has been started in the Western States, and there is much interest in quail breeding in the Southern States, which are well adapted to the production of quail in big numbers." Despite the fact that hundreds of thousands of pheasants have been raised by the breeders, the report says, the prices have continued to rise because importers have been prevented from bringing these birds from foreign countries. The report also states that the breeding of game fish is beginning to attract widespread attention and to prove highly profitable.

BILL TO ABOLISH GAME COMMISSION.

Hot Fight Looms Up When Legislature Meets Again; Duck Season Is Now Over.

The duck hunting season came to an official close on Wednesday. Fairly good sport was enjoyed in the closing days, although the sport has been on the decline since practically the first of the year. Up until that time ducks were more plentiful and more limit bags were reported than in several years past.

Attention will now be focussed on the numerous bills that have made their appearance in the California Legislature. The lawmakers put in the first session, which ended January 26th, in introducing measures and they have adjourned until February 26th, when the business of getting through the acts will commence in earnest.

Fish and game bills have been introduced in abundance. Many are the changes that have been advocated. By far the most important is the one having the backing of J. B. Hauer, providing for the abolition of the present commission, in favor of a single commissionership with a salary of $5,000. Ernest Schaeffle, former executive officer of the commission, denies the charge of President Frank M. Newbert that he drew up the bill but he says that he is in favor of the idea.

The Fish and Game Commission is perturbed by the measure, more than the dozens of other bills that are pending. It charges Hauer with trying to settle a personal grievance and says that the California State Fish, Game and Forest Protective League, of which he is president, has only a limit number of disgruntled members. Both sides have beeen firing back and forth in the daily papers and a hot fight looms up.

Spoonies and teal everywhere is the way in which hunters tell of their last Sunday's sport in the San Joaquin country. Some hunters near Los Banos found that they could step from the blinds and pick the birds in the open. Most all of those who ventured out secured limits, or near-limits.

While the tenor of reports from the northern section is not quite so encouraging, the shooting has been fair. Gridley, Live Oaks and the whole of the rice field country produced some fine bags.

Word From the South.—Los Angeles, Cal.—Duck season wound up Wednesday night with a general celebration on the part of duck clubs and unatached hunters alike, although from present prospects there is not likely to be very much to celebrate, as the tail-end of a poor season is to be laid away with such obsequies as may seem fitting.

A few gunners are away now on wind-up trips, the desire to be in at the finish being as strong as the disinclination to be left out at the beginning. Best prospects exist down Imperial way.

Deputy Fish and Game Commissioner W. R. Malone of San Bernardino reports good shooting on San Jacinto lake, a flooded basin north of that town, formed by rain water collecting and comprising perhaps 200 acres now. The sprig are out that way, feeding upon the seed barley of the ranchers, it being a great grain country. Geese are reported plentiful also.

San Bernardino sportsmen have been successful in securing the introduction of a bill to prevent shooting at ducks from any boat propelled by power or with anything more powerful in her than a pair of oars—man power. Power was abused on Bear lake last fall and many think it injured the shooting very seriously.

Bear Valley is now inaccessible except by snowshoes, some photographs which came down two weeks ago showing snow up to the porches of the cabins.

Some local sportsmen have become excited over bills which they have been passing around calling for radical changes in the game laws, but as these all have to be passed upon by a committee of level-headed fellows whose duty is to weed out the impracticable and unjust measures, worrying is confined to those who think every bill introduced is already law.

The State Fish and Game Association will recommend to the Pennsylvania Legislature the adoption of a fishing license bill. The receipts from such a measure would go towards the propagation of fish.

UNLICENSED DOGS HAVE NO STATUS.

Supreme Court Decides Owner Cannot Recover Loss Unless Pet Is Registered.

Dogs not licensed have no legal status, is the gist of a ruling recently made by Irving G. Hubbs, a Justice of the New York State Supreme Court, in a test case at Fulton, N. Y. No doubt it is the most important ruling that has been passed in years affecting New York State dog owners. It will also carry weight in all other States of the Union.

A great many of the States have laws requiring all dogs to be licensed. It has always been one of the favorite hobbies of legislators of the hayseed type to annually bring up a bill imposing taxes on dogs and dog owners. It is only a short time ago that New York had to array itself against a Senator who tried his utmost to have a bill passed which more than doubled the tax on dogs and further attempted to restrict the number of dogs and make preference for the so-called farmer dogs.

Scarcely a month later Pennsylvania fanciers had to fight against the passing of a law that gave any one the right to kill dogs found running at large. That old bugaboo sheep killing is always brought out strong by anti-dog legislators, who magnify the number of sheep killed by dogs until they run into the millions.

A Troy fancier effectively killed all attempts to overtax dogs by showing how ridiculous was the assertion of the Senator who fathered the bill that the dogs of the State killed so many sheep. He showed that by the government census there was not the number of sheep in the State that the Senator claimed were killed annually by dogs.

Dog people have always been heavily imposed upon in the matter of licenses and extra taxation, and it is only by constant struggle that fanciers have been able to prevent their being legislated out of existence. This latest ruling of Justice Hobbs is of the most vital importance, and dog fanciers and breeders throughout the country would do well to organize now.

The decision—in a nutshell—is that if a dog is not licensed you cannot recover for his loss. If a man applies for a license and does not get one, according to Justice Hobbs' interpretation of the statute governing the licensing of dogs, and allows his dog to run at large, he cannot recover the value of the animal if the latter is destroyed. Instead, before he may recover for their loss, a man must keep his dogs locked up until such time as he has obtained licenses.

Justice Hobbs' ruling was made in granting a non-suit to the defendant in a test action brought by Frederick L. Ingersoll, of Fulton, against Thomas, George and William Lanning, of the town of Volney. Mr. Ingersoll alleged that the defendants killed two dogs ,a foxhound and a setter, valued at about $150. The killing of the dogs occurred a few days after Mr. Ingersoll had applied for licenses and had been refused them at the City Clerk's office in the city of Fulton. The clerk at the office told Mr. Ingersoll, it was stated, that they had not yet begun to issue dog licenses for the year.

It was said that the dogs ran on the Fanning place and created much havoc among Belgian hares raised there for the market. It was alleged the Fannings killed the dogs and buried them on the place. The action was then brought by Mr. Ingersoll to recover the value of the dogs.

The lawyer appearing for Mr. Ingersoll argued at length in opposition to the non-suit, stating that his client had acted in good faith in the matter, and held that his client should not be made to suffer because of the Fulton City Clerk's failure to provide a license. The Court decided the statute was mandatory and refused to allow the case to go to the jury.

The colloquy between the Court and counsel brought out the fact that all were dog owners, the Court admitting the ownership of two, and counsel for both sides as well. The decision has already led to a large increase in the number of dog licenses issued in Fulton and adjoining counties.

In other words, if for any reason your license lapses or your dog is not licensed you cannot recover for his value in case of injury or death. He has no legal status, nor does your ownership count as worth anything unless your dog is licensed. The importance of the ruling is due to the fact that some one will contend that if your dog is not licensed you cannot transfer ownership—cannot sell your dog unless he is licensed. It affects every dog owner, not only in New York State but throughout the country.

* * *

It is at best a daring thing to challenge everybody in the country to produce a better dog than the one you own, but Mrs. Ida H. Garrett goes even farther and challenges anybody from any part of the globe to produce a better Chihuahua. Mrs. Garrett is the proud owner of a dog of her own breeding, the breeding going back three generations in her own ownership. The dog weighs but one pound, and she claims is the best Chihuahua ever reared. To back her opinion Mrs. Garrett is ready to arrange a match for $100 a side with anybody who can produce one as lively, as healthy, as small and as perfect as this young dog of her breeding. One pound can well be said to be the lowest weight for any dog, and is a record even for this tiniest of small breeds, the Chihuahua.

There is but slight difference in the ability of the professional and amateur trapshot.

The 1916 averages compiled by the Interstate Association for the Encouragement of Trapshooting, and just issued by Secretary Shaner, show there is but a fraction of a target difference in the percentage of the highest 20 trapshooters—10 amateurs and 10 professionals.

The professionals have the edge—but it isn't much. The fellows who make a living "busting" the blue rocks broke 38,142 out of 39,420 targets for a combined average of .9676. The 10 leading amateurs broke 24,677 targets of the 25,555 for a grand average of .9656. The 20 trapshooters shot at 64,975 targets and averaged .9666. That is what you call "busting" the targets with a vengeance.

The fact that the professionals had a slight advantage on the amateurs in the averages doesn't necessarily mean that the professionals would beat the amateurs in a team match. The amateurs in the select 10 are a fine bunch of trapshots. One of the amateurs listed is the late A. B. Richardson, of Dover, Del. The eleventh amateur on the list is J. R. Jahn, of Davenport, Ia., who had an average of .9565—and in the winter league competition he would have to be listed in the place of Richardson.

In the 1915 averages also the professionals had a slight advantage on the amateurs—the figures being .9617 to .9604. The best professional shots vary but little in their shooting from year to year. Only two of the men who were in the first 10 in 1915 failed to get in in 1916. Henderson, Richardson and Graper are the only amateurs to get in the select circle of amateurs in 1915 and 1916.

There are a couple of singular things in connection with the averages. Phil. Miller, the professional champion, and Frank Troeh, the amateur champion, were twenty-fifth in their respective divisions, and both the amateurs and professionals had 31 shooters with an average of 95 or better. The amateurs had 9 over 96 and 3 over 97. The professionals had 16 over 96, 3 over 97 and one with 98. Ralph Spotts, the amateur champion at 200 targets, was eighteenth on the list.

Mrs. Adolph Topperwein, the only woman professional shot, broke 2539 of the 2690 targets trapped for her for an average of .9438, and George Maxwell, the one-armed professional shot, broke 3439 out the 3640 targets thrown for him for an average of .9447.

Fred Gilbert, the wizard of Spirit Lake, shot at more targets than any other trapshooter in 1916—9690, and averaged .9543. O. N. Ford, of San Jose, Cal., shot at more targets than any amateur—6580, and averaged .9431. A shooter had to fire at more than 2000 targets to get recognition in the interstate list.

In the doubles Frank Troeh led the amateurs with an average of .8750, and C. G. Spencer led the professionals with an average of 90. Six professionals bettered 80, and four amateurs reached that mark. Altogether the shooting was better in 1916 than in any year in the history of trapshooting.

Idaho Averages.—The averages of Idaho shooters follow:—

Amateurs.—Adelman, A. G., Boise, shot 200, broke 182, average .9100; Addison, D., Boise, 200—166, .8300; Allen, O. W., Boise, 200—161, .9050.

Bailey, C. A., Twin Falls, 300—275, .9166; Beckman, Ed., Lewiston, 150—131, .8733; Beckman, Geo., Lewiston, 670—589, .8701; Bennett, Nellie, Hollister, 150—118, .7866; Biwer, E. T., Boise, 200—163, .8150; Brooks, E. R., Clear Lake, 150—142, .9466; Brooks, Dr. E. E., Kellogg, 300—259, .8633; Butler, C. E., Lewiston, 450—365, .8111.

Channel, C. B., Twin Falls, 300—239, .7966; Coates, R. J., Jerome, 300—276, .9200.

Deklotz, John G., Filer, 300—266, .8866; Dresser, Dr. Harold, Boise, 940—700, .8440.

Eastman, J. O., Buhl, 150—116, .7763; Erb, R. S., Lewiston, 300—236, .7866.

Farmin, E. D., Sand Point, 640—535, 8359; Fisher, D. C., Grangeville, 50—53, .8833; Fisher, A. G., Twin Falls, 300—275, .9166; Fitzgerald, Edw., Burley, 700—625, .8928! Freeman, Gaylord, Buhl, 150—124, .8266; Fritcher, T. D., Buhl, 150—112, .7466.

Garber, A. S., Nampa, 90—69, .7666; Garvin, P. P., Boise, 200—141, .7050; Gibbs, C. W., Wallace, 60—26, .4333; Gilmore, G. K., Wallace, 300—241, .8033; Green, C. B., Moscow, 450—378, .8400; Gregory, P. J., Boise, 200—157, .7850; Grice, E. G., Boise, 740—674, .9108.

Hahn, Chas., Lewiston, 300—279, .9300; Hargraves, C., Boise, 200—137, .6850; Harvey, G. H., Boise, 90—64, .7111; Heitler, Dr. A. W., Burley, 150—114, .7600; Hill, R. C., Lewiston, 300—260, .8666; Molohan, D. J., Burley, 640—601, .9390; Hopffgarten, J. H., Boise, 200—167, .8350; Humphreys, W. H., Boise, 200—181, .9050.

Ingersoll, W. E., Kellog, 285—164, .5754.

Johnson, A. R., Lewiston, 300—264, .8800; Johnson, C. M., Wallace, 300—192, .6400; Jones, O. M., Boise, 300—263, .8766; Jones, C. E., Twin Falls, 150—135, .9000.

Kavanaugh, G. K., Lewiston, 90—57, .6338.

Leigh, C. A., Twin Falls, 300—245, .8166; Lemp, H., Boise, 200—176, .8800.

Magel, Glenn, Twin Falls, 300—228, .7680; Martin, Ray, Boise, 300—263, .8766; Maxwell, J. M., Twin Falls, 150—128, .8533; McCracken, N. R., Twin Falls, 300—266, .8866; Miller, M. I., Filer, 300—257, .8566; Miller, Wm., Filer, 300—241, .8033; Moberly, E. H., Boise, 200—166, .8300; Moore, F. C., Wallace, 300—265, .8833; Morse, R. C., Buhl, 150—121, .8066; Mull, C., Twin Falls, 300—229, .8633.

Oliver. C., Buhl, 300—257, .8566.

Porter, Fred, Kellogg, 300—227, .7566.

Reason, W. A., Boise, 440—336, .7636; Roland, R. F., Kellogg, 300—239, .7966.

Scott, J. H., Wallace, 300—235, 7833; Sebastian, R., Kellogg, 300—241, 8033; Seckel, C. R., Boise, 500—434, 8680; Shaw, C. R., Boise, 200—164, .8166; Snook, F. E., Twin Falls, 300—245, .8166; Streeter, H. L., Boise, 300—215, .7166; Sweeley, E. M., Twin Falls, 400—377, .9425.

Thomas, R. E., Kellogg, 600—488, .8133; Thompson, N. O., Buhl, 150—132, .8800; Titus, F. F., Grangeville, 60—47, .7833.

Ulrich, G. W., Lewiston, 400—314, .7850.

Venable, F. R., Wallace, 60—29, .4833.

Wade, J. E., Boise, 200—178, .8900; Wade, F. D., Wendall. 500—473, .9460; Wallace, D. S., Lewiston, 450—383, .8511; Wann, J. N., Lapwal, 750—636, .8480; Weaver, A. E., Boise, 500—437, .8740; Werkheiser, M. L., Wallace, 60—46, .7666; White, Ernest, Twin Falls, 300—279, .9300; Wood, W. T., Twin Falls, 300—274, .9133; Wright, L. T., Twin Falls, 300—249, .8300.

Professional—Reed, J. A., Boise, 200—168, .8400.

Great Records.—The "Old Reliable" Parker Gun has again forced itself to the front by making the highest official amateur record on the Pacific Coast for 1916, scoring over 96% on 2100 targets in the hands of Mr. Henry Pfirrmann. It will be remembered that Mr. Pfirrmann by scoring 100 straight targets at San Jose won the Championship of his State and also made the brilliant score of 493 out of 500 targets at the Vernon Gun Club in July,1916. The above shooting was done with a 34-inch double barrel Parker "Old Reliable" gun.

During 1915 and 1916 the Parker Gun made the highest Official General Averages as compiled by the Interstate Association, and Mr. Lester German's score of 647 out of 650 targets is the world's record under Interstate rules. Mr. German always shoots the Parker Gun.

The Parker 20-gauge double gun is the forerunner of small bores in America and has reached the place in the sun it so well deserves.

Amateurs Beat Pros.—Denver, Col.—Only recently trapshooters of Denver proved that they were wide-awake, as usual, when they made an interesting test in the shape of a 50-target contest between five of Denver's best amateur shots and five of Denver's professionals. This resulted in a victory for the amateurs by a score of 242 to 229 out of a possible 250.

The greatest bunch of old-time shooters, as well as spectators, witnessed the contest, notwithstanding the chilly atmosphere. After a practice score, or "warm up" of 25 targets, interest centered on the coming contest owing to the rivalry between the two teams.

Ambrose E. McKenzie, father of trapshooting in the Rocky Mountain States, and Nelson Franklin, for years president of the Rocky Mountain Interstate Sportsmen's Association, were selected to referee the contest, and the big match was on.

The amateurs started to gain from the very beginning, and while the match was a fine exhibition, the professionals never had a chance. W. R. Thomas Jr., for the amateurs, and George Burt, for the professionals, were the only two to break 50 straight, while R. A. King, the Delta wizard, who has just been declared fourth high amateur in the United States, with an average of 96 per cent for the year's shooting, broke 49 out of 50.

The amateurs were immediately challenged for a return match, and same will be decided during the stock show, perhaps the Sunday before.

The fact that a man is a professional in the trapshooting game does not indicate that he is a better shot than an amateur. This was forcibly demonstrated here.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Shore Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 and a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal.—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first $75 and a trophy, and the winner of third place place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Improving Portland Traps.—Sixteen hundred dollars additional will be expended in improving and beautifying the Vverding Park grounds of the Portland Gun Club at Jenne station. Acting President H. A. Pollock announced that contracts were let calling for the expenditure of this amount in carrying out the details of improvements planned by the directors.

The work will be started as soon as weather conditions permit and when completed will rank the Everding Park traps second to none in the United States. The club grounds ar now recognized among the best in the country, having been greatly improved last year.

Cement shooting stands will be installed at each of the four traps and they will be connected with each other by cement walks. A wide cement walk will lead from the clubrooms to trap No. 3, which is situated directly in front of the building. Crushed gravel will be placed between the shooting stands and a promenade six feet wide will be put in between the clubhouse and the shooting stands. The promenade will be crushed gravel and will extend from one end of the grounds to the other. Permanent benches for the squads will also be erected.

The concrete traphouses, the finest in the country, will be cut down a little and concrete tops will be put on them. The ground in front of the shooting stands will be leveled and planted in grass. Flower beds will be placed between each shooting stand, which will make the grounds as pretty as some of the most exclusive clubs in the country.

Five hundred dollars is being spent in the construction of a well. The wooded section in back of the clubhouse, through which Johnson creek winds, will be converted into a picnic grounds.

The officers of the club are putting forth every effort to have this work completed before the big northwest tournament ,scheduled t obe staged during the Rose Festival.

Seattle Association.—A good attendance with excellent weather made this shoot one of the most enjoyable o fthe winter season, on January 21st.

L. H. Reid, professional, furnished the high score in both the fifty and one hundred target races. He broke forty-nine and ninety-seven, respectively. The high amateur score was divided between Deskin Reid, C. W. Bandy and L. S. Barnes, each knocking out forty-seven. Bandy made an exceptionally good showing, this being the first time that he has topped the list, resulting through the consistency in shooting by one who might be termed a new shooter. Second amateur position was taken by Hi Follerich with a score of forty-six.

In the hundred bird program, the high scores were between C. E. McKelvey and Hi Follerich for first, with ninety-four each, and L. S. Barnes for second place with a ninety-three to his credit.

P. G. Schwager of Dundern, Saskatchewan, Canada, and H. J. Trimmer, formerly of Victoria, B. C., were visiting shooters with the club. The scores: —

At50 targets—L. H. Reid* 49, Deskin Reid 47, C. W. Bandy 47, L. S. Barnes 47, Hi Follerich 46, P. G. Schwager 46, J. H. Hopkins 45, Dr. Kerr 45, C. E. McKelvey 44, Ralph Kinzer 43, D. Rhodes* 43, Ike Fisher* 43, G. A. Conklin 42, H. E. Gleason 42, C. L. Templeton 41, Alvin Schwager 40, W. B. Taft 39, J. H. Davis 30, C. F. Reinhard 28, H. J. Trimmer 28.

At 100 targets—L. H. Reid* 97, C. E. McKelvey 94, Hi Follerich 94, L. S. Barnes 93, Deskin Reid 90, J. H. Hopkins 89, Ike Fisher* 88, D. Rhodes* 88, P. G. Schwager 86, G. A. Conklin 85, A. Schwager 84, Ralph Kinzer 83, C. L. Templeton 83, H. E. Gleason 80, W. B. Taft 79, J. H. Davis 60, Dr. Hill 41, J. P. Houston 12.

Yours, E. A. FRY.

Three hundred and twenty-one thousand eight hundred and twenty-three persons have visited the Canadian National Park at Banff. It is a great place for tourists.

* * *

There wasn't a shooting accident during the recent hunting season in New Jersey.

Sportsmen's Row

Nine registered tournaments were given in California last year as against eight in 1915. Indications point to many more this year with the events permitted on Sunday. The Golden Gate, Alameda Elks, Vernon and Los Angeles clubs have already applied for dates.

* * *

Bear Valley sportsmen are insisting upon an extension of the law prohibiting power-boat shooting entirely, as the "in motion" feature of the present law was abused.

* * *

George Harris of Aliso Canyon, below Santa Ana, shot a big mountain lion 6 ft. 2 in. long, weighing eighty-five pounds, recently, it having raided his piggery once too often.

* * *

The Interstate Association will give $500 to the Westy Hogans shoot beginning in 1917—the same as they give to the subsidiary handicaps.

* * *

Portland, Ore., is the only city in the United States that has a trophy competition in which only 20-gauge guns are allowed.

* * *

Larry Gardner, third baseman of the Boston Americans, has rigged up a hand trap on the fender of his automobile, and he gets a lot of sport out of the "sport alluring" by trying to break the clay birds while the car is in motion.

* * *

There is a new trapshooter in Portland, Ore. He is James Everding Strowger. He weighed eight and one-half pounds when he arrived on December 3rd. His father was president of the Portland Gun Club, and he is named after H. R. Everding, the former president of the club.

* * *

Pennsylvania maintains 18 game preserves, which cover an area of 100 square miles.

* * *

Connecticut sportsmen are demanding a closed season for deer.

* * *

Ten thousand deer were killed in Maine during the past season. Nine thousand more were killed in California and 261 in New Jersey. In the latter State the season is only four days.

* * *

Two hundred and fifty bear were killed in Pennsylvania during the season just closed, which is a greater number than were killed in many of the Western States. Eighteen bear were killed in Maine.

* * *

California paid out $60,000 in bounties for mountain lions at $20 each during 1916. Statistics show that a mountain lion will kill 50 deer a year.

* * *

Five game preserves and 67 bird reservations are maintained by the Biological Survey of the United States Department of Agriculture.

* * *

Statistics upon casualties in hunting this last year in California compiled by the Fish and Game Commission indicate eight fatalities and nine injuries. Carelessness killed seven of them. Automobiles equal that record every week, but no one worries much about the ever-present dangers of motoring. Based upon the number who follow it, hunting would seem to be one of the safest of diversions, about as dangerous as crossing the street.

* * *

United States and Great Britain have signed a treaty for the mutual border protection of migratory birds. One of these days Uncle Sam will have a like treaty with Mexico.

* * *

Word comes from Independence that the big Mount Whitney hatchery is officially turned over to the fish and game commission by the state department of engineering, which built it. Completed in every detail to the last trough, it is said to be ready for the eyed eggs from Naylor district up above. It is the biggest, best, most modern trout propagation plant in the world, and the handsomest to look upon, as well as certain to outlast any other hatchery now above ground. Watchmen have been put in charge and an inventory taken of the property as it now stands . Every man who has seen it came back enthusiastic and declares it the biggest improvement that could have been made in fish and game for the south.

* * *

John T. Connolly went up to Knights Landing and got out in the tules. He found that most of the large birds had departed for other parts but he had a good shoot on teal and sprig.

* * *

J. Walter Scott, the field trials enthusiast and president of the Los Banos Gun Club, closed the season appropriately. There were five or six in his party and there were as many limits. Sir J. Walter says that the shooting at Los Banos this year was the best he has ever experienced.

* * *

W. J. Terry, the well-known trap shooter of the Golden Gate Gun Club, bagged what is said to be the biggest goose of the season at the Teal Club near Willows on Sunday. It weighed 21¼ pounds and was some monster. In addition he got the limit on mallards and English snipe. It was certainly a great day for shooting.

* * *

Bill Price and George Thomas got the limit, according to the way they figure it. Up at Sobrante on Sunday they shot 2 birds in the morning and 0 in the afternoon. Adding 0 to the 2, it makes 20—just the limit.

* * *

The National Championship has been postponed until February 5th, to be held the week following the Southwestern and Derby Championship trials at Vinita, Okla. The stake was scheduled to begin at Grand Junction, Tenn., on Monday, January 15th, but the elements conspired and decreed otherwise.

* * *

In the state of New Jersey a foreign-born, unnaturalized person is prohibited from hunting or owning a shotgun or rifle unless he is the owner of real estate to the value of $2000 above all incumbrances.

Hawk Flies 3700 Miles.—Red Lodge (Mont.).—A large hawk, caught by Eddie Hotchkiss in his oat field August 19, was killed October 29 on Bogota plain, nine miles north of Bogota, capital of the South American Republic of Colombia. When Hotchkiss caught the birds he conceived the idea of attaching to it a bottle, containing his name and address ,and releasing it. This he did, and has just received a letter dated November 4, from Luis Felipe Rulda of Colombia, in which he wrote of killing the hawk and finding the bottle tied to the bird's neck. In an air line, Bogota is about 3700 miles from Red Lodge.

Rabbit Bounties Large—Lakeview, Ore.—Dan Godsil, who has charge of the counting of the scalps that are brought to the courthouse for payment, says that the past few days has seen only a few rabbit scalps brought in. However, the previous several weeks since the first of the year saw him almost swamped with them. He states that up to the present time bounties have been paid on about 10,000 rabbits. This means about $500 worth of warrants issued in the first three weeks that the bounty law has been in effect.

However, it is impossible to cash the warrants at the present time as there is no money in the rabbit bounty fund to pay them and there will not be until the taxes come due on the fifth of April next. Rumors have been going around Lakeview in the past few days that some of the large timber holders are going to refuse to pay that portion of the tax, claiming that it is in direct violation of the six per cent tax limitation law.

Has Doe Skin; Fined.—Jail sentence befell a Mexican arrested by Deputy Fish and Game Commissioner Henry J. Abels in Santa Barbara county for having in his possession the hide of a doe, and Joe Soleara was given 30 days wherein to pay a $25 fine for having deer meat in the closed season. The snows have driven down deer from the heights and made them easy to get from the Santa Ynez valley.

As some 275 deer were reported in that county as shot by hunters during September over previous years, Deputy Abels feels that the protection of deer has paid and the justices support enforcement work by stiff penalties.

Los Angeles Club.—R. P. Riggs, shooting from the sixteen-yard line, captured the C. W. Fish cup at the Los Angeles Gun Club on Sunday, from forty other contestants. Seth Hart and A. Pachmayr tied for second place. A cool wind blew over the traps at the Los Angeles Club and this accounts for the only fair scores which were made. The complete scores of the day's shoot are as follows:

Ed Mitchell 93, R. P. Riggs 91, Seth Hart 90, A. Pachmayr 90, W. A. Hillis 87, H. D. Blanchard 86, L. R. Mellus 86, C. W. Fish 84, E. K. Mohler 83, O. Council 83, V. A. Rossbach 83, N. W. Nelson 82, Mrs. Pfirrmann 82, C. S. White 82, W. A. Joslyn 81, J .H. Bishop Jr. 80, H. Pfirrmann 80, G. Holohan 79, H. E. Sargent 78, B. H. Carnahan 77, Wm. Kennedy 76, George Oliver 72, H. Hickban 59, W. L. Cooper 52x75, A. J. Petersen 46x75, G. Pulley 44x50, L. M. Packard 43x50, O. L. Grimsley 43x50, F. H. Teeple 42x50, M. D. Town 39x50, H. Bower 36x60, R. Chenowith 30x50, W. Koerner 24x50, S. McInnis 19x50, Ben Meyer 14x50, Mrs. C. E. Groat 21x25, C. E. Groat 19x25, S. F. Bell 19x25, H. A. Richey 14x25, C. A. Scroggs 16x20, Bordean 10x15.

WHAT SIZED FISH, MOST FUN?

One-Pounders Better Than Giants is the Opinion of Eastern Anglers.

Much has recently been printed in the papers regarding brook trout of extremely large size having been taken with the fly, some of which weighed ten pounds, and in fairness I do not believe that such an incident has ever occurred in American waters.

Trout of ten pounds in weight are found only in the Rangeley lakes of Maine, and while it may be true that these monster trout are physically landed after being hooked with artificial flies, yet the big fish never come the the surface to seize the fly, as do the smaller trout, which often make such a rush in attacking the insect as to shoot above the surface of the water, quite as if their entire future happiness depended upon securing that particular fly.

To get the big fish a light shot is attached to the fly, which is sunk far beneath the surface and agitated before the fish and is thus taken, and this is bait fishing and nothing else.

The salmon always steals upward slowly and deliberately, quietly sucks the fly into his mouth and gradually sinks to the bottom in a leisurely manner, while the big trout take the fly only when it is sunk beneath the surface of the water to some distance, and then the fly becomes ordinary bait.

And when hooked the big fish do not display the agility or skirmishing qualities of the smaller specimens, but of course they fight hard because of their weight and correspondingly great muscular development.

It has been repeatedly asserted that brook trout of fourteen pounds or more have been taken from the Nepigon River, and that very large trout are found there cannot be denied; but I do not believe they rather a species of fario, and of course true trout.

If I might be able to get one of them into my hands for two minutes I could reach a definite conclusion because, while I don't know much I am able to distinguish a salmon from a charr unerringly.

I have a mounted brook trout which weighed over nine pounds and which put up a long and game fight, but it was just a constant and heavy pull and sulk, giving and taking line until the fish was exhausted and netted.

There is more solid fun and excitement in taking the dashing and vigorous one-pounders with light tackle than can ever be enjoyed in landing the giants of the species, but you have got to capture a colossus of the species if you want to see your name and picture printed in the newspapers.

As an object of intrinsic beauty there is no fish in our waters that is even remotely worthy of being compared to the brook trout. It is gorgeousness exemplified, a thing of rare beauty and an endless delight to the eye.

In outline it is grace personified, not an ideal curve absent, dazzling in its coat of rose and velvet, its countless vermillion spots and aureole of blue dignifying it with a crown of royalty, the veritable monarch of American waters.

When Marc Antonio discovered his friend Raphael engaged upon the Sistine picture, he exclaimed: "Cospetto! Another Madonna?"

Raphael gravely replied: "Amico mia, were all artists to paint her portrait forever they could not exhaust her beauty."

The exclamation applies with full cogency to the valorous brook trout, than which God never created a more beautiful object.

There is one feature associated with trout fishing not met in the pursuit of any other fish, the stately quiet and peace and freedom from danger and the soothing effect of the murmuring ripples of the ceaseless brook.

Repeatedly have I stretched myself upon the ground in the shade of a bunch of bushes beside a mountain brook and enjoyed a refreshing sleep, and when I awoke the $17 and my watch were still secure in my pockets, and I think it would be risky to indulge in this experiment anywhere in New York and expect to retain my property.

From this it is fair to assume that the beasts of New York are a greater menace to man than the beasts of the forests, and indeed no wild beast will ever attack a human being in the wilderness unless it is assailed and its safety threatened. Even the villainous rattlesnake will make every effort to escape and get away from a man as fast and as far as possible, and inflicts its perilous stab only when it finds danger to itself impending. It may safely be asserted that mankind's greatest enemy is man, and the farther away one gets from his race the more secure is he from harm.

The brook trout is beset with more enemies by far than the anglers who endeavor to catch them; indeed the entire existence of the fish appears to be a constant and vigilant effort t oavoid its relentless destroyers.

Among such enemies are water snakes, cranes, kingfishers and snapping turtles, and the vast amount of trout these destroy is beyond computation. Even the trout themselves destroy and eat each other constantly, the larger seeming to be very fond of the smaller fish as a regular diet, and it must be confessed they know a good thing when they see it.

The water snake ,however, quite often falls victim to the fish, thus pleasantly reversing conditions, and I have caught trout with one or two small snakes in the stomach.

The crane will stand upon one of his long legs, usually at the foot of a pool, as rigid and immovable as a rock, and when a trout leisurely swims by the long bills makes an instantaneous dive and never fails to bring up a fine trout, when it flies away to quietly enjoy its delicious morsel.

The bulky snapping turtle is wonderfully quick, wily and active when hunting a stream, and no trout for which it darts ever escapes.

Nothing that lives is so tenacious of life as the snapping turtle. With the head severed from the body it will live for days, and a headless turtle moving about is a most repulsive sight, while the severed head will snap fiercely for several days, as if attacking a foe.—[Kit Clarke, N. Y .

CLOSED SEASONS FOR WASHINGTON.

Old Hunter Writes, Advocating Protection For the Upland Birds.

Tacoma, Wash.—Ira Robinson of Bellingham believes that recommendations made to the legislature by count ygame commissioners are wrong and in an open letter to the game and fish committee he sets forth his views on the matter. He believes that a closed season of one or two years should be declared for upland birds to replenish flocks. A closed season for part of each year is not sufficient, in his estimation, to preserve bird life. Robinson takes a slap at county game commissioners and charges that some of them at least are not equal to their jobs. He thinks the state should protect deer also, and that game fish should be kept from going to sea. His letter is as follows:

"Considerable interest being taken in the protection of game this year, amendments to our present game code will no doubt be enacted.

"Having been a resident of the state of Washington for the last 44 years, and following the pleasures of outdoor life for 30 years or more, and during that time being a close observer of our game and fish, a few suggestions along that line may be of some benefit to your honorable committee.

"We remember that a few weeks back the county game commissioners of the state met at Tacoma and have recommended several amendments to our game laws. One is, they recommend that the game commissioners be given the power to regulate the open and closed seasons in their respective counties. In other words, having the making of game laws. In my judgment this is entirely wrong.

"I base my reasons for that on the fact that we do not always have game commissioners who are qualified to hold their positions.

"Our present way of appointing county game commissioners, I believe, is wrong. While it is right that the county game commissioners should be recommended by the board of county commissioners, the law should be so amended as to give the county commissioners who are in power that privilege. We also remember that by a decision of the supreme court not long ago, the county commissioners are compelled to audit all game bills padded by the game commissioners without the right to reject any of them. This part of the game laws should receive your due consideration and you should so amend, giving the county commissioners the right to handle the game funds as they do all other county funds. It is recommended that a law be enacted holding the owner of dogs liable for what damage their dogs may do. I believe this a good law, for from personal knowledge I know dogs kill many of our game birds durinf the closed season.

"Another most important amendment recommended by the game commissioners is in regard to the open and closed seasons for upland birds. It seems to be their desire to go right on killing. We must admit that some of our game commissioners are city bred and brought up. Some are late arrivals in the state and do not fully realize that our game is being gradually exterminated. Changing the open and closed seasons will not prolong the life of our game many years more. What we need is a closed season for one or two years, and our coveys will increase in number.

"Restrictive measures alone will not preserve our game. A certain per cent of each county's game fund should be set aside for propagation purposes or purchasing game birds and distributing the same thruout the country.

"Considerable stress is being put upon the state game farm at Walla Walla to furnish all game birds necessary. Let us notice for a moment as to how these birds are liberated. They are sent out some time during the summer months along with the mother bird who broods and cares for them until they become nearly grown, when they wander away. We must consider that these birds are reared in captivity and become quite tame, and it is an even bet that not one of these birds live through the hunting season.

"I suggest that the law be so amended that all birds be liberated at the end of hunting seasons instead of just before. By so doing these birds will nest the following spring and greatly increase our game birds.

"Taking the history of Whatcom, my home county: In our pioneer days, or say, 25 years back, our streams, lakes and marshes were alive with waterfowl, but with the advancement of agriculture their resting and feeding places have been destroyed, and as they are strictly a migratory bird, no restrictions other than our federal migratory law will increase their numbers here. A few years back native pheasants were plentiful, but as they are a woodland bird and our forests are being rapidly cleared up, they are doomed to be exterminated.

"We have a few Hungarian pheasants, but they are protected until 1920, so we practically have no other upland bird than the Chinese pheasant, which we must look to for our future game.

"In the pioneer days deer roamed our forests in great numbers. Today they are almost extinct and the killing of bucks only (as recommended by the game commissioners) will not preserve the life of that noble animal. A closed season should be placed upon them, especially in some of our counties. As to game fish—we find from the records of our game officers that the Lake Whatcom trout hatchery (recognized as the best game fish hatchery in the state) has spent several thousand dollars in the last five or six years for operation and maintenance; has also liberated several million game fish, with the result that game fish are no more plentiful today than they were when the above named hatchery was put into operation.

"The pioneers, or those of us who have studied and observed the habits of the fish, know that game fish, as well as food fish, are of migratory nature. It is their habit to remain on or near their spawning grounds for about a year, until they become from three and a half to five inches long. Then they head for the open sea, and unless they are properly secured by screen or otherwise, it is an absolute waste of game funds to operate a game fish hatchery."

Seattle Fly-Casting.—With a list of new officers at its head the Seattle Fly and Bait Casting Club is starting another year which promises to be a record-breaker in membership and good work in the propagation, preservation and other work on the fish and game question.

At a recent business meeting of the club R. E. Lyttaker was elected president, R. S. Hayes vice-president and L. F. Lane, secretary-treasurer for the ensuing year.

It was with pride that P. Pitt Shaw, the retiring president, turned over the head of what has become the largest sportsmen's organization in Seattle. Mr. Shaw and the other retiring officers were given a vote of thanks for their good work during the past year.

Trustees elected for 1917 were Messrs. Houser, Chase, Bunker, Thomas and De Long.

R. S. Hayes was also elected as captain and will immediately start action toward the fly and bait casting tournament work for the coming season. Hayes has planned at least one large Northwest tournament and several inter-city affairs, and intends to place the Seattle club on a par with the tournament work carried on by other cities.

Mr. Smart as judge and Messrs. Flammont and Schaefer as tellers were the first appointments to be made by the new president.

The club, working together with other sportsmen's organizations of the country, is making a special effort to get a good, reliable man in the office of county game warden .

Vernon Club.—Bob Bole captured the gold bar prize at the Vernon Gun Club Sunday by defeating Stanton Bruner and W. Reid in a twenty-five bird shoot-off. Bole smashed 24x25 in the shoot-off, while the other two participants broke only 23x25. In the first event the shooters tied with 46x50 smashes. The scores:

	Hdcp.	Prize.	Prac.
H. Hoyt	16	34	39
O. A. Evans	18	42	47
A .W. Bruner	16	47	46

Los Angeles Gun Club Plans.—Los Angeles, Cal.—During the past year the Los Angeles Gun Club had the largest weekly attendance of any gun club in the United States. Greater enthusiasm is being shown by the members so far this year, although it is early in the year. From 4,000 to 7,000 targets were thrown weekly during the year of 1916.

Somewhere between Los Angeles and the east are 120,000 targets which make up the regular shipment the L. A. club receives every three months during the shooting season.

The Los Angeles Gun Club has made a bid for the big 1917 shooting tournament, which will be held this summer. The present indications are that Los Angeles has never had a big shooting event. Although it has one of the largest trapshooting clubs in the state it has never been awarded the big shooting event.

Heine Pfirrmann and Fred Teeples are in receipt of more than half a hundred letters from prominent trapshooters throughout the coast who are in favor of the big California-Nevada Gun Club this year. The two states always hold their shoots together.

The dates of May 21-22-23 have been submitted to the association by the club. If the shoot is warded to the Los Angeles Gun Club a special car will be chartered to carry the local shooters to the Pacific Coast Handicap shoot, which will be held at San Jose, May 27, 28, 29 and 30. The head of the San Jose club, Mr. Ford, has written to the local officials and is doing everything in his power to land the big state shoot for the Los Angeles Club.

TRAPSHOOTING AMATEUR IS DEFINED.

Any One Who Receives Expenses, Free Shells or Ammunition, or Anything Else.

The National Associations of Golf and Tennis have for years been trying to define an amateur—and have not met with any success because every move toward the tightening of the amateur clause has hit some popular player who earns his daily bread through his connection with some sporting goods house.

The Amateur Athletic Union defines an amateur clearly—and then tries to duck from under. The definition is lived up to in some sections and in more others it is not. Influence has a great deal to do with whether an athlete remains an amateur or is declared a professional. I speak from experience—for I know.

It would pay some of the organizations that are trying to define amateurism to delve into the trapshooting rules and purloin a few pages from the books of the Interstate Association for the Encouragement of Trapshooting. Here is an association that handles in the neighborhood of a half-million trapshooters annually without any registration and has less friction and complaint than organizations dealing with a half-dozen persons.

The Interstate Association makes a ruling on amateurs and professionals and lives up to it . Some years ago it wasn't very sever. It has been tightened each year, and there have always been some people who were able to beat the rules and remain in classes that they were not entitled to be in. These things are known and as time wore on the Interstate Association corrected the faults.

Now they have defined the amateur and professional so clearly that it will be next to impossible for any person to beat the rules without dishonor. Everything is accomplished on the honor system in trapshooting—and trapshooters are the finest sportsmen in the world.

Here is the Interstate Association's definition of the Amateur and Professional:

"Any shooter, not dependent upon his skill as a trapshot as a means of livelihood, either directly or indirectly, or in part or whole, including employees of manufacturers of, or dealers in, firearms, ammunition, powder, traps, targets and other trapshooting accessories, and who does not receive any compensation or concession, monetary or otherwise, or allowance for expenses or trapshooting supplies from such manufacturers o rdealers, shall be classed as an amateur.

"Any shooter, including employees of manufacturers of, or dealers in, firearms, ammunition, powder, targets, traps and other shooting accesories, who receives his salary or any portion of his salary, or any expenses of any kind for use in trapshooting, or rebate on the market price of such articles, as compensation for the promotion of the sale or advertisement of any such products handled by such manufactruers, shall be classed as a professional."

In other words, the amateur shooter is the one who pulverizes the clay birds because he likes the sport and shoots for sport only.

The fellow who receives any portion of his expenses in any capacity, or who purchases shells, guns, etc., less than standard figures because he has some ability as a shot, or the hardware clerk who gets his ammunition free, etc., will be found in the professional class this year. The rule is drastic—but it is right—and the Interstate Association didn't mince matters in adopting it. And if it isn't strong enough, they will put in a few more screws and tighten it.—Peter P. Carney, Phila., Pa.

Trapshooting Comparisons.—Back in the early 80's when America's sportsmen began to demand a between-season outlet for their gunning enthusiasm, some bright Yankee genius conceived the idea of the glass ball as a fitting target to try the prowess of the marksman, when the object was projected at unknown angles from a mechanical contrivance known as a trap.

The name of Bogardus, in connection with glass ball shooting, is not only historical, but still alive and dominant in the reminiscences of old-timers, a goodly percentage of whom still follow the sport of trapshooting.

The trapshooting of today, however, differs materially from that sport of long ago; the traps are more scientifically constructed, the target, instead of being globular in form, is saucer-shaped and not only covers its fifty-yard flight with the speed of an arrow but rotates as well.

It has become customary for writers to refer to the clay pigeon as "the inanimate target"; so long as they remain packed in barrels or stacked in the trap house this is quite proper. On the other hand, were you to ask any one of the 500,000 trapshooters in the country for his personal opinion he would unhesitatingly say that immediately following the release of the trap, it becomes just about as animated as a devilish ingenuity could conceive.—[By Geo. Peck.

Wyoming appropriated $60,000 in 1916 to be paid for the hides of coyotes at $1.50 each. The sum was not enough. Thousands of coyotes were killed which the trappers could not collect for.

Stock and Farm Department

It is estimated that there are 130,000 acres of prunes and apricots in California.

✣ ✣ ✣

The cheese factory at Caruthers paid out $6,800 for butter fat during the month of December. The price paid producers for the butter fat was 42¾ cents.

✣ ✣ ✣

It is not economy to feed all cows the same amount of grain. They should be fed in accordance with their production. A heavy grain ration given a light milking cow fatters her but does not increase her milk beyond her ordinary limit.

✣ ✣ ✣

A Los Angeles colony consisting of thirty-six families will settle on land purchased at Oak Flat, near Dunlap, Cal., June 1. The land brought $100 per acre. The land will be improved with apple orchards. All of the families intend to erect dwellings and reside on the premises. The land is considered among the best in the state for the culture of apples, and it is understood there is plenty of capital behind the colony to make all needed improvements.

✣ ✣ ✣

High prices for potatoes on the Chicago market have attracted big shipments from England to compete with the American-grown product, according to a statement made public by Sol Westerfield, former president of the National Retail Grocers' Association. "It seems impossible that war-stricken England can send potatoes to Chicago to compete with the product grown in Illinois, Wisconsin and other western states, but I have seen the bills of lading." Mr. Westerfield says. Potatoes are selling at $2.25 a bushel.

✣ ✣ ✣

Approximately 50,000 hogs were shipped from Colusa county during the year 1916. At a conservative figure the amount of money returned to Colusa county was approximately $750,000. The principal shippers were Johnsen & Richter, who shipped more than 10,000 hogs during the year, and Comfort & Hougland, who shipped about the same number. That this year will see a large increase in the shipments is the belief of the shippers. It is expected that more than $1,000,000 in hogs alone will be shipped in 1917. Ideal climatic conditions, combined with excellent feeding grounds and water transportation, make it possible for Colusa county producers to ship their hogs at a minimum cost and at a comparatively small cost for production.

✣ ✣ ✣

Dairymen receive $5,529.

Two hundred and fifty shareholders in the Dairymen's Co-Operative Creamery Association of Tulare attended the annual meeting of the association last week. The report of the maneger showed that the creamery had a capacity business in 1916. The sales totaled $638,630.19, of which amount $5,529.58 was paid dairymen for 5,178,918 pounds of cream delivered during the year. The butter churned during the year totaled 2,120,962 pounds, and the average make per day was 5,180 pounds. The average price per pound paid for butter fat was 24.65 cents.

✣ ✣ ✣

Volumne 34 of the Holstein-Friesian Herd Book is the last volume issued by the Holstein-Friesian Association of America, Brattleboro, Vt. It contains the entries from May 1, 1915 to Jan. 15, 1916, instead of those for the entire fiscal year as formerly, the business having so increased as to make the issuing of one volume a year impracticable . The total number of entries in the volume is 45,538, of which 16,659 are bulls and 28,879 cows.

✣ ✣ ✣

Tietje Quenn de Kol, the Holstein-Friesian cow which recently broke the record for butter making in giving 542.7 pounds of milk in seven days for 542.7 pounds of butter was sold recently for $5,000 to a creamery company. The previous record has been 32 pounds of butter. The vow is nine years and nine months old.

✣ ✣ ✣

A dairy cow should be in good condition at time of calving. The amount of milk she gives when fresh usually shows her capacity . She should then be fed enough to support this milk production. A cow that does not have the inheritance to give more than 20 pounds of milk daily cannot be made to give 40 by liberal grain feeding. However, the cow that starts giving 40 pounds will not continue to do so long unless sufficient feed is given to furnish the raw material for this much product.

✣ ✣ ✣

The findings of the tri-state milk commission, which was appointed from Maryland, Pennsylvania and Delaware with a view of standardizing the production and sale of milk, were recently made public. The food value of milk is exhaustively discussed and shows that a quart of milk is equal to eight eggs. With milk at nine cents a quart and eggs at 45 cents a dozen, it is stated that the consumer pays 23.10 times as much for the same food value, when buying milk and eggs. The report shows that the cost of production of a quart of milk now ranges between two and four cents, where formerly it was one to two cents.

The late S. C. Lillis, whose death occurred in Oakland last week, owned 140,000 acres of land, the major portion of which was in Fresno county. He was particularly interested in cattle and owned several thousand head of range cattle at the time of his death.

✣ ✣ ✣

At a mass meeting at Fresno, last week, the $9,000,000 Pine Flat reservoir project was explained to a large number of farmers. More than 1,000,000 acres of land in Fresno, Tulare and Kings counties will be irrigated if the project is successfully carried through.

✣ ✣ ✣

Keen competition between the southern and northern citrus fruit districts has developed into the National Orange Show, to be conducted at San Bernardino, February 20 to 28. World honors are to be awarded to the best quality of fruits, and, as in former years, the citrus fruit growers of California are preparing to enter their most luscious orchard products.

✣ ✣ ✣

A farm adviser is assured for Fresno county, following the example of the progressive counties of California, the majority of which have farm advisers. The Chamber of Commerce of Fresno county and the University of California department of agriculture, by working hand in hand secured enough signers of Fresno county stockmen and farmers to assure the support of a capable man.

California Swine Breeders Meet.

One of the most enthusiastic meetings of live stock breeders ever held in California was conducted at Los Angeles, January 1 8and 19 account the California Swine Breeders' Association.

The progressive breeders of the coast attended and many prominent breeders addressed the convention. They are a live-wire bunch and the swine business of the coast promises much in the future for the breeders, as a result of this association.

The following resolution was adopted at the meeting:

"Whereas, It is held by some that the remedy for existing marketing ills for farm products is the establishing of state markets in the towns and cities of California in order to bring producer and consumer together, and

"Whereas, We, the members of the California Swine Breeders' Association, assembled in the city of Los Angeles this 18th day of January, 1917, in state convention, feel in common with the field farmers of California that such state markets would not in the slightest degree solve our grave and serious marketing problems, and

"Whereas, We firmly believe that the only solution for such swine marketing problems lies first of all in organizing a strong and effective swine breeders' Marketing association, and

"Whereas, We believe that such producers' marketing association is as much in the interest of consumer as of producer, by

(a) Raising the standards so as to ship market products equal to those shipped here from outside the state,

(b) Minimizing the waste in cost of distribution,

(c) Lessening the possibility of speculation and thus in the interest of producer and consumer stabilizing prices; be it therefore

"Resolved, That we heartily approve the work that has been done and is being done by State Market Director Weinstock in organizing the farm producers of the state into effective marketing associations;

"Resolved, That we earnestly recommend to the legislature now in session that it approve such additional amendments to the marketing law as will enable the State Market Director, in the interest of producer and consumer of farm products, to broaden his activities and to enlarge the scope of his work so that the State Market Commission may be of highest usefulness to the great agricultural interests of California."

Treating Wounds of Animals.

Most wounds on farm animals will heal naturally without causing trouble. It is, however, good practice to aid nature by keeping out infection and thus causing more rapid healing. The first twenty-four hours the wound is made is the most important time to get in good work. Normally the skin keeps out infection, but when it is broken the portion underneath is laid open to harmful bacteria. After about twenty-four hours the body sends blood and white corpuscles around the wound to fortify it against infection, but infection usually gets in while the wound is fresh and the body is unprepared for the attack.

In treating a fresh wound, the first step is to check the hemorrhage if the animal is bleeding badly. This can be done by heat, torsion of the blood vessels, ligation, or pressure. One of the best ways to check bleeding from most wounds is to put a pack of sterile cotton, dusted with boric acid, over the raw surface and bandage it tightly. Washing with warm water will control a slight hemorrhage. After the bleeding is over the wound should be prepared for immediate healing. All dirt, hair, slivers of wood or foreign substances of any kind should be removed. Long hair near the wound should be clipped and parts of the tissue that are badly torn and hanging should be cut off. Then wash the wound thoroughly with a weak solution of mercuric bichloride or carbolic acid. Repeat these washings every 8 hours for the next 48 hours, but just dampen the wound after the first good washing.

Wounds that have not been looked after at first and have become infected should be well painted with tincture of iodine. In case an animal is snagged the hole should be filled with iodine every 8 hours for four or five times. Be sure to get the iodine to the bottom of the hole. A syringe comes in handy in this case.

After the wounds have begun to heal they usually require but a small amount of attention. The following is a good healing lotion that can be profitably used once or twice a day: Pine tar 2 ounces, and castor oil enough to make up a pint. If there is any overabundance of new tissue forming an excessive granulation, white lotion is good to use. It is composed of lead acetate, 1 ounce; zinc sulphate 6 drahms, and water enough to make up a pint. Dampen the surface of the wound mornings and evenings with the above mixture. If quite a bit of proud flesh has already formed cauterizing should be resorted to . A red hot iron rubbed thoroughly over the wound will stop the formation of proud flesh. Copper sulphate, iron sulphate and zinc sulphate mixed in equa lparts will form a powder that will serve the same purpose as the hot iron, if the mixture is dusted on the wound every three or four days until unhealthy granulation ceases.

Union Stock Yards at Sacramento.

With the filing of incorporation last week of a $100,000 stock company, California promoters and capitalists have taken formal steps to establish a union stockyards at Sacramento. The new organization will be known as the Union Stockyards of West Sacramento. Harry Thorp will be president, with D. O. Lively, formerly Chief of the Department of Livestock, P.-P. I. E., as manager. The directors and organizers are J. H. Glide, Harry Thorp, Chas. E. Virden, H. Sam Thorp, T. S. Glide.

Before launching the new stock concern the organizers visited the Portland yards with the result that they became convinced Sacramento is an ideal place for such an industry. They found that many of the cattle from this district are shipped to Portland, while the stock men of the state largely are dependent on buyers in handling their cattle, a situation that does not mean the best of prices.

The proposed stockyards will be located on a 20-acre tract in West Sacramento between the Oakland, Antioch and Eastern tracks and the Sacramento river. Fifteen acres will be used for the stock yards proper, while five acres will be reserved for a packing plant which it is proposed to establish after the venture is in working order.

With the completion of the incorporation of the stock yards the concern will be ready to issue stock, and it is expected will be in a position to open the yards in about six months.

Following the announcement that the stockyards are about to be established in Sacramento, State Market Director Weinstock issued a statement commending the idea as a step toward the settling of some of the marketing problems of livestock growers and dairymen. With a central stock market, Weinstock declared, it will be easier to organize the stock men and increase the business of growing meat in this state, which now depends on other commonwealths for $30,000,000 worth of meat products consumed.

PREVENTION OF ABORTION IN CATTLE.

Veterinarians Receive Instruction Concerning Recent Discoveries Regarding Abortion at Short Course at the University Farm at Davis.

[A System of Hygiene for Breeding Cattle Recommended to Cattle Owners by an Expert.]

In order to make immediately available throughout the state recent discoveries regarding infectious abortion and allied diseases of cattle, the College of Agriculture of the University of California, in cooperation with the California State Veterinary Medical Association, recently held a Practitioners' Short Course in Veterinary Medicine at the University Farm, Davis. Seventy-five veterinarians attended the course. One of the chief features of the course was the demonstration by Dr. W. I. Williams, Research Professor of Diseases of Breeding Cattle at Cornell University.

The success of his system of treating the barrenness in cows resulting from abortion disease has attracted the attention of veterinarians and stock owners throughout the country. The system requires special training and some of the California veterinarians are planning to go to Ithaca, N. Y., for further study and practice under Dr. Williams. In addition to the special operations taught by Dr. Williams he recommends a system of preventive hygiene which should be carried out by every owner of valuable cattle, and which he explained at a lecture before the cattle breeders of the State at Sacramento on December 26th. He stated that abortion is a disease so widely disseminated that few dairy or pure bred herds are free from infection.

The infection may even be present in cattle without the occurrence of abortions. When the virulence or disease producing power of the germs is high, losses occur in the herd from abortion, sterility, retained afterbirth, or diseased ovaries, and they also cause diseases of new-born calves such as calf

scours, pneumonia, joint disease and similar complications. In infected herds not only the aborting cows but non-aborting cows, bulls and calves may harbor the infection ,and calves and young heifers should be protected from infection. Heifers carrying the first calf are more liable to abort than older cows. The two periods when the germs of abortion infection are most liable to gain entrance to the offspring are at the time the heifer calf is born and at the time she is first served by the bull. The entrance of the germs at these times is especially liable to cause damage. In order to obviate as far as possible the infection, Professor Williams recommends the following procedure to all cattle owners having animals valuable enough to warrant the extra expense:

Before and after service irrigate the sheath of the bull with one-fourth per cent Lugel's solution. It is advisable to administer a vaginal douche of this solution an hour or two before service to cows which do not conceive at the first service. Dr. Williams has discovered that the use of this solution does not interfere in any way with conception. If the cow still fails to breed, enlist the services of a qualified veterinarian who by manipulating the ovaries and catheterizing the uterus may be able to get the cow into breeding condition.

When the cow has reached her 270th day of pregnancy or earlier, if calving seems probable, give her a thorough bath with warm water and soap, lathering the skin repeatedly until thoroughly clean. Rinse off the soap and water with a one per cent solution of compound solution of cresol. Place the cow in a clean, disinfected stall. After the bathing wash the tail, vulva, thighs and udder daily with warm compound cresol solution, one and a half to two per cont, and douche the vagina daily with one-fourth per cent Lugol's solution.

When the calf is born rub it dry and disinfect the stump of the navel cord. Do not tie it. Do not touch the navel stump with the hands. Fill a goblet or glass to the brim with 1-1000 corrosive sublimate solution and having the calf held on its feet, push the goblet against the navel region so as to submerge the navel stump completely and keep it submerged for fifteen minutes. (Corrosive sublimate tablets can be purchased of a size that one to one pint equals 1-1000.) Then dust the navel stump over heavily with a powder composed of equal parts of powdered alum or boric acid. Place the calf in a clean, dry, comfortable stall and keep it alone until two or three months old. Do not permit the calf to suck.

According to Dr. Williams, it is best in most cases to feed calves on boiled milk. Some very young calves do not thrive on boiled milk and when it does not appear practicable to boil the milk the following special precautions should be taken to protect the milk for the calf from infection:

Before drawing milk from the cow to feed the calf wash her vulva, tail, thighs and udder and douche the vagina according to the plan recommended prior to birth. The milker must first disinfect his hands and use a sterile pail. The first milk from each teat should be discarded. Repeat the washing of the vulva, tail, thighs and udder immediately before each milking. Repeat the vaginal douches daily until all discharges from the vulva have ceased. At eight or ten days of age nearly all calves may safely be placed on boiled milk. The milk which is boiled may be drawn from any economic source. In order to prevent scorching a large double boiler or water bath should be used to heat the milk.

When all discharges after calving have ceased, vaginal douching of cows may be stopped, though it would be well to continue the external washing of vulva, tail and udder daily in the interest of clean milk as well as of the general health of the herd. When abortion or retained afterbirth occurs each case should be handled individually by a skilled veterinarian and by the special treatment restored to health as promptly as possible. Much needless loss might be saved by owners of valuable pure bred cattle if the services of veterinarians skilled in the special work perfected by Dr. Williams were available. By a monthly or quarterly veterinary examination of all the animals in a herd, cases of sterility will be discovered before it is too late to cure them and incurable or dangerous cases can be eliminated before they have done irreparable damage to the bull or other cows.

This does not mean, however, that all animals infected with abortion should be disposed of. As a matter of fact in herds in which abortions are occurring a cow that has aborted once or twice may be just as valuable for breeding as one that has not. Cows seldom abort more than two or three times. Cows that are not made sterile by abortion will in all probability resume normal reproduction. On the other hand, if they are removed to make way for fresh animals there is a possibility that the newcomers already are or soon will be infected and are more liable to abort than the old ones. The elimination of infected animals is, therefore, not to be recommended as a means of controlling the disease unless their value is not great enough to warrant the expense of treatment.

By keeping pregnant animals the disease will be brought to a standstill more quickly than if new susceptible material is continually added in their place. Some cows apparently become immune without aborting. It is the history of the disease in the great majority of herds that after reaching its height, it gradually subsides of its own accord until only a few slips occur each year or it may disappear entirely. In herds where abortions have not occurred for several years, or at least only rarely, the owner should take particular pains to prevent its introduction. Every case of abortion should be regarded as infectious until proved otherwise.

For outbreaks of pneumonia and scours in calves Dr. Williams recommends the frequent use of enemas of physiological salt solution and the daily injection of liberal amounts of calf scour serum in addition to the special precautions to be taken at time of calving mentioned above.

Judging Horse's Age.

Until a horse is over ten years old the teeth furnish an indication of age which is fairly accurate. In estimating the age of a horse, only three pairs of front teeth or nippers on each jaw are considered. Horses, like human beings, have two sets of teeth; the first set, known as milk teeth, being replaced by permanent teeth. Now teeth have deep cups, or indentations, at their centers. As the teeth wear down these cups disappear.

A colt does not usually get its first pair of nippers until it is a few days old, but has all three pairs by the time it is 6 to 10 months old. Until a colt is 3 years old, however, its general appearance is relied upon largely to indicate its age . Following is a description of the yearling changes which ordinarily occur in the teeth of a horse:

One year.—The center pair of milk incisors, known as the pinchers, and the pair next to them, known as the intermediates, are well through the gums and in contact, but the corner pairs do not yet meet on a level.

Two years.—The pinchers and intermediates indicate that they are being crowded by the permanent teeth, as they are pushed free from their gums at the base. By the time the colt is 2½ years old the middle pinchers should be through. The permanent teeth are much longer than the temporary ones.

Three years. — The middle pinchers are large enough for use. Their deep cups show plainly. The milk intermediates are about to be shed.

Four years.—The permanent intermediates appear at 3½ years and are ready for use at 4. The corner teeth give evidence that the permanent corners are coming. The cups in the pinchers are about one-third gone. (The tusks, or canine teeth, of male colts may appear about this time.)

Five years.—The temporary corner teeth are shed at 4½ and the permanent ones are ready to use. The horse has now what is known as a full mouth, all permanent incisors being ready to use. The cups of the first pair are about two-thirds gone.

Six years.—The cups in the center pair have nearly disappeared. In the second pair they are about two-thirds gone.

Seven years.—The cups from the second pair are now gone. There is a notch in the upper corner tooth where it overlaps the lower one.

Eight years.—The cups having all worn out of the lower nippers, we now look at the upper jaw. Although cups remain in the center pair, they are not deep.

Nine years.—The cups in the center pair of nippers on the upper jaw have disappeared. They are still present in the other two pairs, being fairly deep in the corner ones.

Ten years.—The cups are worn out of the second pair on the upper jaw, although they are still present in the corner pair.

Older horses.—At 11 years all of the cups are usually worn out of the incisors and it becomes necessary to use some other indication. Estimation of age may now be based upon the angle at which the teeth meet, their change in size and shape. As the horse gets older, the teeth meet more and more at an acute angle; that is, the jaws become more oblique. As the teeth wear down, the shape of the worn ends changes from oval to more nearly round and, finally, in an aged horse to a nearly triangular form. Sometimes cups are cut or burned in the teeth of old horses to make their mouths resemble those of younger animals. This practice, known as "Bishoping," may be detected if the shape of the tooth and the absence of the ring of enamel which surrounds the natural cup are noted. After a horse is 12 years old its condition is more important than its age in determining values.

The national convention of wool growers at Salt Lake last week endorsed the idea of seeking a standardization of wool and petitioned the department of agriculture to fix a definite system on which wool should be sold on the American markets. Other resolutions called upon it to appropriate $300,000 to aid in gaining control over predatory animals and asked the different states to make appropriations for the same purpose. They urged the United States bureau of animal industry to conduct experiments to determine the most economical method of feeding sheep on the range; condemned the agricultural committee of the House of Representatives at Washington for disallowing an appropriation of $20,000 for the establishment of an experimental farm and expressed the hope that the Senate committee would reinstate the appropriation. They requested the flock-masters to have their wool graded at the shearing pens and pledged support to the secretary of the interior in the matter of laying trails through the national forests.

Farm Advisor W. H. Hamilton of Monmouth county, New Jersey, reports the results of scientific methods of handling a run-down orchard on a farm in the same county that resulted in the increasing in two years of the average yield of apples annually from 800 to 4000 bushels. Mr. Hamilton used the orchard, which the owner intended to cut down, to demonstrate the results to be obtained by careful pruning, spraying, fertilizing and cultivating. The cost of the extra care, sprays and fertilizers amounted to five cents per bushel on the increased yield. Instead of poor, inferior fruit of low market value, Mr. Hamilton secured high quality apples of high market value.

✣ ✣ ✣

One of the difficulties confronting the man who aims to produce fall lambs for market is the fact that the regular time for ewes to drop their young is in the spring; while some will bred so as to drop their young late in the fall, the majority do not breed until fall, dropping the lambs the next spring. It is claimed that this has been overcome to some extent by the selection of November and December lambs as breeders for a flock of early lambing ewes each year, saving a few of the December lambs to raise as breeding ewes. The usual method followed has been to pay particular attention to the feeding and care of the ewes during the winter, and after lambing in the spring get them in good vigorous condition before turning them out to pasture. When placed in the pasture in May the rams are turned out with them, and better results will be secured if two or three young active rams are allowed to run in the flock.

✣ ✣ ✣

According to experiments at the Kansas Experiment Station, the time to change the calf from whole milk to skim milk depends upon the development of the calf. If it is healthy it may be changed to skim milk at the end of the second week, but the third week would be better . This change must be made gradually by putting a small quantity of skim milk into each feeding. About a week or 10 days is required. In this way the calf learns to like the skim milk without noticing the change. The right temperature for the milk is 100 degrees. It should be fed at as nearly this temperature as possible. Feeding cold milk at one meal and warm milk at another upsets the digestive system of the young calf. It is also important to feed the milk sweet. A single feed of sour milk might cause serious trouble for the young calf. Better let it miss a feed or even two than give it sour milk. The pails out of which it is fed must be kept clean and sterile.

✣ ✣ ✣

The Hammond brothers of eastern Utah recently purchased 2000 head of sheep from W. T. Goslin of Mesa county, Colorado, for the big round figure of $12 a head.

✣ ✣ ✣

It has been a good many years since the old Dunham days with the great Brilliant at the head of 150 of his colts, that we have seen such a display of all-around Percherons as were stacked up at the Denver show last week. France, in the decrepitude of her national struggle, can scarcely bring out as many good Percherons as may be found in our western states today ,and the pick of these were admired in Denver last week. The Belgians were also fine and it is a good thing for posterity that Americans have been breeding these fine animals in a substantial way before the great crash came to wipe out the industry on its native sod. Europe will have to come to us to replenish its broken blood lines and keep some of the families going. The seven breeders of Belgians who were here last week seem to be pretty well fitted to pick up the banner and light the way for the perpetuation of the breed with their noble animals. If there were any Clydes, Shires or Suffolk Punches in the show we did not notice them.—[Field and Farm.

In keeping your horses sound and well it is advisable to keep on hand the Tuttle remedies. They are Tuttle's Elixir, Hoof Ointment, Condition Powders, and others that have been used for years with the very best results. Send for the free booklet Veterinary Experience. It gives a lot of infromation htat will be useful to horse owners.

✣ ✣ ✣

J. L. Harlan, one of Yolo county's most progressive farmers, is the owner of a Holstein bull that is a half brother to the bull that was sold at auction at Portland, Oregon, a few weeks ago for the highest price ever paid for a bull on the Pacific coast. The price was $21,500, and the animal was Finderne Mutuale Fayne Valdessa, and John Von Herberg, owner of a fine herd at Kent, Washington, was the successful bidder.

✣ ✣ ✣

The Carr ranch of 5600 acres, in Monterey county, was sold last week to Mr. P. F. Brown at a reported price of $90,000, by Mrs. Jesse D. Seale, a daughter of the late Jesse D. Carr, of Salinas, and the deal, it is rumored, was made in the interest of the Paicines Ranch Company owned by A. K. Macomber. This fine tract of land adjoins the ranch of that company and will make quite an addition to its already large holdings. About 600 acres of the Carr place is suitable for farming and the balance is fine grazing land.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09¼, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

MARSE ABE: Yankee (Hanover (Hindoo, Bourbon Belle); Correction (Himyar, Mannie Gray)); Halo (St. Blaise (Hermit, Fusee); Ida K. (King Alfonso, Lerna))

Virgil; Florence; Bonnie Scotland; Ella D.; Alarm; Hira; Enquirer; Lizzie G.; Newminster; Seclusion; Marsyas; Vesuvienne; Phaeton; Capitola; Asteroid; Laura

THE WORK of organizing a California circuit of harness racing which has been undertaken by the recently organized California Fair and Racing Association is steadily progressing. Secretary Joseph Vaddell spent the past week in visiting Marysville, Woodland, Dixon and Stockton and the preliminary work of bringing those cities into line is well under way. Some of these places are hardly ready to give a fair this year, but will join the circuit with a race meeting and horse show, thus providing a complete circuit for the harness horsemen. There is an excellent chance of Stockton taking the week following the State Fair and if this is done it will fill in a week that has not otherwise been claimed. Mr. Waddell will visit Fresno, Hanford, Riverside and Los Angeles during the coming week and will be able to report fully at a meeting of the California Fair and Racing Association which will be called to meet in San Francisco on Saturday, the 24th inst. At this meeting everyone interested in a circuit of fairs and race meetings is invited to be present. Many interesting addresses will be made and a general movement started for the advancement of the horse breeding interests of California.

Volume 21 of the American Trotting Register has been received at this office. It is three years since volume 20 was issued, and the new volume contains the names of all stallions from No. 59500 to 63599. The rules for registration of standard trotters and pacers are the same as have been in effect since November 1st, 1898. The printing and binding are uniform with previous volumes of this work.

✤ ✤ ✤

Albaloma 2:08¼, now owned by S. H. Cowell and in the training stable of Walter Tryon at Sacramento, has won nearly $17,000 during his racing career. In 1912 he won three races and $4162; in 1913 he had four first moneys to his credit and $5725; in 1914 he took his record of 2:08¼, won five races and $2150, and in 1915, the last year he was raced, he won two races and $4834. The total for the four years was 14 races and $16,862 won.

✤ ✤ ✤

Harold Welcome, the pacing stallion that reduced his record last year to 2:08¼ at Boise, Idaho, is now thirteen years old. He was foaled in 1904, was bred by the late Horry W. Meek of San Lorenzo, and is by Welcome out of Judith, sister to Janice 2:08¼, by William Harold, second dam Fenella, by Fallis 4781, third dam Patti (dam of 2 in the list) by Nutwood 600, fourth dam the thoroughbred mare Centennial Belle that was the grandam of Clipper 2:06. The fifth dam, Bonnie Belle, was a full sister to Langford, sire of the grandam of Guy Axworthy, sire of the world's champion trotting stallion Lee Axworthy 1:58¼. Judith, the dam of Harold Welcome, was sold at an auction held by the Meek Estate in 1903 and purchased by James Faris Jr., then of Sacramento, but now of Red Deer, Alberta, Canada. Judith was in foal at the time to Welcome and Harold Welcome was foaled the following spring. Harold Welcome raced over the Inter-Mountain circuit last year, won three races, got second money five times and third money once out of nine starts. He did not start in any race in which he failed to win at least

✤ ✤ ✤

Eight of the twelve members of the state board of agriculture, whose terms had expired, were reappointed to their jobs by Governor Hiram W. Johnson this week.

Those named to serve on the board again were Charles J. Chenn of Sacramento, T. H. Ramsey of Red Bluff, John M. Perry of Stockton, Theodore Gier of Oakland, E. Franklin of Colfax, E. F. Mitchell of San Francisco, I. L. Borden of San Francisco and E. J. Delorey of Los Angeles. The appointments extend over a period of four years.

Some of the terms of the men reappointed expired several years ago. Chenu had been serving since 1913 and Gier since 1914 without being appointed.

WINRACES AND TIME ALLOWANCES.

Hartford, Conn., Feb. 2, 1917.

As there is a tendency to misunderstand the new time allowance rule by getting it confused with the one defining the four seconds difference between winraces made on a mile and a half mile track, and especially when a horse has a half mile track winrace within the four seconds allowance fixed by Rule 7, Section 5, an explanation will materially assist owners and racing officials in its application. A winrace is defined in Rule 2, Section 10, as follows: "A winrace is the fastest time made by the winning horse in a public race or in an event in which he stood best in the summary. "Nothing is said in this rule as to whether the winrace was made over a mile or half-mile track. It is simply the fastest and the one to which the time allowance granted by Rule 7, Section 6, is added in the event of a horse being entitled to any.

In the National Trotting Association Winrace and Eligibility List which is published in Volume 32 of Wallace's Year Book, no reference is made to a winrace made over a half mile track in connection with the performance of a horse except when he has a winrace made over a mile track and also one made over a half mile track and which is within the four seconds limit fixed by Rule 7, Section 5, which reads as follows:

"A horse with a winrace made on a mile track shall be allowed four seconds when entering on a half-mile track, providing the class to which he would be eligible under this allowance is not slower than his winrace on a half-mile track."

If the latter, that is, his winrace made over a half-mile track, is three seconds slower than his winrace made on a mile track he is entitled to but three seconds. If it is but two seconds, he is entitled to two. This is the first time allowance rule that was ever adopted. It was originally enacted by the National Trotting Association in 1912. At that time the difference was fixed at three seconds. In 1914, it was increased to four seconds. There is no connection between this allowance and the one fixed by Rule 7, Section 6, which reads as follows:

"After a horse has acquired a winrace he shall be allowed whether raced or not, one second for each calendar year until he equals or reduces it. No other time allowances shall be permitted. A nominator is required to claim time allowance when making entry."

Section 5 covers the difference fixed in the rules by actual performance while Section 6 covers the year or years in which a horse has for any reason, whether raced or not, failed to equal or reduce his winrace, the limit being fixed for one second for each calendar year.

In order to illustrate the two sections of this rule the names of the following well known performers are presented together with an explanation showing what allowances they are entitled to in 1917.

Joan, br m (p) by Directum Spier	(1914)	(m)	2:04¼
Earl Jr. (p), gr s by The Earl...	(1915)	(m)	2:01
Peter Scott, b s by Peter the G't	(1915)	(m)	2:05¼
Hal B. Jr. (p), br s by Hal B....	(1913)	(m)	2:02½
	(1916)	(½)	2:05½
Fred W (p) b g by Modern Chimes	(1914)	(m)	2:09
Texas Jim (p), b g by Texas Jack	(1915)	(m)	2:04½
	(1915)	(½)	2:07¼
Judge Ormonde (p), bl s by Ormonde	(1915)	(m)	2:03¾
	(1916)	(½)	2:07½
Aconite (p), b s by Aquilin.....	(1915)	(m)	2:07½
	(1916)	(½)	2:10¼
Ida May W., bl m by Cazeaux....	(1914)	(m)	2:18½
	(1914)	(½)	2:20½
Add F (p), b s by Jno. J Hughes	(1913)	(m)	2:09½
	(1913)	(½)	2:10¼

Earl Jr. made his winrace in 1915, on a mile track. He has not a half-mile track winrace within four seconds limit and is entitled to one second time allowance as he failed to equal or reduce his winrace in 1916. He is therefore entitled to the four seconds allowance when entering on a half-mile track and one second for failing to equal or reduce his winrace of 2:01½ in 1916. He can therefore start in the 2:03 class on mile tracks and the 2:07 class on half-mile tracks in 1917.

Joan made her winrace of 2:04¼ in 1914. She is entitled to two seconds time allowance and is eligible to the 2:07 class on a mile track and the 2:11 on a half-mile track in 1917, providing she does not equal or reduce her winrace of 2:04¼. Peter Scott has a winrace of 2:05½ made in 1915. He is entitled to one second time allowance for 1916 and under the same can start in the 2:07 class on a mile track and the 2:11 class on a half-mile track until he equals or reduces his winrace. If he should be taken up and trained this year and failed to do so, in 1918, under the present rules, if continued without change in 1918, he would be eligible to the 2:08 class on a mile track and the 2:12 class on a half-mile track.

Hal B. Jr. was foaled in 1905. He is now twelve years old and has like Goldsmith Maid and Tom Keeler trained on and improved with age. He made a winrace of 2:02½ in 1913 and has done practically no racing on mile tracks since that date. As an evidence, however, that he was not raced to his limit on the mile tracks, he came back in 1916, and at York, Pa., acquired a half-mile track winrace of 2:05¼. He is, therefore, entitled to but three seconds allowance, the difference between his winraces on a mile and a half-mile track and three seconds for failing to equal or reduce his winrace in 1914, 1915, 1916. In other words, in 1917 he is eligible to the 2:06 class on a mile track and the 2:09 class on a half-mile track. Also if raced in 1917, if associations consider him too formidable, there is but one way to keep him out of the 2:09 classes on the half-mile tracks, and that is, by barring him in the published conditions just as Johnson was in the Grand Circuit in the early '80's and Peter Mac was at one or two meetings last season. He will then be required to start in the free-for-alls or go back to the mile tracks when, in the event of winning in 2:02½ or better, he would forfeit his three seconds time allowance.

Fred W. is a halfmile track pacer. He drops from the 2:09 class to the 2:11. Texas Jim has a winrace of 2:04½ made on a mile track in 1915, and 2:07¼ on a half-mile track. He is therefore entitled to but three seconds time allowance, as his half-mile track winrace comes within the four seconds limit. In addition to this he also is entitled to one second as he failed to equal or reduce his winrace last year. This makes him a 2:06 pacer on a mile track and a 2:09 pacer on a half-mile track.

Judge Ormonde has a winrace of 2:03¾, made in 1915 on a mile track, and 2:07½ over a half-mile track in 1916. He is also entitled to one second time allowance for 1916 during which he failed to equal or reduce his winrace of 2:03¾. He is therefore eligible to the 2:05 class on a mile track and the 2:09 class on a half-mile track in 1917. Aconite has a mile track winrace of 2:07½ made in 1915. While last year he acquired a half-mile winrace of 2:10¼, he is, therefore, entitled to but three seconds under Rule 7, Section 5, while he is entitled to one second for failing to equal or reduce his winrace last season. He is now eligible to the 2:09 class on a mile track and the 2:12 class on a half-mile track.

There is but two seconds difference between the mile and half-mile track winraces held by Ida May W. and, as she made both in 1914, she is entitled to two seconds time allowance and is eligible to the 2:21 class on a mile track and the 2:23 class on a half-mile track. The returns for Add F show but one second difference between his mile and half-mile track winraces and as he made both in 1913 he is entitled to three seconds allowance and in 1917 can start in the 2:13 class on a mile track and the 2:14 class on a half-mile track.

As the time allowance rule was presented to and adopted by the Joint Rule Committee at Columbus, Ohio, it is very simple and adapts itself to any case that may arise so long as the two time allowances—that is, the one granted by Rule 7, Section 5, and the one granted by Rule 7, Section 6—are kept separate and distinct. When estimating time allowances it must always be borne in mind that the half-mile track winrace given in the list published in Volume 32 of Wallace's Year Book is presented solely for the purpose of showing that the horses having same are not entitled to four seconds when entering on a half-mile track, but only the difference between the winraces made on a mile and a half-mile track. To this it is necessary to add the one second for each calendar year in which a horse has failed to equal or reduce his winrace as defined in Rule 2, Section 10; that is, the fastest time made by the winner in a public race or in an event in which he stood best in the summary. The latter is given to each horse because he is entitled to it and because it was admitted when the rule was adopted that after a horse reaches his top form he goes back at least one second a year, and he retains that allowance until he can show by actual performance that he is again as good or better than he was on the day that he acquired his winrace. Among the older horses this will be very rare, although it will be the means of bringing back to the turf many horses that were considered outclassed until this rule was adopted. It will, however, be an every day affair during the racing season in the younger division that was retired for a season or two, or even three seasons, to mature for breeding purposes or to recover from an injury.

W. H. GOCHER, Sec'y.

An Excellent Idea.

Gordon H. True, of the Division of Animal Husbandry of the University Farm at Davis, has addressed the following letter to the secretaries of all fair associations in California:

"It has been planned that there shall be held at the University Farm the last week in May or the first of June what will be called Farmers' Week. At this time it is planned to put on a program of practical talks and demonstrations to be participated in as far as possible by the stockmen of the state. All of the organizations interested in agriculture or the livestock industry are being invited to meet here at that time and to participate in the meeting.

"I have wondered if we could not secure, at this time, a meeting of the managers of the fair associations of the state. I do not know whether there is an organization of these associations or not, but my experience with such in the east suggests that a program of considerable profit might be carried out. I, therefore, take the liberty of suggesting the calling such a meeting at the University Farm at the time named.

"I would be very glad indeed to hear from you, telling what you think of the plan and suggesting topics which might come up for discussion at such a meeting. Yours very truly,

"GORDON H. TRUE."

Harness Horses and Horsemen

Leading Money Winners.

The ten leading money winning trotters which have won races during the past seven years are:

Peter Scott 2:05½ by Peter the Great	$56,210
Dudie Archdale 2:03¼ by Archdale	47,488
Peter Volo (4) 2:02 by Peter the Great	44,536
Sonoma Girl 2:04¼ by Lynwood W	41,328
Baden 2:05¼ by Bingara	40,085
Mabel Trask 2:03¼ by Peter the Great	36,795
Spanish Queen 2.04¼ by Onward Silver	34,540
Etawah 2:03 by Al Stanley	33,599
R. T. C. 2:06¾ by Prince March	33,456
Saint Frisco 2:03¼ by San Francisco	31,875

The ten leading money winning pacers that have won races since 1909 are the following:

Hal Boy 2:01½ by Hal B.	$49,809
Earl Jr. 2:01½ by The Earl	40,314
Frank Bogash Jr. 1:59¼ by Frank Bogash	37,700
Directum I 1:56¾ by Directum Kelly	33,225
The Eel 2:02½ by Gambolier	30,950
Major Mallow 2:03¾ by Box Elder	30,940
Branham Baughman 2:04¼ by Gambetta Wilkes	30,302
Joe Patchen II 2:03¼ by Joe Patchen	28,750
Braden Direct 2:01¼ by Baron Direct	26,485
Hal B. Jr. 2:02½ by Hal B.	25,863

In the above tables it will be seen that among the trotters no stallion has sired more than one of the ten except Peter the Great, who has sired three, and among the pacers Hal B., with two of the leading money winners to his credit, is the only horse to sire more than one.

McKinney Stands Well in Front as a Sire.

The greatness of McKinney 2:11¼ as a progenitor of speed is not dimmed as the years go by. In the list of sires of standard performers he is fifth with 203 to his credit. Peter the Great, Allerton, Gambetta Wilkes, and Bingen are the only sires that lead him in this list, and they have 286, 269, 235 and 218, respectively.

In the list of sires of standard trotters he is fourth, with 162, Peter the Great with 241, Allerton with 209, and Bingen with 172 leading him.

In the list of sires of 2:10 performers he is second, with Peter the Great the only sire to lead him. Peter the Great has sired 50, and McKinney 28 2:10 performers.

Among the sires of 2:10 trotters McKinney is third with Peter the Great again first, with 39, McKinney's son Zombro second, with 18, and McKinney himself third with 17.

In the list of 2:10 pacers McKinney, with 11 to his credit, ties Ashland Wilkes and Peter the Great for eighth position, each having that number.

Old Fashioned But Good Blood.

Arthur Remington, reporter of the Supreme Court of the State of Washington, owns a little farm near Olympia whereon he has built a training track on soil that does not get muddy during the rainy season. This sounds rather fishy, but it is true, nevertheless. Mr. Remington is not a regular horse breeder as yet, having a few head of old-fashioned breeding that, as he says, "just happened." But his little farm is a gem and some day he hopes to put a few high class mares on it, as he can raise all the feed necessary for them. He has two mares that are very fine individuals and make an ideal pole team that he thinks are not quite good enough for foundation stock, but any student of breeding would take a chance on getting good colts from them if they were mated to a good horse. One mare is by the registered stallion Florida M. that is a producing sire ,and she is out of Birdie, dam of Irene 2:19¼ by Altamont, second dam Stella H. 2:29¾, dam of McClosky Wainwright 2:21¼ by Hambletonian Mambrino, sire of Carlyle Carne 2:11¼, third dam by Challenge 1698, a son of Sherman Black Hawk. The other member of Mr. Remington's pole team is by Zombrook, a well bred son of the great Zombro, and is out of the same dam. With such blood as flows in the veins of these mares we think Mr. Remington would be fully justified in expecting something good from mating them with a good trotting bred stallion.

Pop Geers Has a Birthday.

Thursday, January 25, was the sixty-sixth birthday of the Grand Old Man of the harness turf, Ed F. Geers, while next May he will also celebrate the forty-fifth anniversary of his connection with the sport as an active driver. As usual Pop Geers, the idol of the turf, received hundreds of congratulations from horsemen all over the country, who will be glad to learn that in spite of the two severe smashes he suffered from last summer he is now in fine health and not only in the training cart every day, weather permitting, but has resumed his younger days' practice of winding up his daily work with a horseback ride.

This birthday was no doubt of greater pleasure to Pop than in the past because he also celebrated the first event in which he ever drove a harness horse a mile faster than 2:00, namely Napoleon Direct 1:59¾, at the Columbus August meeting. Up to 1916 his best trotting and pacing miles were 2:01 by The Harvester and 2:00¾ behind Ess H. Kay. His training stable right now contains more high-class racing prospects than in many years past, and his hosts of friends wish him many more and happy days.—[Horse Journal.

The Faster the Cheaper.

Nothing truer was ever written than these words of Frank Trott, referring to the custom of giving the big purses to horses without reputation and all unknown to the race-going public, which has for so long prevailed on the Grand Circuit:

"Nothing has been given out anywhere along the line that the trotters whose names even thrill are to be looked after with substantial purses.

"The Grand Circuit track manager figures that Cox will have Mabel Trask along, as Geers will have St. Frisco, and a $1200 purse will catch them.

"That is the way the harness horse turf is generally conducted, and it tells as no other thing can why harness horse racing has not attained its just measure of public approval."

Mabel Trask and St. Frisco last season contributed more to increase the popular interest in harness racing than any ten trotters combined, and their reward is the practical obliteration of their earning capacity. They must race for $1000 or $1200 purses or stay in the barn, because trotting managers fail to appreciate their importance as gate-drawing attractions and fall back upon their stock reliance, the entrance fees. The available resources in extremely fast and widely known trotters, whose reputations are familiar to everybody who has an atom of interest in the harness sport, were never so large as at this time. A free-for-all would include among its competitors reigning sensations like Mabel Trask 2:03¼; Peter Mc 2:03¼; Lucile Spier 2:03¼; St. Frisco 2:03¼; Zomrect 2:03¾; Volga 2:04½; Mary Putney 2:04¾; Peter Scott 2:05; M. L. J. 2:05¼ Dona Lona 2:05¾, and others. A 2:05 class would attract all of the above except Mabel Trask, St. Frisco and Zomrect, and also Peter McKlyo 2:06; The Exposer 2:06; Brisac 2:06¼; Donna Clay 2:06¼ Early Don 2:06¼; Grand Chimes 2:06¼; Tramp-right 2:06¼; Azora Axworthy 2:06¾; Busy's Lassie 2:06¾, and seven or eight others with records faster than 2:07, all of whom were largely before the gaze of racegoers last season. And yet we are told that the M. and M. and the Charter Oak Purse are likely to be moved back to the 2:12 class, and other promoters of big purses will probably follow suit. The foreign war, through the fact that it is impossible to ship our horses abroad safely, has made fast, sensational racing material more abundant and available to us than ever before and yet it is not to be utilized because trotting managers demand a big entry list to pay their purses, Mr. Trott is right when he says that it is this condition which tells why harness racing has not attained to its just measure of public approval.—[Trotter and Pacer.

The Little Red Horse.

The following is from the Nashville, Tenn., Banner of January 5th:

"Last Monday John R. Gentry 2:00½ completed his twenty-eighth year in this land of the free, and during the day Mr. Rensselaer Weston, of Goshen, New York, journeyed out to Cumberland Park and jogged the grand old horse a couple of miles just to see if anything of the old spirit was left in him. There was, and Mr. Weston discovered it the moment he gathered up the reins. The son of Ashland Wilkes was in a fine humor, seemed to realize that it was New Year's day, as well as his birthday, and without word from his driver, flew around the track like a frisky colt trying to show off before company. Evidently he remembered the day twenty years ago, when, on this same track, he and Robert J. raced each other to a head, and as he flew down the stretch with his ears working like a pair of shears, he seemed to be looking for his old rival. He was allowed to do just as he pleased, and brushed the last eighth like a house afire, clearly demonstrating his ability to hold his own in the best of company.

"John R. Gentry was foaled in 1889, and his owner hoped he would die, so weak and puny did he appear. He wasn't bigger than a minute, and could not stand up. And yet he lived to be one of the greatest horses in the world, a champion in more ways than one, and universally voted the handsomest horse in the world. He was all that, and more, for it is to his credit that at one time or another he beat every great horse he ever met on the race track. He does not look half as old as he is, and every time Mr. Weston comes to Nashville to look him over and to see that he has all the horse comforts possible, he, too, seems to renew his youth and to take a more rosy view of the affairs of life. John R. Gentry's dam was a daughter of Wedgewood, who, twenty-five years ago, was the premier stallion at the old Hermitage stud. His sire, Ashland Wilkes, was sired by Red Wilkes, son of George Wilkes, and behind his Belmont cross that he gets through Wedgewood, his lineage traces to the warm blood of the thoroughbred."

John Splan, the veteran horseman, who is in charge of breeding operations at Patchen Wilkes Farm, Lexington, writes that on the first of the year more mares were booked to the champion colt trotter, Peter Volo 2:02, than to his famous sire, Peter the Great, at that time of the year in any past season.

PACIFIC BREEDERS' FUTURITY NO. 15.

Forty-Four Two-Year-Olds Kept Eligible to This Stake by Payment on February 1st.

There is a goodly field of two-year-olds eligible to the Pacific Breeders' Futurity this year as the following list of forty-four on which payments were made February 1st will show. From this 44 there should be good fields in both two-year-old divisions of this stake when it is raced at the Breeders' meeting this year. The eligibles are the following:

E. T. Barnette's b f by Carlokin, dam Zephyr by Zombro.

I. L. Borden's b f by Major's By Guy, dam C. D. K., b f by Ed. McKinney, dam Miss Nutwood by Nutwood Wilkes.

S. Christenson's br c King Albert by The Bondsman, dam Reina Directum by Rey Direct.

John N. Colomb's b f Mary McKinney by Vernor McKinney, dam Mary Gordon by Gordon.

Chas. Cook's b f Goldie McGregor by Onward McGregor, dam Gypsy C. by Nutwood Wilkes.

S. H. Cowell's bl c by Panama, dam Harvest Queen by Silver Arrow; b c by Panama, dam Zaza by Henry Nutwood.

Wm. C. DeRyder's b f Kilo Watts by General Watts, dam Miss Douglas by Cochato.

Dr. Wm. Dodge's b c Bon Rex by Bon McKinney, dam Johanna R. by Limonero.

Jas. F. Dunne's bl f Prieta by Tom Smith, dam Letter B. Jr. by Benton Boy; b f Viola Watts by General Watts, dam Native Bidwell by The Native.

V. K. Dunne's ch c The General Bond by General Watts, dam Bourbon Bond by The Bondsman.

W. G. Durfee's ch f by Copa de Oro, dam Christianita by Zolock; b f by Carlokin, dam My Irene S. by Petigru; b f by Carlokin, dam Honey Healey by Zombro.

E. A. Gammon's b c The Meteor by Peter McKlyo, dam Cleo Dillon by Sidney Dillon.

Alex. Grant's br f Margaretta Lou by Wilbur Lou, dam Sona by McKinney.

H. H. Helman's b c Baron Mowry by The Bondsman, dam Lady Mowry by McKinney.

Hemet Stock Farm's ch c by Wilbur Lou, dam Eradiate by Geo. W. McKinney; b c by Wilbur Lou, dam Fiesta Queen by On Stanley; b f Hemet Queen by Wilbur Lou, dam Hemet Girl by Geo. W. McKinney; ch f Edith Carter by Kinney de Lopez, dam Louise Carter by Chestnut Tom.

H. A. Hershey's b f Skye Ball by Jim Logan, dam by Falrose.

Dan E. Hoffman's b f Onward McGregor, dam Bonnie Melba by Bon Guy.

H. S. Hogoboom's ch f Beautiful Baby by Palo King, dam Beautiful Morn by Iran Alto.

R. S. Irvine's b c Vannan by The Bondsman, dam The Bloom by Nushagak; b f Bonnetta by The Bondsman, dam Beretta by Searchlight.

Abe W. Johnson's b c W. J. K. by Directum Penn, dam Belle Raymon by Raymon.

Ed. Lavin's br c Eddie L. by George Hammett, dam Stella McKinney by Ed. McKinney.

Wm. Loftus' b f by Copa de Oro, dam Leonor McKay by McKinney; b c by Copa de Oro, dam Annabelle L. by Hamb. Wilkes; b f by Carlokin, dam Iran Belle by Iran Alto.

A. W. Longley's b c by Prince Ansel, dam Ella J. T. by Bob Mason.

Carey Montgomery's b c Tennessee Bill by Jim Logan, dam Lela H. L. by Nutwood Wilkes.

Dr. M. F. Schaltenbrandt's b c Wm. McKinney by Scott McKinney, dam Kate by Antevolo.

W. L. Scott's ch c Wilbur Lou 2d by Wilbur Lou, dam Lady You by Stanton Wilkes.

W. L. Selman's br f Bess by Prince Zombro, dam Bessie Mack by Herman.

T. D. Sexton's bl f by Vernon McKinney, dam by Oh So.

J. E. Short's b c Tom Morris by Skidoo Wilkes, dam Honda Girl by Rubino.

C. M. F. Stone's b f Harriet by Carlokin, dam Cora Jane by Del Coronado.

L. H. Todhunter's foal by Peter McKlyo, dam Zombowyette by Zombro; foal by Peter McKlyo, dam by Osmuda by Bon Voyage.

M. L. Woy's br c Strathalie Hall by Black Hall, dam Strathalie by Strathway.

One of the anomalies in the Denver show this year was the mare Alice E. N., a Kentucky standard bred, who won the first place in the roadster and trotting class. Although an ordinary street mare pulling a delivery wagon, Alice E. N. has twice won the Joslin cup as the best road horse in Colorado, and during her show career has earned more than $2,000 in prizes. She was foaled at Elmendorf in 1906 and is of the blood of Prodigal and Neonta, owned by J. B. Haggin. She was brought to Colorado when young and raised on the MacRose farm of Colonel George S. Newman near Denver.

✤ ✤ ✤

The management of the mile track at Readville, Mass., has announced a race meeting of five events, carrying $11,000 in purses, for July 4. The American Trotting Derby for three-year-olds eligible to the 2:20 class will be for a purse of $3,000; the Massachusetts 2:08 trot and a free-for-all pace will have prizes of $2,500 each attached and the 2:14 trot and 2:18 trot will be for $1500 each. The races will be decided in heats of one mile each, best two in three, with the entrance three per cent.

Thoroughbred Matters

The good horse Ed Cudihee, winner of the San Diego Business Men's Handicap at Tijuana in which race he defeated Geo. Wingfield's Slippery Elm and other good horses, was bred by Aaron Neale at Sunnyside, Washington. Ed Cudihee is sired by Golf Ball, dam Purse Rose that was out of imported China Rose. Louise Miller, the nice filly now racing at Tijuana in Mr. Neal's colors, is a half sister to Ed Cudihee. Mr. Neal's great mare Purse Rose is at Mr. Geo. Wingfield's Nevada Stock Farm at Reno and is safe in foal to his fine stallion imported Honeywood. The resultant foal from this mating should be a valuable one. Ed Cudihee was named for Mr. Neal's long-time friend, Edward F. Cudihee, former Sheriff of Kings county, Washington.

✤ ✤ ✤

It is probable that the Tijuana meeting will be extended beyond the 100 days advertised.

✤ ✤ ✤

The abolition of the gelding allowance of three pounds, which is in effect on The Jockey Club tracks, was supported by many on the assumption that when a racehorse was broken down he would be worthless if a gelding, but more or less valuable if a stallion. Then again it was pointed out that in many cases like those of Roamer, Stromboli, Borrow, Boots and many other good ones ,the loss inflicted upon the horse breeding industry was very material. But it now appears that the abolition of the gelding allowance has done little or nothing to reduce the number of geldings.

✤ ✤ ✤

An epidemic of typhus fever brought the meeting at Juarez to an abrupt close and a consequent heavy loss to Price McKinney and his associates of the Juarez Jockey Club. The rigid quarantine established against Juarez by El Paso came after the death of Dr. W. C. Kluttz (health officer of the Texas city), who was a victim of the disease. It was after his death that the mayor of El Paso established the quarantine. Under the quarantine no person may enter El Paso from Juarez, or any other point in Mexico, without the most rigid examination and disinfection.

✤ ✤ ✤

Charles Scribner, the magazine and book publisher, having bought the bay stallion Uncas Chief, by Ben Strome out of Passion Flower, has sent him to his farm at Far Hills, N. J., where he will be employed for the breeding of hunters and saddle horses. Uncas Chief is the last stallion son of Ben Strome, the sire of Highball, Roseben, and other good ones. Ben Strome was one of the largest and most impressive looking sons of Bend Or brought to this country.

✤ ✤ ✤

While no move has been made as yet to allot dates for the eastern racing season of 1917, the Maryland Jockey Club, which operates the Pimlico track, has issued its list of stakes for the Spring meeting, which it is presumed will be held early in May. Entries will close on April 2 and large purses are offered for the chief events. The stakes announced are the Spring Juvenile, for two-year-olds, at four and one-half furlongs, with $2000 added; the Preakness for three-year-olds, with $5000 added, at one mile and one-eighth; the Pimlico Spring Handicap, for three-year-olds and upward, with $2500 added, one mile and seventy yards, and the Green Spring Valley Steeplechase Handicap, for four-year-olds and upward, with $2,000 added, two miles. No purse of less than $700 will be offered for overnight events.

✤ ✤ ✤

There is every possibility that the three great classics—the Derby, the Oaks, and the St. Leger—will be restored to the coming season's calendar of English flat racing which commences this month. Strong appeals have been made by owners, trainers, and breeders to The Jockey Club, for it is felt especially that the entries which have already been made for these races should be allowed to stand, as well as the conditions, and that the Ascot Gold Cup should also be revived under its original title. Of course, all four events will have to be run off at Newmarket, as their original values are not available, but, after all, it is the names of the races and not the places at which they are decided that are of most significance and value to the all-important breeding industry.

✤ ✤ ✤

The National Hunt Stewards have decided that the Grand National—the blue ribbon of the English steeplechase season—will be run off over the Gatwick course on March 21. A number of fine entries have been received for this classic race, including Ally Sloper, winner in 1915; Sumoch, who scored twelve months earlier, and Irish Mail.

✤ ✤ ✤

That it pays to nominate a number of horses for an event such as the Futurity is shown by the announcement that John E. Madden has transferred the entries of twenty-one nominations for the Futurity of 1918 to Hal Price Headley. All these yearlings are by Star Shoot. There are eleven colts and ten fillies.

Polymelus Most Successful Sire in England.

Going to the stud when six years old, not as a classic winner, but as merely a well bred handicap horse, Polymelus is making a record as a sire in England that has not been equaled since the days of the great St. Simon, more than twenty years ago. Among his rivals in the stud were nearly a dozen winners of the Derby or the St. Leger, yet the horse whose best performance was a win in the Cambridgeshire Handicap, with 122 pounds up, has beaten them all by leading the list of winning sires three years in succession, which no other horse save St. Simon has done in a generation or more.

That wonderful sire led the list four years in succession and with his sons held the place of honor twelve years out of twenty-one before Polymelus came to the front in 1914. Persimmon, one of the sons of St. Simon, won the first place four times between 1902 and 1912, but no two years were together. Cyllene, the sire of Polymelus, is the only horse that has topped the list two years in succession since 1896. He was sold for export to South America at the height of his stud career, else he might now be outshining his best son in England.

Polymelus is bred for the great stock horse he is proving to be. His sire got four Derby winners in eight years and he was a son of Bona Vista, whose sire, Ben d'Or, got the dam of Polymelus, was by Hampton, the sire of three Derby winners, out of Queen Victoria's famous old mare Quiver, by Toxophilite, that produced La Fleche and Memoir, fillies that in their respective years won both the Oaks and the St. Leger.

Polymelus is fifteen years old. He was bred by Lord Crewe. As a two-year-old he won three of the eight races in which he started. At three he ran eleven races, in all but four of which he was beaten, but he finished second to Challacombe in the St. Leger and second to St. Amant in the rich Jockey Club Stakes. He won the Cambridgeshire as a four-year-old and at five won the Princess of Wales Stakes, but was easily beaten by The White Knight for the Coronation Cup at Epsom.

It was not until 1912 that a high class race horse by Polymelus appeared. In that year Maiden Erlegh ran second to Tracery in the St. Leger. Two years later Black Jester, by Polymelus, won the Doncaster classic from the largest field seen in fifty years, and in the same year Honeywood, by Polymelus, won the Cambridgeshire. Then came Corcyra, one of the best three-year-olds of 1914; Pommern, winner of the New Derby and St. Leger in 1915; Fifinella, winner of the New Derby and New Oaks last year, and Cannobie, the colt that beat the Caesarewitch winner, Sanctum, for the Jockey Club stakes, now the richest prize of the British turf.

In the six years they have been running the offspring of Polymelus have won $410,000, a large sum when it is considered that racing in England has fallen off to one-fifth its normal volume since the beginning of the war. The earnings of the family last year were $80,000 as compared with $48,000 for that of Chaucer; $44,000 for Sunstar; $35,000 for Radium, $30,000 for Captivation, $26,000 for Orby, $26,000 for William the Third, $23,000 for Marcovil, $22,000 for Desmond, $22,000 for Spearmint and $21,000 for Bayardo.

Of these eleven sires four are descended in the direct line from Ben d'Or, the Derby winner of 1880. When he was twenty-five years old he got Radium, the fourth horse on the list. His son Bona Vista got Cyllene, the sire of Polymelus and of Captivation, while Ormonde, another son, got Orme, the sire of Orby. This line comes down from Eclipse through Stockwell, Birdcatcher and Sir Hercules, and is generally known as a branch of the Stockwell family. But in spite of the fact that British breeders sold for export its greatest representatives, Ormonde, Flying Fox, Galtee More and Cyllene, the Ben d'Or branch at present overshadows all the other lines from Stockwell and Birdcatcher, whose best recent representatives were Rock Sand, Isinglass and Gallinule.

Chaucer, Desmond and William the Third are sons of St. Simon, whose daughter, Charm, produced Captivation, an Irish sire that has come to the front with a rush. Angelica, the full sister of St. Simon, produced Orme, the sire of Orby. Galopin, the sire of both St. Simon and Angelica, got Donovan, the Derby winner of 1889, and the sire of Galliard, who got Black Duchess, the dam of Bayardo. Going back another generation, Vedette, the sire of Galopin, got Speculum, sire of Roseberry, sire of Amphion, sire of Sundridge, sire of Sunstar, so that eight of the eleven leading sires of 1916 are direct descendants of this horse Vedette, winner of the Two Thousand Guineas, in 1854, and of two Doncaster cups.

———o———

Sixteen polo ponies, bred at Capt. W. H. McKittrick's farm near Bakersfield, were shipped on the steamer Lurline to Honolulu last Tuesday for Walter Dillingham, one of the polo enthusiasts of the island territory. Dillingham will head a Honolulu team next year that has planned to make a tour of the United States, and the McKittrick ponies, it was said, would be used as mounts. They will be given their first tryout next month in the polo tournament to be played at Honolulu.

✤ ✤ ✤

During the four days of the New Zealand cup meeting the sum of $878,485 passed through the totalisators. We doubt if any such amount was ever wagered on a track in the United States in four days.

Pioneer Mail-Messengers Before Pony Express.

A long-delayed recognition has at last come to heroic pioneers who carried the mails to California for ten years before the famous "Pony Express" was established.

Everyone knows the romantic story of the "Pony Express," but by a curious irony of fate the world had forgotten until now predecessors who for a decade faced every danger of nature and of hostile Indians to carry the mails across plains and mountains to California. This forgotten history has been recovered through documents sent to the California Historical Survey Commission, at its headquarters at the University of California, by H. Chorpenning McKee of Berkeley.

Discovery has been made by Owen C. Coy, Secretary of the Commission, through examination of these documents, that as early as April 25, 1851, nearly ten years before the "Pony Express" was started, the United States contracted with George Chorpenning and Absalom Woodward to pay $14,000 a year to have the mail carried once each month between Salt Lake and Sacramento. The contractors agreed to make the 910-mile journey in not more than thirty days. The original route was along the regular emigrant road through Placerville, crossing the Sierras at Carson's Canyon, then following along the Carson and Humboldt rivers and around the northern end of Great Salt Lake. In the first journey across the mountains it took at times a whole day to make two miles through the snow. Before the end of the first year, Woodward was killed by Indians, near Great Salt Lake. Winter proved the northern route impracticable, so, after an unsatisfactory trial of the Feather-river route, Chorpenning changed the winter route so that the mails went from Salt Lake to San Pedro and thence on a Panama mail steamer to San Francisco. By 1858 the quantity of mail to be carried increased so much—and also the government remuneration—that Chorpenning was able to run a stage-line of four-horse coaches along the mail route. A new route was discovered, south of Great Salt Lake, which shortened the journey a hundred miles.

The very idea of the "Pony Express" was anticipated by Major Chorpenning, for in December, 1858, when the President's Message was about to be issued, Chorpenning placed a fresh horse at each mail station from Salt Lake to California, and Sacramento read President Buchanan's second annual message only seventeen days after it had been delivered to Congress. This was two years before Russell and Company established the famous "Pony Express."

Californians who read a Chicago newspaper only three days old, or who look out over the desert from a dining-car table, little realize the dangers and difficulties of these long-forgotten pioneer mail contractors. During the ten years Major Chorpenning was engaged in this service, says Mr. Coy, he lost at the hands of the Indians nearly three hundred head of horses and mules and many coaches, wagons and station buildings, and sixteen of his brave messengers were slain by the Indians.

———o———

The English Government has notified the Irish Turf Club that, in the interests of the State, the number of days of racing in Ireland during this year must be reduced considerably. Since the railways were taken over by the Government pleasure traffic of all description has been discontinued. Thoroughbred horsebreeding is one of the most important and remunerative industries in Ireland, more than 100,000 horses having been exported from the Emerald Isle for war purposes.

✤ ✤ ✤

The new regulation which prohibits the English railways from conveying horses to race meetings has not interfered with the steeplechase season in any way. A service of motor vehicles has been installed from the training stables to the various racecourses.

———o———

Stayers Descended From Roarers.

If roaring is hereditary, as was asserted in 1891 by the prominent breeders and owners who objected to the return of Ormonde, it is indeed strange that the taint has not disclosed itself in his descendants. Melbourne and Macaroni were roarers, but the present-day line of Melbourne, via West Australian, Solon, Barcaldine and Marco, has given us not roarers, but, on the other hand, such excellent stayers as Beppo, Mark Time and others of less note, together with brilliant horses at from a mile to a mile and a quarter or thereabouts, in Neil Gow, Marcovil, Sansovino, Malua, etc. Similarly the Wolf's Crag branch of Barcaldine has produced good stayers in Karakoul, War Wolf and Bellivor Tor, while Manwolf, Catty Crag, Dumbarton Castle, Linacre (now a successful sire in Australia) are only a few of the other sons of Wolf's Crag that have been prominent winners. Then, as to Macaroni, mares by him have been of inestimable value. Both Kendal and Ormonde were out of daughters of Macaroni out of mares of the Agnes family.—[London Sportsman.

———o———

One never hears of trouble or dissatisfaction over the conditions of selling races in England, such as is common at almost every race meeting on this side of the Atlantic. The difference seems to be, not in the conditions, but in the attitude of owners, who, in America, want the opportunities without any consequent responsibilities. In England horses are put into selling races to be sold, which is the last thing in the minds of owners on this side.

Six young women of the Young Women's Christian Association, of Fresno, have recently fostered a horseback club. They made their first ride Saturday to Kearney park and return. Many like trips will be taken other Saturdays. It is expected that the club will be considerably enlarged within a short time. The club has been organized under the supervision of the physical director, Miss Alice Lehman.

✤ ✤ ✤

Scottie Moore McDonald, advertised for sale in this issue by J. R. Hodge, of Laddonia, Mo., is one of the best saddle horse sires in Missouri and has been greatly admired by many noted horsemen. He is sired by Rex McDonald and his dam is by Kentucky Cavalier 403. He was first prize three-year-old stallion at the Iowa and Minnesota State Fairs and has been a big winner at Missouri county fairs.

✤ ✤ ✤

The owners of good breeding horses in Missouri are lining up for the Stallion Registration Law, which was recently introduced by Representative B. T. Gordon, of Liberty, Mo., himself a well informed breeder. The bill is an improved form over many stallion laws now in effect in other states and has the endorsement of progressive horsemen of the state who hope for its adoption.

✤ ✤ ✤

Sixteen Polo ponies, representing the best blood in California, were shipped to Honolulu last week. They are from Captain W. H. McKittrick's farm at Bakersfield and are consigned to Walter Dillingham.

✤ ✤ ✤

Mrs. Adelaide Gillis McCormick, of Los Angeles, has sent her celebrated matron, Undine, by Chester Dare 10, and the dam of many winners, to the court of Montgomery Chief, the premier sire at the head of Ball Bros.' farm, Versailles, Ky. Montgomery Chief is the sire of as many champion saddle horses of the present day shows as any living stallion and the cross with the beautiful daughter of Chester Dare will be watched with interest.

✤ ✤ ✤

Missourians are indeed proud of the fact that Governor Gardner's inclinations are of the most democratic nature. He gets to the Executive office early in the morning, doffs his coat and goes at his important duties in his shirt-sleeves. After his day's work, and in the late afternoon, he mounts a good Missouri saddle horse and forgets the worries of his important position in an exhilarating, healthful and pleasant hour spent on his horse along the highways of Cole county. As often as her household and social duties will permit, the Governor's estimable wife joins him on these pleasant excursions for, like her distinguished husband, Mrs. Gardner is a great lover of the noble equine and is a thorough and capable horsewoman. With the Governor and Mrs. Gardner setting this splendid example those high in official life at our State capital are rapidly following suit and it may be expected that with the coming of spring and summer many of the Jefferson City elite will be improving health and morals by daily jaunts to the countryside horseback.

✤ ✤ ✤

Jas. A. Houchin, of Jefferson City, Mo., is of the same opinion as the Breeder and Sportsman, as regards horse shows in California, and in a letter to the writer, declares that the horse show stables of Missouri and Kentucky will rally to the call and give their support to the West. He also suggests a circuit of big shows regarding which he makes the following comment: "I talked horse shows when I judged at Salem, Ore., last year and I have no doubt, in fact I know, those people up there are anxious to get in a horse show circuit. A show at Denver, Salem, San Francisco, Los Angeles, El Paso and up to Fort Worth, would certainly be a "stem winder" and would attract the leading stables of this section. Once they give a properly conducted horse show, the future of the shows in those places will be assured. If we can find a winning gelding and mare this year our stable will be in the midst of the fray from the tap of the first bell. Astral King is in his prime and we have some youngsters coming on that can win. Whether we show or not I would like to see the circus started and we will come in time."

DENVER'S GREATEST HORSE SHOW.

[Written for the Breeder and Sportsman by "Looker On."]

"Number Four!" the clarion voice of Superintendent Harry Youngermman echoed through the great building, and the multitude that had sat spellbound throughout the high jump broke into deafening cheers as the splendid chestnut gelding, Great Heart, owned by the Mayslake stables Chicago and ridden by Fred Veasey, trotted out for the blue ribbon; twenty minutes later taps were sounded and the lights were turned out, and the 1917 performance of the National Western Horse Show, at Denver, Colo., passed into equine history upon whose golden pages there will be no more alluring story.

From its inception the Denver show of 1917, which is the forerunner of all live stock exhibitions, was particularly fortunate. Fortunate in the selection of the men who guided its destinies; fortunate in the quanaity and quality of its entries; fortunate in the prosperity in evidence on every hand, and last of all, fortunate in being favored with weather such as Colorado alone can at times produce. All these things and more contributed toward the success of the show and resulted in an attendance which, at the entire eight performances, taxed the seating capacity of the stock yards coliseum. Seats at all times were at a premium and the promenade was thronged with people who divided their attention between Denver's gaily clad Four Hundred and the blue bloods of the arena. Society was out in force, and when Denver smiles the whole world stands aside.

Fred P. Johnson, long identified with the live stock interests of the West and promoter of previous exhibitions, was ably assisted by Robt. R. Boyce, who acted as secretary of the horse show. R. P. Shollenberger was retained as Ring secretary and the only Harry L. Youngerman, whose friends are legion and whose efficiency and popularity are the subject of much comment, handled the show as master of ceremonies; and be it said, to his credit, that there was not an idle moment or a lull in the entertainment during the week.

MISS LOULA LONG,
America's Most Noted Exhibitor of Horses, Who Revived Her Usual Success at the Denver Horse Show.

Mr. D. Schilling, known to every one as a breeder, owner, exhibitor and all-around horseman, acted as chairman of the Directing Committee. He was as usual untiring in his efforts to serve the best interests of the show and please its patrons. One can always avoid criticism by saying nothing, doing nothing and being nothing, but such an individual has no place in the show ring. His determination to get impartial results regardless of ownership was commendable, and his selection was a happy one. He was ably assisted by Mr. Bruce G. Easton, a well known breeder of saddle horses, and Mr. J. A. Osner, prince of good fellows, of Denver.

The ribbons were tied by W. S. Roberts of Lexington, Ky., James Lockridge of Fayette, Mo., and Walter Palmer of Ottawa, Ill. Their decisions were rendered with a promptness that implied proficiency and were well received.

Capt. Louie Verdier of the French army judged all hunters in a satisfactory manner.

The ceremonies were opened on Monday night with a class for trotters with records, which was won by the veteran stallion Tommy Doyle, from the stable of Geo. J. Peake, Winchester, Ill. Britton Forbes, heralded as a champion, was placed second; his speed was terrific but he became erratic as the show progressed and lost all chance of winning. Homer Allerton, well shown by Tom Bass, was third and Tommy Piper fourth.

High stepping pairs revealed entries from the stables of John R. Thompson, Miss Loula Long (two entries), and O. J. Mooers. Ribbons were awarded in the order named. First going to Pride & Oakwood, second to Revelation and Reputation, third to Fascination and Flirtation, and fourth to Pick of the Basket and Adora.

Ladies' saddle horses, three-gaited, was won by John R. Thompson's Nancy Walker, ridden by the charming little daughter of the restaurant magnate Lady Fascination, of the Mayslake stables, was placed second, Cathryn Countiss third, and Chloe Malone fourth.

Heavy Harness horses, 15.2 and over, resulted in one of the best contests of the entire week. John R. Thompson's bay gelding, Sir Edward, evidently in marvelous form and faultlessly shown by Ed. White, finally won from Miss Long's Reputation, Mr. Thompson's Lord Brilliant and Miss Long's Exclamation.

Five-gaited saddle mares developed into a battle royal between Miss Long's Joan Sawyer, Mr. Eaton's Princess Eugenia and Mr. Davis' Helen Hicklin, placed as named. Mr. Eaton's mare was always the favorite with the crowd and the judges were nearly stampeded as the audience shouted its approval. Form was thrown to the four winds by most of the riders and at every call for a different gait a free-for-all race resulted, Willie McDonald, ridden by Bass, showing astonishing speed at the trot and Helen Hicklin racking out from under Roy Davis in a startling manner.

Ebony girl and Lovely Lady annexed another blue for the Thompson stable in the tandem over 14.2 and under 15.2; second going to O. J. Mooers with Pick of Basket and Adora and third to Honey Girl and Southerner, the local entry of J. M. Kuykendall.

Heavy harness horses, single, under 15.2, produced four splendid mares and was finally won by Miss Long's Realization, with O. J. Mooers' The Spring Maid the real contender, 2nd; Mr. Thompson's Lovey Lady was third and Miss Long's Fascination fourth.

Tommy Doyle, minus the master hand of the sage of Winchester and as nearly guideless as a horse could be, received fourth place in a class for roadsters single, Miss Long's Aspiration and Anticipation being placed first and second, respectively, and the gray mare Miss Beulah, "the idol of the gallery," third.

My Major Dare was withdrawn from the stallion class for five-gaited horses of any age, at the request of the management, and Beauchamp, from the stable of Blades & Holeman, simply tramped on the remainder of a very good field. Mr. J. A. Osner's bay colt Mary's Artist made his first show, and, destined for future honors, was awarded the red ribbon. D. Schilling's Noble Rex was third and Tom Bass with Sulton Star fourth.

Miss Marie Eaton and Don Reavis, faultlessly mounted, made a strikingly beautiful picture as they cantered to victory in the class for pair of riders. Ray Davis and Mrs. Holman were second and Miss Daly and Mr. Fitzell third.

The riding of Miss Marie Eaton in the class for Girl riders under 18 years was one of the notably artistic events of the week. Princess Eugenia was in splendid form and never responded to professional hands as she did to the magic touch of the Miss from Eaton farm. Scarcely less proficient was the work of Miss Florence Flick, Miss Barbara Petrikin and Miss Louise Tebeau, who caught the judge's eye as named.

On Wednesday night Lord Brilliant won the Gig class from a field which did not tax his ability. Mrs. Holman won the Ladies' cross saddle class, and Miss Long's dainty black mare again took the roadsters into camp.

The appointment class for Ladies' horses, single, was won by Miss Long's Realization, with her Combination second. The three-gaited event went to Nancy Walker, and Revelation and Reputation won the pair class for horses over 15.2,

Alice E. N. won a second leg on the Joslin Dry Goods challenge cup which has been the subject of local rivalry for five years.

Miss Beulah, the Annette Kellerman of the horse world, was all the judges could see in the class for ladies" saddle horses owned in Colorado, and Walter Burcher, who has had the winning habit for years, carried away the blue in the class for boy riders.

H. Rasmusson won the Sporting tandem event in record breaking manner.

The $1,000 Colorado stake for five-gaited saddle horses was the magnet which drew an audience that packed the house to the rafters on Thursday evening. Eight entries responded to the bugle and entertained the responsive audience for thirty minutes as perhaps no show has done before. Brilliant as has been the career of My Major Dare and great as has been his prestige, it is doubtful if he has ever entered the ring in more superb form or staged a more dazzling performance. It was a foregone conclusion that he would win and he was not extended but for an instant at each gait, but it was the opinion of those who know him best that he is right now at the zenith of his achievements, and stands unqualifiedly the peer of all living saddle stallions.

Beauchamp, well ridden by Dell Holeman, was an easy second, and is, in the writer's opinion, a coming champion. Adelaid Jeanette, formerly The Decoration Lady, was placed third; Princess Eugenie fourth; Helen Hecklin fifth, and Mary's Artist sixth.

One of the really sensational thingc of the show

(Continued on Page 7, Column 3.)

Notes and News

The New England Trotting Horsemen's Convention will be held in Boston today and 500 are expected to be present.

✤ ✤ ✤

The Lake Erie Circuit offers racing over half mile tracks this year from the first week in June until the last week in October.

✤ ✤ ✤

The green trotter Joe Matthews by Kentucky Todd that is in J. B. Stetson's string at Sacramento can 2:20 right now and looks like one of the good trotters for 1917.

✤ ✤ ✤

Read Secretary Gocher's article on "Winraces and Time Allowances" on page 3 and you will be able to figure out exactly the class to which your horse is eligible this year. It is a timely article.

✤ ✤ ✤

Sixteen two-year-olds, 80 three-year-olds and 114 four-year-olds have trotted to records of 2:10 or better. Two two-year-olds, three three-year-olds and five four-year-olds have trotting records below 2:05.

✤ ✤ ✤

The stallion Zomblack 2:14¼, bred by James W. Marshall of Dixon, and now owned by R. J. MacKenzie, is making a season in the stud at Palatine, Illinois, where he is in charge of Charles ("Red") McDonald.

✤ ✤ ✤

It is said that some of the associations are throwing fits over the new mandatory rule which awards all the moneys to a horse distancing the field, and predictions are already being made that they will insist on its being rescinded next year.

✤ ✤ ✤

Cornelius J. Griffin, who was well known in California as a trainer of race horses, and who was a familiar figure at Emeryville and Ingleside years ago, died at his home in Martinez this week, aged 79 years. He was a native of Canada.

✤ ✤ ✤

Of the 34 stallions that are sires of more than 100 standard performers, but six are living. They are Peter the Great 2:07¼, sire of 286; McKinney 2:11¼, sire of 203; Axworthy (3) 2:15¼, sire of 152; Moko, sire of 143; Bingara sire of 125, and Walnut Hall 2:08¼, sire of 117.

✤ ✤ ✤

Bon Watts, James Thompson's son of Gen. Watts, is now a three-year-old and a better looking colt it would be hard to find. Thompson has him at the Sacramento track and is only giving him exercise at present.

✤ ✤ ✤

A payment of $10 will be due and payable on Thursday, March 1st, on all three-year-olds that are still eligible to Pacific Breeders' Futurity No. 14, which stake has a total value of $7,250, and which is to be raced for this year at the Breeders' meeting.

✤ ✤ ✤

Marysville will almost certainly be on the California circuit this season. J. E. Strain of that city and other enterprising stock men have already taken the matter up and will soon get to work to organize and get a guarantee fund for a good fair and race meeting.

✤ ✤ ✤

Joseph Waddell, secretary of the California Fair and Racing Association, took a look at L. H. Todhunter's stallion Peter McKlyo 2:06 for the first time last week and pronounced him one of the best looking stallions he had seen in many a day, and Joseph has seen "quite a few" during his lifetime.

✤ ✤ ✤

The sale of the Billings horses will undoubtedly occur some time next fall—if not sold as a whole in the meantime—and will take place either at Lexington during the October "trots" at Curles Neck Farm, or in New York City, Uhlan 1:58 and Lou Dillon 1:58½ being the only two that Mr. Billings will reserve.

✤ ✤ ✤

Lou Dillon 1:58½, the trotting queen, is 19 years old, has been bred 11 times, has produced eight foals, seven of which are living. Her latest foal, a filly, came January 11 and is by The Harvester 2:01. Three of her produce are in the 2:10 list and five have taken standard records. One of her daughters is the dam of a standard performer.

✤ ✤ ✤

George Ryan has in training at the Pleasanton track a handsome three-year-old colt by Flosnut, dam by Dillcara. Considering the short time the colt has been taken up, he is showing remarkably well. Anyone looking for a promising three-year-old would do well to see this colt as the owner will be pleased to dispose of him to someone who would develop him.

✤ ✤ ✤

Lou Mativia has four head in training at the Dixon half mile track. The six-year-old stallion Healini 56150 is showing up well and acts like a real trotter. He has no record. Others in his string are two four-year-olds by Logan Pointer, a four-year-old mare by Alton, and a three-year-old by Logan Pointer.

The Chicago Breeders' Gazette of last week says that owing to scarcity of heavy steers heavy cows are being substituted in kosher trade and are selling at the high point of the season ,anywhere from $9.25 to $10 being paid. Shortage of fat yearling steers is making a high market for heifers, one, averaging 1,260 pounds, selling this week at $11.

✤ ✤ ✤

Back in 1892 Budd Doble drove Martha Wilkes to what was at that time the record for the three fastest heats in a race. The heats were in 2:12, 2:10 and 2:09½, an average of 2:10½. Ed Geers now holds this record and has held it since 1914, when he drove Etawah, a four-year-old colt by On Stanley, three heats in 2:03½, 2:03½ and 2:03¾.

✤ ✤ ✤

Mr. George J. Giannini, president of the San Francisco-California Driving Club and a director of the Pacific Coast Trotting Horse Breeders' Association, who went east two weeks ago on a business trip, underwent an operation for appendicitis at a hospital in Washington, D. C., on February 4th. The operation was successful and his recovery is expected to be speedy.

✤ ✤ ✤

The Solano County Fair Association will give its fair and race meeting at Dixon this year and will increase its purses to $400 for the majority of the events, with a $500 purse for each of the fast classes at trot and pace. It is probable that the stretch and first turn of the track will be widened before the meeting. The live stock exhibit will be again made one of the big features of this fair.

✤ ✤ ✤

P. W. Hodges has a string of horses at the Stockton track which are being prepared for the California circuit. Mr. Hodges has been one of California's most successful breeders. He bred the great stallion San Francisco 2:07¾ now owned by Walnut Hall Farm, Lexington, Kentucky, and he also bred Copa de Oro 1:59, the fastest pacer ever bred in California.

✤ ✤ ✤

A meeting of the members of the California Fair and Racing Association will be held in San Francisco on Saturday, February 24th to complete the organization of a California circuit. Every person interested in the breeding, training and racing of harness horses is invited to be present. The hour and place of meeting will be duly announced.

✤ ✤ ✤

Of the 55 trotters in the 2:05 list, 25 are out of developed dams. Uhlan 1:58, the fastest of them all, is out of an undeveloped dam, as is Lou Dillon 1:58½, the fastest of all trotting mares. Lee Axworthy 1:58¼, champion trotting stallion, is out of a developed dam, but The Harvester 2:01 that he displaced is not. Of the six trotters that have beaten 2:02, but two are out of developed dams.

✤ ✤ ✤

Says the North Pacific Rural Spirit: "When the California racing interests came to Oregon and employed Joseph Waddell, of Baker, to act as the secretary of the California Fair and Racing Circuit, they picked up one of the most capable men to be found for that work that is to be done. Mr. Waddell is probably one of the best informed men along this line of work in the West and if a successful series of meets is in the cards he will make a go of it."

✤ ✤ ✤

Elmo Montgomery's string from which his campaigners for 1917 will be selected are now at the Woodland Stock Farm track. The old hero of the homestretch, Jim Logan 2:01¾, is making a season there in the stud but will be ready to race in any classes to which he is eligible. Lock Logan 2:07½ and Hal Logan are in good shape and the three-year-old Marshall Logan and the two-year-old Tennessee Bill are both entered in stakes and will be out for their share of it this year.

✤ ✤ ✤

The special catalogue for the Walnut Hall Farm consignment to the Midwinter sale at Madison Square Garden, this month, contains a list of fifty-six yearlings, five two-year-olds and one six-year-old. Number one on the list is Ferncroft, a full brother to the world's champion two-year-old filly The Real Lady 2:04¼, and the largest money winner of her age, a total of $13,663.

✤ ✤ ✤

Dr. D. F. Herspring of Woodland has bred his mare Niquee 2:13¾, by Joe Patchen 2:01¼, to Chas. Silva's game and fast pacing stallion Teddy Bear 2:05. The resultant foal will have a lot of speed and racing inheritance and it is to be hoped that Dr. Herspring will nominate Niquee in all the California futurities. He has recently bought a very promising three-year-old filly by G. Albert Mac (full brother to Berta Mac 2:08), dam a mare by Dictatus, that is a producer of standard speed.

✤ ✤ ✤

In Guy Axworthy, sire of the world's champion trotting stallion, there is not as much of the blood of Hambletonian 10 as one would surmise from the fact that both his sire and dam trace in the direct sire line to the Hero of Chester. Through his sire Guy Axworthy gets one thirty-second of the blood of Hambletonian and through his dam one-sixteenth, a total of but three thirty-seconds. However, the dam of Lee Axworthy has a much stronger infusion of the Hambletonian blood, as 13-64ths of her blood is that of the so-called founder of the American trotting family.

SADDLE AND SHOW HORSES.

(Continued from Page 6.)

was the speed displayed by the roan runabout champion Jack Tar. Good as he has always been, his performance at Denver was a revelation to all, and it is doubtful if there is a runabout horse living that could have taken his measure in that event.

The jumping contests of the week were as usual battles royal between the Rasmussen and Mayslake stables, with the audience waiting until the last horse was over the bars.

High class side attractions, notably the splendid girl riders from the Wolcott riding club; the Denver Division of the Boy Scouts of America; the Olinger Highlanders; the tug of war between the Police Departments of Omaha and Denver, won by the latter; the parades of draft horses and beef cattle, unparalleled in the history of the show, and last of all, the perennial, inevitable, fascinating Belle Beach, completed a program which the people of Colorado approved by their attendance and applause.

✤ ✤ ✤

Notes on the Denver Horse Show.

Where did George Peak get the new "teamster" in the single classes?

John R. Thompson's old pair, Pride of Prides and Oakwood, put up a wonderful show the first night at the Denver show. They looked fresh and fit.

Talk about pretty girls and good riders, come to the Denver show and see the Wolcott School Riding Club members.

O. J. Mooers has a splendid three-gaited mare in Chloe Malone. She has type, class and conformation; but is a little shy on manners so far. A little time, however, will correct them.

Mrs. Grace Maxwell, Denver's star rider, showed all the ladies' classes in her usual finished style and, as is always the case, every one pulled for this popular little lady.

The judges at Denver did well. There were few classes where all three agreed. There are no better horse show judges in America than "Billie" Roberts, Walter Palmer and Jas. Lockridge.

Blades & Holeman, of Holliday, Mo., sold the three-gaited mare, Theda Bara, during the show to a Denver man, who presented her to his daughter, a member of the Wollcott Riding Club. Theda Bara won her share of three-gaited classes in 1916, and more than $1,200 in cash prizes. She has defeated some of the best of her class of the present day and under the direction of Mrs. Dell Holeman, won the Lady's class at the Denver show. She carries more of the blood of Black Squirrel than any other present day show mare, and should be invaluable as a brood mare after retirement from the show rings.

✤ ✤ ✤

S. Anissimoff, riding master of the First Cavalry Riding Academy, Chicago, was in Mexico, Mo., last week in search of good desirable saddle horses for the use of his pupils. Mr. Anissimoff was accompanied by Bert Luckie, of Montgomery City, and a close inspection was made of the offerings in the stables of Lee Bros., Tom Bass and other local horsemen. While no direct purchases were negotiated arrangements were made that with Mr. Anissimoff's return to this section in the near future a car load of the type of horse he desires will have been assembled for him by Mr. Luckie. Mr. Anissimoff has been connected with the First Cavalry Riding Academy for the last twelve years. He is a native of Russia and came to this country in charge of a squad of Cossacks that appeared as a feature with the late Buffalo Bill's great show. He is an expert horseman, and, contrary to the views generally held by the foreign riding masters, is a great lover of the five-gaited saddle horse. "The gaited saddle horse is the ideal pleasure horse," this well-qualified authority said to a group of horsemen; "and I am glad that with the increasing popularity of horeback riding in the cities more interest is being shown in the gaited horse than ever before."

✤ ✤ ✤

Friends and admirers of Tom Bass, the famous trainer and exhibitor of saddle horses, are greatly interested in the sketch of him which appears in the current issue of the Breeder's Gazette, and which is written by Will L. Nelson, one of Missouri's most brilliant writers on live stock topics.

✤ ✤ ✤

Hamilton Bros., of the Blue Grass Farm, Mexico, Mo., last week sold 20 fine jacks to W. L. DeClow, a dealer of Cedar Rapids, Iowa. This is one of the best shipments these well known breeders and dealers have made this year. They have shipped several cars of jacks and fine saddle horses since the first of January.

✤ ✤ ✤

The state of Kentucky has never produced a handsomer saddle horse than Jewell Dare, advertised for sale in the Breeder and Sportsman, by Clarence B. Smith, of Shelbyville, Ky. Jewell Dare probably has won more breeding classes than any horse in Kentucky and as a sire he has proven himself the equal of any horse offered for sale. Mr. Smith's extensive business interests prevents him giving him the attention he deserves, and he will sell him for a very reasonable price, considering the breeding and class of the individual offered. Jewell Dare would be a valuable asset to the saddle horse interest of Missouri or California and the writer would like to see some one in one of these states buy him.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Cougar Hunt in Washington.—J. W. Clark, publisher of the Grays Harbor Post, of Aberdeen, Jack Winslow and Ignar Olson, the latter of the Quinault valley, returned to the lake recently after a week's cougar hunt, during which they bagged two cougars, one of which gave them a few minutes of real excitement by charging the hunters, says the Washingtonian, of recent date. Clark and Winslow returned to the Harbor.

They started out from the lake early in the week, taking Winslow's dog and Olson's dog, Ring. The hunters found the trail of a cougar, which evidently was trailing an elk. The dogs took the trail and after some time came upon the cougar where he had just killed an elk, a year and a half old bull. The hunters came upon the cougar suddenly and the dogs dashed forward. The elk carcass lay on a ledge of rock along the side of a canyon and the cougar was standing over his prey.

As the dogs dashed at the animal and the men appeared below, the cougar, an unusually large one, turned on his pursuers, something very unusual for the Olympic mountain lions, and leaped from the ledge for the men. He landed between and in front of Winslow and Olson, and not more than ten feet from either. Winslow fired twice point blank at the cougar but missed.

Showing his unusual knowledge of cougars and his presence of mind, Olson jerked off his felt hat, sprang at the cougar and threw the hat directly in its face. The animal was bewildered by the suddenness of the attack, and instead of stopping to fight sprang sideways over Winslow's head to a tall cedar, and went off on the other side past Clark and down the canyon. Olson quickly rounded up the surprised dogs and started them down the canyon in pursuit of the cougar. It was soon treed, and Clark fired at it, wounding the animal. It came out of the tree again and started to run but was soon treed a second time, and the next shot brought it down. The animal was about eight feet from tip to tip and weighed about 450 pounds.

Two days later, about three miles farther east, the hunters got another cougar, which Clark also killed.

On the trip the hunters saw large numbers of elk, and all seemed to be in good condition. There alread is considerable snow in the mountains. Mr. Clark stated that tracks in the snow and broken brush showed the terrible fight the elk and cougar they found had made. They fought along the hillside for fully 150 yards. Mr. Clark was enthusiastic in his praise of Olson's handling of the situation when the cougar attacked the hunters. He said it would do credit to a Hagenbeck.

Westminster Kennel Show—All entries, except for the pack specials beloved of the foxhunting sets, have closed for the forty-first annual dog show of the Westminster Kennel Club, to be held at the Madison Square Garden, from February 20 to 23 inclusive. In the regular and special competitions about $30,000 is hung up in prizes, in money or late, of which the Westminster Kennel Club will give about 60 per cent.

The first competition for the James Mortimer Memorial Trophy will give a sentimental interest to the unclassified specials. The award will be to the best American-bred dog or bitch at the show, but the plate must be won five times by the one person to be won out. The trophy has been purchased by the committee headed by Theodore Offerman, which has been collecting voluntary subscriptions for this purpose since the death of Mr. Mortimer, for many years, until his death, superintendent of the show. The conditions do not seem too long a string, or too burdensome to dog exhibitors, for Mr. Mortimer had so many friends among them that they really hope the competition may continue forever and so help to keep his memory green among them.

There has been an especial number of advance entries for the children's and the selling variety classes, both of which will be a special attraction in the way of spectacular charm. The regular classes have already brought entries in from British Columbia, California, Texas, Canada, and throughout the nearer points . Thus far there have been no foreign entries, but some fifty of the best British and Continental show champions have been imported for the show and will make their debut at the garden.

Waterloo Cup Abandoned.—London.—Owing to the restricted train service, labor shortage, and the inability of many of the subscribers, through loss of trainers, to fill their nominations, it has been found necessary to abandon the famous Waterloo Cup, which has caused widespread regret throughout the north of England. The annual Dog Derby has been decided without a break since its institution in 1836, when it was only an eight-dog stake. In 1847 the stake was increased to sixteen dogs and in 1838 to thirty-two dogs. In 1857 it became a sixty-four-dog stake.

The Waterloo Cup is to the coursing fraternity what the Derby is to followers of racing. The permanent trophy, in existence for many years, is a collar, to which the owner of the winner adds a silver medal. The first Waterloo Cup proper, valued at $500, was presented by the Earl of Sefton, over whose estate at Altcar the event is decided, in 1903, and a new trophy is added each year by his lordship. The winner gets $2500 in prize money, $1,000 going to the runner-up.

STORY OF THREE FAITHFUL DOGS.

Shepherd's Life Is Saved by His Best Friends in Fight with Coyote.

Salt Lake, Utah.—Dr. T. B. Beatty, secretary of the State Board of Health, wants to give the Pasteur treatment to three shepherd dogs who saved the life of their master, Eli Black, by fighting a monster rabid coyote to a standstill on the snow-covered waste ten miles north of Low station, on the Western Pacific. Black told the story of canine devotion at the Board of Health office yesterday. When he concluded Dr. Beatty said:

"I want to give the Pasteur treatment to those dogs. Where was there ever greater devotion? They shall at least be put on the leash and given a ninety-day chance for life—but I want to give them the Pasteur treatment. I wish I could."

Black is a sheep herder for the Bountiful Live-stock Company in the desert district north of Low station, with camp quarters in Puddle valley. A week ago, with a biting wind dashing the snow in his face, he turned toward the campfire, accompanied by his three dogs. His big combrero was drawn down over his eyes to break the shower of freezing snow. He was beating it sturdily along, the dogs trailing close by his side, when a stronger blast than usual made him lift his head.

About "three jumps away,' 'as the shepherd put it, and directly in front of him, a big coyote was on the leap. With presence of mind he threw out his hands, but that was all he could do, for the beast was upon him. Both the coyote and the shepherd fell to the ground with the crash, and then the brave dogs "gathered."

A fierce battle ensued, and Black bore on toward the camp, three-quarters of a mile away. The coyote dashed at his heels, refusing to keep up the fight with the dogs. He sprang again and again on the hard-driven shepherd, but every time the faithful collies dragged him down and held him for a time in a rough-and-tumble in the snow.

Black toiled on, helpless to injure the crazed animal and almost hopeless of escape. The coyote's head was swollen and covered with froth.

The dogs held to their task, and the mad coyote held to his—that, apparently, of tearing the shepherd down and ending his life . Every time the infuriated beast tore from the claws and teeth of his canine enemies, he dashed ferociously upon Black.

The desperate battle left a bloody trail over a half-mile long, but the campfire was in sight. The struggle had increased in fury all the way, and Black's strength was gone. Raising his arms in appeal to the skies, he said, he gave up and collapsed in the snow.

"What happened then?" Dr. Beatty asked.

"I hardly know," said Black, "the dogs ran all over me as I lay, and stretched out their heads to they coyote; but they seemed tired and made no advance. They just stood on me, like, reaching out to the thing. The coyote seemed as if he could not come back, and I think he turned tail and ran off across the desert. My dogs stayed with me, and I got up after awhile and made it to camp."

Black's right index finger is badly torn and his defenders are severely gashed and lacerated. Black is but a youth. His face is deeply tanned with the wind and sun. He showed no fear of the possible result of the coyote's bites, save for his "good dogs," as he called them.

Deer-Slaying Lion.—Loveland (Col).—The first deer-slaying mountain lion to have its career blasted by Government hunters sent into the Rocky Mountain National Park, under the leadership of A. J. McGlocin, was killed between the Big Thompson and the St. Vrain after dogs had trailed it from a point where it had downed and partially eaten a big buck deer.

Dogs used by McGlocin and his companions followed the trail for some distance from the foot of a steep slope where the deer was found. High up on the mountain side, the lion had caught the deer by the throat and the two animals had rolled over and over, loosening the rocks and tearing up the ground in the death struggle.

The dogs treed the lion in a big pine and the latter sought refuge in the uppermost branches. Upon being wounded it fell to the ground and proved more than a match for the two canines when they gave it battle.

BILL TO PROHIBIT SALE OF TROUT.

Many Measures in Legislature Are Arousing Interest of Hunters and Anglers.

No single topic during the brief weeks of the short session of the State Legislature received more atten than game regulation. Good bills, freak bills, bad bills—all sorts of bills—were introduced. Some who entered bills thought only of local conditions, a few, judging from the character of their pet idea, knew little of conditions; others, seemingly anxious only to have their names appended to measures, fathered bills that surely will die in the committee chambers.

A State Commission measure—the one which forbids the sale of trout—has caused as much stir among sportsmen and market fishermen as any other proposition. The Commission feels that if this law fails to get in the statute books there is grave danger of trout streams and lakes becoming barren creeks and shallows with onl yfrogs and water dogs for inhabitants.

Carl Westerfield and Commissioner Bosqui argued that the combination of good automobile roads to the lakes and organized fishing may easily offset every effort of the State to keep the number of fish up to normal.

"How easy it will be," says Bosqui, "for market fishermen to establish automobile lines to the lakes and streams. A crew of men fishing in a lake will surely exhaust it of fish. Already the improved roads are making it possible for market men to establish camps and send fresh trout to the market in twenty-four hours.

"Since Lake Almanore has been opened up, market anglers have started there, and it is only a question of time until auto highways will make all of our lakes accessible."

Secretary Mueller, of the Fishermen's Union, composed mostly of market fishermen of Lake Tahoe, fought the bill bitterly in Sacramento. He claims that not only are market men being deprived of a livelihood, but citizens are being forbidden to buy what their own contributions create.

Last season seventy-eight market fishermen were operating on Lake Tahoe. They shipped 74,138 fish, weighing 65,241 pounds. Bear Lake in the south, and Lake Almanore at Big Meadows, supplied quantities of fish.

Sentiment of many of the legislators was in favor of the bill which will establish a series of game refuges in California. If this bill is passed thirty-eight sanctuaries, wherein game may not be molested, will be created. These are to extend from the Mexican line to Oregon, with areas varying from 75,000 to 9,000 acres.

Another little bit of innocent legislation, which looks harmless enough, but which may cause a fight, is the bill which forbids aliens from carrying firearms. Since Pennsylvania adopted this measure several years ago many other states have taken it up, with a marked diminishment of violations of game laws and of police regulations.

"Meadow Lark" Struckenbruck, along with a number of curious bills, has brought up one which has met with the approval of many hunters. The Senator now proposes to close the season on mountain doves. And then comes J. N. Argabrite, from down in the southern end of the State, with another "hunch." He wants to open the dove season August 16 instead of September 1, as at present. Experts say that such an opening date would be deplorable, as the birds are still nesting at that time.

A change is proposed in the law governing the killing of deer. At present the shooting of spike bucks is forbidden, but a joker crept into the law. No deer with "straight, unbranched antlers" may be shot. The result was that some cases arose where a spike buck offender pleaded that since the horns of his deer were not "straight" he was not violating the law. The change will make the law read "unbranched antlers."

A bill designed to give the Fish and Game Commission an oversight of trappers has been submitted. If passed, this law will require that all trappers take out licenses when trapping for profit, and advise the authorities of every catch made. For similar reasons it is urged that taxidermists be licensed, and such a bill is in the hands of the committee.

And to wind up a long list of bills, of which the foregoing are only a very small part, comes the suggestion, all done in legal form by Senator Thompson of Santa Barbara, that violators of fish and game laws shall have their weapons confiscated by the deputies making the arrest. He would also empower peace officers to act as game wardens.

Catches Ribbon Fish.—Long Beach.—A ribbon fish, measuring five feet in length, was brought to the pier on Sunday by Capt. Ben Denslow of the launch Eagle. The fish was caught while Captain Denslow was angling for cod and salmon groupers off Long Beach.

Though ribbon fish frequently are caught in Mexican waters this one is the first captured in local waters. It weighed three pounds and four ounces.

The ribbon fish resembles in form the article after which it is named. The one caught by Denslow was extremely dark and possessed very sharp and powerful teeth. The fish bit off a heavy steel hook and broke in two a quarter-inch oak stick.

EAST vs. WEST AT THE TRAPS.

Ten Highest Eastern Trapshots Averaged Five Targets Better in Every Thousand.

The Ten Best Amateur Trapshots in the East.

There has always been speculation as to whether the best trapshooters are from the East or the West—and there always will be. In the 1915 averages of the Interstate Association the highest ten Western amateurs had just a shade on the highest ten Eastern shots. The highest ten amateurs in the East averaged five more breaks in every thousand targets than did the high ten amateurs of the West—for a combined average of 9615 against 9570. The Eastern shooters missed 1126 out of 28,975 targets while the Western shooters missed 1370 out of 31,890. If the ten highest shooters in the averages from the two sections could get together in a match of 100 targets, each, it would be well worth witnessing and there would be such a slight difference in the totals of the teams—all shooting to form—that the match might depend on the last target.

This idea of comparison of the East and the West and the Professionals and Amateurs in trapshooting will bring forth as many arguments as the people interested in the "sport alluring" as in any other outdoor sport. Just this kind of a yarn one year ago caused the Westy Hogans to put on a shoot between the East and the West in their Atlantic City tournament and this event will be one of the features in years to come.

This sectional rivalry brings out a lot of good keen competition that is good for the sport, for trapshooters are honest to the core and fair in all their dealings. No trapshooter will take advantage of an error of an official—they all play the game fair. This adds to the popularity of the sport.

It will be noted that in the Eastern shooters is listed the name of the late A. B. Richardson. If Richardson's name was stricken from the list the name of Fred Plum, of Atlantic City, N. J., would come next. Plum shot 4415 targets and broke 4218 for an average of .9553. The elimination of Richardson from the mythical team and the addition of Plum would bring down the average of the Eastern team slightly—but Plum, by his great run of 281 straight at Maplewood—100 of this number being from 21 yards, shows the kind of stuff he is made out of.

Local Chapter of Indians.—A California chapter of the Indians, the national trapshooting organization, which embraces in its membership the best marksmen, both professional and amateur, in the United States and Canada, is in the process of organization in San Francisco.

At a preliminary meeting, plans were made for the organization meeting to be held within the next few weeks. R. C. Reed, L. S. Hawxhurst, C. A. Haight and J. A. Cook are the men actively engaged in having a California body formed.

Interest in such an organization, of which there are many chapters in the East famous in trapshooters' records, has been stimulated by the visit here of F. C. Riehl, the first secretary of the original Indians of Arnold's Park, Ia. They organized in 1897. Since that time many chapters have been formed, among which are the well-known Westy Hogans, the East Indians of Sandusky, O., and the Southern Pappooses. The Indians have but one purpose—the furthering of trapshooting—and to that end each year an open shoot is held. Amateurs and professionals are put on the same footing; outsiders may enter, and if they are able to tally higher than the Indians, prizes go to them.

J. A. Cook states that San Francisco blue-rock men are eager to see an Indian camp established here. Already a number of scattergun enthusiasts have given their support to the Indian idea. They are: Henry Stelling, Andy Flickinger, F. K. Burnham, R. N. Fuller, Harry Ogilvie, Dr. C. N. McGettigan, George Thomas, W. A. Landry, A. G. Wilkes, N. A. Howard, W. H. Price, Barney Worthen, Johnny Conley, W. E. Cooley, Dr. E. Topham, J. W. Terry, E. B. Thorning, Dave and Frank Ruhstaller. In addition to these amateurs, at least twenty-five trade representatives will be included in the Indians.

The present plan, as outlined by J. A. Cook, is to include both Nevada and Arizona in the Indians. This will bring together the best marksmen of three states for the annual shoot, the first of which will possibly be held this year.

There is one chapter of the Indians on the Pacific Coast—the Pacific Indians of Tacoma. Their annual shoot comes in July. A number of marksmen interested in the California scheme will meet informally at the Golden Gate Club Sunday. The day will also mark the first practice shoot of the season on the Golden Gate grounds.

CAREERS OF TRAPSHOOTERS.

Martines Chick.

The career of Martines Chick, of San Diego, Cal., at the traps was a brilliant one, and covers a series of some twenty-six years. He was a member of the original Pastime Gun Club of San Diego, and is an honorary member of the present club of that name. His record is interestingly told by a correspondent of the Sportsmen's Review, from which account the following is compiled and quoted.

On March 20, 1888, a big crowd watched the race at 100 live birds between Chick and Dr. W. F. Carver, known as the world's champion wing shot. The match was intensely interesting. At the half way post, Carver was one bird behind, with 45 kills to his credit, and at 75 birds he had dropped three more birds to the rear. In the home stretch, Chick let three birds get away, two of them dead out of bounds, but from then to the finish he shot true to form, and went under the wire the winner by one bird; with 91 to Carver's 90. After the match Carver remarked, as he extended his hand in congratulation, "I didn't know you could shoot so good." Chick hesitated a minute, and replied, "I didn't either, Doc!"

Two years later, in 1890, Chick went to Oakland to shoot a series of three matches against John L. Brewer, of Australia, who claimed the world's championship. This match was for the championship of the world and a purse of $500, and was shot on June 1st. At the half way post Chick led by one bird, and in the last 50 he increased his lead, winning on a score of 95 to 92. The next match was shot on June 5th, Chick taking the lead almost from the start, winning the race with a score of 95. There was no third race, as Brewer was satisfied.

Chick was also an expert in smashing clay pigeons. In San Jose, shooting at 50 singles and 25 pairs, 16 yards rise, he turned in the fine score of 94. He missed one single and five of the doubles. In Riverside, October 29 and 30, 1888, he broke 142 out of 150, which included 30 pairs of doubles. He won the Fay diamond medal, a perpetual challenge trophy, half a dozen times; won the Selby medal; the California live bird championship; the Standard medal, and a great many other cups and money prizes. All the medals except the Fay diamond trophy had to be won three times to entitle ownership, and Chick owns them all. They are all Pacific coast trophies.

For years Chick defeated all comers. His closest rival was another Californian, Crit Robinson, of San Francisco. In a match at 75 live birds, in 1889, Chick won with 74; Robinson, 73. In 1887 Chick beat Gus Knight in a 100 live bird match at San Bernardino; Chick 88, Knight 86. This was one of Chick's poorest scores, although he lost eight of his birds dead out of bounds. In San Diego, in 1893, he defeated A. W. Bruner in a match at 100 live birds, with a score of 94 to 92.

Chick's last public appearance was in 1904 with the Spanish Bright Gun Club in Coronado. He competed for a silver loving cup given by Mrs. Walter Dupee, and won it. This race was at 50 live birds, and the old veteran rounded out his sensational trap career by making 94 straight kills, all he shot at that day, so his score in the cup race can be easily computed. Since this time Chick has confined his shotgun work to quail shooting, and he's a master hand at that game.

Portland Club.—L. L. Burtenshaw, of Council, Idaho, won the W. C. Bristol 20-gauge trophy on January 28th from Henry R. Everding, who had previously defended it successfully on three occasions. Despite the snow flurries and cold weather 18 nimrods were out at the Everding Park traps.

As Mr. Burtenshaw will be unable to be in Portland, he has turned the cup over to A. Woelm.

Four out-of-town visitors were at Everding Park—L. L. Burtenshaw, Council, Idaho; F. E. Butler, Lewiston, Idaho; Mark Siddall, Salem, Oregon, and A. J. Gerrard, Seattle, Washington.

Following are the scores on the Bristol trophy: L. L. Burtenshaw 20, Frank M. Templeton 19, E. H. Keller 19, Henry R. Everding 19, C. C. Kelley 17, F. E. Butler 17, A. L. Zachrisson 17, A. W. Strowger 16, A. Woelm 16, James K. Simpson 16, A. K. Downs 16, and A. J. Gerrard 12.

The regular practice event resulted in the following scores: L. L. Burtenshaw 96, Mrs. Ada Schilling 96, C. C. Kelley 96, Frank M. Templeton 92, Carl J. Schilling 92, A. L. Zachrisson 88, Mar kSiddall 88, E. H. Keller 84, A. J. Gerrard 84, James K. Simpson 76, F. E. Butler 76, James P. Bull 76, A. K. Downs 72, A. Woelm 72, A. W. Strowger 72, Mayfield Standifer 65, C. L. Diven 60, and Henry R. Everding 58.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ills.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Share Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 nd a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Los Angeles Club.—Owen Council and C. F. Nichols had some very lively competition at the Los Angeles gun club. The two shooters tied in the shoot for the Du Pont cup with 93x100 smashes, and it required two shoot-offs before Nichols finally won the cup. The Los Angeles shooting team defeated the visiting shooting squad in two special events.

Ed Mitchell was the real high man for the Du Pont trophy with 97x100 smashes, but as he is a pro the mark did not count. A very large crowd attended the shoot. The scores:

Ed Mitchell, handicap 16 yds., broke 97x100; H. Poston 18—96, O. Council 20—93, C. F. Nichols 19—93, H. E. Dickerman 20—92, H. Pfirrmann 20—91, H. Cline 18—91, J. Barto 19—90, R. H. Morse 19—90, L. J. Micks 20—89, F. H. Mellus 20—89, F. H. Hall 17—89, W. A. Hillis 20—88, C. F. White 18—88, H. Hoyt 18—88, L. R. Mellus 20—87, W. E. Phillips 19—86, H. E. Sargent 18—86, George Middleton 16—86, H. D. Blanchard 20—85, W. A. Cornelius 20—85, D. R. Dickey 16—85, Seth Hart 16—85, O. Evans 20—84, V. A. Rossbach 18—84, C. W. Fish 20—84, S. C. Miller 16—84, B. H. Carnahan 16—84, F. H. Mellon 19—84, George Oliver 16—83, Guy Holohan 19—83, Mrs. Pfirrmann 16—82, Geo. H. Melford 17—82, F. C. Crossman 16—82, William Kennedy 16—82, D. Holohan 20—81, F. Free 18—80, A. Pachmayr 16—79, F. H. Nichols 17—79, E. K. Mohler 20—78, Mrs. F. H. Mellon 16—73, A. J. Petersen 16—68, W. F. Nordhoff 16—63; others at 16 yards—A. W. Childs 63, H. J. Bauer 62, R. Tornby 53.

by 43, J. N. Dunn 58x75, J. H. Bishop Jr. 42x50, J. W. Meek 40x50, O. D. Ashton 37x50, Mrs. A. W. Goodrich 37x50, M. D. Towne 34x50, E. W. Selbach 32x50.

For Silver Trophy—E. J. Fisk 32x50, F. B. Winters 22x50, F. H. Teeple 22x25, J. B. Joslyn 21x25, A. B. Carter 20x25, P. J. De Hetre 19x25, Charles Gotleib 17x25, E. K. Mohler 99x100, H. Pfirrmann 98x100, V. A. Rossbach 98x100, F. H. Mellon 94x100, F. H. Teeple 94x100, B. H. Carnahan 90x100, William Kennedy 88x100, F. H. Mellus 80x80, H. Cline 49x50, Seth Hart 47x50, A. Pachmayr 47x50, Mrs. F. H. Mellon 89x100.

Locals vs. Visitors (25 targets, 16 yds.)—Los Angeles: Pfirrmann 24, F. H. Mellus 25, Council 24, L. R. Mellus 24, Fish 24, G. Holohan 25, Rossbach 24, Evans 21, Mrs. Pfirrmann 17, Cornelius 25, Pachmayr 21, Mohler 22, Hall 25, Carnahan 23—total, 324. Visitors: Dickerman 23, Phillips 20, D. Holohan 25, Micka 23, Sargent 23, Cline 23, White 23, Morse 22, Mellon 24, Barto 20, Dunn 21, Kennedy 20, Teeple 22; total, 318.

25 targets, 16 yards—Los Angeles: Pfirrman 25, Dickerman 25, Fish 24, Micka 25, Poston 24, Evans 25, White 24, Pachmayr 23—total, 195. Visitors—F. H. Mellus 25, G. Holohan 23, D. Holohan 23, Cline 25, Mellon 18, Cornelius 24, Rossbach 24, Mohler 20—total, 182.

Young America and Trapshooting.—Did you ever see paternal pride fairly exude? Well, just let a father bring his boy to a trapshooting club and start him at the sport and when the lad begins to "hit 'em on the nose," as the saying goes, papa is there with the pride.

One boy wonder is W. E. Phillips, Jr., of Chicago. He is not a new shooter by any means, though he is but 15 years old. His father, a winner of the Grand American Handicap, took him in hand early and he made the grade to a point where he entered the G. A. H. last August and gave a very good account of himself.

On the 17th of last June, at a registered shoot of the Metropolitan Gun Club, of Chicago, Master Phillips tied the high amateur score, 139x150, with Chas. Burmeister, the Illinois State champion, and in the shoot-off beat the latter, the young man breaking 25 straight, while the State champion dropped one.

Master Phillips intends to enter the Grand American Handicap next August, and who knows but what he will emulate the achievement of his illustrious dad?

Mr. Phillips coached his son wisely and well, both as to form and deportment. Undoubtedly his coolness came naturally, but whether natural or acquired it is bound to stand him in good stead in years to come.—George Beck.

Sportsmen's Row

While it seems a long way off yet, the officials of the San Jose, Cal., Gun Club are jubilant over their success in landing the P. C. Handicap. There are so many ladies on the west coast who shoot—Mrs. Wilkes, Mrs. Pfirrmann, Mrs. Groat, Miss Meyers, Miss Reid, Mrs. Schilling, Mrs. Peret, and scores of others,—that there will, no doubt, be a generous sprinkling of the fair shooters at the big event above mentioned. The San Jose Club is always generous in giving prizes to the lady contestants, which proves an attractive event.

* * *

Stockton.—The body of Raymond B. Heacock, game warden, who was killed with Richard J. Squire during a gunfight with Sicilian fishermen on Bouldin island December 1, 1916, found by a trapper on day last week, was brought in by deputies from the office of the Sheriff.

✤ ✤ ✤

A. G. Wilkes, president of the Pacific Coast Field Trials Club and well known in local trapshooting circles, has returned with Mrs. Wilkes from an extensive trip in the East. Mr. and Mrs. Wilkes participated in the midwinter handicap tournament at Pinehurst, N. C. Wilkes was put on the nineteen-yard mark and broke 82 and 88, and for the tourney had a total of 461. Mrs. Wilkes, on the sixteen-yard mark, broke 76 and 83 out of 100 frames, which was creditable shooting. George N. Fish was the winner, with 488 out of 500. Wilkes reports that the trapshooting sport is booming in the East.

✤ ✤ ✤

A party of American naturalists are, it is said, en route for the French Congo to get specimens of gorillas for mounting in the American National Museum. They are accompanied by Professor Garner, who, it may be recollected, some years ago built himself a hut in the wilds of the Congo forests for the purpose of studying gorilla language. The Professor's part in the expedition will be that of decoy to call the gorillas to their doom in their own language.

✤ ✤ ✤

O. N. Ford took the lead in the shooting at the San Jose Gun Club last Sunday, February 4, with 94x100. Following are other scores which were made: Hal McLochlan 89x100, George Anderson 88x100, C. H. Nash 88x100, D. C. DeHart 34x50, A. R. Kennedy 33x 50. In class "A" George H. Anderson made 282x300 and Hal McLochlan 281x300. O. N. Ford shot 292x 300. Mr. DeHart and Mr. A. R. Kennedy have just joined the club and members who have watched them shoot predict high scores for them in the future.

✤ ✤ ✤

Clarence Howard caught a salmon Sunday at Healdsburg which weighed 15 pounds. The large fish was captured with a hook and line.

✤ ✤ ✤

Now for trapshooting to get going in full blast. The regular hunting season is over and the boys are starting to turn their attention to the blue rocks.

✤ ✤ ✤

Manager Pete Ashcroft has been active over at the Alameda grounds and has everything in readiness to welcome shooters who want to get in some practice.

✤ ✤ ✤

Applications for the California-Nevada State shoot must be in by February 15th. So far it is known that Del Monte and Los Angeles are after the fixture. Secretary Clarence A. Haight will announce where the event will be contested right after the fifteenth.

Oregon State Shoot.—Salem, Ore.—Directors of the Oregon State Sportsmen's Association decided at a meeting last week to hold the state championship trap shoot at the Capital City Rod and Gun Club grounds May 6, 7 and 8.

The Squier money back system is to be used in the shoot. Special attention will be given team events, three men to a team from each gun club in the state. G. B. Fraser, J. E. Reid and J. P. Bull of Portland were present.

About 20 of the sportsmen took part in a practice shoot at the Capital City Rod and Gun Club's grounds on Feb. 3d.

Utah For Protection.—Following the general movement inaugurated in the west for the better protection of game birds, fish and animals, sportsmen from all parts of Utah are actively engaged in bringing before the state legislature suggestions for the betterment o fexisting protective laws.

Two issues discussed and voted upon recently at a meeting of sportsmen were the increase in the license fee from $1.25 to $2 a year, and the discontinuance of the 10 per cent profit to issuing agents on each license sold. It was claimed that the increase of 75 cents on every license would greatly aid the state fiish and game commission in the preservation of fish and game and in the establishment of new fishing and hunting grounds.

The suggestion was made that one-half of the revenue derived from this increase be used for the protection and propagation of upland game birds, and the other half be directed toward the purchase of screens to prevent the game fish from getting into irrigation ditches.

BILL TO GIVE EFFECT TO TREATY.

Migratory Bird Law Introduced in Both Houses of Congress.

Herewith is a bill that was introduced in the Senate of the United States on January 13 (S. 7858) to give effect to the Migratory Bird Treaty between the United States and Great Britain. The bill was introduced by Mr. Hitchcock, read twice, and referred to the Committee on Agriculture and Forestry:

"A BILL

"To give effect to the convention between the United States and Great Britain for the protection of migratory birds, the ratifications whereof were exchanged on the seventh day of December, nineteen hundred and sixteen, and for other purposes.

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That unless and except as permitted by regulations made as hereinafter provided, hunting, taking, capturing, killing, attempting to take, capture, or kill, possessing, offering for sale, selling, offering to purchase, purchasing, delivering for shipment, shipping, causing to be shipped, delivering for transportation, transporting or causing to be transported by any means whatever, receiving for shipment or transportation, or exporting, at any time or in any manner, any migratory bird included in the terms of the convention between the United States and Great Britain for the protection of migratory birds, or any part, nest, or egg thereof, is prohibited.

"Sec. 2. That, subject to the provisions, and in order to carry out the purposes of the convention, the Secretary of Agriculture is authorized and directed, from time to time, to determine when, to what extent, if at all, and by what means, having due regard to the zones of temperature and to the distribution abundance, economic value, breeding habits, and times and lines of migratory flight of such birds, it is compatible with the terms of the convention to allow the hunting, taking, capture, killing, possession, sale, purchase, shipment, transportation, and export of any of said birds, or parts, nests, or eggs thereof, and to adopt suitable regulations permitting and governing the same, in conformity with such determinations, which regulations shall become effective when approved by the President.

"Sec. 3. That the shipment, transportation, or export to a foreign country of any birds, or parts, or eggs thereof, taken, captured, killed, shipped, or transported contrary to the laws of the state, territory, or district in which the same were taken, captured, killed, shipped, or transported, is prohibited. The importation of any birds, or parts, or eggs thereof, taken, captured, killed, shipped, or transported contrary to the laws of any province of the Dominion of Canada in which the same were taken, captured, killed, shipped, or transported is prohibited.

"Sec. 4. That persons appointed by the Secretary of Agriculture for the purpose of enforcing the provisions of this act shall, with respect thereto, have the same powers as are conferred by law on marshals with respect to executing the laws of the United States. Any such person shall have authority, without warrant, to search any place other than a dwelling, and, with warrant, to search any dwelling, if he shall have any reason to suspect that there is concealed therein any migratory bird, or any part, nest, or egg thereof, which has been taken, or is possessed, contrary to the provisions of this act or of any regulation made pursuant thereto. The several judges of the courts established under the laws of the United States and United States commissioners may, within their respective jurisdictions, upon proper oath or affirmation showing probable cause, issue warrants in such cases. All such migratory birds, or parts, nests, or eggs thereof, when found shall be seized and held and, upon conviction of the offender, shall be forfeited to the United States and disposed of as directed by the court.

"Sec. 5. That any person, association, partnership, or corporation who shall violate any of the provisions of said convention or of this act, or shall violate or fail to comply with any regulation made pursuant to this act, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined not more than $500, or be imprisoned not more than six months, or both.

"Sec. 6. That nothing in this act shall be construed to prevent the several states and territories from making and enforcing laws and regulations not inconsistent with the provisions of said convention, or of this act, or of any regulation made pursuant to this act.

"Sec. 7. That there is hereby appropriated, out of any moneys in the treasury not otherwise appropriated, available until expended, for the expenses of carrying into effect the provisions of this act and regulations made pursuant thereto, including the payment of such rent and the employment of such persons and means as the Secretary of Agriculture may deem necessary, in the city of Washington and elsewhere, and for co-operation with local authorities in the protection of migratory birds and necessary investigations connected therewith, the sum of $170,000, and in addition the unexpected balance of any sum appropriated by the agricultural appropriation act for the fiscal year nineteen hundred and seventeen for enforcing the provisions of the act approved March fourth, nineteen hundred and thirteen, relating to the protection of migratory game and insectivorous birds.

"Sec. 8. That this act shall become effective impediately upon its passage and approval."

522-Mile Dog Race.—St. Paul.—Albert Campbell, a Cree half-breed from the Hudson bay district, won the longest dog race of history last Saturday night, while Fred Hartman, an American and popular favorite, finished last in the field of five competitors who completed the course, and collapsed as he crossed the line. Wild acclaim greeted Hartman, when long after dark, he staggered in front of the judges' stand at Lake Como.

Campbell finished ten days almost to the minute, after he had been sent away at Winnipeg. Next in order came Bill Grayson, Joe Metcalf and Gabriel Campbell, a brother of the winner.

The final dash from Elk river was dramatic. The four Hudson bay drivers had arranged to stake everything on the final drive, and purposed resting at Elk river. There Hartman was staying also, but his attempt to slip away from his rivals was frustrated, when some one, said to have been employed to watch him, informed the other four of his movements, and they were routed out o ftheir beds. They reached Anoka i nthe lead and were never headed. Hartman crumpled up as he plodded over the ice of Lake Como.

Hartman, a Boston chemist, employed as assayer in Manitoba will profit by his arduous experience, notwithstanding his failure to win. Purses aggregating $1000 have been made up for him. A first prize of $500 cash and a number of other prizes go to Albert Campbell. Eleven teams started. The course was 522 miles.

Fun With Sharks.—Nine man-eating sharks have been caught with a hook and line off the Jersey coast and within 200 miles of New York by the crew of the Standard Oil tank ship Glenpool.

With the carcasses of the dead sharks in her hold, the Glenpool arrived at her Brooklyn pier, foot of Van Brunt street, where the officers told the story of the capture of the sharks. They declared that the sharks were members of the real man-eating species.

A remarkable thing about the capture is that the sharks were not caught in the Gulf stream, but in the cold waters north of that current.

The man-eating shark makes his home in tropic waters, and it is a most unusual thing for him to venture so far north. It was in this vicinity that so many sharks were seen last summer and several persons were attacked and killed by them. The Glenpool was on her way to New York from a Southern port when her engines broke down, and she drifted for two days while repairs were being made to her engines. During that time, the crew amused themselves by fishing over her rails. They caught the sharks in this way. The smallest of the fish was five feet long and the largest was eleven.

The sharks were killed by placing a rifle in the mouths of the fish and discharging it.

The crew were full of the story of the sharks when they reached port . They said they had never seen such large fish, and they were amazed that man-eaters should loiter so far north.

When the assistant curator of the Museum of Natural History was asked about the catch, he said that it was a most unusual occurrence. He doubted, he said, that the sharks were man-eaters.

Something to Think About.—Getting indignant is thebest little thing we Americans do; second best is forgetting all about the thing or condition that arouses our indignation, writes Larry St. John. We get "all het up" about something, even to the extent of passing a law against it—then we put it in the "cannery" by not enforcing the law.

We are going to lay ourselves open to the charge of raiding this cannery by mentioning a subject on which, for a fleeting moment at least, there was once considerable indignation. This is the use of feathers, especially aigrettes, for millinery.

You can tell a woman who wears aigrettes that the feathers are torn from the living mother bird during the mating season; that the mother bird, still living, is thrown to the ground, and lies there helpless while her babes cry for food, and she'll dismiss the whole subject by stating that she did not kill the bird—"passing the buck" is the best thing we do.

There is no difference in the motives of the belle of the Solomon isles who wears a string of porcelain door knobs around her neck and the Caucasian woman who wears feathers on her hat. There is this difference, however: in effect door knobs may as well be decorating dusky damsels as doing duty on doors, because there is practically no limit to the output of the knob factories, but a species of birds once exterminated is gone forever.

We are holding the birds we now have in trust for future generations. The question is, are we going to violate that trust? The answer is, we probably will. The reason is that we get indignant or sentimental when we ought to get busy—we raise a lump in our throats when we ought to raise h—l!

The remedy is education of feather wearers and rod of iron laws that will make feather hunting, feather selling, and feather wearing not a fine paying affair but a ball and chain offense.

FUR VALUES OF RABBITS.

Government Gives Advice on Great Industry Encouraged in This Country.

Washington, D. C.—The U. S. Department of Agriculture during the past few months has received many inquiries regarding the merits of certain rabbits that have been extensively advertised as fur producers. Replies to such inquiries have stated that the demand for rabbit fur is such as to make it pay to save the pelts of domestic rabbits killed for food, but that raising rabbits for the fur alone would be unprofitable with any known breed. Some facts about the trade in rabbit skins will be of interest in this connection.

More skins of rabbits are collected and sold annually than of all other fur animals combined. Before the present war, Great Britain imported each year from 70,000,000 to 90,000,000 skins, while the home production added 30,000,000 more. The imported supply came from Australia and the nearer European countries. France, Belgium, Germany, the United States, and other countries also use large quantities of this fur. The bulk of it is sold in bales, bringing from 10 cents to 50 cents a pound, dependent on color and quality. The better class of skins sell by the dozen, bringing from 50 cents to $1, that is less than 10 cents each.

Baled rabbit furs are bought largely for felting purposes, the fur being made into cloth or coarse hats, while the skins are utilized for manufacturing glue. Fine hats are made of nutria (the fur of the South American copyu) or of nutria and rabbit fur mixed. The fur of the common wild rabbit of America does not felt well and is in slight demand. Whole skins of these animals seldom sell for more than 1 or 2 cents each.

The better kinds of rabbit skins are used for making fur garments, which, when made up, are commonly sold as "cony," but often under other trade names. White skins are made up in imitation of arctic fox, or, sheared, in imitation of ermine. Gray rabbits are dyed brown or black and become "Baltic black fox" or "Baltic brown fox"; seal-dyed, they become "inland seal," "electric seal," "coast seal," or "near-seal." Reputable furriers avoid such names, or, if they use them, frankly explain that the goods are cony or rabbit. These garments, while handsome and comfortable, have little durability and are therefore cheap.

Statements to the effect that certain breeds of rabbits produce pelts of high market value are unwarranted . The long-haired breeds, such as the Angora and the Siberian (both white animals) have poor pelts and the hairs are not well set in the skins. The short-haired varieties are much alike as to strength of pelts, but vary considerably in color. The English black-and-white has striking colors that might appeal to the fancy of individual wearers of fur garments, but they are not popular in the fur trade. Skins of piebald rabbits of any shade sell for less than those of solid colors. There is also a difference in quality of fur between hutch rabbits and those kept in the open, the latter having the better pelts.

Besides exaggerated statements as to value of fur, advertisements of fur rabbits contain totally false claims as to the origin of animals offered for sale. This practice is not a new one, for about 60 years ago, when the now well-known Himalayan rabbit was first bred in England, the statement that it originated in the Himalayan Mountains was believed by a fellow of the Zoological Society of London, who described and figured the animal in the society's journal as a new species. Rabbits recently advertised as fur animals are said to have been imported directly from Siberia in one instance, and from Mongolia in another. The further statement that the animals exist in these countries in a wild state is advanced. As a matter of fact well known to naturalists, no wild rabbits occur in either country and the few specimens of hares found there are small gray animals that turn white in winter. The support of the fanciful testimony of an unknown naturalist who claims to have resided in Siberia and to have observed the animals in the wild states does not help the case.

So far as the "black Siberian hare" is concerned, any experienced breeder of rabbits can readily identify the animals at first sight. They are undoubtedly the common European rabbit of the Flemish giant greed. In this variety black is a constantly recurring color and sometimes appears among litters of the purest-bred strain. These black individuals are usually regarded by fanciers as undesirable and are discarded. However, if the black stock be chosen for reproduction, a black strain of Flemish giants is obtained in which bluish gray individuals refur from time to time, as several breeders in the United States have proved. Such a strain of Flemish giants is now offered as a new species imported directly from Siberia, a country without rabbits unless carried there as domestic animals.

It is not to be inferred, however, that black Flemish giant rabbits have no fur value. On the contrary, owing to their great size and color, the skins will probably sell for more than those of most other breeds. All known breeds of domestic rabbits belong to a single species, the European rabbit, whether they are known as Belgian hare, Flemish giant, Siberian, Himalayan, Dutch, Japanese, Kai-Gai, or any other name, and the attempt to palm any of them upon the public as a new species imported from a portion of the world not inhabited by rabbits is wholly unwarranted and to be severely condemned.

Seattle Association.—Shooting in a blinding snow storm, one of the worst handicaps the "gun bugs" have experienced for some time, a big bunch of shooters turned out and hung up some good scores despite the weather conditions, on Sunday, Jan. 26.

The amateur honors went to C. E. McKelvey and Hi Follerich, who both shot the same score in the 50-target program, and C. W. Bandy was second high in the same event. C. E. McKelvey and Hi Follerich stood first and second position in the hundred target program.

L. H. Reid led the professionals in both programs, while Ike Fisher stood second in the 50-bird event and Pete Holohan second in the 100 stretch.

Further plans for a trapshooting league has led to the formation of the Northwest Trapshooters' League and taking in the following clubs: Seattle Trapshooters' Association, Green Lake Gun Club (both of this city), Everett Gun Club, Bellingham Gun Club, Blaine Gun Club, and the Tacoma Gun Club. While no schedule has as yet been completed it is very probable that the first shoots will be held the latter part of March. The first few programs will doubtless be held at Seattle and Tacoma. Dr. C. L. Templeton and Earl A. Fry, both of Seattle, were named president and secretary-treasurer, respectively. The scores:

Hi Follerich 48, C. E. McKelvey 48, *L. H. Reid 47, C. W. Bandy 46, Ike Fisher* 46, P. Schwager 45, Pete Holohan* 45, Geo. Garrison* 44, Dr. C. L. Templeton 43, W. B. Taft 42, Deskin Reid 42, Ralph Kinzer 41, J. H. Hopkins 41, A. Schwager 35, W. B. Cook 34, H. J. Sorensen 29, Jack Lewis 23, all at 50 targets.

At 100 targets—L. H. Reid* 97, C. E. McKelvey 96, Hi Follerich 95, Pete Holohan* 93, P. Schwager 90, Dr. Templeton 88, J. H. Hopkins 86, Ike Fisher 87, Ralph Kinzer 86, Jack Lewis 58, F. T. Barron 13.

Yours, E. A. FRY.

Vernon Club—With perfect weather prevailing, a large crowd of trapshooters turned out at the Vernon Gun Club Sunday and some very good scores resulted. This was the first day's shooting for the new set of trophies which have been put up by the club.

In the prize event Dr. Packard was the high man, making a record of 57x60 smashes for the afternoon. William Pugh and Stanton Bruner tied for second place with 56x60, while William Dougherty and Mrs. Groat tied for third place with 52x60.

In the practice event some very good scores resulted and competition was very close. Following are the scores of the day's shoot:

J. D. Dierdoff, 19 yards, broke 47; Spofford 16—48, A. W. Bruner 19—56, William Pugh 20—56, William Dougherty 18—54, George Kenney 16—43, S. A. Bruner 20—56, P. E. Peterson 17—52, Bob Bole 18—53, Van Nest 18—42, Reid 16—49, C. P. Smith 16—46, Dr. Packard 20—57, Manderville 17—51, C. E. Groat 18—50, Mrs. Groat 19—54.

Practice event—Fred Kimble 16, Spofford 31, A. W. Bruner 36, William Pugh 20, Dougherty 18, Kinney 23, S. A. Bruner 38, Bole 17, Reid 17, Meenzuber 14, Hollowell 11, Bohring 19.

Shooting Permits.—The Du Pont Company of Wilmington, Del., has just issued a small book which will no doubt be received with thanks by the many hunters and gunners of the country. It contains ten permit slips, reading as follows:

SHOOTING PERMIT.

Date.....

I hereby grant

M.....

permission to shoot on my land.

.....

from this date until.....

Signed.....

upon which the shooter gets the signatures of the owners of the land in the territory in which he intends to hunt. These slips are neatly clasped with a different color cover.

In this form the permit will not get dirty, crumpled or lost as often happens to small individual pieces of paper, which the busy man puts into his pockets.

Prize Winning Fish.—At the ball of the United Anglers' League held at the Amsterdam Opera House in New York City, January 6th, prizes were awarded to the members of the league who caught the largest fish during 1916.

The prize winners took fish as follows: George W. Reynolds, at Island Beach, channel bass of 41 pounds; Al Oches, at Rockaway, drum of 70 pounds; A. Kubler, at Point Pleasant, striped bass of 59 pounds 14 ounces; Gus Wolz, at the Farms, from the steamer Taurus, cod of 52 pounds; J. McGuire, at Seabright, blackfish of 4¾ pounds; C. Arthurman, at Hempstead, weakfish of 11 pounds; Gus Christman, at the Cholera Banks, from the Evelyn, 4-pound sea bass; Dr. F. C. Raynor, at Corsen's Inlet, fluke of 8½ pounds; J. Hardenberg, in the Wallkill, wall-eyed pike of 5 pounds; J. H. Ghegan, in the Mombaquist river, small-mouth black bass of 2¾ pounds; C. E. Anderson, in Rye Lake, large-mouth black bass of 4½ pounds.

GAME IS FAST DISAPPEARING.

Government Report On Former Vast Herds of Buffalo and Antelope.

Washington, D. C.—"Although the wild life of North America is more abundant than that of the other continents of the northern hemisphere and has only Africa as world rival, yet our present-day richness in this respect is decidedly poor compared with the abundance and variety of mammalian life that roamed our plains before the advent of the white man, while the vast number of species which disappeared even before the Indians came to inhabit the land is eve nmore astonishing."

In a communication to the National Geographic Society, E. W. Nelson, chief of the United States Geological Society, gives an amazing account of North American wild life in prehistoric times. A portion of the communication has been made public by the society in the following bulletin:

"The original buffalo herds have been estimated to have contained from 30,000,000 to 60,000,000 animals (the latter figure is 6,000,000 greater than the total number of cattle in the United States, according to the census 1910), and in 1870 it was estimated that about 5,500,000 still survived—exceeding by 1,400,000 the number of mules in the United States in 1910. A number of men now living were privileged to see some of the great herds of the West before they were finally destroyed. Dr. George Bird Grinnell writes:

"In 1870 I happened to be on a train that was stopped for three hours to let a herd of buffalo pass. We supposed they would soon pass by, but they kept on coming. On a number of occasions in earlier days the engineers thought that they could run through the herds and that, seeing the locomotive, the buffalo would stop to turn aside, but after a few locomotives had been ditched by the animals the engineers got in the way of respecting the buffaloes' idiosyncrasies.'

"Astonishing as was the number of buffalo which roamed the plains of old, even more numerous were the antelope, though the latter did not attract as much attention as the larger mammals. Besides these, the chroniclers of the colonial days give many interesting accounts of the incredible number of other wild animals, including bears, wapiti, white-tailed deer and turkeys, on which the wolves made firce war. One writer narrates that during the winter of 1670-71 fully 2400 moose were snared on the Great Manitoulin island at the head of Lake Huron.

"The wealth of animal life found by our forbears was one of the great natural resources of the new world. Although freely drawn upon from the first, the stock was but little depleted up to within a century. During the last 100 years, however, the rapidly increasing occupation of the continent and other causes, together with a steadier increasing commercial demand for animal products, have had an appalling effect. The buffalo, elk and antelope are reduced to a pitiful fraction of their former countless numbers.

"Practically all other large game has alarmingly decreased, and its extermination has been partly stayed only by the recent enforcement of protective laws."

A. A. T. A. Election of Officers—The following officers were re-elected at the annual meeting of the Board of Trustees of the American Amateur Trapshooters' Association held at the headquarters of the Association in Baltimore, Maryland, on Saturday:

John Philip Sousa of New York, president.

Dr. Horace Betts of Delaware, first vice-president.

Chas. W. Billings, New Jersey, second vice-president.

Prof. James L. Kellogg of Mass., third vice-president.

Stanley F. Withe, Maryland, secretary-treasurer.

State Vice-Presidents — Alabama, R. H. Baugh; Arizona, W. E. Mullen; Arkansas, W. Gus Nash; California, G. H. Anderson; Connecticut, E. H. Morse; Illinois, Ray Loring; Indiana, H. E. Stutz; Idaho, E. N. Sweeley; Iowa, E. O. Hinshaw; Kentucky, T. H. Clay Jr.; Louisiana, R. W. Dodd; Maryland, H. D. Billmeyer; Michigan, A. R. Hensler; Missouri, J. O. Victor; Mississippi, Chas. Green; Montana, Frank Conley; Nebraska, Harry E. Palmer; New Hampshire, Peter M. Kling; New Jersey, J. W. Mason; New York, H. W. Smith; North Carolina, J. B. Pennington; North Dakota, C. O. Heckle; Oklahoma, S. H. Harris; Oregon, H. S. Veatch; Pennsylvania, J. S. Speer; Rhode Island, N. F. Reiner; So. Carolina, A. F. McKissick; So. Dakota, A. F. Scharnweber; Tennessee, John H. Noel; Texas, W. H. Bertrand; Utah, John F. Cowan; Virginia, C. S. Adams; Vermont, G. B. Walton; West Virginia, John W. Graham; Wisconsin, E. F. Leidel; Wyoming, C. F. Nelson.

The following were elected Vice-Presidents of the Association from States and Provinces previously unrepresented: Colorado, J. H. Rohrer; Florida, W. C. Thomas; Georgia, H. W. Quick; Kansas, B. F. Simonds; Maine, A. W. Reed; Minnesota, J. E. Harker; New Mexico, C. A. Whited; Ohio, C. E. Sheldon; Washington, W. B. Taft; Nevada, E. M. Bosch; Massachusetts, L. H. Davis; Alaska, R. E. Murphy; Hawaii, G. K. Mills.

Fifty-eight thousand four hundred and thirty-six muskrats were trapped in Wisconsin in 1916.

Stock and Farm Department

Mrs. Jack London, of Glen Ellen, Sonoma county, California, was a buyer at the first Shorthorn sale of the year held at Chicago, January 16th and 17th. She paid $2000 for the six-year-old cow Pine Grove Secret and her bull calf. Twenty-three of the animals brought from $1000 to $2000 and the average for the 96 head sold was $775.

✤ ✤ ✤

The Yolo County Farm Bureau has set October 4, 5 and 6 as the time for holding the annual farm festival at Woodland this year. It is the hope and expectation of the directors that the festival will develop into a real county fair, where all sorts of soil products, stock and poultry exhibits, will appeal to the farmers and where a section devoted to fruits, both fresh and canned, and needlework, will open an avenue for the women of the county to take part. Prizes will be offered covering a wide range of exhibits, among them being four prizes for the first, second, third and fourth best exhibits of variety and quality from any one farm. These prizes will be $50, $25, $15 and $10 respectively.

✤ ✤ ✤

There is now being offered by the California College of Agriculture, correspondence courses entitled "Dairy Husbandry," "Swine Husbandry" and "Sheep Husbandry." Each course takes up in detail the care and management of the animals under discussion with special reference to selection, breeding and feeding. One may enroll for any one of the above courses free of charge; for a description of these courses and an application card address the Division of Agricultural Education, College of Agriculture, University of California, Berkeley, California.

✤ ✤ ✤

The Butte County Spring Exposition at Chico last year was a big success, but it is proposed to make the 1917 exposition much greater in every way. It will be held May 21-27 inclusive and A. G. Eames, director-general, states that it will be a livestock show above all else. The Blackhawk Stock Ranch of Burlingame, California, has already decided to make a number of entries of its Shires.

✤ ✤ ✤

At the Denver show last week some range-fed blooded stock from Wyoming carried off prizes against stall-fed stock from Missouri, Kansas, Nebraska, Oklahoma and eastern states. The Hereford corporation of Wyoming entered one car of registered Hereford junior heifers and a second of registered Hereford junior bulls and took first prize and championship on the heifer entries and first prize and reserve championship on the other lot. Among the Shorthorns, Angus and Galloways were some of the finest lots ever seen in any show. One bunch of Angus from away out in Washington was especially fine, but the Galloways were not very strong. There was a $6600 Shorthorn bull and a 2200-pound three-year-old cow on exhibition.—[Field and Farm.

✤ ✤ ✤

The Western Berkshire Breeders' Congress will meet at the University Farm, Davis, California, on the 13th and 14th of this month. There will be special features for the two days, as follows: Hon. A. J. Lovejoy, eminent Berkshire breeder and authority will speak on Breeding and Breed History; Judging of live barrows for carcass contest; Slaughter test and carcass judging; Student judging; Thirty ladies judging contest for a $50 prize; Banquet and love feast. On February 15th there will be an auction sale of Berkshires with Mr. W. H. Hord as auctioneer. A fifty-dollar trophy will be given for the best sow entered in this sale.

✤ ✤ ✤

Thirty-one Shires realized $13,730, an average of $443, in the sale by McCraw & Fowler at Danville, Ill., Jan. 17. Buyers were present from many parts of the nation. The progeny of Royal Grey were in special demand. A mare by him brought $2100, the highest price of the sale. The purchase of a few not in sale condition lowered values, but the prices realized on the productions of the sellers and particularly on the Royal Grey stock were encouraging to breeders of good stock. The attendance was large.

✤ ✤ ✤

River Bend Farm, St. Helena, Cal., in Napa county, has just received some young Duroc-Jersey gilts from the east, selected from the noted Larson and Jackson herds. Crossed with the farm's Model and Defender herd boars, these magnificent gilts will produce grandly bred litters and California Duroc breeders will not have to go out of the state to get the best to be had of the big type Duroc-Jerseys.

✤ ✤ ✤

The Jersey cow Sophie's Adora, owned by Hood Farm, Lowell, Mass., finished her year's test on Dec. 30 with a record of 15,852 pounds of milk and 888 pounds of fat, a breed record for cows starting when more than 4 and under 4½ years of age. Sophie's Adora was bred at Hood Farm and is a daughter of Pogis 99th of Hood Farm. Her dam is a daughter of Hood Farm Torono. Sophie's Adora, starting at 2 years and 2 months of age, made a record of 10,274 pounds of milk and 691 pounds 8 ounces of butter and dropped 3 calves before she was four years old.

A notable sale of Duroc-Jerseys was held at New London, Ia., on Jan. 19 by Hanks & Bishop. An average of $228 was secured on some 56 head. The boars were sired by Pathfinder and many of the females were bred to him. J. Wellendorf, Algona, Ia., paid $550, the top price, for one of the sows. Another went to Wm. Putnam & Son, Worthington, Neb., at $505, while the top-priced boar was taken by Jake Waltemeyer, Melbourne, Ia., on a bid of $435.

✤ ✤ ✤

Godie Nehalem Beauty, a three-year-old owned by C. F. Reid, Portland, Ore., has leaped into fame by acquiring the title of junior champion three-year-old Jersey. In a 365-day test, conducted under Register of Merit rules, and supervised by the Oregon Agricultural College, she produced 12,367.7 pounds of milk and 750.51 pounds of butter-fat. The new record exceeds that of Lass 74th of Hood Farm, the former title-holder, by 4 pounds of butter-fat.

✤ ✤ ✤

At Hiawatha, Kansas, the other day twenty spans of mules sold at an average price of $431 the span, with the top at $570.

✤ ✤ ✤

G. Wendt & Sons, of San Jose, this week purchased from the Miller & Lux corporation fifty-two head of stall fed steers, the total weight of which was 68,090 pounds, the price for the same, delivered at the yards of the Southern Pacific Company in San Jose, being $5274, an average of 8½ cents per pound on foot.

✤ ✤ ✤

Two steers purchased from Mike Feeney by John Wood for H. T. Carey weighed 5370 lbs. One of them was 2690 pounds and the other 2680. Carey said they were the finest steers he had ever seen. Oscar Scunrbusch, recently retired as a partner in the Willows Meat Market and who has had an experience of twenty-five years with cattle, said they were the largest cattle ever produced in Glenn county. The price paid for the two steers was in the neighborhood of $400.—Yolo Democrat.

✤ ✤ ✤

W. T. Nance, Lapwai, Idaho, recently sold twenty head of steers to a Spokane packer for $8.35 per hundred weight. This is said to be the highest price ever paid in the Spokane yards for prime light cattle. The steers averaged 1110 pounds each.

✤ ✤ ✤

The prize story of the season comes from Port Angeles, Wash., and is to the effect that a Jersey cow owned by a farmer near that place recently gave evidences of failure in milk and the symptoms gave the veterinarian no solution. The cow appeared perfectly healthy and gave a good flow of milk mornings but none at all in the evening. Investigation proved that she had adopted a fawn out in the woods and a photo was snapped of the fawn stripping the cow to prove the authenticity of the story.

✤ ✤ ✤

It is not wise to select a bull from a cow even with a wonderful record if she is the only good animal in her family. In this case she is a freak in her family and will probably transmit not her own high milk production, but the average of the family to which she belongs.

✤ ✤ ✤

The raising of beef cattle will always be at its best where pasture can be used to a maximum degree, and where land is rather too distant from a suitable market for the more perishable products. Such land will naturally be cheaper, and as a general thing less adapted to more intensive farming.

✤ ✤ ✤

The modern dairy cow is bred so far away from the wild cow of nature that it is only by continual selection that the production of our herds can be maintained at the present level, to say nothing of increasing it. The only practical ways for most farmers to greatly improve their herds are to cull out the inferior cows and introduce the best possible blood through the sire. The old saying that the sire is half the herd is literally true from the standpoint of herd improvement. The sire selected should first of all be a pure-bred of the breed to which the cows belong. Cross breeding does not pay and in the end is disastrous to the herd.

Percheron Blood For European Armies.

The exports of horses and mules have at last passed the million mark. The official figures given by the Department of Foreign and Domestic Commerce, U. S. A., show that during the twenty-seven months ending December 1, 1916, 1,029,961 head of horses and mules, valued at a total of $216,941,912, were actually exported from the United States, most of these going directly to the European war territory. Purchases are still continuing at a heavy rate.

The firm of Ellsworth and McNair have sold more than 70,000 head of horses annually for the last two years and no one is better informed on horse values than Harry McNair of that firm. In discussing the war trade recently he estimated that the average prices for the different classes of horses actually accruing to the farmers, or, in other words, the prices which the farmers realized for the horses on the farm, were substantially as follows: Cavalry horses $115 per head, French artillery horses $140 per head, British artillery horses $165 per head, draft horses weighing over 1650 pounds about $215 to $240 per head. In other words, light weight horses ranging around 100 to 1100 pounds have brought farmers $115 each, but one cross of draft horse blood on the same mare that was used to produce this light cavalry horse would have produced a horse ranging from 1200 to 1500 pounds in weight, depending upon the conditions under which said half-blood drafter came to maturity. Those that were not well fed would naturally be lighter in weight at maturity, while those that received an abundance of food, permitting of full development, would range from 1400 to 1500 pounds, so that the first cross of draft blood raised the value from $115 to $140 or $165 per head. The selection of half blood Percheron mares, weighing from 1350 to 1500 pounds, for breeding to another Percheron stallion of first class type and conformation will result, as long experience has shown, in horses of good draft type and conformation, weighing from 1600 to 1800 pounds at maturity if they are allowed plenty of food for full development, and these horses have brought prices ranging in excess of $200 on the farms. In other words, one cross of Percheron blood increases the value of the progeny from light weight mares from $35 to $50, and a second cross on the half blood mares will increase the value from $35 to $50 more, so that the first two crosses of Percheron sires on ordinary light weight mares will increase the value of the progeny resulting from $70 to $100 per head. This is not theory, but has been proved over and over again in the sales of horses occurring during the past two years.

The farmer who has been obliged to sell his horses at $115 per head, while his neighbors using the same kind of mares, but who bred to Percheron stallions, have sold their surplus at prices ranging from $140, $165 up to $225 per head, sees in a financial way the direct contrast in the value of light horses as compared with the value of horses carrying one-half or three-quarters of Percheron blood. This has done more to increase the demand for Percheron stallions than anything that has occurred in the past fifteen years.

Death of a Prominent Dairyman.

Dixon (Solano Co.), Feb. 5—H. R. Timm, of wide reputation as a dairyman, banker and prominent resident, died this evening about 6 o'clock, after an illness of ten days with pneumonia.

The high standing of Dixon as a dairy center is due to the intelligent effort and energy of H. R. Timm, who had the distinction of establishing, near this city, the first certified dairy in California. From a small beginning the dairy has grown to be one of the largest in California and its product is in great demand in the cities around the bay of San Francisco.

The Timm certified dairy has become one of the model institutions of its kind in California. The manager's activities were not confined alone to the best methods of obtaining pure milk, but the herd of dairy cows became known for breeding and healthy conditions.

Mr. Timm was manager of the Timm Certified Dairy Company, president of the First National Bank of Dixon and secretary-treasurer of the Sacramento Valley Railroad Company. He had been president of the chamber of commerce several years and took an active interest in the development of this section. Before starting the certified dairy he had a stock ranch near Elmira.

H. L. Timm was born near Dixon about 48 years ago. He started the dairy about 1907. He leaves a wife, a son, a mother and two sisters, all residents of Dixon.

Relative Value of Corn and Oats.

Some interesting facts have been learned in investigations made on feeding horses at the Ohio station.

Contrary to popular opinion that horses fed oats have more life, keep in better condition and endure work better, especially during the hot weather, than horses given a grain ration consisting largely or exclusively of corn, an experiment conducted for 48 weeks at the Ohio Experiment Station with work horses showed that oats are not superior in effciency to corn. Economy in feeding is generally in favor of corn.

Three teams of mature geldings were used, one horse in each team being fed oats and the other an equal weight of ear corn, in connection with mixed clover and timothy hay. There was practically no difference in the changes in weight during the year between the two lots. No difference due to the feeds used was observed in the spirit and endurance of the horses.

The cost of feeding the corn-fed horses, with corn at 80 cents a bushel, oats at 60 cents and hay at $10 a ton, was $85.65 for the 48 weeks, as compared with a charge of $122.19 for the horses given oats. Animal husbandmen at the experiment station, considering the relative prices of these two grains over a long period of years, say that corn may be substituted for oats for work horses with a material saving, and therefore should be given a large place in their rations whenever market conditions warrant its use.

Dr. Kunz of New York, one of the prominent speakers at a recent convention of scientists, said: "If the United States would spend annually for highways, and to reclaim swamps and arid land, as much as the war is costing in one month, the increased value of the land would return a profit to the government."

THE FARM

TRANSPLANT IN THE FALL.

In general the fall is the best time to plant trees and shrubs on the home grounds. When planted in the fall, the plant is given an opportunity to spend its strength in producing new root growth rather than top growth. These new roots are the "feeding" roots and if well established will give added vigor to the plant the following year. The protection and health of the root system is the most important consideration in plant growing.

There are some exceptions to this rule. If the summer and fall seasons have been unusually dry and the plant has suffered from drouth, it may be best to wait until early spring to transplant, as plants may recuperate during the winter. In some parts of the country late summer planting of evergreens has proved best, but for Missouri early spring planting seems more satisfactory.

It is best to transplant all trees and shrubs in the fall. It is possible to move plants after they have "leafed out" but there is some danger of over evaporation of moisture from the leaves and bark which will exhaust the strength of the roots. The plant will then show wilt and spend its strength on new leaves instead of readjusting its roots. To lessen the danger from evaporation it is always well to cut the tops back severely and if in leaf, the trunk of a tree should be wrapped with straw or sphagnum moss to keep it moist. Trees have been moved as late as June first in Central Missouri without showing wilt, by using this method. It is better to transplant early in the morning or late in the afternoon.

Rainy or cloudy days are the best ones in which to do planting. Transplant after the leaves drop in the autumn or before they open in the spring.

CONCRETE WATER TANKS.

A good mixture for concrete tanks is one part cement, two parts sand, and four parts broken stone or gravel. A mixture of one part cement and three parts of coarse sand can also be used. The cement and aggregate is thoroughly mixed and the mixture well tamped or shaded when placed in the forms. After removing the forms the sides of the tank may be flushed with a mixture of cement and water to smooth them.

Heavy woven wire fencing may be used to reinforce the tank. Lap the ends of the reinforcing at least six inches. The reinforcing for the walls should be placed near the outer side and well covered with concrete.

Green lumber is best for the forms. If seasoned lumber is used, it should be dampeded before the concrete is poured in. Dry boards absorb the moisture from the concrete which causes the tank to crock.

Make the bottom o fthe tank smaller than the top by sloping the inner walls. This will prevent ice from breaking the walls. The inner forms should be built so that they may be easily removed. A wedge can be used to advantage if the forms swell and are difficult to remove. Avoid heavy pounding and prying as green concrete is easily cracked.

It is easier t obuild a rectangular form for a tank, but the round is a stronger one and calls for less concrete.

shrdlshrd shrd shr shr shr shrdlhrdl

Acre Yields.—In "Monthly Crop Reports" the bureau of crop estimate gives the results of inquiries made among its thousands of crop correspondents as to the largest yields per acre obtained by farmers last year. The figures are surprising and valuable, indicating that the heaviest returns are far in excess of fthe average yields per acre for the country.

In the case of wheat, for example, correspondents fcund one tract of 18 acres in Island county, Washington, which averaged 117 bushels an acre. In Twin Falls county, Idaho, a tract of 12 acres averaged 108 bushels. Twin Falls county also reported average yields of 105 bushels from 11 acres, 102 bushels from 6 acres and 98 bushels from 8 acres.

Skagit county, Washington, reports an average yield of 183.7 bushels of oats per acre from 8.5 acres. Logan county, Colo., claims second honor in this respect, 166 bushels from 8 acres. Ottertail county, Minn., reports 165 bushels per acre from two acres.

El Dorado county, in California, reports 790 bushels of potatoes from one acre. This was from a selected acre in a 30-acre field which averaged 550 bushels per acre. Yakima county, Wash., reports 743 bushels per acre from four acres. A Roane county, Tenn., grower averaged 600 bushels per acre from two acres of sweet potatoes.

In addition to receiving a period of rest before freshening, a cow should receive feeds that meet the following requirements:

1. Rest and cooling out of the digestive tract. For this purpose the following feeds are very good: Silage, pasture grass, soiling crops, bran, oil meal ,etc.

2. Building up of the flesh and the strength of the cow herself. For this corn silage, grass, soiling crops, oats, corn, etc., are good.

3. Supplying nourishment for the growth of the unborn calf. The feeds rich in protein and mineral matter are needed, such as alfalfa, or clover hay, oats, bran, etc.

It is a good plan to have a small pasture so that cows due to freshen in the summer or fall may have an abundance of grass and not be molested by other cows. In addition to this a few pounds of ground oats, which is one of the best feeds for pregnant cows, and in some cases a small quantity of cracked corn and bran will be sufficient. For cows that are to freshen during the winter months, corn silage make an excellent substitute for pasture grass and in summer time, corn should ottentimes be a supplement to pasture gross. In fact it is impractical and unprofitable to attempt to run a dairy farm in the corn belt without corn silage. A ration made up of 20 to 30 pounds of corn silage, all the alfalfa or clover hay they desire and a grain or clover hay with oats, bran and oil meal, will prove very satisfactory. The amount of grain per day should be governed by the individual animal.

THE BEST LINIMENT
OR PAIN KILLER FOR THE HUMAN BODY
Gombault's
Caustic Balsam
IT HAS NO EQUAL

For the Human Body —It is penetrating, soothing and healing, and for all Old Sores, Bruises, Wounds, Felons Exterior Cancers, Boils Corns and Bunions CAUSTIC BALSAM has no equal as a Liniment.

We would say to all who buy it that it does not contain a particle of poisonous substance and therefore no harm can result from its external use. Persistent, thorough use will cure many old or chronic ailments and it can be used on any case that requires an outward application with perfect safety.

THE WISE SPORTSMAN'S NEW YEAR RESOLUTION!

Use the Ⓟ Brand Shells and Cartridges

¶ Wherever ammunition is used the name of "Peters" is synonymous with QUALITY. The high standards used in the production of these goods guarantee that every lot of shells or cartridges shipped under our labels embodies all the essentials of perfect ammunition, such as accuracy, penetration, uniformity and general reliability.

¶ In the last analysis, successful performance is the most conclusive evidence of quality, and during the year 1916, the exceptional shooting proficiency of Peters shells has again been demonstrated.

Mr. Rolla O. Heikes, a veteran of more than 25 years' experience in trapshooting, began using Peters shells a little over a year ago and his Official Average for 1916, 96.24%, exceeds by several per cent the best average he ever made with other makes of shells.
Similarly Mr. W. R. Crosby, another man with country-wide fame among trapshooters and sportsmen of all classes, averaged in 1916 96.79%, using Peters shells exclusively and exceeding any yearly average he has ever made on a similar or greater number of targets when using other brands of ammunition.
Add to this the achievement of Mr. Woolfolk Henderson in winning the Official High Amateur Average in 1914, 96.63%, and in 1915, 97.53%, and Second Amateur honors in 1916, 97.14%, and you have evidence enough to convince the most skeptical that Peters shells are a real contributor to the making of high scores.
The amateur shooter who heeds the handwriting on the wall and decides to use the Ⓟ brand shells in 1917 is sure to make the best scores of which he is capable.

¶ We extend to the members of the shooting fraternity our best wishes for the New Year, including "100%" happiness and a "straight run" of 365 prosperous days.

THE PETERS CARTRIDGE CO., PACIFIC COAST BRANCH . . . . **585-587 Howard Street, SAN FRANCISCO, CAL.**

AT THE 11th ANNUAL INDOOR TOURNAMENT of the INDOOR .22 CALIBRE RIFLE LEAGUE of the UNITED STATES, RECENTLY HELD IN PHILADELPHIA

WINCHESTER GUNS AND AMMUNITION

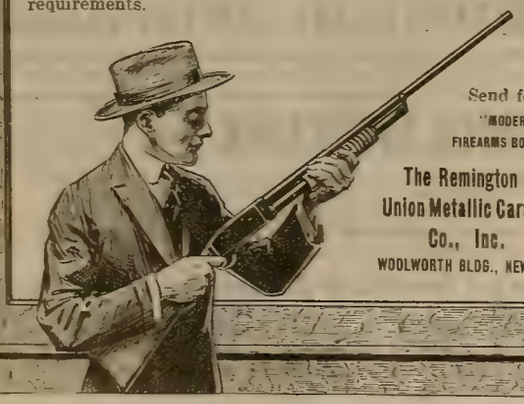
Again Demonstrated Their Reliability and Uniformity.

In the TWO SHOT MATCH, George W. Chesley, using Winchester Gun and Ammunition, won the prize, although it was necessary for him to make the possible (50) three times before he could defeat his nearest competitor, Mr. J. G. Schnerring, who also used Winchester cartridges.

In the 20 SHOT MATCH, shot from the prone position, W. H. Richard, shooting Winchester Gun and Ammunition, won the event with a score of 199. Mr. Raymond, shooting Winchester ammunition, was second with a score of 196.

In the 10 SHOT MATCH (shot prone), W. H. Richard (shooting Winchester), made three perfect scores. Mr. Raymond and Mr. Schnerring finished second and third, both using Winchester ammunition.

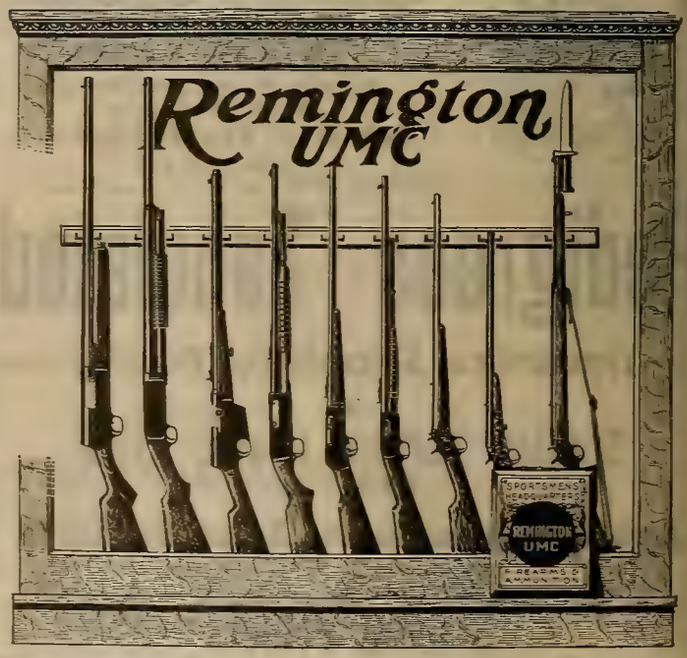
In the BULL'S EYE MATCH, the shooters of Winchester ammunition captured the first three prizes in the following order: Mr. Chesley, first prize; Mr. Schnerring, second; Mr. Richard, third.



The CONTINUOUS MATCH called for the best three targets to count for prizes. On the first three targets, Mr. Chesley and Dr. Hudson tied with three possibles (75). On the shoot-off Mr. Chesley won first place.

In all shooting events, superior accuracy and uniformity are absolutely necessary. The arms and ammunition that can be counted upon to invariably make good, bear the trade mark

WINCHESTER



NO MATTER what branch of the shooting sport a man follows, he can go to any one of eighty thousand retailers and get exactly the arm for it in Remington UMC.

More sportsmen every year are turning to Remington UMC firearms and ammunition to find the products adapted in greater measure to their exacting requirements.

Parker Gun Records

MR HENRY PFIRRMANN, JR., with his 34-inch double barrel Parker made the HIGHEST GENERAL OFFICIAL AMATEUR AVERAGE on the Pacific Coast during 1916. He also won the CHAMPIONSHIP OF CALIFORNIA scoring 100 straight targets, and made the highest General Average at the Vernon Gun Club, July 2 to 4, 1916, scoring 493 out of 500 targets with the same gun.

PARKER GUNS

made the highest Official Averages in America in 1914 and 1915.
PARKER 20-gauge guns are the pioneer small bore guns of America.

TRAINING THE HOUND

A PRACTICAL TREATISE ON THE TRAINING OF FOX HOUNDS, BEAGLES, AND COON HOUNDS.

The system of training advocated is simple and effective, so that anyone who carries out instructions can easily develop a foxhound, a beagle or a coon dog to the highest state of usefulness or organize a pack in which each hound will work independently and at the same time harmoniously with the others. The subjects are: The Hound's Ancestry, History, Instinctive Tendencies, English and Native Hounds, Developing the Intelligence, Training the Foxhound, Voices and Pace of the Hound, Qualities of Scent, Manners, Training the Coon Dog, Coon Hunting, Training the Beagle, Forming a Pack, Field Trial Handling, Faults and Vices, Conditioning, Selecting and Rearing Puppies, Kennels and Yards, Diseases of Hounds and Their Treatment. The chapters on field trial training and handling are alone worth the price of the book, which is one that every man who loves the voice of a hound should read.

The book contains 224 pages, is clearly printed, nicely bound, and handsomely illustrated with bloodhounds, various types of English and American foxhounds, beagles and cross-bred dogs for 'possum and coon hunting.

Price, in heavy paper cover, $1; $1.50, postpaid.

MARSHALL CHIEF 2765

Champion Saddle Stallion, Missouri State Fair 1916 and Undefeated in Breeding Classes. In Service at Mexico, Mo. Owned by Mr. William Wallace, of Philadelphia.

Pleasanton Driving Park

PLEASANTON, CALIFORNIA

offers for service for the season of 1917 the following stallions:

THE ANVIL 2:02 3-4

Non-Standard Cal. State License No. 2.

FASTEST TROTTING STALLION EVER OFFERED FOR SERVICE IN CALIFORNIA AND FIFTH FASTEST ENTIRE TROTTER IN THE WORLD

Son of St. Valiant Vincent 2:11¾ (by St. Vincent 2:13½ out of the triple producer Grace Lee 2:29¼ by Electioneer 125); dam Amy Smith by Emperor Wilkes 2:20¾, sire of Princess Eulalia (4) 2:09½, etc.; grandam by Hambletonian 539.

The Anvil is regarded by Edward F. Geers as one of the very greatest trotters that he has ever raced. For five years the pair of Tennesseeans went to the races together and in that time were but twice unplaced, while winining a total of fifteen races, including the historic M. and M.

As an individual he is most pleasing, not too large or coarse in any way but smoothly and compactly made and "all horse" in every line. He is a perfect headed, pure gaited trotter, with the very best of disposition, and is destined to become a very great sire of trotting speed. His opportunities in the stud have been very slight as he has been retired from racing only since the close of 1914. He was selected to head the stud at Pleasanton Driving Park not only on account of his great qualities as a race trotter, but because one of his first foals, Anvilite (2) 2:22¼, with a trial of ten seconds or more faster, was in every way the greatest colt trotter ever handled by C. L. DeRyder. The services of The Anvil are recommended to you without reserve.

Fee for THE ANVIL 2:02 3-4, $50 with usual privilege

Vernon McKinney 2:01 1-2

Pure Bred Cal. State License No. 39

Fastest member of the great family of McKinney 2:11¼

Sire of VERNA McKINNEY (2) 2:13 (his first foal raced), fastest two-year-old pacing filly of 1915, three-year-old record, 1916, 2:09¼; VERNON DIABLO, mat. rec. half mile track 2:14¼, and DR. DYER (3) trial 2:12¼.

Son of Guy McKinney 37625 (by McKinney 2:11¼ out of Flossie Drais by Guy Wilkes 2:15¼); dam Maud Vernon by Mount Vernon 2:15¼, sire of the dams of Leata J. 2:03, etc.; grandam Mag by General McClellan, sire of the dams of Mack Mack 2:08, etc.

Vernon McKinney's racing career was not an extensive one but will long be remembered for the excellence of his performances, as his winnings include a Chamber of Commerce stake in time very near the record for that event at the time, and he is the fastest of all the McKinneys.

He is a horse of rare qualities in the way of individual excellence, almost ideal in behavior and temperament in harness or out. Since his retirement he has been a popular horse in the stud and our claim that he would prove a very great sire of pacing speed has been fully substantiated, his first foal to be raced being the season champion for the age and gait in 1915, a most excellent testimonial to his potency. He is a very sure breeder, his get are uniformly endowed with natural speed and the physical and mental requirements of modern race horses and find ready sale at most gratifying prices.

Fee for VERNON McKINNEY 2:01 1-2, $50 with usual privilege.

The best of care taken of mares in any manner owners may desire, but no responsibility assumed for accidents or escapes. Address for particulars

GEORGE F. RYAN, Superintendent, PLEASANTON, CAL.

Thoroughbred sire MARSE ABE

WILL MAKE THE SEASON OF 1917 AT

PLEASANTON DRIVING PARK

Service Fee $50

Marse Abe carries the best blood of America through his sire lines. Yankee was a superior race horse and sire. Hanover was the best horse of his day, and headed the list of winning sires for years. No reference is necessary to Hindoo as everyone knows what he was. Halo, the dam of Marse Abe, is bred just right to cross with the sire blood in his pedigree; a daughter of St. Blaise, son of Hermit, the most fashionable sire line in England, and backed up on her dam's side by the lines of long distance performers from which sprung Ten Brock and other four-milers.

MARSE ABE
- Yankee
  - Hanover
    - Hindoo — Virgil / Florence
    - Bourbon Belle — Bonnie Scotland / Ella D.
  - Correction
    - Himyar — Alarm / Hira
    - Mannie Gray — Enquirer / Lizzie G.
- Halo
  - St. Blaise
    - Hermit — Newminster / Seclusion
    - Fusee — Marsyas / Vesuvienne
  - Ida K
    - King Alfonso — Phaeton / Capitola
    - Lerna — Asteroid / Laura

YOUR THREE YEAR OLD that is still eligible to Pacific Breeders' Futurity No. 14 will not be eligible to that rich event if you should miss making the payment of $10 which is due Tuesday, March 1st. This stake had an original guaranteed value of $7250. The two-year-old divisions were raced last year, and this year at the meeting of the Pacific Coast Trotting Horse Breeders' Association, guarantors of the stake, the three-year-olds will race in two divisions for the balance of the stake. The money for the three-year-old trotters to race for will be $2500, quite a nice sum and one that should put every three-year-old trotter that is still eligible to the stake, into training. The pacers will race for $1500, another good fat stake. These races will be on the three heat plan, every heat a race, the money in each race being divided into three equal parts and there being four moneys for each heat. There were sixty-two colts paid up on in this stake one year ago when they were two-year-olds. Out of these there should be enough paid up on March 1st to make two of the best three-year-old races seen in California for a number of years. But you can't start unless your colt is kept eligible, so don't fail to send in that $10 on or before that date.

THERE have been more rainless days during January and February in California this year than any winter since 1899. Grain crops are very backward and feed very short in the pastures. The long cold spell during January prevented the feed from growing but at the same time the absence of warm weather kept in the ground the moisture that fell during November and December. Rain within the next two weeks will put the growing grain and pastures in fair order again and start the late sown grain. At this writing (Thursday) the outlook for farmers and stock men is anything but promising, but California has seen seasons that looked worse at this time that finally turned out fairly well. Nearly all stock on pasture is being fed hay at the present time which is an uncommon sight in California, as usually the grass is six inches high in the hills and valleys at this season.

ONE FEATURE that will be a welcome change to trainers and horse owners in the organization of a California Circuit will be the systematic shipping of horses from one town to another on the circuit. Heretofore in California it has been a case of everyone for himself when engaging transportation for horses, with the result that the shipping has generally been done at a maximum of expense. Secretary Joseph Waddell has had much experience in the matter of horse transportation and has already held conferences with the railroad officials that have been most encouraging. Mr. Waddell is of the opinion that by united action the horsemen can ship by express at less cost than they have been paying when shipping singly by freight. It will certainly be a great convenience to horse owners to have all the details of ordering cars taken off their hands and it will detract much from the many annoyances which they have heretofore met with in shipping through the circuit.

THE THIRD ANNUAL CONVENTION of the Western Berkshire Congress and Western Berkshire Congress sale, at the University Farm, Davis, California, February 13, 14 and 15, was largely attended and was characterized by much enthusiasm. Excellent programs had been arranged for the sessions of the convention, the addresses being of a practical and instructive nature. The sale offerings were the most representative lot of Berkshires that have ever been gathered for a western sale and were a credit to their producers. The 47 head sold averaged $136. The top of the sale was the winning gilt, Escalon Fashion Princess, by Fashion Longfellow, consigned by A. B. Humphrey of Escalon and bought by Harry Moore, of Indianapolis, for $500. The offerings were widely distributed, one of the buyers being H. W. Rice of Hawaii. L. E. Frost of Chicago was sales manager, ably assisted by the officers of the Western Berkshire Congress and the Faculty of the State Farm. Col. W. H. Hord of San Francisco was the auctioneer.

Students Will Judge Saddle Horses.

The second annual American Saddle Horse Judging Contest will be held at the University of Missouri in the afternoon of February 22. The contest last year was the first ever held by any state university. That it was a success is shown by the interest of the American Saddle Horse Breeders' Association. This association will offer again this year a $50 silver trophy, to be awarded to the best student judge of saddle horses. Missouri is one of the leading states in saddle horse production and the College of Agriculture is holding these judging contests to further interest in saddle horses.

Since the contest falls on Washington's birthday, which is a holiday, all students who care to enter the contest will be able to do so. Last year 161 students competed. They were required to place a class of three-gaited and a class of five-gaited horses under saddle, and a class of brood mares and weanlings to halter.

The judges this year will be prominent Missouri breeders and exhibitors of saddle horses. Visitors will be permitted to watch the contest.

American Association Fills Vacancies.

Chicago, Feb. 8, 1917.

Breeder and Sportsman: This is to inform you that there was held in the office of the Association yesterday, February 7, 1917, a meeting of the stockholders and directors of the American Trotting Register Association, at which Mr. John R. Thompson of Chicago and Mr. J. A. Snyder of Springfield, Ohio, were elected to fill vacancies in the Directory for one year, and Mr. Lee Sturgis, of Chicago, for two years. There was also added to the directors Messrs. C. B. Shaffer of Chicago and Lexington, Ky., and W. P. Cowan of Chicago.

Mr. David M. Look of New York was elected President, and Mr. Paul C. Wilson of Menomonie, Wis., was elected Vice-President. Mr. F. E. Best was re-elected Registrar and myself as Secretary and Treasurer.

In consequence of vacancies on the Executive Committee, Messrs. C. B. Shaffer and John R. Thompson were added.

Resolutions in consequence of the death of our much respected President, also Directors Messrs. Wm. Simpson and W. G. Bennett, were spread upon the minutes of the meeting.

W. H. KNIGHT, Secretary.

Probably no other horseman in the history of racing has owned so many trotters of 2:10 speed as C. K. G. Billings has. Among those in his stud or his stable at one time or another were Uhlan 1:58, Lou Dillon 1:58½, The Harvester 2:01, Major Del Mar 2:01¼, Margaret Druien 2:03¼, George G. 2:05¼, The Monk 2:05¾, Lewis Forrest 2:06¼, W. J. Lewis 2:06¼, McCloskey 2:06¼, Nancy Royce 2:06¼, Prince of Orange 2:06½, Lucile 2:07¼, Bernice R. 2:07¼, Tempus Fugit 2:07¼, Zarrine 2:07¼, Fleming Boy 2:07½, Charley Mac 2:07¾, Turley 2:07¾, Berta Mac 2:08, The Lark 2:08¼, Baroness Virginia 2:08¼, Lucille Bingen 2:08½, Lou Billings 2:08¾, Santos Maid 2:08¾, Expressive Lou 2:08¾, Lucille Marlow 2:09¼, Ida Highwood 2:09¼, Clarita W. 2:09¾, Battleton 2:09¾, Alexander 2:09½, Captor 2:09¾, Louise Jefferson 2:10, and Doc Book 2:10.

✤ ✤ ✤

Visitors at the California State Fair last year doubtless remember the two little Arabian stallions that took part in the horse show and were seen in the horse parades driven to a four-wheeled vehicle by their owner, Dr. J. W. Henderson, of Berkeley. Dr. Henderson has recently sold these two stallions, Zamil and Mubarka, to the Japanese Government and it is understood they will be used for siring horses suitable for the Japanese army. As the Japanese are small in stature they need small horses and these Arabians will doubtless fill the bill.

✤ ✤ ✤

Billy Finley has a good stable of pacers at Santa Maria. He has Pope Hartford, black gelding by Wild Nutling, with a mile track winrace of 2:09¼ made in 1915, and a half mile track winrace of 2:11¼ made the same year. Mono Ansel, bay stallion by Monocrat, with a winrace of 2:09¼ made last year, Ben Corbett Jr., bay gelding by Ben Corbett with a mile track winrace of 2:09¼ made in 1915, and a half mile track winrace of 2:12 made in 1916. Besides these three he has several young horses without records that he expects to race this year.

A New Lamb Record at $14.80.

Live Stock Reporter:—During the latter part of 1916 and so far the present year may be correctly termed sensational periods in the history of the St. Louis market. First one price record and then another was hung up only to be replaced by another, then still others. Cattle, hog, and sheep records have been smashed right and left during the past few months and fortunate have been the men who have been stimulated with confidence as to the future of the market in feeding $1 corn.

One of the noteworthy record breaking sales was made Tuesday in the sheep house when 136 head of choice Missouri fed western lambs averaging 80 lbs. sold at the phenomenal price of $14.80 per cwt., while 108 head of Missouri fed, aged western ewes that averaged 108 pounds sold at $10.90 per cwt. These were marketed by Chas. Householder, one of the foremost flockmasters of the state of Missouri. Mr. Householder resides in Audrain county, one of the best producing sections. The systematic handling and conservative judgment of his feeding operations have given him a reputation second to none. Mr. Householder is to be congratulated on the honor of selling the first sheep and lambs at the price upon this market in history.

John T. Buckner of Audrain county, Mo., sold a load of western lambs of his own feeding, 149 head that weighed 75 lbs., and they sold straight at $14.60 on the National Market Tuesday. Mr. Buckner was pleased with the sale of his lambs as they brought much more than he hoped to get when he began feeding them.

✤ ✤ ✤

The State Veterinarian has on file applications for the tuberculin testing of over 6,000 herds containing between 75,000 and 100,000 head of dairy animals. The testing of these cattle will require an immense amount of work. A large number of these herds must be tested twice every year, and in order to assist dairymen in eradicating tuberculosis from their herds it will be advisable to test some herds oftener. Inspectors are instructed to test every animal in the herd, including fresh and dry cows, bulls and calves. This indicates the thoroughness with which the new law is being enforced. With the co-operation of dairymen throughout the State, tuberculosis should be greatly reduced in the dairy herds of California.

✤ ✤ ✤

Overton Harris & Sons, Harris, Mo., have completed arrangements to sell 150 head of Model Herefords on the farm Feb. 28 and March 1. That this sale will easily eclipse all former sales goes without saying. The staging for this annual event is now nearing completion. During the year 1916 this great herd has increased to the point of a new building 200 feet long that has been added to the regular equipment, that can stable the 150 head of sale cattle so buyers can have a splendid opportunity to see every animal. Added to this is a new sale pavilion, comfortably seated, so that practically everything is under the one roof; thus visitors at the 1917 sale can rely on seeing the cattle to the best possible advantage without even going outdoors.

✤ ✤ ✤

The first Western Hereford Futurity, judged at the recent Denver show, was a decided success, and its promoters are well pleased with the experiment. The nominations were limited to members of the Western Hereford Association, membership in which is open to breeders in Colorado, Wyoming, Montana, Idaho, Washington, Oregon, Utah, Nevada and California. A total of 65 junior and senior calves were kept good and presented in the ring, and they were highly creditable to the Western breeders, a growthier, stronger-boned, typier lot of calves seldom having been seen in any show ring.

✤ ✤ ✤

M. L. Woy, of Fresno, a leading horseman-stockman of California, recently purchased 100 head of fine Durham heifers and placed them on his ranch near Fresno for breeding purposes. He will buy the best bulls from time to time that the breed affords and expects to follow the same custom in this line of endeavor as he has with his favorite hobby, the trotters, and own and breed nothing but the best. The cattle were purchased from D. C. Sample, one of the leading breeders of that section of California. In addition to some splendid swine and other live stock, Mr. Woy has a mammoth jack and 20 fine mule-mares on his ranch and will breed mules on an extensive scale.

✤ ✤ ✤

Probably the best way for the dairyman to maintain and build up his herd is to raise his heifer calves. If his foundation cows are good producers and if he uses a tested sire he can be reasonably sure that the heifer calves will be good producers. But with the fast advance in prices of land and farm products, the expense of raising the calves is increasing. When the young were allowed to suckle their dams no such conditions existed, but this practice is no longer economical.

✤ ✤ ✤

D. O. Lively, of San Francisco, who is in the corn-belt buying purebred live stock, last week secured one of the prize bulls from W. T. McCray's herd at Kentland, Ind.

✤ ✤ ✤

Preparations are now under way for the installation of the milk condensary machinery at the large Borden plant recently completed at Modesto.

Harness Horses and Horsemen

Fair Promoters and Horsemen to Meet.

Secretary Joseph Waddell, of the recently organized California Fair and Racing Association, has sent the following communication to all secretaries and managers of fair associations in California, and also to a large number of horse breeders and others interested in the organization of a fair and racing circuit in California this year. In addition to this personal invitation, President Cannon and Secretary Waddell request that every person interested in fairs, live stock and horse shows as well as legitimate racing will consider himself as invited, on reading or hearing of this notice, and will make arrangements to attend this meeting and take part in its deliberations. The call is as follows:

San Francisco, Feb'y 10, 1917.

"A meeting of the California Fair and Racing Association is hereby called to meet in the assembly room of the Hotel Manx, Powell street between Geary and O'Farrell, San Francisco, at 1 p. m., Saturday, February 24th, 1917, for the purpose of further perfecting the permanent organization of this association, arranging and making a final allotment of dates for the California Circuit of 1917, and providing uniform rules and conditions for the same, and such other business as may properly come before the meeting.

All the members that would like to be in this circuit that we have been unable to visit are invited to attend this meeting and try to arrange for dates.

Members should come prepared, if possible to present their racing schedules, accept dates, and adopt conditions and classes. If there is any benefit in early announcement of schedules, we should this year receive it, so discuss these matters, if necessary, with your directors before the meeting.

You are earnestly requested to be present at this meeting in person, and a general invitation is extended to all persons who are interested in the holding of annual fairs and race meetings in California to be present and take part in the deliberations.

L. L CANNON, President.
JOSEPH WADDELL, Secretary."

C. A. Harrison Says a Few Words.

Dr. Ellis McLean, of the horse dealing firm of Frazier & McLean, Portland, Oregon, is the owner and breeder of two very choicely bred young horses. One is a three-year-old filly, sired by The Bondsman, dam Shelagh by McKinney 2:11¼, second dam Electway (own sister to Klatawah (3) 2:05½, Chas. Derby 2:20 and others), third dam the great broodmare Katie G. by Electioneer. Shelagh was was a fast trotter sold at auction at the dispersal sale of the late James Coffin, and bought by D. L. Hackett for C. A. Harrison, then a resident of Victoria, B. C. Mr. Harrison sold Shelagh in Canada and a Mr. Johnson got her. Dick Wilson trained her and drove her a mile in 2:13 at Rose City Track, Portland, so her filly by The Bondsman has a just right to make Dr. McLean proud of her. The other is a two-year-old colt out of May Ella by McKinney, second dam Ada Rock by Adirondack. Ada Rock is the dam of one of Oregon's many good pacers, Atlas 2:15¾, and the trotter Bessie Jones 2:17½. Dr. McLean is going to send these two royal equine swells to a first-class trainer as he realizes they have no value unless early and properly trained.

There are many well bred young horses owned in and around Portland and Salem, if their owners would just brace up, cheer up and have them trained and raced. Oregon should begin racing by June 1st. There is no scarcity of tracks nor is there a scarcity of horses. I admit there is a scarcity of sober, honest, competent trainers, but our factories are still making baby carriages, so I think the crop of competent trainers will be kept replenished unless a war should take away all our good young western trainers. But as I said before; perambulators are still being made. C. A. HARRISON.

Death of Directly 2:03¼

Word comes from Phoenix, Arizona, that the black stallion Directly 2:03¼ dropped dead in his stall there on January 29th from heart failure. He was owned at the time by Chas. A. Smith, who also owned the old champion four-mile trotter Senator L. when that horse died a few years ago. Directly was bred by Mr. I. D. Cunningham of Hayward, Cal., and was foaled in 1892. Mr. Cunningham owned the mare Mabel by Naubuc and sent her to the court of the "little black rascal" Direct 2:05½, as Monroe Salisbury called that son of Director, and Directly resulted. Mr. Salisbury took Directly and raced him as a two-year-old, giving him a mark of 2:07¾ at the pacing gait at Galesburg in 1894. It is twenty-three years since then and Directly's mark has never been beaten by any two-year-old pacer, but the two-year-old colt Poorman by The Northern Man tied it last year. After Salisbury sold Directly to Frank Gorton of Chicago the latter placed him in the hands of George West, who took him to Louisville, Kentucky, in 1898 and beat such horses as Anaconda, Chehalis, Frank Bogash, Bumps, Ananias and Planet in three straight heats in 2:04¼, 2:06½ and 2:03¼, and became the fifth fastest pacer in the world, only Star Pointer 1:59¼, John R. Gentry 2:00½, Joe Patchen 2:01¼ and Robert J. 2:01½ having faster records. He passed through different hands and made seasons in several states after being retired from racing. The Year Book credits him with 40 standard performers up to the close of 1916 and of these three pacers are in the 2:10 list—Direct Gentry 2:05¼, Correctly 2:08 and Directed 2:08¼. He was a wonderfully fast and game horse and but for his bad feet, which probably resulted from too much work as a two-year-old, he would have paced close to the 2:00 mark.

Stanford McKinney in the Stud.

M. L. Woy, who bought the stallion Stanford McKinney from George Warlow of Fresno, intending to use him as a private stallion, has consented to permit him to serve a few outside mares this year and presents his advertisement in this issue of the Breeder and Sportsman. For his opportunities Stanford McKinney has proven a high class sire. He never sired a colt or filly out of a mare of any breeding that could not trot fast, and now has to his credit Miss Macklie 2:09¼, Pavana 2:10¼, Kinneysham (3) 2:13¼ and Silente 2:19. Stanford McKinney was bred by Palo Alto Stock Farm. He is by the great McKinney 2:11¼ and his dam is Palavena, a daughter of Palo Alto 2:08¾. Palavena took a record of 2:27 under the name of Avena P. and produced High Admiral 2:07¾, Mendovina 2:19¾ and Alto Dewey 2:24¼. The second dam of Stanford McKinney was Astoria, by Gen. Benton, sire of the dams of Sunol 2:08¼, Serpol 2:10 and Lena N. 2:05¼; his third dam was Asthore by Kentucky Prince, sire of the dams of 9 in the 2:10 list; his fourth dam Sheba by Hambletonian 10, and fifth dam Queen by Harris Hambletonian 2. Stanford McKinney is not a large horse, but he is a horse of fine proportions, perfect trotting action, and could be given a low record even now if he were trained. There is no horse in California today that a person can send a good mare to with more certainty of getting a fast trotter.

The New Time Allowance Rule.

A Sacramento correspondent writes the Breeder and Sportsman as follows: "How does the new time allowance rule strike you? If it works out in other States as it looks to here it will be fine—for a few. There is a horse here with a winrace of 2:09¼. He can start in the 2:14 class and no matter when entries close, if he don't beat 2:09½ he can race all season in the 2:14 class, and next season, unless the rule is changed, get one more second and be in the 2:15 class. If you start out against him with a green one and get a winrace of 2:10 you will be in the 2:10 class in 1918 and the old "winrace" that has beaten you in 2:09½ (a quarter of a second slower than his old record) will be in the 2:15 in 1918. I know a mare, record 2:07¾ fourth heat, has raced around 2:05 and 2:06, that is eligible to the 2:13 class; another with a record of 2:06¼ that is eligible to the 2:12 class; a gelding with a record of 2:09¼ eligible to the 2:12 class. These are horses that are all likely to be raced this year and all but one quite likely to go right to or better than their records. A nice bunch for a 2:12 or 2:14 class trotter to hook up with all season. They can leave the best 2:12 and 2:14 class trotters out of the money all season and get another second allowance for it next year, while a green one gets marked if he is lucky enough to win a race just where they make him go.

"OBSERVER."

[There will never be a time allowance rule devised that will not favor some horses, just as the old rule which compelled a horse to enter in his class determined by his record, has kept many horses from being raced after being "marked for life." Some of these horses that will have a big time allowance this year have never made a successful campaign, and have had more entrance money paid out on them than they have won. And the chances are that a horse that fails to race well in the class in which he has been entered will not make a much better showing when entered in slower classes to which he is made eligible by the new time allowance rule.—Ed. B. and S.]

Many With Records Below 2:10.

There is quite a field of fast record pacers, owned on the Pacific Coast, from which the managers of race meetings will be able to make up some good fast races this year. Among them are Zombrino 2:06¼, White Sox 2:05¼, Vernon McKinney 2:01½, Rastus 2:04¾, Jim Logan 2:01¾, Nifty 2:07¾, Bernice 2:07½, Mono Ansel 2:09¼, Ben Corbett Jr. 2:06¼, Potrero Boy 2:06¼, Emeline Dillon 2:07¼, Prince Zolock 2:07¼, Mack Fitzsimmons 2:07¾, Madame Mac 2:07¼, Clara Mac 2:04½, Vera Hal 2:05, O. U. C. 2:07½, Leata J. 2:08, Teddy Bear 2:05, Harold Welcome 2:08¼, Bold Harry Aerolite 2:07¼, Lock Logan 2:07¼, John Malcolm 2:09¼, Verna McKinney 2:09¼, Pedlar Direct 2:09¾, Hal Logan 2:09, Hal Paxton 2:09¼, and several others. The fast record trotters are not quite so numerous, but among them are Anvil 2:02¾, Peter McKlyo 2:06, Helen Stiles 2:06¼, Esperanza 2:07¼, Carlokin 2:07¼, Virginia Barnette 2:07¾, Albaloma 2:08¼, Honey Healey 2:08¼, Kid Cupid 2:08¼, Pegasus 2:08½, Bon Guy 2:09¼, Bonnie Ansel 2:09¼, Future Tramp 2:09¼, Miss Macklie 2:09¼, Nada 2:09¼, Rags 2:09¼, San Felipe 2:09¼, Donasham 2:09¾, F. S. Whitney 2:09¾, The Proof 2:09¾, Moko Hall 2:09¾, and others outside the 2:10 list that are expected to enter "the charmed circle" this season.

Will of the Late W. F. Whittier.

The will of the late William F. Whittier bequeathed the bulk of his large estate to his three children, Mrs. Lottie J. Sypher and Mrs. Mattie S. Wier of San Francisco, and William R. Whittier of Hemet.

Other beneficiaries are W. J. Weatherly, for many years private secretary to the decedent, who is given $5,000, Way Ying, a Chinese cook, who gets $500, Minnie Stengel, housekeeper, who is bequeathed $1,000, and the Hospital for Children at San Francisco, which is left $5,000.

The value of the estate is not known, but is presumed to be well up in the millions. The Whittier properties in Hemet and vicinity are estimated to be worth more than a million, and Mr. Whittier owned much valuable property in San Francisco, and was heavily interested in manufacturing enterprises in West Virginia.

W. J. Weatherly, William B. Wier and William R. Whittier are named as executors under the will and absolute control of the estate will vest in them.

It is not expected that there will be any immediate change in the management of the Hemet properties, but it is understood the real estate, including the Hemet Stock Farm, will be put on the market.

Our New Editor Visits Fresno.

Ideal weather conditions, a splendidly equipped track and the brightest racing prospects California has had in years, together with the interest being taken all over the state in harness racing and the liberal purses proposed, are the prime factors for the "whiz" and preparation being made at Fresno. There was more activity there last week than I have ever seen at this time of year and the enthusiasm and eagerness with which every trainer is working his horses would lead one to believe the bell was going to tap within the month.

There are more than twenty-five head of "top-liners" getting their final preparation at this track and there are many in the lot which promise some memorable battles for the coming season. A whirl around the stables and a few moments listening to the business chatter assured me that the boys were at it in earnest and I saw some youngsters which would be ready if the races were called tomorrow.

M. L. Woy, one of the veteran California sportsmen, who has won many a coveted purse and probably as much money as any owner of recent years, has recently bought the good stallion, Stanford McKinney 45173, by McKinney; dam Palavena 2:19½ (2-year-old record), by Palo Alto 2:08¾, from Geo. L. Warlow, of Fresno, and will place him in the stud at his ranch near Fresno. Stanford McKinney is a trim made, good looking horse; a little small but built for a lot of endurance, and is all horse from end to end. Mr. Woy has always wanted him as he believed him to be the right kind of a sire, and when Judge Warlow decided to sell out Mr. Woy did not let any grass grow under his feet before closing with him for this horse. Stanford McKinney has already sired a number of fast ones, including Miss Macklie 2:09¼, Pavana 2:10¼, Kinneysham 2:13¼, and Silente 2:19, and there are several now being worked that will add to this list as soon as they are raced.

B. F. Townsend has nine head of the best he has ever jogged in his string, four of them owned by Mr. Woy, who declares they are the best lot he ever owned. From his three-year-old stake-winning filly, Lula B, 2:11¼ by The Bondsman and out of Loma B. by Stam B., Mr. Woy expects some sensational speed. In fact, Miss Macklie, Expressive B. and the green pacer, Strathalie Hall all have this horse lover and sportsman about as enthusiastic as he has even been over his "hosses."

Walter Gallup is well pleased with the results he is getting from four youngsters and declares the boys will know he has been to the races when the roll is called. He is particularly sweet on the pacer, Surety, which took a three-year-old mark of 2:11 in the hands of Al McDonald, who sold him to Mr. Gallup. Surety has recently been gelded and did not come around as well as was hoped for, but is now as sound as a bullet and Mr. Gallup says we had better "look out" for this good son of The Bondsman and Eva H., that good daughter of Washington McKinney.

C. E. Clark has two, a young pacer and a trotter that are getting a lot of good work and fulfilling the hopes of their trainer.

Harve Workman recently landed at Fresno's speedway with five head owned by De Ryder and Malcolm and has started them on their way to glory.

Harry Brown has two ripping good colts going good and will start a few more in the near future.

[Jump.]

An Illinois farmer who breeds big trotters, using mares that weigh around 1200 pounds, and patronizing registered horses that are large, says the trotter as a draft horse is a success and that in summer his trotting bred horses plow all day when the weather is so hot that the big drafters cannot work at all.

✤ ✤ ✤

Harry Hersey, who drove Dan Patch to his record of 1:59¼, has accepted the position of second trainer with the stable and is already located at Poughkeepsie.

Thoroughbred Matters

Mr. Macomber to Build at Belmont Park.

New York City, Feb. 6.—A. K. Macomber, the most notable of recent recruits to the American turf, will have his own private stable at Belmont Park before the opening of the season at the big Nassau County track, and construction will shortly be commenced. The new buildings, plans for which have been accepted, will be probably the most elaborate and most modern found on any race course. They will be situated a short distance above the field stand and the plot of ground that has been set aside for their occupancy is of a size to permit of commodious quarters for the horses as well as a luxurious home for Trainer Walter Jennings.

When seen at the offices of The Jockey Club Trainer Jennings said that all of the Macomber horses, as well as those of the various others that make up the colony at old Palmetto Park, were enjoying the very best of health. There has not been a day when it was not possible to gallop over the track, and though there had been considerable rain, the track is of such a sandy nature that it rapidly dries out and it is always a safe galloping ground.

Just now Jennings has fifty-one horses in his care, and of these all, with the exception of some Star Shoot two-year-olds and the older horses that were purchased at Saratoga, are foreign-bred. Mr. Macomber has paid larger prices than any other American sportsman who made importations last year, and there are several in his string that would not have been permitted to leave England at any price were it not for the present war.

It was at Palmetto Park that Jennings fitted Star Hawk for the Kentucky Derby last winter, and his spring he will have a try at the same big race with another son of Sunstar in North Star, probably the best two-year-old that raced in England last year. This fellow is a son of Sunstar and Angelic, and he was winner of the Middle Park Plate and the Barton Mills Nursery Handicap of seven furlongs at Newmarket.

Mr. Macomber's commission was to buy the best two-year-old in England and before North Star was the final selection Knutsford, a son of Swynford and Maypole was seriously considered. He won the Exeter Stakes and the Soltykoff Stakes at York, and Two-Year-Old Stake at Newmarket, and he was also second in the Hopeful Stakes at Newmarket. After both colts were carefully considered North Star was the selection.

Since arriving at Palmetto Park North Star has been going along nicely under the care of Trainer Jennings, and he promises to have him go to the post in the best of condition for the Kentucky Derby, barring accidents. There are others named for the same running from the stable, but the general belief is that North Star will readily be the best in the string.

Star Hawk will be pointed for the Kentucky Handicap, to be run at Douglas Park, and provided he is not too harshly treated by the handicapper he will undoubtedly be a starter there, but as is the case in the Derby there will be several others named for that fixture.

When Racing Was For Sport in South Carolina.

Josiah Quincy's diary record of wagers aggregating £2,000 on the Flimnap race is indicative of the active spirit of betting before the Revolution. That spirit increased rather than abated with the revival of racing after the restoration of peace. Betting was conducted then, however, under very different methods than those of these days. Bookmaking and pool-selling were unknown. Gentlemen carried ivory tablets, morocco or vellum covered, upon which they recorded the items of their wagers with the names of the takers, and the differences were adjusted, generally, though not always, at the end of the day, or on the morrow. Thus cash was not necessary, and the prevailing tendency was, therefore, probably, to bet more than is possible now under the bookmaking system.

Horse racing reached its zenith at Charleston under the auspices of the South Carolina Jockey Club, the oldest jockey club in the United States. The date of its organization is not definitely known, but it probably came into existence after the Revolution. It purchased the Washington race course from the heirs of the founders in 1836, the following year inclosed it by the erection of a seven-foot fence. Then, "for the first time, a small assessment was levied on foot passengers." Distinguished visitors, or even respectable strangers from abroad or from other states, were never allowed to pay for entrance. They were received as guests of the club, and provided with tickets and badges entitling them to all of the hospitalities of the meeting. The meeting lasted a week, and was usually held in the early spring. The Jockey Club dinner, on Wednesday evening, and the Jockey Club ball, on Friday night, were the chief society events of the week. In 1856 the club had over 200 members and an annual income of more than $10,000 derived from subscriptions, real estate, bonds and bank stock. Besides the race course the club owned a large farm adjoining, where horse owners could get supplies and accommodations for their help.

In those days, race week was the red-letter occasion of the year. Mrs. St. Julian Ravenel, widow of a descendant of the pioneer of the sport mentioned, wrote as follows of the enthusiasm of Charlestonians over racing:

"Race week was the great popular festival shared by everyone, from the government and ladies in the grandstand, to the negroes who sat unmolested on the fence tops—only the sick and infirm staying at home. The ladies in carriages; the gentlemen on their handsomest horses; the boys on their ponies; the poorer sort in carts and wagons of every kind; the negroes in numbers, all thronged from every direction to the course. It was a gay open-air jollification, good humored and merry, thoroughly enjoyed by all."

To complete the picture we must add the statement of Dr. Irving that the schools were closed, shops shut up, and the courts adjourned at noon to give opportunity to all to attend the races, and that "'venerable and distinguished dignitaries of the land, clergymen and judges" touched elbows on the grandstand. There can be no gainsaying that much of the same spirit exists in the old town today, notwithstanding the inscription on the statute books of provisions forbidding the sport.

The last successful meeting of the club was held in 1860. No meetings were held during the war, and only one afterward. That was a failure, so after remaining dormant for some years, it sold its real estate and other assets and went into liquidation.

The last president of the Jockey Club was the venerable Major Theodore G. Barker, a distinguished lawyer, still socially prominent as head of the famous St. Cecillia Society.

Racing Dates for 1917.

Business Men's League, Hot Sprinks, Ark., March 7 to March 26—17 days.
Essex Park Jockey Club, Hot Springs, Ark., March 27 to April 14—17 days.
Kentucky Association, Lexington, Ky., April 28 to May 10—11 days.
New Louisville Jockey Club, Churchill Downs, Louisville, Ky., May 12 to 25—12 days.
Douglas Park Jockey Club, Douglas Park, Louisville, Ky., May 26 to June 9—13 days.
Latonia Jockey Club, Latonia, Ky., June 11 to July 4—21 days.
Montreal Driving Club, Delorimier Park, Montreal, Que., May 19 to May 26—7 days.
Ontario Jockey Club, Toronto, Ont., May 19 to May 26—7 days.
Dorval Jockey Club, Montreal, Que., May 29 to June 5—7 days.
Montreal Jockey Club, Montreal, Que., June 7 to June 14—7 days.
Back River Jockey Club, Mount Royal Park, Montreal, Que., June 14 to June 21—7 days.
Connaught Park Jockey Club, Ottawa, Ont., June 16 to June 23—7 days.
Maisonneuve Park Jockey Club, Montreal, Que., June 22 to June 29—7 days.
Hamilton Jockey Club, Hamilton, Ont., June 26 to July 3—7 days.
Western Racing Association, Devonshire Park, Windsor, Ont., June 30 to July 7—7 days.
Montreal Driving Club, Delorimer Park, Montreal, Que., June 30 to July 7—7 days.
Niagara Racing Association, Fort Erie, Ont., July 4 to July 11—7 days.
King Edward Park Jockey Club, Montreal, Que., July 9 to July 16—7 days.
Windsor Jockey Club, Windsor, Ont., July 14 to July 21—7 days.
Kempton Course Breeders' Association, Kempton Park, Montreal, Que., July 21 to July 27—7 days.

May Regulate Pay of Jockeys.

The Kentucky Racing Commission has a rule before it which, if passed, will enable racing associations to intelligently distribute their offerings. It is likely to pass, and is one of the best rules proposed during the life of the present commission. The next regulation which the commission should take up is a graduated jockey fee system. At present jockeys riding in Kentucky receive $25 for winning mounts and $10 for losing mounts. A jockey who finishes second or third receives no more pay than the jockey who finishes tenth in a field of ten. The purses are distributed to horses which finish first, second and third, and in stake races the fourth horse usually saves his stake entrance, then why should not the jockey money be distributed in the same manner? An easy way to divide the jockey money properly would be to pay $25 for winning mounts, $15 for placed horses, $10 for show horses and give $5 to the jockeys who failed to get their mounts in the money. This gives a premium for the boys who are always trying to get down in front. Too many mounts now are pulled up when their riders see they have no chance to win. If a graduated jockey fee system was in vogue racing patrons would find their horses ridden out, and those who wager on them to place and show would have a much better opportunity of winning than they have now. Horsemen at Latonia discussed this rule last fall and were unanimous in their praise of such a measure. Pass this measure, Mr. Commissioners, and better racing will result in Kentucky.—[Cincinnati Enquirer.

More About Latonia's New Stake.

The greatest thoroughbred race in all America may be run annually during the fall meeting at Latonia, if plans under consideration by General Manager John Hachmeister materialize. Mr. Hachmeister is contemplating putting on a race to which $15,000 will be added for three-year-olds and over, probably at a mile and three-eighths or a mile and a quarter. The terms and conditions of the race have not yet been determined, and, according to Mr. Hachmeister, the race itself is not a certainty. "This race I have in mind depends upon the breeders," said Mr. Hachmeister a few days ago. "If the breeders show a desire to support it by nominating their horses, I am sure that the Latonia Association will put it on. However, it has not been determined just what the conditions will be. I understand that the Thoroughbred Breeders' Association gave an indorsement to a race of this kind. I have been in correspondence with A. B. Hancock about the race, but nothing definite has come out of it. Some of the Kentucky breeders do not support the stakes now offered in Kentucky, but I believe this event is worthy of their hearty support.

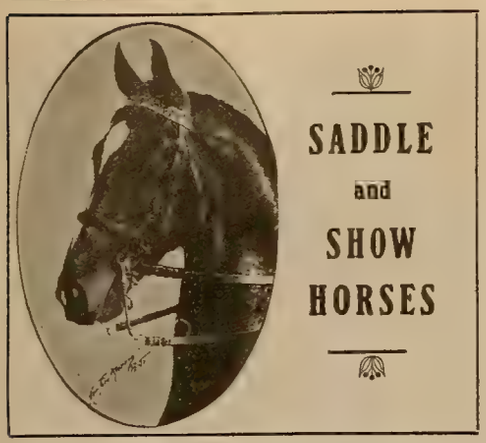
"If we go through with the plans for such a race it will mean the biggest race in the country. The Futurity was worth $17,340 net to the winner last year and only $5,000 was added to it. We propose to go this $10,000 better in added money alone. First money should be worth $30,000 and this race should make Latonia America's premier racing point."

Horse Values Will Not Be Lower.

A writer in the Chicago Breeder's Gazette says:

"Interest in horse breeding among farmers is quiet just now. The unusual combination of conditions seems to have distracted attention and befogged judgment. The centering of horse market demand upon war horses has caused the impression that big draft horses are not wanted. In reality not enough high-class heavy horses are showing up at markets to supply requirements of team-owners. The big ones have been scarce all along, and they have brought much more than war-horse prices. But horse prices have not vaulted skyward along with other live stock values, and that has also caused discouragement.

Big food requirements hold up the prices of cattle, hogs and sheep; tractor talk tends to keep down the price of horses. This has undoubtedly checked the purchase of farm mares and stallions. It has led some men to wait for subsequent events to point the way before they launch ahead on established breeding plans. Tractors and trucks are doing some horse work, and yet horses have not slumped. That fact of itself should impress the conclusion that the horse has a secure place in commerce and agriculture. The war is steadily reducing the horse population of the world, and the end of the war is not in sight. After the war some countries must restock their farms, and that will require more and better horses than are needed for war. In fact, the reconstruction of agriculture and the industries in war-swept countries will demand horses more insistently than other live stock. Peaceful people eat bread and vegetables if they think meat is too high-priced. Our exports of meat are going for army use. It seems certain that later on, when shattered industrial pursuits must be repaired abroad, there will be just as imperative and paying a call for horses to do the work.



"While interest is largely attracted from horses to meat and dairy animals, there is a good opportunity to get ready for the higher prices that are sure to come for horses. The time to stock up is when many are thinking of something else. The time to breed horses for the market five years hence is now, so that the animals will be ready for sale later on. No sudden expansion in horse breeding is possible. It is only the man with prophetic instinct and persistence through depression who will be ready to sell horses when everyone else wants to buy."

———o———

The latest and assuredly one of the most valuable purchases in the bloodstock line yet made by Corrigan & McKinney, for their Wickliffe Stud in Kentucky, in Marian Hood, half-sister to Polymelus, the leading sire of England, which they have just secured from J. B. Joel. The transaction also includes a filly foal by Prince Palatine (for which Mr. Joel paid the highest price ever given for a thoroughbred) and she will be bred to him again this year. Marian Hood is a bay mare, foaled 1905, by Martagon (son of Bend Or and Tiger Lily by Macaroni) out of Maid Marian (dam of Polymelus) by Hampton; next dam Quiver by Toxophilite. Marian Hood is the dam of A. K. Macomber's Sunbonnet, which showed considerable class in this country last year as a two-year-old and of which great things are expected this year.

✣ ✣ ✣

Lady Dilham, one of the greatest show horses in the world, and winner of 170 blue ribbons, and Elegant Dilham, a full brother, were sold as a pair for $4,500 to Thomas Clark of Edgmont, Pa., in the sales ring in New York last week. The two noted high steppers belonged to Miss Constance Vauclain of Philadelphia, who authorized the sale to modify the present over-extensiveness of her great stable of show horses at Rosemont, Pa. This pair are probably 15 and 16 years old respectively.

SADDLE and SHOW HORSES

The latest star in the Loula Long stable is Prohibition, whose first appearance was at Denver's great horse show and where his name created amusement. Her great Revelation is better by himself than with Reputation, the new mate.

✤ ✤ ✤

Col. Tom Dennison's high school mare, Fashion Denmark, was a sensational attraction despite the presence of Belle Beach. Fashion Denmark was mated to Marshall Chief late last summer and is thought to be in foal to that great stallion.

✤ ✤ ✤

N. R. Pratt, of Denver, has the finest selection of saddle horses in his Capital Hill Riding Academy that is to be found in any riding academy in the country.

✤ ✤ ✤

John Hook must have felt considerably "elated" when his junior mare, Joan Sawyer, defeated the noted gray Princess Eubenia. It takes a real one to beat the gray mare that a few years ago came nearer taking the measure of My Major Dare than any mare has ever done. However Joan Sawyer is the most attractive thing Longview has brought out in many years.

✤ ✤ ✤

The Mayslake stable of Mrs. Francis Peabody, which was so successful in Hunter and three-gaited saddle events at Denver, were shipped to Southern California where Mrs. Peabody will spend the remainder of the winter.

✤ ✤ ✤

Silver Zizz, the gray gelding John Hook has been telling the world about for several weeks, was defeated in the five-gaited gelding class at Denver by his stable companion, Prince of Melbourne.

✤ ✤ ✤

Henry Cullens, of Philadelphia, who is a good buyer of Missouri and Kentucky saddle horses, recently purchased a high class hunter from Langhorne Tabb Anderson, Point-au-View Farms, Maysville, Ky. Mr. Anderson has produced some of the best Hunters in recent years and like the saddle horses he sells, they have made good at the big shows.

✤ ✤ ✤

Dr. J. J. Cox, of Sacramento, recently purchased from R. L. English, Pasadena, the good three-year-old stallion Cochise by Highland Squirrel King out of Grace George, also a daughter of Highland Squirrel King. The youngster was left in Mr. English's care to be prepared for the 1917 Pacific Coast Gaited Saddle Horse Futurity. Trainer Tom Jefferson has him racking splendidly and acting like a regular show horse. Cochise has a great tail and carries it well; is of good conformation, and Mr. English is expecting great things of him in the Futurity.

✤ ✤ ✤

Usually at this time of year there are five or six annual sales of saddle horses advertised in Missouri, but to date there have been no formal caliming of dates or other movements to signify that there will be the regularly conducted saddle horse sales of the past. The majority of the big sales declare they had such a strong private demand for good saddle horses that they have nothing to offer. This however is not logical, for usually the more prosperous a breed of live stock the more numerous the public auctions. The Breeder and Sportsman has received several inquiries for the dates of saddle horse sales, which is an indication that there is some interest. Sale dates will be published free in this publication and it will be good business to select dates early.

✤ ✤ ✤

The directors in the Shelbina, Mo., fair association has elected the following officers: Mark C. Dempsey, president; J. G. Douglass, vice-president; B. F. Dobyns, treasurer, and C. C. Hayward, secretary. Mr. Hayward is undecided as to accepting the secretaryship, inasmuch as it may require more time than he can devote to it.

✤ ✤ ✤

Col. D. A. Pierce, of Armstrong, Mo., sold a well bred yearling saddle horse to Emmett Ballew of Glasgow, last Friday at $300. The horse is a full brother of Easter Girl, raised and sold by Mr. Pierce, and for which her present owner, Jas. Baford, of Paris, refused an offer of $1000 last fall. Mr. Ballew expects to develop the colt into a great prize winning saddle horse.

Southern California Saddle Horses.

Much has been said of recent years of saddle and show horse activities in California and the breeders of saddle horses especially are looking to California as a future market for this type, so surely destined to become the most popular of all light horses. However, the general impression in the East, Middle West and South, is that there is no comparison between the horses bred and exhibited there and here. Myself a Middle-Wester, I know what Kentuckians and Missourians think of the interest here. The general impression is that there are only one or two real show horses on the coast and that they have been "handed in nice packages" to the Californians.

The belief that California is destined to become a great state for saddle horses is, in my opinion, a just one, and there will only be a few seasons pass before the county and district fairs are giving liberal premiums for saddle horses and the cities of Los Angeles, San Francisco, Oakland, Portland and Pasadena, conducting annual horse shows which will attract the breeders and exhibitors of the Middle West and which will act as an impetus to the rancher-stockmen of California. Like the farmer-stockmen of Missouri and Kentucky, the Californians will realize what great possibilities are to be gained by having a few well bred saddle mares on their farms, and, as in everything else, will buy but the best. But the idea that Californians are yet in darkness is entirely wrong.

It has only taken me a few weeks to find that they are as good judges here as elsewhere, and further, there are some establishments breeding saddle horses here which will compare with the most pretentious and oldest established breeding farms of the Blue Grass. There are comparatively few breeders, yet those breeders have had "hoss sense" all along and a visit to their places will convince any Missourian that ever lived that they have "hoss sense" and good judgment here as well as there. The future of the riding horse is bright and Californians realize it. If my good and highly esteemed friends in the "Blue Grass" don't step a little livelier it will be another story of the Tortoise and the Hare.

A week of perfectly tropical conditions, with such skies and air and sea as are only found in favored California—the air full of the twitter and chatter of birds, the fragrant scent of growing young crops and ripening oranges—found this Missourian inspecting the leading saddle horse nurseries of the coast, which are located near Los Angeles, and whether it was the honest-to-goodness hospitality, the multitudinous charms of Southern California, or sure enough good horses, I cannot swear; but I was the most delightfully surprised man living. I saw things that would open the eyes of many a veteran of the horse shows, and youngsters that would cause many an egotistical horseman, starting to the California shows with his mind made up to gather in all the alluring purses, to pause. I saw saddle horses made and in the making; colts of untold possibilities, and matrons and stallions of royal lineage and reputations, which are to be known in the future saddle horse industry of California, as Montrose, Black Squirrel and Rex Denmark are considered at the present time in Missouri. I saw the foundation of what is to eventually become a magnificent institution, a business promising great possibilities and profit to the judicious breeders and pleasure and entertainment to the multitudes, who, I am sure, are going to grow in numbers with the advancement of the business.

At the Sierra Vista Farm.

Time whirls along so rapidly in the horse breeding world that one remembers a bunch of colts in their long haired ruggedness and coltish characteristics; and returning, to see the same colts in a few short seasons, is unable to grasp the change which has occurred. The development into full aged horses is nothing short of marvelous and causes amazement. I was with Revel Lindsay English, of Pasadena, in Missouri two years ago when he bought a consignment of fine saddle horses for his Sierra Vista Stock Farm at Chino, California. I visited the Sierra Vista Stock Farm last week, just two years to the day after the purchases were made, and it was hard for me to realize some of the highly educated saddle horses exhibited for me at this time were the same weanlings, yearlings and two-year-olds this California horseman bought at the Blue Grass Farm at Mexico, Mo., and at the Moore sale in Columbia, Mo., February 2d and 3d, 1915.

Much speculation was made by Missouri and Kentucky horsemen present of what would be the outcome of Mr. English's selections, which cost him several thousand dollars. It is amusing when one remembers the prophecy of the wiseacres, to see what has really happened. King of the Highlands, the aged stallion bought by Mr. English at that time, has recently died. He sired some good colts here and was a consistent winner in the show rings in California. The Matron, a daughter of Wilson's King and one of the most successful broodmares in Missouri, was bought by Mr. English for $500. She was safe in foal to the noted Grand McDonald; produced a filly foal and was left in Missouri and mated with Majestic McDonald and produced a splendid stallion foal. She is safe in foal again this year and is good for many years to come. She was the best buy Mr. English made and one of the best buys any saddle horse man ever made; in fact, her real value cannot be estimated at this time.

Another horse I was particularly interested in seeing was Comedian, a chestnut colt by Rex McDonald and out of Helen Middleton. I made this comment at that time: "The best horse, in my opinion, was the first sold, Comedian, a handsome youngster by champion Rex McDonald, and all horsemen agreed with me that he was the best buy Mr. English made, and the cheapest horse sold. He is of the approved Eaton type and when he entered the sale arena, graceful and handsome; alert and full of pep, the audience applauded. He started at $200 and was knocked off at $585." However, Comedian was a disappointment when I saw him and he has been a disappointment to Mr. English, who has gelded him and is using him in his Pasadena Riding Academy. He is a very handsome young horse, well gaited and worth what Mr. English gave for him as a pleasure horse. However, as a sensational show horse he has proved a disappointment.

Mrs. T. L. Johnston's noted stallion, Lord Denmark, is the sire of one of the best animals on Sierra Vista Farm—the five-year-old mare Tarma Denmark. This mare is a rich brown with four white feet and is cleverly gaited and up to making a finished show in five-gaited classes. She is of good conformation, level headed, and is good proof and Lord Denmark is a high class sire. She won the three-year-old Pacific Coast Gaited Saddle Horse Futurity at the P.-P. I. E. and has been a consistent winner at the State Fair.

Many of the most famous three-gaited horses in the big shows of recent years have been sired by that splendid stallion, Rex Chief A., among them Glittering Glory, Early Morn, Lee Chief and Vernon Castle, so when Mr. English told me his three-gaited gelding, Confidence—probably the best three-gaited horse on the coast—was by Rex Chief A, I could account for his splendid qualifications. He has been one of the most successful horses exhibited under the colors of the Sierra Vista Farm, among his winnings being the three-gaited championship at the State Fair and second prize to the sensational My Idol at the P.-P. I. E. He is a full made fellow, well mannered, with good legs and feet, and though of the smaller type is made to carry weight.

The black mare, Helen Idlewood, always considered by horsemen as one of the best, if not the best daughter of Rex McDonald, is in fine fettle and it will take "some hoss" to beat her this year. She was shown twelve times last year, winning first in every event, including the championship. Jefferson has her racking like a house-a-fire and seems to have given her a good schooling, for when I knew her she was an erratic sort of cuss and now she has perfect manners and a sweet way of behaving. She comes nearer to being an ideal lady's mare than anything I have seen in California. In fact, she is quite a different mare than the one formerly campaigned by O. J. Mooers.

Like every one who visits this establishment, I was particularly interested in seeing the head of the family, and after seeing a number of spanking good youngsters by Highland Squirrel King I expected much of him; however, when he was brought out I was not disappointed. He is as game as a peacock, clean of limb and sound in feet, healthy, gimpy and breedy and reminding me of his noted sire, the old champion Forest King. Highland Squirrel King is 18 years old. He has sired many western winners and himself was invincible at the California State Fair until retired. To see him and his foals is a rare treat and a sound convincement of his sterling worth in the stud. He also sired San Jacinto, winner of the first futurity ever shown under saddle.

There are two splendid three-year-olds, Cochise by Highland Squirrel King and Tourist Peavine by Dr. Hockaday, being trained with utmost care for the California Saddle Horse Futurity, and the horse that beats either of them will have to be a "plumb good one."

There are a number of worthy youngsters in the stables at Sierra Vista and all worthy of detailed mention. Many of them are destined, I believe, to attract the attention of horse lovers everywhere. The saddle horses here are now in charge of Tom Jefferson, one of the most capable trainers and exhibitors in the country. Mr. Jefferson, a Kentuckian, has been a leading exhibitor in the South for several years and declares he never worked a better lot of prospects than he now has at the Sierra Vista Farm.

There are a number of prominent breeders of saddle and show horses in California who have splendid foundation stock, and like the above described farm, are only in their infancy. A few shows, such as are now contemplated and advanced by the California Saddle Horse Breeders' Association, will put the business on good sound feet here, and then, and only then, will the breeders realize what a brilliant future is in store for them.

Talk about the horse breeding industry being a "dead one." Hon. James Houchin, of Jefferson City, has sold all of his weanling and yearling stallions by his great stallion, Astral King, and is in the market for good stud colts to fill several orders. There never was a better demand for horses of quality than at present.

✤ ✤ ✤

J. F. Walker, of Garden City, Kan., last week rode horseback from his home to a farm that he owns near Stoutsville, Mo., a distance of about 600 miles. This distance was covered in eight days.

Notes and News

Directly 2:03¼ is dead in Arizona.

✤ ✤ ✤

His two-year-old record of 2:07¾ was never beaten.

✤ ✤ ✤

They are going to try Peter Mac 2:03¼ on the half mile tracks.

✤ ✤ ✤

The book of Gen. Watts 2:06¾ is full for the season of 1917.

✤ ✤ ✤

Adioo Guy 2:05¼ will be raced on the Grand Circuit this year.

✤ ✤ ✤

They are talking about having an auction sale of trotters and pacers at Pleasanton during the spring.

✤ ✤ ✤

Secretary Waddell is visiting Fresno, Hanford, Bakersfield and other points south this week.

✤ ✤ ✤

Send in the list of your foals as they appear. Such news is of interest to all horse breeders and owners.

✤ ✤ ✤

Is your stallion advertised? If not, why not? You may have just the line of blood some one wants and does not know where to find.

✤ ✤ ✤

For the eleventh consecutive year Magnus Flaws of Chicago has been engaged to do the starting at the South Dakota State Fair.

✤ ✤ ✤

Fresno will probably give a better racing program than ever this year. It is proposed to offer $1000 purses for some of the classes.

✤ ✤ ✤

How much will Ferncroft, the yearling full brother to Real Lady (2) 2:04¼, bring at the Midwinter Auction, on the 26th of this month?

✤ ✤ ✤

W. G. Durfee's two-year-olds that he has kept eligible to the Pacific Breeders' Futurity are all fillies. One is a full sister to Esperanza 2:07¼.

✤ ✤ ✤

Twenty-two of the 62 yearlings to be sold in the Walnut Farm consignment to the Midwinter Auction at New York this month are by San Francisco 2:07¾.

✤ ✤ ✤

Expressive Mac, sire of Clara Mac 2:04½, Vera Hal 2:05 and Madam Mac 2:07¼, is in the stud at Selma, Cal., at the low price of $25 the season, or $35 to insure.

✤ ✤ ✤

Let every harness horseman in California determine to attend the meeting of the California Fair and Racing Association, to be held at the Hotel Manx in this city next Saturday.

✤ ✤ ✤

The winrace and time allowance rules are quite simple, but every owner of a horse that did not equal or lower his record last season has been busy figuring just what classes he will be able to enter in this year.

✤ ✤ ✤

C. A. Durfee may do the early training of his trotters and pacers this season at the stadium track in Golden Gate Park, San Francisco. He has not selected them yet but has his eye on two or three and has been offered enough horses to make quite a stable.

✤ ✤ ✤

Eight hundred and three foals have been kept eligible to the Kentucky Futurity for foals of 1916. This is 40 more than were kept eligible to the 1915 Futurity at the January payment. California did not have a representative, but the stake is not advertised here.

✤ ✤ ✤

One of the best evidences that harness racing is getting more popular than ever is the fact that east and west the associations are quarreling over dates. A very serious conflict is now on between two of the big fair associations on the Great Western Circuit that want the same date.

✤ ✤ ✤

If you are looking for a high class Shire stallion at a reasonable price, communicate with Blackhawk Stock Ranch, Burlingame, Cal. They have imported and home bred horses with weight, quality and style, that last year made a clean sweep of blue ribbons at the State and county fairs.

✤ ✤ ✤

R. M. Flick, a leading hotel man of Butler, Pa., owns a three-year-old filly by Copa de Oro 1:59 out of Subito, the dam of White Sox 2:05¼, and will breed her this year to Walter Direct 2:05¾, sire of Napoleon Direct 1:59¾. The resultant foal will have a lot of speed inheritance if there is such a thing.

✤ ✤ ✤

Don't fail to attend the meeting of the California Fair and Racing Association at the Hotel Manx in this city on Saturday next. Every person interested in fairs and harness racing is invited to be present. Secretary Waddell will have a report to make that will be of great interest to harness horsemen.

Jim Logan 2:01¾ has started in 87 heats, won 53 of them and been unplaced in but 5. The son of Charles Derby is a real race horse and will doubtless be out again this year.

✤ ✤ ✤

Native King 2:11¾ is the only stallion that ever had a 2:10 trotter to his credit when five years old. He sired Native Spirit, that took a two-year-old record of 2:09¾ and was the fastest two-year-old trotter of 1914.

✤ ✤ ✤

Hereafter the breeder of the winner of the Kentucky Futurity will receive $1000 out of the stake, the breeder of the second horse will receive $500, of the third $300, the fourth $100, the fifth $75 and the sixth $25. This should encourage the breeding of trotters, and it is to be hoped it will, as the number of breeders is diminishing every year.

✤ ✤ ✤

The Canadian Parliament will probably further restrict racing in Canada. There have been so many tracks built in particular centres of population that continuous racing, with all its evils, is feared by the authorities. A bill has been passed to its second reading limiting racing to fourteen days in any county.

✤ ✤ ✤

Horace White, formerly Governor of New York, has just purchased four promising young trotters in Kentucky, through James Snell, who will train them for the Syracuse horseman. Two are two-year-old colts, by Morgan Axworthy 2:17, and another is a two-year-old filly by Siliko 2:08½, while the fourth is a three-year-old gelding by the same sire.

✤ ✤ ✤

If you have a mare that you think will raise you a pacer fast and game enough to win races if she is mated with a good horse, look over the breeding and history of Jim Logan 2:01¾. His advertisement will be found on the second page of this issue. His sire has ten in the 2:10 list and his dam has produced three with records below 2:08. Jim Logan is a race horse and gets the money.

✤ ✤ ✤

Henry Helman has a two-year-old colt that is eligible to the Pacific Breeders' Futurity and other stakes that is by The Bondsman out of Lady Mowry 2:09¼ by McKinney. Henry trained and raced Lady Mowry and gave her her record, and has been expecting to get a real trotter out of her some day. This colt by The Bondsman acts as if he might fill the bill.

✤ ✤ ✤

The Yolo County Fair for 1917 will be held during the early part of October, Thursday, Oct. 4th having been set as the opening day. This fair is to be given by the Yolo County Farm Bureau and no provision has been made thus far for any race program in connection with it. The regular circuit racing on the Woodland track will take place during the last week in August or the first week in September.

✤ ✤ ✤

The Connecticut Fair to be held at the historic Charter Oak track at Hartford, Sept. 3-8 this year, has provided liberally for the fast trotters. The Battle Royal will be for the 2:06 or better trotters and its value $5000. The Yankee Purse is $3000 for trotters eligible to the 2:07 class and the Charter Oak, $5,000 for trotters eligible to the 2:12 class. Then there will be $3000 for a free-for-all pace, $2500 for a 2:08 pace and $2500 for a 2:12 pace.

✤ ✤ ✤

The free-for-all pace for which the Breeders' Association hung up $900 at Santa Rosa last year had eight entries and seven starters, and resulted in one of the best races ever seen on the Santa Rosa track, Rastus winning the first two heats and Jim Logan the third. The race was on the three heat plan. There should be just as many entries in this class this year. At Sacramento where Jim Logan won in straight heats there were six starters, and the purse was $1000. There is one good feature about a free-for-all—there is no figuring on time allowances.

✤ ✤ ✤

Another attempt will be made this year to campaign the great trotting stallion Peter Mac 2:03½, by Peter the Great. At this time last year nearly every follower of the Grand Circuit expected to see him win all the big early closing purses in much the same way that Peter Scott 2:05 won them in 1915. He had never started in a public race and was eligible to the slow classes. On the eve of the opening meeting at Cleveland he developed trouble in his feet, or in his head, and did not fill an engagement. Mike McDevitt, his trainer, now believes the fast stallion is "cured."

✤ ✤ ✤

Every mail from New Zealand brings news of races won by the get of the California bred stallion Harold Dillon that is by Sidney Dillon out of Guycara by Guy Wilkes. Author Dillon, a son of Harold Dillon, won the New Brighton handicap of $2000, and the Mace Memorial handicap of $1500 at the New Brighton meeting. Another son of Harold Dillon that has been winning lately is Sungod that won the Selwyn handicap at Canterbury in 3:29, the distance being a mile and a half and his handicap three seconds. Still another good winner is Bundura, winner of the Islington handicap last month. He is by Harold Dillon out of Bonny Jenny, the daughter of Bonnie Direct 2:05¼ and Jennie Mac 2:09. Harold Dillon's full brother, Dillcara, is in the stud this year at Pleasanton, California.

Harness horsemen who belong to the Parkway Driving Club of Brooklyn, New York, where they race on a half mile track, concluded recently that they would like to be on the circuit of half mile tracks of which Goshen is the star member. So they went to work and subscribed $9000 as a guarantee for a meeting to be held July 17, 18 and 19, and will give a program of $1000 purses for each class. There will be three races each day and if there is not a cent of gate or grand stand receipts the $9000 will be on hand to pay the purses. But the club is not afraid of a poor attendance. The members expect to get the $9000 back and a few thousand profit.

✤ ✤ ✤

Mr. M. L. Woy of Fresno has sent his mare Loma B. (dam of Lulu B. 2:11¼, winner of last year's Pacific Breeders' Futurity and several other big three-year-old stakes) by Stam B. 2:11¼, to Sacramento to be bred to James Thompson's three-year-old colt Bon Watts, son of Gen. Watts 2:06¾. Loma B. is now in foal to Peter McKlyo 2:06. Mr. Woy has sent his mare Strathalie (dam of Miss Macklie 2:09¼, Panavana 2:10¼ and Strathboul 2:13¼) by Strathway out of Athalie, dam of 6 in the list, to be bred to Peter McKlyo 2:06. Strathalie is expected to foal soon to Stanford McKinney. Florence B. by Bon Voyage out of Loma B. is about due to foal to Stanford McKinney.

✤ ✤ ✤

The leading living broodmare sires for 1916, that is those stallions whose daughters led in the number of new performers during that year, are Axworthy, whose daughters were the dams of 19 new performers, Moko, whose daughters produced 18, Arion, with 15 new ones to the credit of his daughters, McKinney with 8, Peter the Great with 8, Sidney Dillon with 8, John R. Gentry 6, Walnut Hall 6, The Bondsman 5 and Tregantle 5. In the total number of standard performers produced by daughters these stallions stand in the following order: Moko 98, Arion 90, Axworthy 68, McKinney 59, Peter the Great 29, John R. Gentry 20, The Bondsman 20, Sidney Dillon 18, Walnut Hall 16, Tregantle 15.

✤ ✤ ✤

Every horseman in California will wish Hiram Hogoboom good luck with his two-year-old filly Beautiful Baby that is engaged in a number of stakes to be trotted this year and next. Beautiful Morn 2:25, the dam of this filly, is by Iran Alto 2:12¼ out of Beautiful Bird by Nutwood Wilkes 2:16½, second dam the great brood mare Expressive 2:12½ by Electioneer. Beautiful Baby is by Palo King, a son of Marengo King, he by McKinney out of the great mare By By by Nutwood. We doubt if there is a two-year-old in California at the present time whose tabulated pedigree will show more producing sires and dams within five generations, than Beautiful Baby.

✤ ✤ ✤

Will DeRyder's bay filly Kilo Watts by Gen. Watts 2:06¾, dam Miss Douglas by Cochato 2:11½, is one of the best looking of the two-year-olds that have been kept eligible to the Pacific Breeders' Futurity, and is a rare bred one to be entered in a California stake. Her dam is only nine years old, having been foaled in 1908, but has already produced Daisy Todd 2:09½ and Guy Douglas 2:16½. She is out of Clycezone, dam of Bob Douglas 2:04½ and Poindexter 2:09, by Cyclone 1956, next dam Bettie P. by Col. Hambrick 5806, an old-time stallion that was by Dictator and whose dam had that old fashioned Snowstorm and Copperbottom blood in her veins. If Kilo Watts is as good as she looks she should make a fast trotter when matured.

✤ ✤ ✤

Dan Hoffman, the well known liveryman of San Francisco, will race the fast trotter Pavana 2:10¼ by Stanford McKinney on the California circuit this year. Mr. M. L. Woy, owner of Pavana, was in San Francisco this week and made arrangements with Hoffman to take the horse. Hoffman has had him shipped to Millard Sanders at Pleasanton who will get him ready for the races. Pavana took his record of 2:10¼ at Pleasanton in 1914, winning two races during that meeting, trotting his winning heats in 2:10½ and 2:13½ in the first race and in 2:10¼, 2:10¼ in the second race. As Mr. Hoffman is an enthusiastic amateur driver and enjoys the sport of racing, it is probable that he will drive Pavana himself in some of his races. Pavana is now eligible to the 2:13 class trotting events.

✤ ✤ ✤

If you have a preference for either a pacing sire or a trotting sire with a fast record, you can find either in charge of Geo. Ryan at the Pleasanton Driving Park. The Anvil 2:02¾, the fastest trotting stallion ever offered for service on this coast, is there and his fee is $50. He is a young horse and has very few foals old enough to wear harness, but his son Anvilite (2) 2:22½, with a two-year-old trial of 2:12, is good enough proof that he can sire speed. The Anvil is a great race horse himself, was sired by a great race horse and his dam is the triple producer Grace Lee 2:29¼ by Electioneer. If you want to breed to a pacer there is Vernon McKinney 2:01½, the fastest record horse in California, and while young in the stud is the sire of the stake winner Verna McKinney, two-year-old record 2:13 and three-year-old record 2:09¼, his first foal to race. Vernon McKinney's fee is also $50. Mares sent to these stallions will be given the best of care. Write Geo. Ryan at Pleasanton for any information or particulars not stated in the advertisement on another page.

ROD, GUN AND KENNEL

CONDUCTED BY FISHER HUNT

Record of Large Tuna.—Careful records of large tuna caught with rod and line annually off the California coast have been kept by the Tuna Club of Catalina Island since 1898.

The largest leaping tuna over 100 pounds were taken as follows (where a year is not entered no fish over 100 pounds was taken):

Angler.	Season.	Wt.
Dr. C. F. Holder, Pasadena, Cal.....	1898	183
Col. C. P. Morehouse, Pasadena, Cal.	1899	251
Gen. A. W. Barrett, Los Angeles, Cal	1900	164
Mrs. E. N. Dickerson, New York....	1901	216
Ernest E. Ford, Alhambra, Cal.....	1902	174
John E. Stearns, Los Angeles, Cal...	1902	197
Gen. A. W. Barrett, Los Angeles, Cal.	1904	131
Phil. S. O'Mara, Salt Lake City....	1909	153
L. G. Murphy, Converse, Ind.....	1910	175¼
C. B. Stockton, Los Angeles, Cal.....	1911	170
Dr. B. F. Alden, San Francisco, Cal..	1914	151
W. C. Boschen, New York City.....	1915	138
A. W. Hooper, Boston, Mass.	1916	100

These fish were taken with the following tackle: Rod to be of wood, consisting of a butt and tip, and to be not shorter than six feet nine inches over all. Tip not less than five feet and to weigh not more than sixteen ounces. Line not to exceed standard twenty-four thread.

On light tackle the record follows (where a year is not entered no fish over fifty pounds was caught):

Angler.	Season.	Wt.
Arthur J. Eddy, Chicago.....	1906	60
E. J. Polginhorn, Pasadena, Cal.....	1907	50½
F. T. Newport, Arcadia, Cal.....	1911	54
R. Rochester, Jr., Los Angeles.....	1913	77¾
A. W. Hooper, Boston	1914	60
Ben Williams, Los Angeles.....	1916	55½

Light tackle is epecified as follows: Rod to be of wood, consisting of a butt and tip, and to be not shorter than six feet over all. Butt to be not over fourteen inches in length. Tip not less than five feet in length, and to weigh not more than six ounces. Line not to exceed standard nine thread.

Dog Retrieves Fish.—Francis Gilpin, sportsman, policeman and pioneer of the Pike's Peak region, is the owner of a dog whose greatest joy is to go fishing. Mr. Gilpin believes that his animal is the only dog in the world that will retrieve fish. At least he has never heard of another.

When on his trout fishing trips, Mr. Gilpin never carries a net with which to land his catches. As soon as he has made a strike, his dog runs into the water until it is within distance to pounce upon the fish, which is then brought ashore and laid beside the master. No blemish is found on the fish as a result of the dog's teeth.

"Mack" is the name of the dog and it is a liver-and-white Norfolk spaniel weighing about 70 pounds. "Mack" is a product of George Gould's kennels in the East.

"In speaking of "Mack" Mr. Gilpin said: "The first time my dog retrieved a fish I was quite astonished and not a little annoyed at the action, but after the trick had been repeated several times it occurred to me as not only being unique, but a great aid to me in landing my catches. Many a fine fish is lost just before the net is put under it but I do not remember that 'Mack' ever lost a fish once it was hooped; and he has brought hundreds ashore.

"Once the fish is on the shore Mack will not go near it. Apparently he dislikes the smell when they are out of the water. Frequently he will steal away all by himself and go on private fishing trips. I have found him several times standing in the water alertly watching for the opportunity to land a passing trout."

Bird Lovers to Meet.—Leaders in the movement to advance the science of game breeding and preserving will gather in New York Tuesday and Wednesday, March 13 and 14, when the Third National Conference on Game Breeding and Preserving will be held at the Waldorf-Astoria Hotel. At last year's conference the attendance was nearly double that of the preceding year. It is hoped and believed that a similar ratio of increase will take place this year. Ever ysportsman and every lover of wild life is invited to the dinner, on the evening of March 14, and all sessions of the conference, regardless of membership in this association and without further invitation than is given here.

These gatherings are held under the auspices of the Department of Game Breeding and Preserving of the association. They were started three years ago in recognition of the fact that this country faces the beginning of what promises to be constantly increasing activity along these lines for many years to come. It was felt that great benefit would accrue by the exchange of views and experiences afforded by the conference. Another reason lay in the belief that proper direction and safeguarding of the movement fro mexploitation would result from an annual getting together of those genuinely interested in its success.

Practically every game breeding section of the country has been represented at the previous gatherings, and last year delegates were present from the Pacific Coast, and such comparatively distant States as Iowa, Minnesota, West Virginia, and others.

GAME IN CALIFORNIA.

[By F. M. Newbert, President California Fish and Game Commission.]

It is the writer's opinion that California not only has a greater variety of birds and mammals, but that we have more of them than any other State.

Best of all, our wild life is constantly increasing in numbers. Several herds of elk, antelope and mountain sheep are rapidly multiplying each year. Deer and quail are plentiful, while dove, grouse, mountain quail and sage hen are steadily increasing in numbers. This State has always been famous for its flight of wild geese and ducks, but not for many years past have we had so many ducks as the present season.

Our streams and lakes are alive with food and game fishes—trout, bass (calico, black and striped), crappie, blue gill, perch, catfish, etc., while the seasonal runs of salmon and shad can only be appreciated by one who knows their value.

Prominent among the recent accomplishment of the Fish and Game Commission can be mentioned: The establishment of a world's record in the propagation and liberation to the waters of this state of over fifty-two and one-half million trout and salmon in one season; the stocking of barren waters with bass, crappie, blue gills, etc.; the installation of eighty-six adequate fishways or ladders to permit fish to ascend obstructed streams; three hundred and seventy-seven screens placed in ditches and canals; the removal of obstructions that have opened up hundreds of miles of fine fishing streams; from October, 1907, to June, 1916, a bounty of twenty dollars each has been paid on two thousand four hundred and fifty-eight mountain lions, and the erection at a cost of of sixty thousand dollars of a fish hatchery which, when completed, will be the most up-to-date plant of its kind in the world.

This work has not cost the taxpayer a single penny. The Fish and Game Commission of California is entirely self-supporting.

Spearing of Steelhead.—The most fundamental law of fish and game conservation is the one which provides that fish and game shall be allowed to breed undisturbed. We demand that all of our best game birds and animals be given the best of protection during the breeding season and the closed season is always made to conform to the breeding season. In spite of this situation there are a number of people in the north coast counties who are demanding the right to spear steelhead trout while they are on the spawning grounds. Furthermore, they are demanding the right to fish with a gaff hook, thus increasing many times the destructive forces already at work.

Just as people are seeking a better grade of sportsmanship by advocating the use of a fly rather than bait in capturing fish, just so the tendency should be towards the elimination of such a destructive instrument as a gaff hook. This instrument can be carried to a pool where large spawning fish are abundant and by feeling around with the end of the hook the whole pool can be stripped of its fish. This is seldom possible when a spear is used. The law as it now stands provides that the people of the counties mentioned can capture two fish a day between December 15 and February 15, a sufficient number for use as food. The demand for a more liberal law, as regards the method of capture, is in reality a demand for a larger catch at the time of year when fish should have total protection. Every spawning fish killed means a direct loss of thousands of young fish. Furthermore, it is always the largest and therefore the heaviest spawners that are taken by means of a spear or gaff.

As far as possible each section of the country should be allowed to utilize its wild life resources, but that they be allowed to make use of them to their awn advantage and to the detriment of surrounding districts should not be permitted.

It will be necessary, ultimately, to prohibit the destruction of fish during the spawning season. The move to take a larger toll of the spawning steelhead in District Two is therefore directly contrary to natural law and a depletion of the streams is sure to follow.

✤ ✤ ✤

State associations have done a wonderful lot of good for shooting—at the traps and in the field—during the past two years. The State associations have made themselves felt in the passing of common sense game laws and ridding the books of laws that were useless.

RESTRICTING DOGS IN ENGLAND.

Number Will Be Reduced, But Fanciers Will Not Lose Pets.

The suggested restriction in the number of dogs in the United Kingdom foreshadowed by Mr. Pretyman in the House of Commons has created something of a ferment in the kennel societies and correspondingly delighted those who assert that pet dogs are a luxury—says an English writer—especially in war time.

But owners of pet dogs—and all, in fact, who keep dogs properly—need have no fear of being deprived of their pets, if, indeed, Mr. Pretyman's proposal ever does come into effect. This is not the object of the proposal at all.

"It is certainly desirable," said Mr. Pretyman, "to reduce the number of dogs in urban districts, where many of them serve no useful purpose."

No one denies that this is so. There are thousands of stray dogs and dogs improperly cared for in London. There are far too many poor who cannot afford to keep dogs and who, when puppies have reached the age of six months, when they become liable to taxation, turn them adrift to live as best they can or die.

Mr. Charles R. Johns, secretary of the National Canine Defense Association, asked his views on the matter, said:

"Undoubtedly there are too many dogs. But I think I could show that much of the public prejudice rests on flimsy grounds. The present agitation has been fomented partly by the dog-hater and partly by those who see women going about with fancy dogs, and have heard stories of these animals being fed on mutton chops. I hold no brief for those who pamper dogs, but many of the stories you hear are grossly exaggerated by those who object to dogs.

"For instance, I have seen it stated that there are 2,000,000 in London alone, but, as a matter of fact, the total of dogs in England, Wales and Scotland in 1914 was only 1,970,000, exclusive of about 200,000 kept by farmers and not licensed.

"The London County Council last year licensed only 100,000 dogs, and the greater number of these were of the terrier class, kept on bones and scraps, and not costing their owners more than a shilling a week each.

"If any new regulations come into force, it will be to free London, and its suburbs in particular, of all stray dogs and of dogs improperly kept. Holders of dog licenses will not be refused renewals for dogs that are well cared for and kept under proper control. It may happen that private owners, other than dealers, who keep a number of dogs, may have to show cause for any additions to their kennels that they may desire.

"The taxes may be increased. That has been expected. But few, except the very poor, will object to that.

"The breeder and well-to-do owner," said Mr. Johns, "will not be deterred by an increased tax, but the suburban people who take dogs as companions will certainly be hit. The very poor who keep dogs in the puppy stage and then turn them out when the tax can be escaped no longer will not be affected, for they don't pay now.

"The compulsory destruction of puppies by people who cannot afford to keep a number of dogs," said Mr. Johns, "is the only feasible way of dealing with the evil of superfluous dogs."

Meanwhile the Pet Dog Show had a satisfactory list of from nine hundred to a thousand entries. "Why," said Miss L. Jackson, who organized the show, "should pet dogs be extravagant luxuries in war time? If people can afford to keep dogs, why shouldn't they? If the government wants heavier taxes—Mr. Pretyman says 'the question can be considered before the new licenses are issued'—well, let them. But why can't they tax bicycles—or cats?"

And that is one of the popular comments on the whose question. Why not cats? When the debate on the extra tax on dogs comes before the House there is going to be some arguments on cats.

Against Pump Guns—Bills and more bills. There seems to be no end to the fish and game bills which State legislators have introduced. One hundred and six Assembly measures and sixty in the Senate—that's enough to settle everything but the size of that trout you failed to land last season.

Assemblyman Phillips of Los Angeles has a bill which will forbid the use of pump and automatic guns unless they be so regulated as to shoot but two shells at one loading. New York has such a law in force, won after a bitter fight with ammunition men.

Phillips has his name on several other game bills. He would make on buck a year the limit; prevent the use of blinds where they are situated away from the natural cover. This would stop the use of blinds and boats in the bay.

Much attention has been paid to the mountain lion. Several bills, including one by Byrne, in the Assembly, have asked for bounties on the beasts. The price for scalps ranges from $30 to $50. Lion hunters say that they cannot make money unless they secure at least $30 per scalp.

✤ ✤ ✤

One hundred and nineteen golf and country clubs in the United States and Canada have installed trapshooting equipment.

STATISTICS SHOW TRAP GROWTH.

Interesting Data in Report of Secretary Shaner of Interstate Association.

The remarkable growth of trapshooting as a sport is conclusively shown in the annual report of Reed Shaner, secretary of the Interstate Association for the Encouragement of Trapshooting. Naturally every one interested in sport is interested in the statistics of all its branches and the figures that Shaner sets forth in his report are worth knowing.

These statistics show that in 1908 the average attendance at the trapshooting tournaments was 27 amateurs and four professionals. In 1916 the attendance averaged 44 amateurs and five professionals, and there were hundreds more trapshooting events than in 1908.

A comparison of figures of the past four years show just how trapshooting has come along—and the reason why it is known as the King of Sports. In 1913 the number of shooters who participated in the registered tournaments of the Interstate Association were 7014. One year later the number amounted to 7849. In 1915 the figures were 8140 and in 1916 the individual shooters numbered 10,528.

With the steady increase in trapshooters there has been a steady increase in registered tournaments. There were 286 in 1913; 314 in 1914; 333 in 1915 and 546 in 1916. There were 38 State championship tournaments in 1913; 39 in 1914; 42 in 1915 and 46 in 1916. In the number of targets trapped one notes the real increase in the sport. In 1913, 4,526,570 targets were thrown in the registered shoots. In 1914 the number was 4,780,690. In 1915 the number had reached 4,814,260 and in 1916 the high-water mark of 6,366,100 was reached. The average number of targets thrown in the tournaments in 1913 were 16,051; in 1914, 15,273; in 1915, 14,500, and in 1916 12,700.

The Interstate Association appropriates about $25,000 each year to promote trapshooting, at least one-half of the money being spent for trophies. The report shows that 1023 trophies were awarded. Six hundred and sixty-one shooters received one trophy each; 102 shooters received two trophies each; 30 shooters received three trophies; 11 received four trophies; two won five trophies; one shooter won six trophies and one other won eight. In no competition is a trapshot allowed to win more than one trophy.

More money was given for trapshooting in Missouri than in any other state—quite naturally, because the Grand American Handicap was held there. The sum of $4525 was given to the Missouri organization. More targets were trapped in Pennsylvania than in any other state, 633,575. New Jersey had the greatest average to its shoots—96 amateurs and 11 professionals—by reason of the Westy Hogans event being held in that State. Iowa led in the number of registered tournaments with 56.

These figures, with the knowledge that 737 new gun clubs were formed in 1916; that there are now more than 4500 gun clubs in the United States and Canada; that $40,000,000 is invested in the sport; that the trapshooters annually spend $4,000,000 for targets and another $2,000,000 for traveling expenses, are the reasons why the sport is being given such serious consideration. It must be after one goes carefully over the facts.—Peter P. Carney (Phil., Pa.)

Golden Gate Club.—Trapshooters have officially opened the season about the bay. Last Saturday over thirty gunners turned out on the Alameda grounds and took a fling at the flying bluerocks. Considering that most of the boys have been in the field for months after live game, the scores set in the practice events were very creditable.

Len Hawxhurst, the local professional, showed that he is in good form by going 63 straight. W. J. Terry, Toney Prior and Henry Stelling also knocked out straight runs of 25. W. A. Joslyn, the new professional from the East, showed that he can handle a gun by busting 91 out of a 100. The first regularly scheduled event will be the Golden Gate Club's merchandise shoot on Washington's birthday. The scores set were as follows:

At 50 targets—E. Garratt 47, Mr. Linderman 39, T. Prior 49, M. Garratt 25, Dr. Fuller 34, Mr. Wood 42, Mr. Crusoe 41, Bray Thorning 38, W. J. Terry 48, F. W. Blum 39. At 75 targets—Mr. Jennings 75, Mr. Truscott* 63, Mr. Merrill 59, S. Morrison 52. At 100 targets—Mr. Ross 94, Mr. Handman 88, B. Worthen 88, H. C. Peet 85, Mr. Vallejo 83, J. S. French 76, F. Webster 83, D. Best 76, W. A. Joslyn 91. J. Nelson 1:09x125, J. Nelson 127x150, L. S. Hawxhurst 189x200.

Green Lake Club.—Fourteen members of the Green Lake Gun Club of Seattle could not wait for the regular opening of the club and just had to go out on February 4th and see if their eyes were still in trim.

Never in the history of the club has the percentage of good scores been so great. Scores of forty-nine out of fifty were nothing. D. R. Baker, E. K. Van Vleck and George Scripture all tied for first honors, with forty-nine "dead" ones to their credit. Of the fourteen shooters, nine broke 90 per cent or better.

After the regular program had been finished, I. M. Fisher produced a 20-gauge gun and some ammunition. Several of the members tried their skill at targets thrown crosswise from a hand trap, several breaking four out of five, but none going straight. The scores follow:

At 50 targets—D. R. Baker 49, E. K. Van Vleck 49, George Scripture 49, L. S. Barnes 48, Hi Follrich 47, Dr. King 47, G. A. Conklin 47, I. M. Fisher* 46, S. A. Martin 45, H. E. Gleason 42, George B. Baker 42, M. A. Rosenfield 41, Dr. A. B. Kidd 39, George O. Colwell 36.

TRAPSHOOTING CAREERS.

George W. Maxwell.

George W. Maxwell, of Hastings, Neb., is famous in the trap shooting world as one of the leading experts. Some years ago he lost his left arm in a gun accident, and this makes his work the more phenomenal. His first shooting at the traps was in 1903, and he won the Denver Post trophy, emblematic of the championship of the middle west, early in his career, and followed this up with winning the championship of Nebraska, Iowa, Kansas and Missouri. In 1905 he won the Western Handicap with a score of 98 out of 100 targets from the 18 yard mark, and tied for this event in 1904. At the Grand American Handicap in 1908, he won high average on all targets, and repeated in the same event in 1911. He also won high professional honors at the Southern Handicap, and high average on singles at the Eastern Handicap. He has a long run of 268 straight to his credit. In 1905, as an amateur, he broke 4,171 out of 4,590 targets, an average of 90.8 per cent; in 1906 he increased his average to 91.7 per cent, breaking 8,205 out of 8,495 targets; in 1907 he shot as a professional, making an average for the year of 93.3 per cent, breaking 12,311 out of 13,186 targets. Since then he has been shooting steadily and has maintained his position with the leaders, finishing the year 1915 with an average of 94.73 per cent on 5,240 targets. In 1911 he finished in a tie for third place in the National Professional Championship event at 20 0targets, 18 yards rise, with 195.

Vernon Club.—D. Holohan came into prominence as a Southern California trapshooter on Sunday by smashing 59x60 targets at the Vernon Gun Club and in doing so was high man on the trophies. C. W. Fish was a very close second, with 58x60 breaks. Bob Bole was a good third with a mark of 57x60 breaks.

Good marks featured the shoot. Hugh E. Poston, although he is a professional, broke 99x100 targets, while many other very sensational marks were also recorded. Poston was high professional in the trophy event with 60x60 breaks, and Guy Holohan was second with 57x60. Bob Bole did well in the practice by breaking 97x100 targets. Following are the scores:

	Hdcp.	Trophy	Prac.
L. C. Forrest	18	53	38
H. E. Poston	20	60	39
Guy Holohan	20	57	36
C. W. Fish	20	58	17
A. W. Bruner	18	55	38
Wm. Pugh	19	56	37
O. Evans	18	40	18
J. C. Fameshon	19	56	35
Wm. Hilles	20	57	..
Geo. Keeney	16	40	14
Wm. Dougherty	18	48	33
S. A. Bruner	18	56	37
A. N. Van Nest	16	43	29
C. E. Groat	18	50	17
Mrs. Groat	19	51	19
Bob Bole	19	57	40
J. D. Dierdoff	18	52	..
J. E. Reid	18	49	13
C. T. Smith	16	51	10

Trapshooting—What It is?—In response to a request for a concise description of "clay bird" shooting, a local sportsman writes:

"In general, trapshooting consists of shooting with a shotgun at targets thrown from traps. The targets, or pigeons, are composed of river silt and tar-molded into a shape similar to that of a saucer. These are impelled by the releasing of a strong spring when the word 'pull' is called to the trap boy.

"The shooters, in squads, usually of five, take their places sixteen or more yards in the rear of the traps and shoot in rotation.

"Your skilled trapshooter is a fellow with steel nerves, quick and unerring judgment, and unfaltering action. In the majority of cases these positive, manly qualities were as latent in the trapshooters as they are in the average man, until the devotee of the trap and gun took up this most fascinating of recreations.

"Few sports are as scientific as trapshooting. The rapid calculation of lead, elevation, angle, etc., the nice decision and instant action, quicken the eye and hand, and develop qualities which make for success in the affairs of life. Work at the traps drives away brain fag, for the reason that it requires intense concentration on a pleasurable pursuit. Thus, the brain worker finds real relaxation in trapshooting, without the physical exhaustion which in many games more than offsets the good effects of the mental diversion."

One hundred and ten employees of the Pennsylvania Railroad Company recently met at the traps to decide the individual championship. W. W. Williams, of Philadelphia, won the title. The Pitcairn (Pa.) team took the team honors.

TRAPSHOOTING FIXTURES.

August 20, 21, 22, 23, 24, 1917—Chicago, Ill.—The Interstate Association's Eighteenth Grand American Trapshooting Tournament, under the auspices of the South Share Country Club Gun Club; $4,000 added money. Winner of first place in the Grand American Handicap guaranteed $500 and a trophy; winner of second place guaranteed $400 nd a trophy; winner of third place guaranteed $300 and a trophy; winner of fourth place guaranteed $200 and a trophy, and the winner of fifth place guaranteed $100 and a trophy. Numerous other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

May 28, 29, 30, 1917—San Jose, Cal—The Interstate Association's Twelfth Pacific Coast Trapshooting Tournament, under the auspices of the San Jose Gun Club; $1300 added money. Winner of first place in the Pacific Coast Handicap guaranteed $100 and a trophy; winner of second place guaranteed $75 and a trophy, and the winner of third place guaranteed $50 and a trophy. Several other trophies will also be awarded. Elmer E. Shaner, Manager, Pittsburgh, Pennsylvania.

Los Angeles Club.—Harry Cline would like very much to capture the diamond watch charm put up by his father at the Los Angeles Gun Club. At least Harry was high man on the first leg of the shoot for the trophy Sunday when he smashed 97x100 targets from the 19-yard mark. Unless he wished to win the handsome prize he certainly would not have shot like he did.

It was the first 100 target shoot for the prize. The trophy will be awarded on points. Harry Cline now has 5 points, F. H. Mellon 4, F. H. Mellus 4, L. M. Packard 3 and P. C. Carter 2. Cline, Pfirrmann, Pachmayr and Packard each won a solid gold take-home trophy, while R. O. Pool, Mellon, Mellus and Morse captured the silver take-home cups. In the practice shooting Frank Mellus smashed 99x100 targets, while Heinie Pfirrmann broke 98x100 and Hugh Poston broke 50 straight.

Shooting has been going on at its usual steady gait at the Los Angeles Gun Club during the past week. During the last ten days 17,565 targets have been thrown and 125 shooters have fired from the traps in that time. Since April 1 there have been 245,585 targets thrown at the popular club.

Following are the scores of the shoot:

H. Cline 97, F. H. Mellon 94, F. H. Mellus 94, L. M. Packard 94, R. O. Morse 93, Lee Garnsey 93, P. C. Carter 90, Fred Grewell 90, F. Gibson 90, E. L. Rogers 90, Geo. Oliver 90, L. J. Petit 89, O. Council 89, H. Pfirrmann 89, E. K. Mohler 89, L. R. Mellus 89, W. A. Cornelius 89, C. S. White 89, A. Pachmayr 88, Seth Hart 88, V. A. Rossbach 87, H. E. Sargent 86, J. L. Martin 86, S. H. Hall 86, L. R. Breer 86, R. O. Pool 85, L. J. Micka 85, J. H. Bishop Jr. 84, B. H. Carnahan 82, R. Thornby 82, H. Prrmann 81, Wm. Kennedy 77, J. Marin 73, Mrs. F. Mellon 69, S. C. Miller 67, Guy Holohan 72x75, J. R. Pitcher 51x75, N. Bill 44x75, H. E. Poston 48x50 F. H. Teeple 48x50, D. Holohan 47x50, C. W. Fish 47x50, W. S. Oliver 46x50, Guy Pulley 46x50, Fred Thatcher 38x50, M. D. Towne 31x50, O. A. Evans 26x50, R. Adcock 20x25, F. M. Karacoft 20x25, Earl Mueller 20x25, C. R. Banks H. R. Haskin 16x25, E. B. Toppin 15x25, H. S. Nilsen 15x25, G. H. Stewart 15x25, Clement Bouniqu 14x25, J. H. Majo 12x25, J. De Bruyn 8x25.

Team Shooting—H. Pfirrmann (C) 45, H. E. Poston 50, C. W. Fish 45, E. K. Mohler 47, D. Holohan 47—Total, 234x250. F. H. Mellus (C) 48, H. Cline 47, G. Holohan 49, O. A. Evans 38, W. A. Cornelius 47—total, 229x250.

Point winners on the John C. Cline specially designed diamond watch charm: Harry C. Cline 5, F. H. Mellon 4, Mellus 4, Packard 4, Morse 3, Carter 2, Grewell 2, Gibson 2, Petit 1, Council 1, Pfirrmann 1, Mohler 1, L. R. Mellus 1, Cornelius 1, White 1.

Seattle Association.—Good scores were the order of the day, the weather conditions helping the shooters to a certain extent, on February 3d.

L. H. Reid shot the high score throughout the program, totaling a straight fifty in the events calling for that amount, and ninety-eight out of the hundred.

C. E. McKelvey held the high amateur honors in both programs, shooting forty-nine out of the fifty and ninety-seven out of the hundred. Deskin Reid furnished the second high amateur scores by his forty-seven and ninety-six. C. H. Knight, professional, was a visiting shooter from San Francisco.

Interest in the newly formed Northwestern Washington Trapshooters' League is on the increase and it is very certain that when the schedule opens next month a record attendance will have their scores registered. The Seattle Trapshooters' Association has been given the opening date, followed in turn by the various clubs that comprise the league, each club holding one shoot during the season. The scores:

At 5 0targets—L. H. Reid* 50, C. E. McKelvey 49, Deskin Reid 47, J. H. Hopkins 46, C. H. Knight* 45, C. W. Bandy 45, R. S. Searle 45, Matt Grossman 44, A. J. Gerrard 41, Ralph Kinzer 40, Jack Lewis 38, Geo. Hambright* 35, C. F. Reinhard 34, J. H. Davis 27.

At 100 targets—L. H. Reid* 98, C. E. McKelvey 97, Deskin Reid 96, J. H. Hopkins 92, Matt Grossman 90, Ralph Kinzer 83, A. J. Gerrard 82, C. F. Reinhard 68, J. H. Davis 51, P. Schwager 48, Alvin Schwager 32.

Yours, E. A. FRY.

Sportsmen's Row

Robert H. Parker and Beverly H. Coil of Woodland have started a movement for stocking Willow slough and Cache creek with black bass, crappie and Sacramento perch. The present bass supply in Yolo county is due to the foresight of J. A. Murray and Ernest Norton, who planted two cans of bass in Willow slough ten years ago. That the new plan meets with the approval of the State Fish and Game Commission is indicated by a communication which has just reached Woodland fishing enthusiasts.

✤ ✤ ✤

The Spokane Gun Club is priming for the 1917 Inland Empire Shoot on broader lines than heretofore. This event is now regarded as one of the big Western classics. This year it may be shot at the Stadium, in the heart of the city, where conditions are ideal. Spokane was figuring on getting the Pacific Coast Handicap in May, but as San Jose drew the plum, the Inland Empire marksmen have turned their attention toward making the Inland Empire a worthy rival to the big handicap, and they have the enviable record of never having scored a failure.

✤ ✤ ✤

Owen N. Jones, of the Du Pont Company, San Francisco, was married in San Diego on January 2 to Miss Hazel Schlingman.

✤ ✤ ✤

While talking of trapshooting averages in 1916, it will be well to remember that George Maxwell, the one-armed professional of Nebraska, shot at 3,640 targets and broke 3,439, an average of 94.47 per cent; that O. N. Ford of San Jose, Cal., shot at 6,580 targets and averaged 94.31 per cent, while Frank Troeh led the amateur trapshooters at double targets with a percentage of 87.50, C. G. Spencer leading the professionals on doubles with a percentage of 90.

✤ ✤ ✤

Three caribou, a grizzly bear, two wild sheep and three goats constituted the game bag of Mrs. Russell Earl, a young Brooklyn bride on a honeymoon hunting expedition in British Columbia, according to word received from her by her friends. Before departing on this trip Mrs. Earl had never gred a gun. Now she has developed into a most successful and fearless hunter in a party of which she is the only woman.

✤ ✤ ✤

Vincent Oliver, the Philadelphia trapshot, is using the same gun that George Lyon did such creditable work with for many years.

✤ ✤ ✤

Hereafter the annual meeting of the Interstate Association for the Encouragement of Trapshooting will take place the first Thursday after the first Wednesday in November.

✤ ✤ ✤

Yale won the Intercollegiate trapshooting championship in 1916 for the fourteenth time. Princeton and Harvard each have won the championship six times.

✤ ✤ ✤

Sporting writers of Portland, Oregon, are strong for the "sport alluring." At all of the important events of the Portland Gun Club Messrs. Kennedy, Fawcett, Bertz, Goodwin and Cronin, representative Portland scribes, make up the sporting writers' squad.

✤ ✤ ✤

The Fish and Game Commission of Oregon, this year, asks for an appropriation of $89,600, most of the amount, except that needed to pay the salaries and expenses of the commission and deputy wardens, to be used for the improvement of fish hatcheries and fishing conditions. Two years ago the commission received $29,400 in actual appropriations. The same amount is asked this year for running expenses but $60,200 additional is asked for repairs and permanent improvements, on hatcheries and on the Oregon City fishway.

✤ ✤ ✤

According to the statement of Fred W. Thatcher, secretary of the Southern California Trout Association, the official count of licenses sold in Los Angeles and vicinity during the year 1916 shows that 25,000 fishermen took out licenses in that city and vicinity. Mr. Thatcher goes on to say that if each of this number had half a mile of stream in which to cast his fly, this "line of hope" would reach almost halfway round the earth.

✤ ✤ ✤

Despite the efforts that were made by farmers and the deputy game wardens of Utah to save the birds, it is thought that fully 50 per cent of the quail in that state before the recent snowstorm and severe cold weather have perished, and many mare, it is feared, will die before the weather moderates. Reports have been received from Boxelder, Weber, Davis and Salt Lake counties that a great many birds have perished for want of food and the proper shelter.

✤ ✤ ✤

This will be the fifth time that Chicago has staged the Grand American Handicap. The other years were 1907, 1909, 1910 and 1915. The entries were 495, 457, 383 and 881. No less than 1000 is the Chicago slogan this year.

Klamath Falls (Ore.).—Twenty elk calves to be placed by the state fish and game commission in the northern part of Klamath county, arrived in a special express car on the local passenger train last week. The animals were shipped by State Game Warden Shoemaker from Wallows county, Oregon. From Klamath Falls the elk were shipped by rail to Chiloquin and from there transported in sleds to the Sisemore ranch in the Wood river valley, where they will be fed in the corrals until the grass is long enough to assure their living in the spring.

✤ ✤ ✤

There are a lot of trapshooters who made excellent averages in club shoots who do not come up to the mark in registered tournaments. It is not difficult to fathom the reason for this. In many club shoots the targets are thrown 40 and 45 yards, while in the registered tournaments the targets are thrown 55 and 60 yards. It would pay all shooters to always fire at regulation targets. In making high scores on easy targets they deceive no one but themselves.

✤ ✤ ✤

The Denver Trap Club installed another trap at their Aurora grounds last week to take care of the increasing number of shooters. The new trap is of the latest automatic type and throws both double and single targets. It now will be possible to accommodate fifty shooters in two hours, eliminating the tiresome wait with which some have had to contend in the past, and it is expected that there will be enough target smashers to keep both traps going to the full capacity at every regular Sunday morning shoot.

✤ ✤ ✤

The Lakewood club announces that it will hold a registered shoot at its country club March 25 for merchandise and cash prizes. This, with the registered event of the Denver Trap club on May 6, will give Denver two registered shoots for the season of 1917, which is a new thing and puts Denver on the trapshooting map.

Fly-Casting in South.—Earl J. Kennedy, returning to the form in which he was in earlier in the season, captured five of the eight casting events of the Southern California Rod and Reel tournament held in Eastlake Park Sunday noon.

Shifting winds made it difficult for the fly and bait throwers to make high scores. The performance of Kennedy was particularly noteworthy by his making a clean sweep of the fly events. In the light tackle dry fly accuracy number he made nine straight casts with a perfect score, and out of his fifteen casts he missed the target only three times and none of his casts fell more than an inch or two away from the red dics.

A large crowd witnessed the events. Many members of the women's auxiliary were present and several of the feminine anglers gave an exhibition of their skill at bait casting. Summary:

Light tackle, dry fly, accuracy, 15 casts (per cent): E. J. Kennedy 99 12-15, C. Van Horn 99 6-15, J. J. Low 99 2-15, H. Richey 97 7-15.

Light tackle, fly accuracy, 15 casts: E. Kennedy 88 7-15, C. Van Horn 99, J. J. Low 98 11-15, H. Richey 96 8-15.

Roll fly distance, 10 minutes to each entrant (feet): E. J. Kennedy 75, C. Van Horn 60, J. J. Low 58, H. A. Richey 50.

Light tackle fly, distance, 10 minutes each—Kennedy 82.0, Low 72.6, Van Horn 72.

One-fourth ounce accuracy, target 60 to 80 feet—Oscar Lane 98 6-10, C. J. Lenarth 98 2-10, Sherman Baker 97 3-10, E. J. Kennedy 97 2-10, H. A. Richey 95 9-10, A. E. Perkins 93 4-10, Geo. Bongrebe 93 2-10.

One-fourth ounce distance, 5 casts each—Kennedy 138:6, Lane 125:3, Perkins 97:3, Lenarth 65:3, Baker 61:1, Kling 37:5, Bongrebe 93 2-10.

Longest single cast—162 feet 2 inches, by Oscar Lane.

Two and one-half ounce, distance, 5 casts—Perkins 238:9, Baker 227:11, Kennedy 144:1, Bongrebe 140:11, Lane 115:10, E. C. Hibbets 92:4, Kling 75:4.

Longest single cast—252 feet, by E. J. Kennedy.

Two and one-half ounce handicap, under surf conditions, 5 casts each—Bongrebe 176:5, Kling 173:10, Hibbets 156:8, Perkins 144:8, Baker 144:3, Lane 141:1, Kennedy 124:1, Lenarth 59. Longest single cast—254 feet 2 inches, by Geo. Bongrebe.

Cat-Fishing Club.—With a promised membership of at least 1000 ,the Cat Fishing Club of Utah was organized last week at Salt Lake. The officers and members are enthusiastic over the prospects that the legislature will cut out seining for catfish in Utah lake and the Jordan river. "If the legislature will only stop the seining for catfish for two years every man and boy in Salt Lake county who cannot afford to get away for a day will have a chance to get a mess of the best eating fish there is in the world," declared President C. C. Patten. "The Legislature is taking a step in the right direction when it proposes to stop the seining for catfish. Why should a lot of us Salt Lake men and boys, and there are more than ten thousand of us in Salt Lake county, be deprived of the chance to get a mess of fish because some seiners want to 'hog' it all?" said Vice-President L. L. Yarsen. With Patten as president, Yarsen as vice-president, O. C. Brown as secretary, A. S. Thomson as treasurer, Walter Jewks and J. C. Anderson as members of the board of directors, the Cat Fishing Club of Utah starts with a good deal of indications for growth.

REFUGES FOR WILD DUCKS.

Oregon Has Largest and Best Feeding Grounds in the United States.

The Biological Survey of Washington, D. C., was recently asked if it could give the number of acres of land, water and marsh now employed in this country as wild duck refuges, and the reply was as follows:

"There is no information available on any of these items, except for Louisiana, where there is a total of 234,300 acres in the neighborhood of Vermillion Bay, spoken of generally as the Ward-McIlhenny reservation, secured by the co-operation of Mrs. Russell Sage and the Rockefeller Foundation, divided as follows: Marsh Island, 79,300 acres; the Louisiana State Reservation, donated to the state by Messrs. McInhenny and Ward, 13,000 acres; the Ward-McIlhenny tract of 57,000 acres, and the Rockefeller Foundation wild life refuge, 85,000 acres. This is, so far as I know, the only large tract devoted exclusively to duck refuge. A large reservation in Minnesota, approximately 1,000,000 acres, serves to some extent as a breeding place for ducks; Crane Lake, in Illinois, is a prominent refuge, while the Big Lake Reservation in Arkansas is of great importance for ducks migrating on the Mississippi route.

Klamath Lake and Malheur Lake, inOregon , are the largest and best breeding grounds for ducks in the United States which today are given any degree of protection. Dungeness Spit, in the state of Washington; East Lake, in California; Salt River, in Arizona; Rio Grande and Carlsbad, in New Mexico, and the North Platte, in Nebraska; Belle Fourche, in South Dakota, and Minidoka, in Idaho, are the government reservations which are most used by wild ducks. It is exceedingly difficult to get actual information as to the number of acres in each state, for the reason that many of the state refuges are temporary in character, changing with the commissions, or by legislative action. Many of the most important ones are in private hands, and as such are more or less transitory in nature.

"What is needed now, chiefly, is additional breeding grounds and refuges along the paths of migration, so that the birds may be tempted to stop and thus increase the opportunities for shooting without, as the same time, subjecting the ducks to such dangerous hazards as well seriously reduce their numbers.

"E. W. NELSON,
"Chief, Biological Survey."

Elks Pest of Farmers.—Everrett, Wash.—This county has been for some time confronted with perhaps one of the most unique situations which has ever come before the sportsmen of this state.

In 1913 the county procured a carload of elk from the Yellowstone Park, which were liberated at Startup, near the Sultan Basin, thinking the elk would immediately go into the hills, where it was hoped they would thrive to the extent that when the season is opened in 1925 they would be sufficiently numerous to afford much sport for the big game hunters of this county. Instead, however, of taking to the hills, these elk seemed to prefer civilization and remained in the vicinity of Startup, doing considerable damage to crops, and especially to young orchards. In fact, one rancher who has a large pear orchard, representing an investment of over $50,000, has sustained damages of approximately $2,000 to his young trees and crops.

Wire fences will not keep the elk out, as they jump or ride down any wire fence we have been able to put up. We tried shooting them with birdshot, with the result that they stayed in the timber by day, but came back in the orchards at night.

The best results were obtained by running them with dogs, using hounds and Airedales, which drove them for a considerable distance into the hills, where they remained during the summer; but as soon as feed became scarce last fall they once more returned to the ranches and continued their depredations, and we are undecided what to try next. We want something that will put these elk back into the hills and make them "stay put."

If any reader of this article can offer any suggestions of value, they will be very thankfully received.

G. H. MILLER, Game Warden.

Change Lobster Law.—Good news for chorus girls, epicures and midnight cafe habitues comes from an investigation of Deputy Fish and Game Commissioner C. S. Bauder of the commercial fisheries research bureau, who finds that spiny lobsters of large size are plentiful in deep water offshore where commercials have been getting them freely in size just too large to market under the 13-½inch maximum size limit.

As this supply may prove so extensive as to have direct bearing upon the "H. C. of L." Bauder will recommend a change in the lobster law to permit these larger fish to be marketed up to 16½-inch length, so a greater supply may keep down the price to where the general public can taste this delicacy occasionally.

It is thought that the red water inshore may have driven the crawfish out into this depth, which is beyond what was always supposed to be their range.

Deputy Bauder has been detailed on work out of the Los Angeles office and is now compiling a census of the value of the fisheries of Southern California with the amount of investment therein.

SUBMARINES HIT BIG KENNEL SHOW.

English Judges May Not Be Able to Arrive For the Westminster Exhibition.

Officials of the Westminster Kennel Club are concerned over the latest developments in the U-boat situation. It is feared that some or all of the English judges scheduled to officiate at the show in Madison Square Garden February 20 to 23 may be prevented from crossing the ocean. It will, of course, be possible to fill the places of any one of these judges on this side of the water, but the fact that the club went so far afield for the officials is considered sufficient indication that it was good policy to engage them.

Some of the most important breeds are to be supervised by the foreign experts. A gratifying entry has been received for the English bulldog classes, which will be judged by Frank Walker, a London business man who had planned to take his vacation and come over for the New York show. Other important breeds will be intrusted to E. R. L. Hoskins, a fancier from Buckinghamshire. These are fox and Welsh terriers, the former especially being one of the big attractions of the show. The other English judge expected is Lady Savory of Stoke Pogis, Bucks, who is slated to adjudicate on Sealyhams, which are much better understood in England than in this country. The English judges had planned to stay at home until after the Cruft's Show at Islington, which will be held the first week in February, and in the ordinary course of events would be here in plenty of time for the exhibition in the Garden. Should the sailings of steamships be delayed, it is considered likely that the visitors, if they come at all, will not be here for the opening day.

Up at Vancouver, B. C., recently an ordinance was proposed to the effect that no person should keep a kennel within 500 feet of the house. Some of the aldermen moved that the by-law be laid on the table for three months; others said it should be kept there for three years or more.

✤ ✤ ✤

It is estimated that about twenty-five thousand dogs are turned adrift in London every year, and a great expense is caused to taxpayers for collecting and destroying them. Real dog lovers have been trying to educate the public who own dogs as to what it means in mental and physical suffering to an abandoned dog.

✤ ✤ ✤

Purchasing dogs by cable is nothing new. The moneyed persons around Manhattan and environs who are looking for winners do it regularly, but buying a dog by wireless is not so common a custom here. They do it between Alaska and points on the Pacific coast, however. Only the other day an order came for a collie from Hadley, Alaska, to Seattle for one from the Mouls Kennels.

✤ ✤ ✤

Sam Crabtree, who is well known over here, has been invited to judge in New Zealand, and is going to take the trip "down under." The show where he will officiate is to take place next July. This will give him an edge as a globe-trotting pudge on his confreres, Marples, Raper and Holgate, for none of them have yet officiated in the Antipodes, although they have visited every other country as judges at bench shows.

✤ ✤ ✤

Interstate Committees.—Guy V. Dering, of Columbus, Wis., former amateur doubles champion of the United States, has been named as the chairman of the committee that will allot the handicaps to the trapshooters in the Eighteenth Grand American Handicap, which will take place at the South Shore Country Club, Chicago, Ill., in August. The other members of the committee are George K. Mackie, of Lawrence, Kan.; Benjamin S. Donnelly, of Chicago, Ill.; William H. Cochrane, of Bristol, Tenn., and Fred Plum, of Atlantic City, N. J.
